land, and other kinds of support. On July 11th Lord Zouche received the following letter from the secretary of the company:—"My directors have now had an opportunity of giving careful consideration to the proposals made by the recent deputation on the subject of a railway between Pulborough and Steyning, and they have instructed me to write to you for the information of the members of the deputation to say that the necessity which rests on them of carrying out other schemes now on hand, or in contemplation, and a consequent commitment and heavy capital expenditure, precludes them from at present undertaking the construction of such a railway as was suggested by the deputation. My directors are very doubtful whether such a railway would be remunerative to the constructors, but they heartily sympathise with the landowners in the district in their desire to develop their estates. They are by no means sure that a light railway would not fulfil the objects in view, and it would of course be far less expensive than a heavy line. This, however, is a question for your deputation to decide; but my directors authorise me to say that should you decide to construct a railway in the district they are quite willing to again take the matter into consideration with a view of rendering you some assistance I shall be obliged by your making this decision known to the members of the deputation and other gentlemen interested." To this Lord Zouche replied on July 14th:—"The committee appointed at the Pulborough meeting to receive the answer from the London Brighton and South Coast directors regret that therein the latter state that they are unable at present to comply with the desire of the inhabitants and owners of land on the line, and of the Brighton Corporation, that your company should construct this short junction line. The committee, after mature deliberation, are of opinion that the project should not be dropped, and they desire to know in the event of their being able in any other way to put it forward, exactly how they are to understand your offer of rendering assistance in regard to the points of construction, working, and capital." The railway company again wrote to Lord Zouche on July 20th:—"I am now instructed to reply to your lordship's letter of the 14th inst. with regard to the construction of a railway between Pulborough and Steyning. My directors desire me to say that if the parties interested in the district to be served are willing to undertake the construction of the railway in question at their own cost the directors will be prepared to assist by allowing the company's engineer to act as consulting engineer, and by working the railway when made upon terms to be agreed upon. They have but little hope that the line will be remunerative, at all events for many years to come; but they are not indifferent to the interests of the district, which were fully represented by the influential deputation which conferred recently with the board."

### EAST FIFE CENTRAL RAILWAY.

Last week some more extension in the railway system in the county of Fife was opened up for traffic. Some few years ago a commencement was made with what is known as the East Fife Central Railway, and so successfully has the work been carried on that the line, which extends to 14½ miles in length, has now been completed. It branches off from the Leven and East of Fife section at a point between Cameron-bridge and Leven, and passes through a most picturesque piece of country running past the village of Kennoway, and through the estates of Mr. Christie of Durie and Sir John Gilmonr, Bart., of Lundie and Montrave; on by the village of Largoward to Lochty Farm, being only about 3½ miles from Stravithie and south of St. Andrews, where meantime the terminus is. Should this line, which is now the property of the North British Railway Company, prove a paying concern, then it may be extended to Stravithie, and a branch may also be run out to Dairsie, which district so much abounds in rich minerals, more especially its rare white free sandstone. The line meantime is for goods and mineral, but may yet develop into a passenger line also. At its starting-point it is some 65ft. above sea level, and where it terminates it is 545ft., which is a pretty steep gradient. The work has been completed to the satisfaction of a number of the engineers of the North British Railway, who were present at the opening ceremony.

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months .....	£0 7 0
Six Months .....	0 13 0
Twelve Months .....	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

- Aug. 13—Great Southern and Western Railway (Half-yearly and Special), Dublin, at 12.
- Aug. 13—Rhondda and Swansea Bay Railway (Half-yearly), Swansea, at 12.
- Aug. 16—Taff Vale Railway (Half-yearly), Bristol, at 2.
- Aug. 17—Grand Canal (Half-yearly), Dublin, at 2.
- Aug. 17—Great Northern Railway of Ireland (Half-yearly), Belfast, at 1.
- Aug. 17—Port Talbot Railway and Docks (Half-yearly), Port Talbot, at 12.
- Aug. 18—London General Omnibus Company (Half-yearly), 6, Finsbury-square, E.C., at 2.30.
- Aug. 19—Brecon and Merthyr Railway (Half-yearly), 134, Palmerston-buildings, E.C., at 1.
- Aug. 19—Millwall Dock (Half-yearly), City Terminus Hotel, at 1.
- Aug. 22—Dublin Wicklow and Wexford Railway (Half-yearly), Dublin, at 2.
- Aug. 24—Blackpool and Fleetwood Tramroad Company (Half-yearly), Bispham, at 2.30.
- Aug. 31—Colne Valley and Halstead Railway (Half-yearly), 3, Throgmorton-avenue, E.C., at 1.
- Aug. 31—South Yorkshire Junction Railway (Half-yearly), 23, Queen Victoria-street, E.C., at 12.

It is said that an English syndicate has submitted to the Italian Ministry of Public Works a scheme for the construction of a railway *via* the Great St. Bernard.

## The Railway Times.

Established 1837.

AUGUST 13, 1898.

## TWENTY-FOUR O'CLOCK.

It is understood that the Great Eastern Railway has definitely decided to adopt the twenty-four-hour notation for time-table purposes, and thus becomes the pioneer among English railways of a system which is already in use on many thousands of miles of line in India, Canada, and on the Continent. The correspondence on the subject which has recently appeared in the daily press has not been altogether favourable to the proposal, which has been variously characterised as pedantic, clumsy, confusing to the public, and without practical advantage to the railway service. Whatever may be the qualifications of these correspondents as critics, it is evident that the majority of them are in ignorance of the extent to which the notation obtains abroad, and of the reasons which have led to its adoption and ensured its success. The whole object, of course, is to avoid the confusion now possible when the day, the smallest natural division of time, is split into two moieties of twelve hours, the two series of hours being numbered identically, and affording no clue to the particular division of the day in which any particular hour falls. In the attempt to obviate mistake and to guide the reference, the hours of morning and afternoon are generally distinguished in English time-tables by such marks as "morn." and "aft.," which, however, are, for economy of space, as a rule printed only at the head of columns, and the times of arrival at or departure from intermediate stations, being not so marked, have to be checked by running the eye up the column. It is true that the short average length of journeys in this country deprives our present system of many of the inconveniences which would attend time-tables got out on this plan for the two and three day trips common in India and America. But there are few frequent travellers who cannot give personal illustration of the ease with which such a mistake may be made in the haste of a moment. The happily good reputation of our *Bradshaw* and companies' time-tables for freedom from typographical errors only increases the danger of unpleasant consequences resultant upon such errors and omissions as may creep in unobserved. In some countries, indeed, where perhaps the printers' devils are less reliable, it has actually been thought advantageous to introduce such additional complications as a special type, underlining, or other artifice, to distinguish between day and night trains. So multiplied and various have these systems become that it is said that a passenger from London to Constantinople who regulates his doings by the local tables must accustom himself to no less than half-a-dozen such systems, some of which are actually in opposition in their adoption of the inverse method to indicate the day or night respectively for different portions of the same through journey. It has been admitted by the International Railway Congress of 1896 that the twenty-four-hour system disposes of the complication by removing the reasons for it. Nothing new is required, clocks and watches can go on as before, but all hours after midday are numbered 13 to 24, while the confusion between noon and midnight is abolished, and the period between midnight and 1 a.m. is timed 0.1 a.m. to 0.59 a.m. It is not proposed to force the adoption of the notation for all purposes; but the conversion into ordinary time, by the subtraction of 12 from all figures above that point, is of course simple. The marks a.m. and p.m., "mrn." and "aft.," of course disappear, and should cause no small

economy in telegraphic despatches. In reporting on the subject to the Railway Congress, one American telegraph company, the Western Union, stated that the saving to them would be not less than 150 million letters annually. For telegraph purposes indeed the 24-hour notation has long been in use in certain countries, notably in Italy, where it was established by Royal Decree in 1859, and was extended by similar authority to the railways in 1893. In Canada over 12,000 miles are operated under the same system of notation, the advantages of which have frequently been extolled by Sir Charles Tupper. In India the system was first adopted for the working time books only, but was speedily introduced at the public request to cover all public time-tables on the State and guaranteed railways, embracing, as these do, practically the whole railway system of the country. In short, the proposal of the Great Eastern is no academic reform, but a practical matter already tried with success.

### THE ECONOMICS OF PRIVATE SIDINGS.

A suggestive paper on the application of narrow-gauge railways to engineering works and agricultural centres was read last week before the Institute of Mechanical Engineers by Mr. Leslie Robertson, who, as a member of several Light Railway Commissions and inquiries, including that undertaken by the Cape Government some years ago, has acquired a very exhaustive knowledge of what has been done abroad to cheapen the cost of transport, on which the profits of production depend. It was almost inevitable that the author should have been led from the limited subject of his title to some mention of the advantages attending the actual leading of the standard gauge railways into the very centres of production. While not following Mr. Robertson in his lucid explanation of technical details, the occasion is not inappropriate for referring to the great private siding question which indirectly forms the groundwork of his argument. It has frequently been remarked by those who have made a study of the conditions under which products, whether of manufacture or agriculture, are brought to market abroad, that whereas total mileage in proportion to area is almost invariably less than in England, yet the relatively greater number of points at which goods can be loaded or unloaded on foreign railways operates in reducing the average distance, and consequently cost, of cartage in a degree with which we do not compare favourably. The points between which the companies are common carriers—that is, between which rates are normally quoted—are necessarily limited, and the arrangements which govern the usage and cost of additional facilities in the shape of private sidings at intermediate points are not perhaps fully realised, and are certainly not taken as full advantage of as they are in Germany and Belgium. It may be said that the average distance between our stations is much less than on the railways of the countries named, and this, no doubt, is the case, but the fact is beside the point if it be shown that the expenditure involved in providing and working the intermediate siding be less than the economy to be derived therefrom. Nor, when we use the term economy, do we refer to a mere saving to the producer or consumer at the expense of the railway company, a requirement of the latter of equal services, or services which cost as much to perform, for a lower remuneration. We refer to the elimination or reduction of the unnecessary labour now involved in obtaining a specific result, and which, being in whole or in part unnecessary for that result, is true economic waste, and as such harmful to both parties and to the community at large. The installation of an intermediate siding by mutual agreement

between the railway company and the traders using it implies the substitution of cheaper haulage on rails for dearer haulage by horses over a greater or lesser distance, and thus brings with it a real increase in efficiency, which is not confined in a pecuniary sense to any one party. The sums paid for the additional haulage in existing instances are admittedly more remunerative to the railways than those included in the normal rates to cover station and other terminal expenses, which the authorised terminal charges are year by year becoming less able to meet. While it is not easy, however reasonable, to propose, with any chance of acceptance, a general increase in terminal charges, there is no doubt that the costs involved in carrying out the terminal portion of the railway undertaking tend to mount up in a higher proportion than those incurred on the actual haulage from point to point. A further disadvantage, from the railway standpoint, attends the necessarily inelastic nature of the cartage charges which the companies are empowered to levy for collection and delivery. A railway company has no power to compel its customers to allow it to perform these services, although, with the notable exceptions of local rates on three southern lines, and at certain northern towns, of which Liverpool is one, all class rates are quoted to include these details. The result is that the companies are compelled to allow their customers who perform the work for themselves a cartage rebate or drawback on a fixed scale, in order to obviate any charge of discrimination in favour of those for whom the cartage is actually performed; and it is unnecessary to point out that the trader takes this drawback only when it pays him to do so, and frequently compels the railway to perform the service at an actual loss to itself, in the case of small consignments or over long distances. How this can affect the business of the companies can be seen from the following examples of cartage rebates, necessarily fixed as these must be to meet average cases which may but rarely occur, and consequently open to actual loss under circumstances obtaining at one end or other of the scale:—

		CARTAGE RATES PER TON.					
		London.		Yorkshire.		Country.	
		Ordinary rates.	Excep- tional rates.	West Biding.	Ordinary rates.	Excep- tional rates.	
1st Class, C. and D.	...	3/9	...	2/8	...	1/8	...
2nd "	...	4/2	...	2/9	...	1/4	...
3rd "	...	5/0	...	3/0	...	2/0	...
4th "	...	5/10	...	3/4	...	2/6	...
5th "	...	6/8	...	4/0	...	3/4	...

For the purpose of allocation of through rates between two or more companies, the above rates include terminal allowances.

Were the goods collected or delivered in truck at a siding as near as possible to the point of production or consumption, the company would benefit indirectly by the reduction in its terminal expenses, and directly by the added miles of profitable haulage, while it would be further relieved of the performance of cartage services, which bring little or no net profit in the majority of cases, and actual loss on some transactions. The trader on his part would gain to the extent of the cartage drawback, less the small added cost for haulage, a cost, by the way, for the determination of which on a reasonable basis there exists statutory power to appeal to arbitration in the event of a more amicable settlement not being arrived at. To turn to mineral and other traffic carried at rates which do not include cartage services. The majority of the private sidings in the country are employed in dealing with such traffic, on which, although no drawbacks accrue to the trader in respect of collection and delivery, a proportion of the terminal allowance has been claimed with success in view of the station accommodation, which this charge is supposed to meet, not being required of, or furnished by, the railway company. When it is pointed out that these charges amount to as much as 1s. 6d. per ton, of which, in the case of "Evans v. Midland Railway," the Railway and Canal

Commission in 1897 allowed plaintiffs no less than 75 per cent., it will be seen that the point is of importance to the trader who wishes to estimate the net savings he hopes to effect by the provision of his private siding after paying the agreed price to the railway for the haulage of his traffic from the station to that siding. When all is said and done, therefore, the matter shows an equal balance of advantage to railways and to traders, always supposing that conditions favour any suggested scheme as profitable in itself. While realising that little we have said can have the merit of novelty to those responsible for the railway side of the question, yet we are convinced that a dispassionate study of the whole question will prove to some that the last word has not yet been said on the important problem of cheapening transport while maintaining the legitimate earning power of railway capital.

### THE PEKIN SYNDICATE BUBBLE.

We hear a great deal just now of Chinese railway, navigation, mining, and trading concessions, and of the wonders that are going to be worked under these concessions for British trade by the aid of British capital. It is to be feared, however, that all this talk will end in nothing. Even before a penny-piece of capital has been got to work in a legitimate manner the pocket of the British investor is being exploited by unscrupulous company promoters, and public confidence is already being shaken in what at one time looked like a brilliant opening for industrial enterprise. The jerry-mandering which is just now going on in connection with the Pekin syndicate recalls the worst phases of "Chartered Company" finance, and reminds one of the most hare-brained schemes of the South Sea period. By judicious manipulation on the Stock Exchange ls. shares have been rigged up to 125l. each, and upon a somewhat shadowy "concession" of very doubtful value a paper fabric of 1,520,000l. has been built up in a few weeks, and no stone is being left unturned to get the gullible investor to take a hand in this discreditable and unintelligible gamble. It is the old game of experience v. money—experience first, money nowhere. But although the Pekin Syndicate has already succeeded in watering a 20,000l. capital into one of 1,520,000l., this operation does not appear to give it any capital for actual industrial operations. That is yet to come, and it is fair to ask what earthly chance investors will have of getting a return upon the monies yet to be raised and laid out in railway construction and trade, with the company weighed down at the very outset by a huge volume of bogus capital? Meanwhile it is reported that a new board is being formed, and we are told that "one well-known railway man has consented to join the board, and arrangements are on the verge of completion with reference to another." We can only hope that such assertions as these have no foundation in fact, for we should be grieved to find any of the eminent railway men of this country associated with such a dubious promotion. This Pekin or Shansi business, or whatever it is called, is rotten in its very inception, and sufficient to kill at the very outset the great Chinese industrial movement from which so much has been expected.

### THE COLLAPSE IN TRUNKS.

There can be no denying that the statement issued yesterday by the Grand Trunk Railway Company of Canada is extremely disappointing. For some time past it has been evident from the persistent decline in market prices that the optimistic calculations which prevailed a few months ago were not going to be borne out by actual results, but no one who has studied the weekly traffic returns and monthly

working statements could have been prepared for the rude shock which was administered yesterday, when, upon prices already many points below the highest of the current year, there was a sudden slump of  $5\frac{1}{2}$  in first preference,  $4\frac{1}{2}$  in seconds, 2 in thirds, 2 in guaranteed, and  $\frac{1}{2}$  in ordinary stock. It is instructive to compare last night's closing prices "in the street" with the highest quotations of the current year:—

	Highest 1898.	Closing yesterday.
Guaranteed stock .....	79½	75½
First preference .....	76½	61½
Second preference .....	58½	39½
Third preference .....	26½	18½
Ordinary .....	9½	7

Upon the causes which have led to the wide gap between anticipation and realisation as disclosed in yesterday's official statement it would be idle to speculate at present, and we can only await with patience the issue of the directors' report and statement of accounts.

### PASSING NOTES.

The traffic receipts for the week ending August 7th, on thirty-three of the principal lines of the United Kingdom amounted to 1,983,039l., which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,955,645l., with 19,034½ miles open. There was thus an increase of 27,394l. in the receipts, and an increase of 219 in the mileage. The aggregate receipts for six weeks to date amounted on the same thirty-three lines to 11,263,206l., in comparison with 11,059,670l. for the corresponding period last year; increase, 203,536l.

The Trade and Navigation Returns for July show exports amounting to 20,089,878l., a decrease of 1,411,574l., or 6·5 per cent., on the corresponding month of 1897, the imports amounting to 25,903,039l., a decrease of 220,484l., or 0·6 per cent. The value of the iron and steel exports was 1,955,027l., against 2,136,401l., a decrease of 8·4 per cent.; and of coal and coke exports 1,503,011l., against 1,668,123l., a decrease of 9·8 per cent. Imports for seven months ended July 31st amounted to 271,881,490l., an increase of 10,538,224l., or 4·0 per cent.; exports to 132,598,057l., a decrease of 6,313,847l., or 4·5 per cent., and re-exports to 37,216,563l., a decrease of 162,412l., or 0·4 per cent.

At the half-yearly meeting of the Bristol and South Wales Railway Wagon Company, Limited, the chairman stated that for a long time there had been a depression amongst the railways of America, and as the company dealt largely with these railways, it was natural it should have felt that depression, which he hoped was passing away. At the beginning of the year the directors consulted with another company which shared all their American business, whose chairman, at their suggestion, undertook to go to America and investigate the state of affairs for himself, and owing to that gentleman's report they had great confidence that the arrears would eventually be paid.

At the offices of the Great Northern Railway Company at King's-cross on Thursday there was "Presented to Sir Henry Oakley by the officers of the Great Northern Railway as a mark of esteem and regard on his retirement from the position of general manager, 1898," a solid silver library set, comprising a stationery cabinet, two double inkstands with penbox, a blotter, and a pair of candlesticks, specially designed and made for the occasion. Sir Henry Oakley's crest, with his motto, "Recte faciendo securus," is inscribed on the cabinet and blotter, and the former bears also the arms of the Great Northern Company.

At the half-yearly meeting of the Isle of Wight Railway Company the chairman stated that the directors would shortly have to call another meeting to authorise the issue of stock in order to provide the money to pay for a line they had bought. They proposed to issue this stock at par to the ordinary shareholders. It would be issued to the deferred shareholders in proportion to their holdings, and, inasmuch as their stock stood at a considerable premium, it would be a nice bonus to them.

The Waterloo and City Railway was opened for public traffic on Monday. The traffic was carried on throughout the greater part of the day with four trains, but in the evening the number was reduced to three. Altogether about one hundred trains ran each way yesterday, carrying—it was officially stated—between 15,000 and 20,000 passengers. The trains began to run at eight o'clock in the morning and continued until ten o'clock at night.

The London and North Western Railway Company were on Wednesday fined 5l. 6s. 6d., which included costs, at Saddleworth Police-court for having an unjust weigh-bridge at Diggle Station. The machine was for weighing wagons run on rails sunk in the table, and it was used also by the public at a small charge. It proved seriously wrong, the weight varying at all corners. It was stated that those using it had suffered serious damage.

Mr. E. A. Neale, manager of the Waterford and Central Ireland Railway, while riding on a bicycle on the Waterford-road, near Kilmeadon, on Saturday, was run into by some stray horses which were galloping rapidly in a body, and thrown violently to the ground. When discovered he was conveyed in an unconscious condition to his residence in Waterford, where it was found that he had sustained concussion of the brain.

Changes are reported in the engineering staffs of the North British and Highland railways. Mr. Thomas P. Carswell, the North British engineer for the Western district, has resigned, and the post still remains open; while the Highland directors, at their meeting last week, appointed Mr. Alex Newlands assistant-engineer in place of Mr. Batcher, who has joined the Irish Board of Works.

The St. Rollox Goods Station, belonging to the North British Railway Company at Glasgow, was destroyed by fire on Monday morning. The station, which was one of the largest on the system, was filled with general merchandise, which was wholly destroyed. The damage has not yet been fully estimated, but the loss will be heavy. The building destroyed was of stone, and was 300ft. long.

A representative meeting of railwaymen was held at Neath on Sunday night, and was addressed by Mr. Bell, secretary of the Amalgamated Society of Railway Servants. A resolution was passed regretting that the companies did not treat them fairly, and calling upon all railway servants to join the society in the endeavour by combination to obtain emancipation.

The Board of Trade has confirmed the Great Western Railway (Pewsey and Salisbury) Light Railway Order, 1898, authorising the construction of a light railway in the county of Wilts between Pewsey and Salisbury, subject, as regards the portion of railway proposed to be laid on property of the War Department, to the consent of the Secretary of State.

The London Chatham and Dover Railway announce that a through carriage is now running from Calais to Cologne in connection with the 4.20 p.m. service from Victoria. This service will be very convenient for the German watering-places, and the through carriage obviates the unpleasant change at Brussels at midnight.

The directors of the Southport Tramways Company have agreed to sell their own shares in the undertaking to the British Electric Traction Company, Limited, and have arranged that shareholders may also sell their shares under specified conditions at 8l. per fully paid share of 5l.

The Board of Trade has confirmed an order, entitled the Caledonian Railway (Leadhills and Wanlockhead Light Railway) Order 1898, authorising the construction of a light railway between Elvansfoot Station and Wanlockhead, in the counties of Lanark and Dumfries.

The Jarrah Timber and Wood Paving Corporation, Limited, which was so successfully floated in London four months ago, has just secured the contract for the supply of railway sleepers, telephone poles and pickets to the West Australian Government for the next two years.

Mr. Samuel Joseph Carr, who for many years had been

manager of the Wirral Railway, died on the 5th inst. Prior to this appointment Mr. Carr was assistant-superintendent of the Chester and Holyhead Railway at Chester.

By the gale in the Bristol Channel on Saturday last great damage was done to the new works at Port Talbot Docks, from three to four hundred feet of the new extension pier having been washed down by the waves.

The Board of Trade has confirmed the Carmyllie Light Railway Order, 1898, authorising the working as a light railway of a part of the existing Carmyllie branch of the Dundee and Arbroath Joint Railway in the county of Forfar.

The new line of railway from Holaworthy to Bude, which extends the London and South Western Railway system to the north coast of Cornwall, was opened for public traffic on Wednesday.

The *Financial Times* of Tuesday last contains an excellent tabular analysis of the railway accounts of the past half-year, with comparisons for the corresponding halves of the previous nine years.

The subject of the "illustrated interview" in the August issue of the *Railway Magazine* is Mr. Alfred Aslett, general manager of the Furness Railways.

Mr. J. L. Wilkinson, general manager of the Great Western Railway, has been elected a member of the Institution of Civil Engineers.

## Money and Stock Markets.

The monthly settlement in Consols takes place on the 1st prox.; the fortnightly settlement in other Securities commences on the 29th inst.

### CITY, FRIDAY EVENING.

The MONEY MARKET was a shade firmer to-day, and  $1\frac{3}{8}$  per cent. was the lowest quotation for the discount of three months' Bank bills. Money was also a little more wanted, owing to this being "pay day" on the Stock Exchange. The rate for the day was, therefore,  $\frac{1}{2}$  per cent., with nothing doing under. The Bank Return issued yesterday shows that, chiefly owing to the contraction of the note circulation, the reserve is 352,000l. higher at 23,224,793l., and its proportion to the current liabilities has risen from  $44\frac{1}{2}$  to  $45\frac{3}{4}$  per cent. The "other deposits" show a further decrease of 720,000l., owing to revenue collections, which have added 444,000l. to the public deposits, and there is a decrease of 610,000l. in the "other securities," which can have been caused only to a small extent by the running off of bills. The only bullion movement since the issue of the Return has been a withdrawal of 16,000l. in foreign gold coin.

Silver bars are now quoted at 27 7-16d. per oz., being  $\frac{1}{4}$ d. higher on the week. A year ago the price was 25 $\frac{1}{2}$ d.

Eastern exchanges are telegraphed as follows:—Bombay, 1s. 3 27-32d.; Calcutta, 1s. 3 27-32d.; Hong Kong, 1s. 11 $\frac{1}{2}$ d.; Shanghai, 2s. 7 $\frac{3}{4}$ d.; Singapore, 1s. 11 7-16d.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period or last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£34,513,093	£35,619,530
Total Reserve .....	£23,224,793	£24,411,110
Proportion of Reserve to Liabilities...	45 $\frac{3}{4}$ per cent.	51 $\frac{1}{2}$ per cent.
Notes in Circulation .....	£28,088,500	£28,008,420
Bank Rate of Discount .....	2 $\frac{1}{2}$ per cent.	2 per cent.
Open Market ditto .....	1 $\frac{1}{2}$ per cent.	1 $\frac{1}{2}$ per cent.
Consols (account) .....	110 $\frac{1}{2}$	112 $\frac{1}{2}$
French Rentes (account) .....	103f. 52c.	105f. 00c.
Paris Cheque Exchange .....	25f. 24c.	25f. 18c.
New York 60 days ditto .....	\$48 $\frac{1}{4}$	\$48 $\frac{5}{8}$

The premium on gold at Buenos Ayres has fallen during the week from 177-70 to 176-10 per cent., making the paper dollar (nominally worth 4s. 2d.) now actually worth 1s. 5-25d. A year

ago the premium was 191 per cent., and the value of the paper dollar is. 4.42d.

The Valparaiso 90-day exchange comes over to-day at 17½d., being unaltered on the week. A year ago it was 17½d.

The Rio de Janeiro exchange on London is 7 11-32d., being unaltered on the week. A year ago it was 7 7-16d.

The Bankers' Clearing-house return for the week ending August 10th, 1898, shows a total of 139,590,000l., as compared with 135,717,000l. for the corresponding period last year.

The STOCK MARKETS to-day have been somewhat disturbed by the disquieting news from the Far East, and a good deal of fuss is being made about a lot of Chinese concessions of very questionable value. The Funds fell 1-16, and British railway stocks were generally lower, though only fractionally so. The feature of the day, however, was the slump in Grand Trunk issues on the half-yearly revenue statement (referred to in our news and leader columns), the fall being as much as 5¼ in the first preferences and 4¾ in the seconds. An unlooked-for charge of 10,000l. in respect of bridge building partly explains the disappointing statement, but the "market" generally is still 20,000l. to 30,000l. out in its reckoning. Canadian Pacific shed a point in sympathy with Trunk weakness. Yankee Rails, almost for the first time this week, showed some weakness to-day; but the movements were only fractional, and on balance for the week there is still an all-round and important rise in prices. In *Foreign Rails* one of the features has been a recovery in the better-class Argentines, and among the less active stocks Argentine Great Western is up 2, Argentine North Eastern 1½, Buenos Ayres and Ensenada preferences 2½, Buenos Ayres Great Southern preferred 2, Buenos Ayres Western debenture stock 2, Rosario debenture stock 2, Central Argentine debenture stock 2, Cordoba and Rosario 6 per cent. debenture stock 3, Cordoba Central 4 per cent. debenture stock 2, ditto income debenture stock 4½; whilst Buenos Ayres and Valparaiso B debenture stock has lost 4½. Nitrate Railway ordinary and preferred have each lost ¼, but a temporary recovery in the latter is looked for. Mexican issues are very quiet. Amongst other movements of the week may be mentioned a rise of ½ in Western of Havana shares and ¼ in Leopoldina, whilst South West of Venezuela first debentures have lost 4½, the second debenture stock 2, and Campos and Carangola bonds 3.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>					
Consols, 2½ per cent. ....	—	—	Grand Trunk of Canada — ...	½	—

The Stock Exchange Committee has ordered the undermentioned securities to be quoted in the Official List:—Central Argentine Railway Company, Limited, further issue of 100,000l. 4 per cent. debenture stock.

## Parliamentary Intelligence.

### PRIVATE BILL PROGRESS.

Lord Leven's Committee of the House of Lords has reported the Cardiff Railway Bill to the House in a mutilated form. The committee has passed so much of the projected 50 miles of railways as will give the Cardiff Company independent railway access into their own docks free from either the Taff Vale or Rhymney systems. The committee, however, has struck out the whole of the railways along the beds of the Glamorganshire and Aberdare canals, and in this respect the Taff Vale Company and the Rhymney have scored an important victory. The Cardiff Railway Company are stated to be satisfied with this result of three months' fighting, as they recognised that they were asking for more than they expected to get in one session.

The Unopposed Bill Committee of the House of Commons, which last week passed the Mersey Railway Bill, has prepared a special report to the House upon this Bill. The committee states that powers are sought by the Bill to create and issue new redeemable debenture stock to the amount of 275,000l., to be applied, primarily, in redeeming existing redeemable debenture stock authorised in 1888 and 1892, and paying the premium attached thereto when issued, the new debenture stock to have the same priority and to be substituted for the existing debenture stock to be redeemed thereby. The expediency of redeeming the existing first debenture stock was, the committee says, proved to its satisfaction, and it was also proved that the company was unable to raise capital by means of ordinary or preference shares or stock; but that the status of the holders of the existing share and loan capital of the company would not be prejudiced, inasmuch as the rate of interest on the new debenture stock is not to exceed, and may be lower than, the rate now payable on the existing debenture stock to be redeemed. Under these circumstances, the committee recommends that the Standing Orders prohibiting financial operations of this character ought not to be enforced in the case of this company.

### CHINESE RAILWAY CONCESSIONS.

In the House of Commons on Tuesday,

Mr. LAMBERT asked the Under-Secretary for Foreign Affairs whether the final ratification by the Chinese Government of an advance of British money for the projected railway to Niuchwang had been given; if not, whether, consistently with the public interest, he could state what were the objections to its being ratified.

Mr. CURZON—I am unable to make any statement on this subject, which is still under discussion.

Mr. LAMBERT asked whether the right hon. gentleman thought he would be in a position to make a statement on the subject before the prorogation?

Mr. CURZON—I think it is unlikely. I should be glad to make a statement if I could.

Mr. JOSEPH WALTON asked the Under-Secretary for Foreign Affairs whether he could state to the House the terms and conditions upon which the concession for the Peking-Han-kau Railway had been granted, and also on what terms and conditions the Russo-Chinese Bank was providing the money for the undertaking; and whether equal rights were expressly reserved for British commerce, as guaranteed by the Treaty of Tien-tsin.

Mr. CURZON—I informed the hon. member last week that the terms of the agreement have not yet reached us, and I must repeat the same answer now.

Mr. JOSEPH WALTON also asked whether the right hon. gentleman could state the date of the instructions given to her Majesty's Minister at Peking to press for the insertion in every railway concession granted by the Chinese Government of a proper provision as to equal treatment of all nationals and trade; and whether, in all concessions which had been granted to foreign

Powers or syndicates, our rights had been expressly reserved in this sense, and in conformity with the Treaty of Tien-tsin, by the Chinese Government.

Mr. CURZON—Instructions to resist preferential treatment for foreign subjects or trade were sent to Sir C. Macdonald in March last. Renewed and particular instructions with reference to railway concessions were sent to him on July 13th. I am unable to say what may be the provisions of concessions which I have not seen.

Mr. PROVAND asked whether since the German occupation of Kiao-chau the German Minister at Peking had protested against the concession for the railway from Peking to Chin-kiang being granted, or any grant already made being confirmed, to any one not being a German, because the line would pass through a part of the province of Shan-tung; whether, at a meeting of the foreign Consuls at Chifu to arrange for an extension of the foreign settlement at that place, the German Consul protested against any enlargement of the settlement on the ground that it would be an infringement of German rights in the province of Shan-tung; whether her Majesty's Minister at Peking had protested against or in any way recognised those claims on the part of the German Minister and Consul; and whether, in view of the favoured-nation clause in the treaty of Tien-tsin, which provided that the British Government and its subjects would be allowed free and equal participation in all privileges, immunities, and advantages that might have been or might be hereafter granted by his Majesty the Emperor of China to the Government or subjects of any other nation, the Government proposed to take any steps in the matter.

Mr. CURZON—Sir C. Macdonald telegraphed on February 18th that the German Minister had opposed a scheme for a trunk railway from Tientsin to Chin-kiang, on the ground that no railway could be constructed in the province of Shan-tung without an arrangement with Germany. A protest was at once made at Peking on behalf of her Majesty's Government and also to the German Government through her Majesty's Ambassador at Berlin. Thereupon Herr von Bülow addressed a memorandum to her Majesty's Government, of which the following is the text:—"The report which has reached her Britannic Majesty's Government from Peking to the effect that Germany has raised objections there to the Chinese scheme for the construction of a railway from Tientsin through Shan-tung to Chin-kiang, and that these objections were based upon the assertion that in the above-named Chinese province no railway could be constructed without the permission of Germany, is not in accordance with facts. There is also no foundation for the statement that the Imperial Minister at Peking had threatened serious consequences in the event of this claim not being admitted. The demand put forward by the Imperial German Government at Peking was merely to the effect that, should the Chinese Government desire to obtain foreign assistance for the construction of railways within the limits of the province of Shan-tung, they should, in the first instance, offer the work and supplies connected therewith to German industry and German trade. The Imperial Government, true to their principles, have not claimed any exclusive privileges from China—(Opposition laughter)—and have made no attempt to exclude other nations from free competition in the province of Shan-tung." In answer to the second question, I have to say that no information has been received at the Foreign-office of any such claim having been made by the German Consul at Chifu as is referred to.

Mr. YERBURGH—May I ask the right hon. gentleman whether the concession was successfully carried through or not, and, if it fell through, what was the ground of its falling through?

Mr. CURZON—I am not aware that a concession has been carried through. Is the hon. gentleman asking whether a concession has been given?

Mr. YERBURGH—I am asking whether a concession was granted, and whether it has been withdrawn, and why?

Mr. CURZON—What concession?

Mr. YERBURGH—The concession for a trunk line from Peking to Chin-kiang.

Mr. CURZON—Oh, no, Sir; that concession has not been given.

In the House of Commons on Thursday,

Mr. R. G. WEBSTER asked whether the Government had yet received any information as to the reports that the Belgian syndicate which held the concession for the Peking-Hankow Railway had transferred its rights to the Russo-Chinese Bank, whose capital had been mainly supplied by the Russian Government.

Mr. BALFOUR—The information in our possession does not enable me to give an answer to the hon. member's question. The agreement referred to is now under discussion with the Tsung-li-Yamen at Peking, by whom it has lately been received from Shanghai.

In the House of Commons yesterday,

Mr. J. WALTON said—I beg to ask the First Lord of the Treasury the last question of the session—(laughter)—viz.:—Whether her Majesty's Government would use their influence at Peking to prevent the ratification of the Pekin-Hankow Railway concession in favour of any foreign Governments or syndicates; and whether, in order to secure the neutralisation of this railway, they would facilitate its construction by the Chinese Government, and if necessary guarantee a loan for this purpose.

Mr. BALFOUR—I am sorry to have to give so unsatisfactory a reply to a question which occupies so dignified a position. (Laughter.) I cannot give the hon. gentleman the pledge he asks for.

### THE COMPANIES' BILL.

In the House of Lords on Thursday,

The LORD CHANCELLOR, referring to the Committee on the Companies' Bill, said the voluminous evidence which had been given before the committee, had been printed, but they had not yet had time to meet and consider their report. Several members of the committee were also landlords, and having regard to the judicial business of the House, it had been impossible to proceed more rapidly. It was their hope, however, to be able to suggest some amendments of the law which he for one admitted were required in the present state of things. The problem was not a very easy one to solve, but, speaking for himself, he certainly should say that nothing could have a more disastrous effect upon the commerce of the country than the placing of shackles upon the development of joint stock companies for carrying on industrial enterprises. The evidence showed how ridiculously small was the proportion of what were called fraudulent companies to the enormous mass of *bonâ fide* commercial enterprises, *bonâ fide* in all respects, and which earned good profits by the carrying on of their particular trade. The interests of commerce had not been lost sight of, and the committee were desirous as soon as possible of presenting a report.

### WORKMEN'S TRAINS.

In the House of Commons on Tuesday,

Mr. WOODS asked the President of the Board of Trade whether his attention had been called to the hardship and inconvenience which a large number of men engaged in the printing trade had to suffer through the want of an early morning train from the Farringdon-street Station similar to those now being run by other railways in that district; and whether the Board of Trade would exercise the powers conferred upon them by the 1883 Act so as to cause the railway company to provide the necessary train accommodation.

Mr. LONG—Yes, Sir, the attention of the Board of Trade has been directed to this case, and they have communicated with the company, referring to the provisions of the Cheap Trains Act and intimating their intention to order an inquiry.

### WORKMEN'S COMPENSATION.

In the House of Commons on Thursday,

In answer to Mr. LEWIS,

Mr. HANBURY said—The Workmen's Compensation Act provides that the employer may contract with any workmen to substitute an approved alternative scheme for the provisions of the Act. The Government, as other employers may, therefore, refuse to give any workman a choice between two schemes; but, if such choice is given, as it no doubt will be if the alternative Government scheme is approved, the choice will be free and the conditions of employment will be the same in all other respects whichever scheme the workman may prefer.

## Directors' Reports.

### GREAT SOUTHERN AND WESTERN RAILWAY.

#### CAPITAL.

June 30th, 1898.—The total expenditure amounts to 9,102,211*l.* whilst the receipts have been 8,900,137*l.*, viz.:—

Ordinary stock .....	£4,971,155
Preference stock .....	1,329,100
Debenture stock .....	2,321,487
Premiums .....	278,395

Balance to debit of capital account, 202,074*l.* The expenditure on capital account during the half-year amounted to 55,085*l.*, of which 2,168*l.* was on lines open for traffic, 12,438*l.* on working stock, and 40,479*l.* on Drumcondra line. Estimated further expenditure—In the current half-year 67,500*l.*; in subsequent half-years, 198,448*l.*; total, 265,948*l.* Capital powers and other available assets amount to 307,002*l.*

#### REVENUE.

The revenue account for the half-year ending June 30th shows the receipts to have been as under:—

	1897.	1898.
Passengers—First-class .....	£19,753	£20,919
"    Second-class .....	24,594	22,665
"    Third-class .....	102,855	105,448
Periodical tickets .....	3,004	2,750
Parcels, horses, &c. ....	31,610	32,802
Mails .....	22,148	22,144
Goods .....	139,092	139,775
Coals .....	22,193	20,765
Cattle .....	40,119	38,720
Rents .....	2,831	2,617
Rents, Southern Railway Company .....	458	458
Mileage and demurrage .....	—	205
Transfer fees .....	98	123
<b>Total receipts .....</b>	<b>£408,250</b>	<b>£408,890</b>
The expenditure on revenue account for the same period is detail d below:—		
Maintenance of way, works, &c. ....	£52,388	£55,046
Locomotive power .....	61,640	67,180
Carriage and wagon repairs .....	19,718	17,900
Traffic expenses .....	69,339	71,199
General charges .....	9,879	10,788
Compensation—Accidents and losses .....	998	1,149
"    Personal injury .....	223	116
Rates and taxes .....	13,034	13,602
Mileage and demurrage .....	48	—
Rent, Waterford and Limerick Co. ....	948	948
Parliamentary law costs .....	—	782
Miscellaneous law costs .....	746	773
Working other lines .....	Cr.1,332	Cr.1,408
<b>Total expenditure .....</b>	<b>£227,629</b>	<b>£237,460</b>
The net revenue account and the proposed appropriation of the balance available for dividend may be summarised as follows:—		
Balance from previous account .....	£28,575	£30,339
Net earnings .....	180,621	171,430
Baronial guarantees .....	6,055	6,055
Sundry credits .....	81	—
<b>Total .....</b>	<b>£215,332</b>	<b>£207,824</b>
Prior charges .....	£46,220	£47,183
Preference dividends .....	26,582	26,582
Dividend on ordinary stock .....	*130,493	†124,278
Balance to next account .....	12,037	9,781
<b>Total .....</b>	<b>£215,332</b>	<b>£207,824</b>

\* At 5½ per cent. per annum. † At 5 per cent. per annum.

The gross receipts for the past half-year show an increase of 640l., the expenses an increase of 9,831l., and the net receipts a decrease of 9,191l. The ratio of expenditure to receipts is 58·07 per cent., as against 55·76 per cent.

#### TRAFFIC, &c.

	1897.	1898.
Half-year ending June 30th.		
Passengers—First-class .....	73,460	77,657
"    Second-class .....	148,263	145,444
"    Third-class .....	1,295,066	1,343,495
"    Total .....	1,516,789	1,566,596
Periodical-tickets .....	569	557
Mileage—Lines owned .....	583	583
"    Partly owned .....	2½	2½
"    Leased or rented .....	6½	6½
"    Total operated .....	11½	11½
"    Foreign lines run over .....	2	2
"    Total .....	605½	605½
Train mileage*—Passenger .....	1,123,723	1,121,621
"    Goods .....	716,646	743,381
"    Total .....	1,840,369	1,865,002

\* Including that of lines worked by Great Southern and Western Railway.

The report states:—

"During the half-year satisfactory progress has been made with the works on the Drumcondra Link Line.

"Negotiations have been concluded between the respective boards for the amalgamation with this company of the undertakings of the Waterford Limerick and Western Railway Company and the Waterford and Central Ireland Railway Company on terms mentioned in the appendix.

"The new dining-cars are now running, and it is believed that they will be appreciated by the public.

"The directors report with regret the resignation of their esteemed colleague, Colonel John Bonham. The vacancy has been filled by the appointment of Mr. William P. Geoghegan, of Rockfield, Blackrock, county Dublin."

#### APPENDIX.—PROPOSED TERMS OF AMALGAMATION.

*Waterford Limerick and Western Railway.*—The exchange of the Waterford Limerick and Western debenture stocks for such an amount of 4 per cent. Great Southern and Western debenture stock as will yield in each case the same interest to the holders. The exchange of the preference stocks of the Waterford Limerick and Western Company (other than 3½ per cent. preference stock) for such an amount of 4 per cent. preference stock of the Great Southern and Western Company as will yield the same amount of dividend as the proprietors are now receiving. As regards the 3½ per cent. preference stock of the Waterford Limerick and Western Company, the Great Southern and Western Company to issue an amount of 4 per cent. preference stock of the Great Southern and Western Company at the rate of 75 per cent. of such stock for every 100l. of the 3½ per cent. Waterford Limerick and Western stock, or, at the option of the holders, to pay 105l. in cash for each 100l. of stock. To issue for the ordinary stock of the Waterford Limerick and Western Company a guaranteed stock of the Great

Southern and Western Company, ranking after the loan capital of that company, and yielding for the first year from the date of amalgamation interest at the rate of 1½ per cent., for the second year interest at the rate of 1½ per cent., for the third year interest at the rate of 2 per cent., for the fourth year interest at the rate of 2½ per cent., for the fifth year and afterwards interest at the rate of 2½ per cent. The shareholders, on being entitled to interest at the rate of 2½ per cent., to have the option of converting their holdings into such an amount of 4 per cent. cumulative preference stock of the Great Southern and Western Company as will yield the same amount of interest. *Waterford and Central Ireland Railway.*—(1) The Great Southern and Western Railway Company to give 100l. Great Southern and Western Railway 3 per cent. debenture stock to Waterford and Central Ireland debenture-holders for each 100l. debenture stock they hold, or 75l. Great Southern and Western Railway 4 per cent. debenture stock. (2) The Great Southern and Western Railway Company to give Waterford and Central Ireland preference shareholders an equal amount of Great Southern and Western Railway 4 per cent. preference stock. (3) The Great Southern and Western Railway Company to give Waterford and Central Ireland original shareholders 17l. 10s. cash for each 100l. stock they hold.

#### LONDON AND NORTH WESTERN RAILWAY.

##### CAPITAL.

June 30th, 1898.—The total expenditure amounts to 107,927,188l., whilst the receipts have been 105,770,564l., viz.:—

Ordinary stock .....	£39,181,944
Preference and guaranteed stocks .....	30,737,616*
Debenture stock .....	28,250,166
Premiums .....	7,600,838

Balance at debit of capital account, 2,156,624l. The receipts during the half-year amounted to 614,635l. The expenditure in the half-year was 569,806l., of which 257,714l. was on lines open for traffic, 180,594l. on working stock, 112,277l. on lines in course of construction, 3,896l. on leased lines, 15,504l. on subscriptions to other companies. Estimated further expenditure—In the current half-year, 560,000l.; in subsequent half-years, 3,564,386l.; total, 4,124,386l. Capital powers and other available assets amount to 4,328,861l.

\* The amount entitled to dividend is—Ordinary stock, 41,122,233l.; preference and guaranteed stocks, 38,181,026l.; the difference between these sums and the amount actually received being made up by nominal additions on consolidation of various stocks.

##### REVENUE.

The revenue account for the half-year ending June 30th shows the receipts to have been as under:—

	1897.	1898.
Passengers—First-class .....	£248,618	£243,149
"    Second-class .....	123,261	180,104
"    Third-class .....	1,389,336	1,391,966
"    Season-tickets .....	154,738	163,218
Parcels, horses, carriages, &c. ....	424,815	435,558
Mails .....	98,517	99,703
Merchandise (less coll. and delivery) ...	2,101,336	2,161,429
Live stock .....	92,322	88,596
Minerals .....	1,235,422	1,325,205
Transfer fees .....	791	823
Rents (less repairs) .....	112,174	112,164

Total receipts .....

The expenditure on revenue account for the same period was as follows:—

	1897.	1898.
Maintenance of way, &c. ....	£508,912	£557,035
Locomotive power .....	791,666	849,971
Carriage and wagon repairs .....	238,465	276,900
Mileage of carriages, &c., of other cos. ....	12,249	15,185
Traffic expenses .....	1,309,561	1,390,339
General charges .....	157,115	163,301
Law charges .....	15,047	16,150
Parliamentary expenses .....	3,000	3,000
Compensation—Passengers .....	7,841	4,556
"    Goods .....	38,998	46,033
Rates and taxes .....	164,075	171,350
Government duty .....	20,074	22,940
Preston and Wyre steamboats—proportion of joint expenses .....	11,473	11,666
Steamboat expenses .....	38,721	41,368
Depreciation and insurance of steamboats .....	22,500	22,500
Lancaster Canal expenses .....	1,759	—
Huddersfield Canal expenses .....	2,762	—

Total expenditure .....

The net revenue account and the proposed appropriation of the balance available for dividend may be summarised as follows:—

Balance from previous half-year .....	£99,779	£89,536
Net earnings .....	2,637,112	2,609,621
Sundry credits .....	92,616	92,092
<b>Total .....</b>	<b>£2,829,507</b>	<b>£2,791,249</b>
Prior charges .....	£647,678	£651,289
Preference dividends .....	763,620	763,620
Dividend on ordinary stock .....	*1,323,193	†1,285,070
Balance to next half-year .....	95,016	91,270

Total .....

\* At 6½ per cent. per annum. † At 6½ per cent. per annum.

The gross receipts for the past half-year show an increase of 220,585l., the expenses an increase of 248,076l., and the net receipts an increase of

of 27,491l. The ratio of expenses to receipts is 57·92 per cent., as against 55·90 per cent.

TRAFFIC, &c.			
Half-year ending June 30th.			
	1897.	1898.	
Passengers—First-class .....	966,117	984,647	
" Second-class .....	1,503,802	1,995,633	
" Third-class .....	34,551,470	35,230,904	
" Total .....	37,021,389	38,211,184	
Season-tickets .....	44,842	48,689	
Mileage—Lines owned .....	1,680	1,679½	
" Partly owned .....	232	232	
" Leased or rented .....	152½	152½	
" Lines worked .....	30	30	
" Foreign lines worked over .....	778½	777½	
" Total operated .....	2,873	2,871½	
Train mileage—Passengers .....	11,260,891	11,728,450	
" Goods .....	10,205,467	10,728,587	
" Total .....	21,466,358	22,457,037	

The report states:—

"The Workmen's Compensation Act came into operation on July 1st last, and the directors have decided to meet the liability under the Act instead of adopting any scheme for contracting out.

"Votes of the proprietors are requested for:—Additional goods accommodation, Birmingham, 120,000l.; Additional land and works—Chester and Holyhead Line, Middleton, Moreton, Crewe, London, Morecambe, Northampton, Abergavenny, Friden, Blackpool, Carlisle, Oxenholme, Elmeesthorpe, Bushbury, Leominster, Penrith, Bletchley, Dukinfield, Shilton, Wednesfield-leath, Broadheath, Twyford, and Witton, 189,037l.; cottages at various places for company's servants, 6,055l.; steamboats, 55,000l.; subscription—Dundalk and Greenore Railway, 12,000l.; total, 382,092l."

#### WORKS IN PROGRESS.

The Engineer in his report states:—

"At Broad-street, City, goods station, considerable progress has been made with the large warehouse, comprising basement, loading bank, and four upper floors. Nearly the whole of the ironwork is fixed, and the building will shortly be roofed in. Loop lines are being provided for the relief of the main line traffic at Camden, Kilburn, Willesden, Shilton, and Winsford, and portions are in use. The two additional lines on the Trent Valley Railway, between Milford and Stafford (a length of about 3½ miles), were opened for traffic on July 26th. At Crewe a large amount of work has been done in connection with the enlargement of the station. More than half the excavation has been removed, 15 miles of additional lines and sidings have been laid, and the tunnel bridges are in progress to pass the goods lines under the passenger lines. The works are in an advanced state on the new railway from the North Stafford line at Ashbourne to the company's High Peak line at Parsley Hay, near Buxton. Ninety per cent. of the earthwork is finished, and thirty-six of the forty-one bridges and viaducts are constructed or in hand. The works have been commenced for the intermediate stations at Thorpe Cloud, Fenny Bentley, Tissington, Alsop-en-le-Dale, and Hartington. On the new line from Heaton Lodge to Wortley, about two-thirds of the earthwork are finished, and thirty of the sixty-four bridges and viaducts are built. The tunnel at Gomersal has been lined throughout its length of 819 yards, and of the 2,334 yards in Gildersome Tunnel about 1,350 yards have been completed. The stations are in hand at Mirfield and Northorpe, and preparations are being made to proceed with those at Heckmondwike, Liversedge, Cleckheaton, Gomersal, Upper Birstal, and Gildersome. Chester and Holyhead Railway.—A contract has recently been let for the new viaduct over the river Dee in connection with the two additional lines between the west end of Chester Station and Saltney Junction, a distance of 2 miles. The works are being continued to provide two additional lines between Saltney Junction and Connah's Quay, and between Flint and Abergale, a total length of 27 miles, of which about 9 miles are complete. A contract has also been let for the new viaduct to carry two additional main lines over the river Foryd at Rhyl, where arrangements are being made for the enlargement of the passenger and goods station. The new passenger and goods station at Waverton, on the Crewe and Chester line, was opened on June 6th. Progress is being made with the enlargement of Dudley Port passenger station, the alterations and additions to the passenger station at Monton-green, on the Eccles and Wigan line, and with the extension on the joint goods station at Leeds, also with the new passenger and goods station at Morcott, on the Rugby and Stamford line; and with the short branch railway at Peasley-cross, near St. Helens. The works have been commenced for a new goods warehouse at Dewsbury, and for increased siding accommodation at Bank-quay Station, Warrington. The additions to the goods stations at Monument-lane (Birmingham), and at Leigh and Bedford, and Llandudno, are in use. Portions of the foundations have been commenced for the widening of the Ribble Viaduct, forming part of the work for the enlargement of the joint station with the Lancashire and Yorkshire Company at Preston. Arrangements are being made to enlarge the passenger station at Lancaster."

#### GREAT NORTHERN (IRELAND) RAILWAY.

##### CAPITAL.

June 30th, 1898.—The total expenditure on this account has been 7,820,954l., whilst 7,621,558l. has been received as follows:—

Ordinary stock .....	£3,567,165
Preference and guaranteed stocks .....	1,931,991
Debenture stock .....	1,905,569
Sundries .....	216,833

Balance at debit of capital account, 199,396l. The expenditure during the past half-year amounted to 36,568l.—viz., 21,303l. on lines open for traffic, and 12,671l. on working stock, 1,594l. on lines in course of construction, and 1,000l. on subscriptions to other companies. Estimated further expenditure—In the current half-year, 35,500l.; in subsequent

half-years, not ascertained; total, 35,500l. Capital powers and other available assets, 163,116l.

#### REVENUE.

The revenue account for the half-year ending June 30th shows the receipts to have been as under:—

	1897.	1898.
Passengers—First-class .....	£13,721	£13,651
" Second-class .....	25,895	24,783
" Third-class .....	109,998	114,152
" Season-tickets .....	6,198	7,075
Parcels, horses, &c. ....	26,180	27,276
Mails .....	22,249	21,912
Merchandise (less cartage) .....	139,382	143,864
Live stock .....	17,129	17,393
Minerals .....	25,308	24,909
Sundries .....	5,591	5,272
Total receipts .....	£391,631	£400,187

The expenditure on revenue account for the same period is detailed below:—

Maintenance of way, &c. ....	£50,900	£49,326
Locomotive power .....	53,409	56,188
Carriage and wagon repairs .....	16,267	16,880
Traffic expenses .....	62,473	64,666
General charges .....	9,929	10,226
Law charges .....	915	1,004
Parliamentary expenses .....	200	654
Mileage and demurrage .....	247	346
Compensation—Personal injury .....	1,943	581
" Damage to goods &c. ....	815	784
Rates and taxes .....	14,518	17,199
Total expenditure .....	£211,616	£217,654

The net revenue account and the proposed appropriation of the balance available for dividend may be summarised as follows:—

Balance from previous account .....	£38,102	£38,777
Net earnings .....	180,015	182,533
Sundry credits .....	1,501	1,385
Total .....	£219,618	£222,695
Prior charges .....	£58,851	£58,903
Preference dividends .....	24,218	24,218
Dividend on ordinary stock .....	*111,011	*111,474
Placed to reserve fund .....	4,000	4,000
Balance to next account .....	21,538	24,100
Total .....	£219,618	£222,695

\* At 6½ per cent. per annum. † At 6½ per cent. per annum.

The gross receipts for the past half-year show an increase of 8,556l., the expenses an increase of 6,038l., and the net receipts an increase of 2,518l. The ratio of expenses to receipts is 54·39 per cent., as against 54·03 per cent.

#### TRAFFIC, &c.

Half-year ending June 30th.		1897.	1898.
Passengers—First-class .....		67,713	66,927
" Second-class .....		239,747	235,160
" Third-class .....		2,097,312	2,116,244
" Total .....		2,404,772	2,418,331
Season-tickets .....		1,580	1,883
Mileage—Lines owned .....		528	528
Train mileage—*Passengers .....		1,115,034	1,118,184
" Goods .....		548,748	555,596
" Total .....		1,663,782	1,673,780

\* Inclusive of Enniskillen Bundoran and Sligo Railway traffic.

The report states:—

"The working expenses for the half-year have been 217,654l., showing an increase of 6,038l. over the corresponding period of 1897. This arises chiefly from an increase in rates and taxes of 2,600l., from higher rates of wages, and from the increased cost of coal, in consequence of the strike of the South Wales colliers.

"During the half-year 4,860l. ordinary stock, and 2,585l. consolidated 4 per cent. debenture stock, have been issued, and the premiums thereon, amounting to 4,997l., have been credited to capital account.

"The arrangements for obtaining possession of the land necessary for the construction of the electric tramway round the Hill of Howth are well advanced. The working plans for the line are completed, and tenders will shortly be invited for the carrying out of the work.

"The Bill deposited in Parliament to incorporate a company for the purpose of constructing a tramway from Contarf to Howth has passed both Houses of Parliament.

"As intimated at the last half-yearly meeting, your directors have had under their consideration the question of the establishment of a pension fund for the wages staff engaged in working the railway. The details of the scheme are not yet finally completed, but it is proposed at the half-yearly meeting to submit a resolution asking the sanction of the proprietors to the payment of an annual contribution in aid of such fund.

"Your directors have purchased the Mounne and Woodside Hotels at Rostrevor for the sum of 14,000l., and it is expected that the title will shortly be completed and the hotels taken over by the company."

The Bernese Government will shortly order a final survey to be made for the piercing of the Loetschenberg with a view to the construction of a railway between Thun, Loetschenberg, and Brigue, which, when finished, will be the shortest northern connection with the Simplon. This line is to be opened for traffic as soon as possible after the completion of the Simplon Tunnel.

## American & Canadian Railways.

### CHICAGO AND NORTH WESTERN.

The subjoined figures are from the report just issued by this company for the year ending May 31st:—

	1896-7.	1897-8.
Passenger earnings .....	\$6,963,578	\$7,256,299
Freight earnings .....	22,236,612	27,035,105
Mail, express, &c. ....	1,777,053	1,759,157
<b>Total earnings</b> .....	<b>\$30,977,243</b>	<b>\$36,050,561</b>
Expenses (including taxes) .....	19,938,821	23,746,486
<b>Net earnings</b> .....	<b>\$11,038,422</b>	<b>\$12,304,075</b>
Other receipts .....	964,310	1,064,615
<b>Total net income</b> .....	<b>\$12,002,732</b>	<b>\$13,368,690</b>
Interest on debt .....	\$7,115,701	\$7,416,285
Dividends .....	*3,518,650	*3,519,824
Miscellaneous .....	196,413	197,260
<b>Total disbursements</b> .....	<b>\$10,830,764</b>	<b>\$11,133,369</b>
<b>Balance—surplus</b> .....	<b>\$1,171,968</b>	<b>\$2,235,322</b>

\* On preferred stock 7 per cent., and on common stock 5 per cent.

The balance-sheet shows a common share capital of \$41,420,366, a preferred share capital of \$22,370,954, and a bonded debt of \$131,645,000. The total mileage operated was 5,071 (against 5,031 miles in the previous year); the number of passengers carried 14,036,388 (against 13,821,065); the average rate per passenger per mile, 2.01 cents (against 2.04 cents); the quantity of freight moved, 19,693,634 tons (against 15,225,138 tons); the average rate per ton per mile, 0.89 (against 0.99 cent); the ratio of operating expenses to receipts, 65.87 (against 64.37 per cent.).

The annual report of the Chicago and North Western Railway indicates in a striking and rather impressive way, says the *New York Financial Chronicle*, "what a record the great railroad systems west of Chicago are able to make in a year of prosperity. The showing is a gratifying one from every standpoint, and the results disclosed afford added evidence of the strength of the properties in that part of the country. Of course, there is nothing new or surprising in the exceedingly favourable outcome for the twelve months which the report reveals. Indeed, just such an outcome was foreshadowed when, in the review of the business for the previous fiscal year, we saw what a satisfactory exhibit the company had been able to make in a year of depression. That the improvement has been large and general, however, is shown by the notable growth in the volume of the total tonnage. This total tonnage is reported at 19,693,634 tons for 1897-98, against only 15,225,138 tons for 1896-97. In other words, there was an increase of nearly 4,500,000 tons, or almost 30 per cent. (29.35 per cent.), in this period of twelve months. In the tonnage movement 1 mile the addition was yet more striking, the gain here being 34.45 per cent., the tons carried 1 mile rising from 2,254,000,000 to 3,030,000,000. Of course, this increase follows a falling-off the previous year; but in actual tons moved the loss then was only 1,857,251 tons, against the present gain of 4,468,496 tons, and in tons 1 mile the loss was but 118,000,000, against the present increase of 776,000,000. As the traffic in 1895-96 (with which we compared in the previous year) had been the largest recorded up to that time, it follows that in the late year the company carried over 2,500,000 tons more freight and over 658,000,000 tons more 1 mile than ever before in its history. With \$5,073,317 augmentation in gross receipts, expenses were added to in the sum of \$3,807,664. Necessarily, with a larger volume of traffic to move, an increase in the total of operating expenses was inevitable in any event. But we find that out of the \$3,807,664 augmentation in expenses only \$1,676,579 was under the head of conducting transportation, with \$115,264 more increase under taxes and general expenses. In other words, \$2,015,821 of the \$3,807,664 augmentation in expenses represents enlarged outlays for maintenance of way and structures and for maintenance of equipment. The company spent on the equipment in the late year \$4,245,533, against only \$3,033,188 in 1896-97, the addition thus being almost 40 per cent., and for maintenance of way and structures \$4,946,494, against \$4,148,017. Commenting on this, President Hughitt says that these expenditures have greatly improved the physical condition of the property, increased its facilities for doing business, and permanently added to the safety and economy of operation. The figures given, large though they are, do not reflect in full the additions and renewals made. In a number of cases the expenditure of a given amount of money really represented a greatly increased amount of work done on account of a drop in the price of the materials entering into the work. Take the item of new rails purchased and laid in the track. This item actually counted for \$130,552 less than in the previous year, being reported at \$429,010 for 1897-98, against \$559,562 for 1896-97. Yet, as a matter of fact, the smaller outlay for 1897-98 covered 23,554 tons

of new rails, while the larger outlay for 1896-97 covered only 19,222 tons—that is, with a diminished amount of money the company was able to put down an increased amount of rails. In 1896-97 the average cost of the rails to the company was a little over \$29 per ton; in 1897-98 it was not quite \$18.25 per ton."

### THE CANADIAN RATE WAR.

A Montreal telegram quotes an interview with Passenger Traffic Manager McNicoll, of the Canadian Pacific, who says that the investigation by the Interstate Commerce Commission was to discover the cause of the present rate war. The American railways tried to convince the Commission that the cause of the trouble was the differential basis of rates which had been agreed to and had existed for many years, but the Canadian Pacific convinced the Commission that the cause of the war was the illegal underhand cutting by the American lines, not only in the States, but to Canada and Europe, the cuts being far below any differential ever used by the Canadian Pacific. The American lines early in the investigation, fearing that they could not prove their case for the maintenance of rates, endeavoured to work public sentiment against the Canadian roads participating in American travel, and Mr. Clough, vice-president of the Great Northern, made a strong appeal for legislation to debar any Canadian road—the Grand Trunk as well as the Canadian Pacific—from participating in United States Interstate travel, claiming that the same law which applied to vessels in the coasting trade should be made applicable to railways. As the amount of Interstate business carried by the Canadian Pacific is infinitesimal in comparison with that carried by the Grand Trunk and Michigan Central, it was seen that this appeal was going to act as a boomerang to the Grand Trunk, which had been sticking hitherto through thick and thin, and at enormous losses, with the American railways. "I hope," said Mr. McNicoll, "the Grand Trunk will like the position their antipathy to the Canadian Pacific has now placed them in. History repeats itself; they were left in the lurch by their friends several years ago, and should have profited by their experience. The small amount of Interstate traffic carried by the Canadian Pacific, if lost under the proposed arrangement, would be more than made up by what Canadian traffic is now carried through the United States."

### GRAND TRUNK OF CANADA.

This company has issued a preliminary revenue statement for the half-year ending June 30th, 1898, against which we have placed the figures for the corresponding half of last year:—

	1897.	1898.
Gross receipts .....	\$1,722,500	\$1,871,700
Working expenses .....	1,162,600	1,243,900
<b>Net revenue</b> .....	<b>\$559,900</b>	<b>\$627,800</b>
Deduct—Net revenue charges, less credits .....	487,000	490,500
<b>Balance of net revenue</b> .....	<b>\$72,900</b>	<b>\$137,300</b>
Deduct—Chicago and Grand Trunk deficiency for half-year payable by the Grand Trunk Company under traffic agreements .....	\$50,100	\$8,400
Detroit Grand Haven and Milwaukee deficiency for the half-year .....	20,100	22,300
<b>Total deductions</b> .....	<b>\$70,200</b>	<b>\$30,700</b>
<b>Surplus for the half-year</b> .....	<b>\$2,700</b>	<b>\$106,600</b>
Add—Balance brought from previous half-year 10,300l., less appropriated as the contribution for the half-year ending December 31st, 1897, towards the revenue proportion of the expenditure for the reconstruction of the Victoria Jubilee Bridge, 10,000l. ....		
		300

Balance available for dividend .....

The above balance admits of the payment of the full dividend for the half-year of 2l. per cent. on the 4 per cent. guaranteed stock, leaving an amount of about 2,500l. to be carried forward.

### LATEST EARNINGS.

First week of August.—Kansas City Pittsburg and Gulf, \$67,000—increase, \$13,000; Chicago Great Western, \$105,000—increase, \$9,000; Chicago Milwaukee and St. Paul, \$625,000—increase, \$24,000; Denver and Rio Grande, \$157,000—increase, \$18,000; Wabash, \$248,000—increase, \$18,000; Baltimore and Ohio South Western, \$126,000—decrease, \$2,000; Chesapeake and Ohio, \$205,000—decrease, \$19,000; Mexican Central, \$240,000—the same as last year; Missouri Kansas and Texas, \$180,000—decrease, \$32,000; Missouri Pacific, \$460,000—decrease, \$21,000; New York Ontario and Western, \$79,000—decrease, \$7,000; Texas and Pacific, \$106,000—decrease, \$2,000; Wabash (corrected by the company), \$266,000—increase, \$18,000.

Fourth week of July.—Baltimore and Ohio South Western,

\$164,000—decrease, \$30,000; Louisville and Nashville, \$599,000—decrease, \$30,000; Missouri Kansas and Texas, \$275,000—decrease, \$38,000; Norfolk and Western, \$187,000—decrease, \$28,000; St. Louis and San Francisco, \$173,000—decrease, \$1,000; St. Louis South Western, \$130,000—increase, \$14,000; Southern Railway, \$673,000—increase, \$140,000; Texas and Pacific, \$170,000—increase, \$1,000; Cleveland Cincinnati Chicago and St. Louis, \$376,000—increase, \$38,000; Northern Pacific, \$661,000—decrease, \$19,000. The gross earnings of forty-seven roads in the fourth week of July show an increase of 0.88 per cent.

Month of July.—New York Central and Hudson River, gross, \$3,298,000—decrease, \$334,000. Oregon Railroad and Navigation, gross, \$525,000—increase, \$94,000.

Month of June.—Oregon Railroad and Navigation, gross, \$550,000; net, \$235,000—increase, \$70,000; net surplus for the year, \$964,000. Union Pacific Denver and Gulf, gross, \$283,000—increase, \$12,000; net, \$58,000—increase, \$26,000. Oregon Short Line, gross, \$601,000—increase, \$15,000; net, \$320,000—increase, \$6,000. Pacific Mail Steamship Company, gross, \$406,000—increase, \$13,000; net, \$103,000—increase, \$42,000. Wabash, gross, \$1,081,000—increase, \$132,000; net, \$268,000—decrease, \$29,000. Philadelphia and Erie, gross, \$368,000—decrease, \$6,000; net, \$85,000—decrease, \$9,000.

### RAILROAD NOTES.

President Stickney, of the Chicago Great Western Railway, has sent out the following statement for the late fiscal year:—Gross earnings, \$5,386,044; operating expenses, \$3,777,373; net earnings, \$1,608,671. Taxes, fixed charges, and full dividends on the 4 per cent. debenture stock, \$1,366,236; excess, \$242,435. "This excess is equal to a little more than 2 per cent. on the preferred A stock. The operating expenses include, besides other extraordinary expenses, the entire cost of 226 freight cars which were purchased during the year to make good all the cars which have been destroyed and gone out of service from any cause since the organisation of the company. The largest local crop in the history of the company is about ready for the harvest." The gross earnings for the two years 1896-7 and 1895-6 were \$4,680,859 and \$4,709,820 respectively.

A Montreal despatch states that in an interview on Saturday Sir Rivers Wilson said:—"The rate war is a great concern to us, and our earnest hope is that wiser counsels may prevail and a settlement be reached at an early date. I deny the charge that we are responsible for the trouble. We are all desirous of being on good terms with the Canadian Pacific, and the fight is really one between the transcontinental roads. I have no influence with President Hill, of the Great Northern. There is no justification for the Canadian Pacific's demand for differentials; there may have been at one period, but the Canadian Pacific is more than able now to compete on equal terms."

The report of the Chesapeake and Ohio for the year ended June 30th shows:—gross earnings of \$11,789,000—increase, \$1,081,000; net earnings of \$3,806,000—increase, \$385,000; surplus over all charges, \$619,000—increase, \$316,000. The year's earnings have been the largest in the history of the company, and the freight ton mileage shows an increase of 25 per cent. The company has no construction account, and 6 per cent. of the gross earnings have been expended for betterments and additions. The fixed charges for the current year will be \$3,130,000. President Ingolls says that the financial condition of the company is very satisfactory, and the current assets exceed the current liabilities by \$500,000.

The new steamship line between Manchester and Newport News Va., will be called the Manchester Virginia Line, and the service will be fortnightly. The Steamships will be loaded at Newport by the United States Shipping Company, and the Chesapeake and Ohio Railway Company have guaranteed their full support. The service will commence in September, and the first steamship will be the *Manningtree*, 4,500 tons. The Manchester agents are Messrs. Sivewright, Bacon, and Co.; Liverpool, Messrs. Watts, and Co.; and the United States Shipping Company at Newport News and Norfolk.

Default having occurred in the payment of the interest on the Staten Island Rapid Transit Railway Company second mortgage 5 per cent. bonds (guaranteed by the Baltimore and Ohio Railroad Company), due July 1st, 1898, Messrs. Hallgarten and Co. are inviting bondholders to deposit their securities with them in New York on or before the 22nd inst. Messrs. A. Keyser and Co. are prepared to forward bonds to New York for purpose of

deposit under the agreement, of which a copy is to be seen at their offices, 21, Cornhill, E.C.

The report of the Wabash Railroad for the year ended June 30th shows:—Gross earnings, \$13,208,000—increase, \$1,681,000; net earnings, \$3,903,000—increase, \$355,000; net income, \$4,083,000—increase, \$340,000; surplus over charges, \$401,000—increase, \$373,000. In 1896-7 there was a balance of \$28,336, and in 1894-5 a deficit of \$542,907, without paying anything on the preferred A debentures; and in 1895-6 a surplus of \$31,800 after distributing 1 per cent. on the A's.

Messrs. Speyer Brothers notify holders of Denver and Rio Grande Railway Company first mortgage 7 per cent. gold bonds maturing November 1st, 1900, that their offer to supply new bonds at 103, New York terms, will be withdrawn on September 1st next, after which date the price will be 104, New York terms, and that this offer may be modified or withdrawn at any time without further notice.

The *New York Times* states that the president of the New York Central says that the eight fast freight lines operating over the Vanderbilt system will be consolidated into two divisions. This is expected to result in a large saving of expenses, and to reduce the working force of the lines by over one-half. Nothing definite will, however, be announced until Mr. W. K. Vanderbilt's return to New York.

Passenger rates between Chicago, St. Paul, and Minneapolis have been reduced from \$11.50 to \$3. The latter rate has been made some time by the manipulation of through tickets. The St. Paul has taken the initiative, and the other lines have agreed to acquiesce. In Chicago this is claimed to be the result of the Canadian Pacific's competition on through tickets.

A semi-official statement has been published in New York intimating that no dividend is likely to be paid on the 5 per cent. preferred stock of the Atchison Topeka and Santa Fé for a year. It is understood, however, that the directors will agree next October to pay in the following month the full 4 per cent. on the adjustment income bonds.

Messrs. Vivian, Gray, and Company, London correspondents of the Norfolk and Western Railway, have received the following cable from the company's New York office:—"Board of directors have declared a dividend of 2 per cent., payable August 24th. Books will be closed August 15th to 25th."

At the meeting of the board of directors of the Canadian Pacific Railway, held at Montreal on Monday, dividends of 2 per cent. on the preference stock and of 2 per cent. on the common stock for the half-year ended June 30th last were declared, payable on October 1st.

At a meeting of the presidents and traffic managers of the Vanderbilt system of railways held on Tuesday, to consider the plan of consolidation already mentioned, it was agreed that, as far as practicable, all the line agencies west of Chicago and St. Louis be consolidated.

President Fish, of the Illinois Central, and other Western capitalists have applied for a charter for a railroad from West Point, Mississippi, to the coalfields in Alabama. The road will be operated in connection with the Illinois Central.

It is understood that the holders of the St. Paul Minneapolis and Manitoba stock will be offered 125 per cent. in Great Northern preferred stock with the understanding that the issue will be made a 7 per cent. dividend-payer.

The Interstate Commerce Commission has given ten days for the filing of printed arguments, after which it will issue its report in the case heard at Chicago last week.

Last week's east-bound all-freight tonnage from Chicago amounted to 46,000 tons, the Lake Shore line leading with 7,000 tons. Last year, in the corresponding week, 55,000 tons were forwarded.

The final report of the Louisville and Nashville Railroad for the year ended June 30th shows an actual net surplus on income account of \$1,632,990, an increase on last year of \$653,721.

The conference of trunk line managers on passenger rates has led to no definite result.

## General News.

### DIVIDEND ANNOUNCEMENTS.

[The date given in parentheses is that on which the announcement was made.]

**Furness Railway (August 10th).**—At the rate of 2 per cent. per annum, carrying forward 5,062l. For the corresponding half of last year the dividend was at the rate of 1½ per cent. per annum, and 4,824l. was carried forward. The following table shows the dividend for the June half of the past twelve years:—

1898 ... 2 p. cent.	1895... nil	1892... nil	1889... 3½ p. cent.
1897 ... 1½ "	1894... 1 p. cent.	1891... 2½ p. cent.	1888... 2½ "
1896 ... 1 "	1893... 1 "	1890... 4 "	1887... 2 "

**Costa Rica Railway Company, Limited.**—The directors notify that they will make an interim payment of 3 per cent. on the second debentures (being at the rate of 6 per cent. per annum) on September 1st next.

**Maryport and Carlisle Railway.**—At the rate of 6½ (against 6) per cent. per annum.

**Cockermouth Keswick and Penrith Railway.**—At the rate of 4½ (against 4) per cent. per annum.

**Forth and Clyde Junction Railway.**—At the usual rate of 7 per cent. per annum.

**Edinburgh and Bathgate Railway.**—At the usual rate of 5 per cent. per annum.

**Ross and Monmouth Railway.**—At the rate of ½ (against ½) per cent. per annum.

**Brecon and Merthyr Railway.**—Fixed charges down to and including the A debentures.

**Gloucester Railway Carriage and Wagon, 5 per cent., making 7½ per cent. for the year (being the same as for the previous year).**

**Car Trust Investment.**—At the rate of 9 per cent. per annum, making 8 per cent. for the year.

**Millwall Dock.**—At the rate of 2 (against 2) per cent. per annum.

The mysterious telegram to which we referred in this column in our last issue would seem to have emanated from the Taff Vale Railway Company. Like ourselves, many other journals appear to have been mystified by "Surname's" message, with the consequence that only two of last Saturday's London morning papers contained the belated official announcement that the Taff was passing its preference and ordinary dividends for the June half-year. Perhaps the management of the company will see that something more intelligible to the common or garden intellect is sent out six months hence.

### NITRATE ITEMS.

Mr. Robert Harvey, the great nitrate expert—or shall we say nitrate company expert?—as a seller of Lagunas grounds on behalf of himself and partners, and as a would-be buyer of Santiago grounds on behalf of the Liverpool Nitrate Company, appears to have somewhat divergent views as to the value of such properties. In the former case, if we remember aright, nearly a million sterling was asked for and obtained for a few estacas of ground; in the latter case we hear of an offer of 20,000l. for an estate containing millions of quintals of caliche. Needless to say, no "deal" has yet resulted, and the shareholders in the Liverpool Nitrate Company may contemplate the exhaustion of their grounds in a few years' time at the present rate of production—unless Mr. Harvey displays better diplomacy and secures them some new properties.

The Santiago Nitrate Company's contract with the Nitrate Railways Company expires December 31st, 1898, and the interesting question arises whether after that the traffic will continue to go over the Nitrate Railways at 6d. per quintal, plus 1½d. shipping charges, or over the Agua Santa and Caleta Buena Railway at an inclusive charge of 5d. per quintal.

We understand that a meeting of nitrate producers will be held at Iquique about the end of this month to consider proposals for a new combination to come into force on April 1st next, and to run for a period of five years. It is suggested that the output for the first three months shall be restricted to 6,000,000 quintals; but we fail to see how prices will be lifted unless producers can agree to a far wider margin than this between supply and demand.

Once more Nitrate Railway preferred ordinary shares have reached the depths of despondency, and at one time on Thursday the best offer for a small parcel of 250 shares was 2½ per share. From what we hear, however, we should not be surprised if an announcement were forthcoming in the autumn, which should have the effect of bringing about a substantial—though, perhaps, only temporary—recovery.

### LIVERPOOL AND MANCHESTER GOODS TRAFFIC.

The Special Committee, consisting of representatives of the Liverpool Chamber of Commerce, the Mersey Docks and Harbour Board, the City Council, and other public bodies, appointed to consider the question of cheapening the transit of goods between Liverpool and Manchester and the manufacturing districts generally, issued their report on Monday. The labours of the committee have extended over a period of two and a half years, and during that time they have considered a variety of schemes put before them as the most likely to effect the object in view. The commercial community of Liverpool consider that the city has been unfairly treated in the manner of rates by the different railway companies, and this fact, together with the refusal of the companies to concede better terms, was largely responsible for the committee being called into existence. The four principal schemes which have occupied the attention of the committee are Mr. Alfred Holt's plateway scheme, Mr. Calthrop's lorry platform carrier railway, Colonel Holme's goods railway scheme, and Mr. John Wood's tramway scheme. The committee state that they are unanimously of opinion that Colonel Holme's scheme for a goods railway between Liverpool and Manchester contains greater promise as a thoroughly economical and otherwise satisfactory means of conveying merchandise between those centres, as well as between other places in the vicinity of the line, than any of the other schemes submitted to them. The cost of construction, equipment, working, and maintenance, of such a railway would be much less than that of the existing lines, and goods could be conveyed on such a railway at rates not only far below those now charged, but which would leave a loss to the present lines. The committee finally recommend that Colonel Holme's revised scheme for a goods railway should be carefully examined, and if approved of should be adopted, and that steps should then be taken to obtain the effective support of the commercial community to the undertaking. It is pointed out by the committee that in order to ensure the success of the undertaking it is important not only that the necessary capital should be obtained at the lowest possible cost, but also that the railway should not, when completed, fall into the hands or under the control of the existing companies, and to this end it is suggested that the scheme adopted should be placed before the Liverpool and Bootle corporations, and the Mersey Docks and Harbour Board, and their co-operation obtained in guaranteeing the interest on the necessary outlay and in taking measures to ensure the maintenance of the line as an independent concern. Colonel Holme estimates the cost of constructing and equipping the proposed goods railway at 1,610,876l.

### LYNMOUTH LIGHT RAILWAY SCHEME.

An inquiry was opened at Minehead, Somerset, on Tuesday, by the Light Railway Commissioners, relative to an application for powers to construct a light railway from Minehead pier along the coast to Lynmouth. Mr. A. Thomas, Q.C., for the promoters, said a great deal had been urged in the newspapers, especially in London, against the scheme. The whole outcry was due to the supposition that the railway would spoil the natural beauty of the district, but if the Commissioners examined the route they would come to the conclusion that these fears were wholly imaginary. All the representative bodies and all those who lived by their labour were practically in favour of the scheme, and if the inhabitants of a district could not get a light railway of which they were in favour it was a pity the Act had ever been passed. It was objected that the line would spoil the sport of stag-hunting, but as a matter of fact the line, by keeping the deer from the sea, would be very much better for sport. Roughly speaking, the line would cost 87,000l. Mr. G. F. Luttrell, of Dunster Castle, one of the promoters, and other witnesses having given evidence in support of the application, Sir James Szlumper, the engineer to the line, said its length would be 20 miles 3 furlongs. One in forty was the steepest gradient. The route was the only one practicable. In cross-examination the witness said that 13 of the 20 miles of the line would be on a gradient of one in forty, but this covered the journey to and fro. The line would benefit rather than injure the Lynton and Barnstaple Railway. Other witnesses were called, and the promoters' case having closed, the inquiry was adjourned. On the resumption of the inquiry on Wednesday, the Earl of Jersey said the Commissioners did not think that any good purpose would be served by prolonged inquiry. It was clear that the owners of some nine-tenths of the land proposed to be taken were against the scheme, besides which the Commissioners had received, from residents and others interested in the district, representations showing that on various grounds there was strong aversion to it. From the evidence already given, it was clear that over a large portion of the line there would be very little local traffic, and that the line was intended to serve not so much local needs as tourist requirements. That was a reasonable purpose in a case where there was general

support in the locality interested, but that was not the case here, and under present circumstances the Commissioners could not recommend that compulsory powers should be exercised. Mr. Pember, Q.C., said that if he had had the opportunity, he should have cleared the landowners and others whom he represented from the suggestion that there were only four or five persons with selfish views standing in the way of the people and their enjoyment of the scenery of the neighbourhood. The fact was that in nine-tenths of the area to be served by the proposed line, there was absolute aversion to any serious change in the present state of things.

### THE STOCK EXCHANGE SETTLEMENT.

The making-up prices for the principal railway stocks, and the extreme rates of continuation current at the Stock Exchange settlement on Wednesday, are shown hereunder:—

Making-up Price.			Stock.	Continuation rate.
July 12.	July 26.	Aug. 10.

### CHINESE RAILWAY CONCESSIONS.

The Pekin correspondent of the *Times*, telegraphing on August 10th, says:—"The Tsung-li-Yamen has given a formal assent to all the conditions imposed by M. Pavloff with regard to the contract for the Niu-chwang extension railway loan. M. Pavloff demanded that the line should not be mortgaged as security, and that no foreign control or interference of any description should be permitted, even in case of default. These conditions directly conflict with the terms of the signed contract and are designed

to block the completion of the final contract. The Tsung-li-Yamen professes amazement at the terms of the Pekin-Han-kau Railway contract published at Shanghai, and endeavours to cast the responsibility on Li Hung Chang, who conducted the negotiations, and whose Russian sympathies are known. The Chinese admit the importance of the separate agreement appointing as arbitrator in any question in dispute the Minister in Pekin of that country which has the largest financial interest in it. They recognise that this provision gives the Russian Minister absolute power in all disputes. It is, however, officially announced that the contract is still unratified, and that the Belgian Minister is pressing for an Imperial rescript ratifying the contract. It is an obvious fact that the railway is a political and not a commercial undertaking, and is designed against British interests. Her Majesty's Government might at least endeavour to delay the ratification of the contract until the objectionable clauses are revised."

A Renter's telegram, dated Pekin, August 12th, says:—"Notwithstanding the British Minister's protests, an Imperial Edict has been issued finally sanctioning the Belgian loan for the Pekin-Hankow Railroad."

### RAILWAY LAW CASES.

#### BEIRA JUNCTION RAILWAY DEBENTURES.

In the Queen's Bench Division, on Wednesday, Mr. Justice Kennedy gave judgment in a case heard before him several weeks ago involving a number of 6 per cent. debentures of the Beira Junction Railway. The Bechuanaland Exploration Company, Limited, brought an action against the London Trading Bank, Limited, of 12, Coleman-street, E.C., the claim being for the return of twenty of the debentures of 100l. each, or in lieu thereof their value, and damages for their detention. The defence was that the debentures were deposited with the defendant bank in the usual way as security to cover two loans, and that by the negligence of plaintiffs in not registering them they were estopped from denying that they were transferable by delivery. The judgment was an exhaustive one, his lordship quoting many cases, and in the end he decided in defendants' favour, and allowed costs.

#### GREAT CENTRAL RAILWAY COMPANY v. METROPOLITAN RAILWAY COMPANY.

In the Chancery Division on the 5th inst., Mr. Justice North heard a motion by the plaintiffs for an interim injunction raising the questions, amongst others, whether an agreement between the two railway companies made in 1890 had yet come into force, and, if so, what the plaintiffs' rights were under such agreement. By the agreement of 1890 it was provided that when and so soon as the proposed physical connection between the undertakings of the Great Central Company and the Metropolitan Company at or near Quainton-road, Bucks, had been effected and authorised to be open for public traffic, the Great Central Company should be entitled, for the consideration therein mentioned, to run over and use the railway of the Metropolitan Company between Quainton-road Junction and Baker-street. The Quainton-road Junction section had been inspected and passed by the Board of Trade as fit for mineral traffic only, and the plaintiffs had endeavoured to run a coal train along the defendants' line as far as Aylesbury Junction, and from there on to the Great Western Railway line. This was objected to by the defendants, on the ground that the proposed physical connection was the completion of the Quainton Junction section for passenger traffic. The plaintiffs stated that the invariable course was to run goods trains over newly constructed lines for some months until the lines settled down and became fit for passenger traffic. The plaintiffs offered to give the defendants, pending the trial of the action, any undertaking they liked, to pay damages or give compensation to the defendants for running their trains on to the Great Western line. The defendants, however, said they could enter into no arrangement for passing the trains off their line at Aylesbury without arranging with the Great Western Railway Company. After a considerable argument, his Lordship said the questions appeared to him to be extremely difficult, and such as could not be hastily determined, and in any case he would have to reserve his judgment. The motion, therefore, stood over until next sittings.

### NEW COMPANIES AND NEW ISSUES.

[Applications for shares in limited liability companies may be withdrawn by letter—or by telegram, if confirmed by letter—provided the notice of withdrawal reaches the secretary before the shares are allotted.]

#### BRIDGETOWN AND ST. ANDREW'S RAILWAY COMPANY, LIMITED.

This is the title of a company which has been formed, with a capital of 60,000l. in 1l. shares, to adopt and carry into effect an agreement expressed to be made between the Foreign, American, and General Investment Trust, Limited, of the one part and this company of the other part, for the acquisition by purchase or otherwise of the business, undertaking, assets, and liabilities, &c.,

of the Barbadoes Railway Company and the Barbadoes Railway Company, Limited, to work the same, and to construct and maintain any other rail or tram roads, telegraph and telephone lines; as engineers, builders of rolling stock, shipowners, carriers by land and sea, warehousemen, marine, and other insurers; and, further, to acquire any other mines, mining, water and other rights, grants, leases, claims, concessions, options of purchase, alluvial ground, mineral deposits, &c., in any part of the world; to carry on the business of a mining, milling, smelting, and trading company in all its branches; to lay out towns and villages, and to construct and maintain rail and tram roads, wharves, piers, docks, &c. The signatories (who take one share each) are:—C. Schiff, 22, Lowndes-square, S.W.; J. Sebag-Montefiore, Kt., 4, Hyde Park-gardens, S.W.; R. Monckton, 14, Burnt Ash-hill, Lee, S.E.; Lord E. G. Cecil, J.P., 111, Eaton-square, S.W.; C. M. Rose, 3, Throgmorton-avenue, E.C.; W. Trotter, 31, Throgmorton-street, E.C.; H. M. Sells, 110, Cannon-street, E.C. The number of directors is to be not less than three nor more than five; the subscribers are to appoint the first. Qualification, one share. Remuneration as fixed by the company. Registered office: 3, Throgmorton-avenue, E.C.

#### KOOTENAY RAILWAY AND NAVIGATION COMPANY, LIMITED.

This company announces the issue at par of 480,000l. 5 per cent. debenture stock. The company has been incorporated, with a capital of 500,000l., to consolidate and control as one system the Kaslo and Slocan Railroad, and the International Navigation and Trading Company, Limited, and to connect these directly with the Great Northern and Northern Pacific railroads by a line either owned or controlled by this company. The company will therefore own or control the undertaking of the Kaslo and Slocan Railroad, which runs from Sandon to Kaslo on Kootenay Lake; the undertaking of the International Navigation and Trading Company, Limited, which owns the connecting steamers on the Kootenay Lake; the undertaking of the Bedlington and Nelson Railroad Company, formed to construct and operate the railroad from Kootenay Lake to the international boundary; and the undertaking of the proposed American company now being formed to construct and operate the railroad from the international boundary to Bonner's Ferry, at which point it will connect with the Great Northern Railroad. The whole of the stock and securities of the four above-mentioned companies will be acquired by the company, and vested in the trustees for this issue, or their nominees. [There will probably be no need to warn investors against this issue. Their own intelligence will tell them that it is one to be avoided.]

#### YORKSHIRE DALES RAILWAY (SKIPTON TO GRASSINGTON).

A letter of August 5th addressed to the *Leeds Mercury*, and signed by the five directors of this company, states:—"We are much pleased to be able to state that, since the issue of our circular-letter of July 15th—in which we appealed for support in our efforts to obtain funds for the construction of this line of railway, and extended the date for the receipt of subscriptions to this day—the applications received have been most encouraging, so much so, indeed, that we feel ourselves justified in again extending the time. The total amount subscribed is now upwards of 24,000l., and further substantial support on the part of our friends and well-wishers is required to place us in the happy position of being able to announce that the line will be made. We accordingly extend the time for the receipt of subscriptions to the 30th instant. A letter appeared in a recent issue of the *Yorkshire Post* commenting adversely upon the estimate of the cost of the construction of the line. We are advised by the engineer who prepared the estimate that the line, which presents no engineering difficulties, can be constructed for the sum named; upon this score we feel there need be no apprehension."

#### RAILWAYS IN ARGENTINA.

An extraordinary general meeting of the North West Argentine Railway Company, Limited, was held on Wednesday, when the resolutions agreed to at a previous meeting on July 25th for the rearrangement of the capital of the company were confirmed.

The Argentine Director-General of Taxes has ordered his Custom-house inspectors to thoroughly revise the books of the different railway companies, so as to see whether the books are being kept in accordance with the decree of September 29th, 1897, providing for the importation of railway stores.

The death is announced, at the age of fifty-one, of Mr. Nicholas Bouwer, the legal representative in Buenos Ayres of the Central Argentine and the Argentine Great Western railway companies. The *Review of the River Plate*, in referring to this lamentable event, remarks:—"It is with deep regret that we have to record the demise of another English resident of the highest prominence in railway and financial circles, in the person of Mr. Nicholas Bouwer, who died suddenly at his residence in Belgrano on

Friday, July 8th. Mr. Bouwer came to Buenos Ayres in January, 1877, as agent of Messrs. Baring Brothers, and after joining the firm of Samuel B. Hale and Co., now a limited company, he continued to carry on the important interests confided to his care by that important financial house. He also held the posts of legal representative of the Central Argentine and Great West Argentine Railways, and of the Argentine Land and Investment Company, to all of which he has rendered valuable services for many years past. Mr. Bouwer was married to the daughter of Mr. John F. Pearson, the well-known chief of the house of Samuel B. Hale and Co., and leaves a young family to mourn his loss."

Government has ordered the handing over to the Transandine Railway Company of a bond for \$2,000,000 gold on account of the \$6,500,000 for which the guarantee was settled.

The Argentine North Eastern Railway Company has been authorised to open to public service the section between Mercedes and Saladas.

The National Railway Board intends (says the *Review*) to make itself as obnoxious as possible during the few months of life that are left to it. Fines are being inflicted right and left, and the department evidently means to die fighting to the last. "The Buenos Ayres and Pacific Railway has lately been coming in for a fair share of abuse from the Board, which, being dissatisfied with the signalling arrangements on the line and the electric lighting in the cars, ordered the company to go in for block signalling, and incur other heavy expenses. This the manager very naturally refused to do without consulting the board of directors in London, but the railway board will have nothing to do with London, and says that what it orders has to be done at once. We wonder what this wonderful department will be up to next?"

#### PARAGUAY CENTRAL RAILWAY.

The *Times* of Saturday last in its City article remarks:—"During the last year or two an endeavour has been made to improve the position of the Paraguay Central Railway. The line had been allowed to get into very bad condition physically, and all kinds of abuses had crept into its administration, in addition to which the nominal fares for passengers and goods have remained unaltered although the currency in which they are expressed has been enormously depreciated. We are informed that some progress has been made in the direction of improving the working of the line, and at last the board have secured permission to raise the fares gradually to a level at which they represent gold."

Our contemporary might have added that the entire credit of carrying out this important and intricate arrangement with the Government is due to Mr. Cyril Smith, the new general manager of the railway, who has brought his wide knowledge of men and manners in Spanish-American countries to bear upon this question with great success. To Mr. Smith is also due the credit of having effected considerable improvement in the working of the line and an increase in its revenues, concurrently with substantial reductions in the working expenditure, and here, no doubt, Mr. Smith's engineering knowledge and his early training on the Buenos Ayres Great Southern Railway have stood him in good stead.

The following decree, granting permission to raise the tariff, has been published by the Government:—

"Resolution. Asuncion, May 30th, 1898. In view of the former petition presented by the managing director of the undertaking known as the Paraguay Central Railway Company, requesting authorisation to gradually increase the tariff for passengers and goods, fixing as the maximum limit for the collection of the same in gold or its equivalent in paper money what was provided by the executive power August 30th, 1889.

"Considering, I., that the fares fixed in the said tariff are, with little difference, the same as the present, not taking into account the considerable variation of the fiduciary currency for drawing up the present tariff.

"II. That the situation thus created is prejudicial to their own interests, in which the Government is concerned not only as a shareholder but also as guarantor of the capital of the company.

"III. That this circumstance tends to obstruct the proper working of the undertaking, preventing the improvements urgently needed for the better service of the public, as well as the most necessary repairs of the permanent way and the increase of the rolling stock, therefore be it resolved:—

"1. To authorise the management of the Paraguay Central Railway Company, Limited, to make a gradual rise in the tariffs for passengers and goods, as far as putting in force in gold the tariff approved by the Executive Power on August 30th, 1889, taking

as a basis the exchange of 170 per cent., the rate of money at that date.

"2. To give effect to this authorisation, the tariff above mentioned should be considered, converted into gold, as the maximum that can be put into force in its entirety, only over the space of at least three years. When this has been done the rate of gold for the collection of the tariffs shall always be subject to a variation of 70 points under the official rate, in order to keep in relation with the rate at the above-mentioned date, but shall only be taken into account when the fluctuations have reached 20 points at the least.

"3. The future alterations in the tariffs that the management is authorised to make shall only be made by it at intervals of three months, with thirty days' previous notice to the public. Tables in each case determining the tariff for passengers and freights in paper money to be drawn up and hung up in the stations, so that the rates may be collected in accordance therewith.

"There is also approved the modification proposed in the goods tariff, which asks for the inclusion of yerba maté in the first category, and establishes for cotton half the rate stipulated therein.—Let it be known, &c., EGUSQUIZA, RUFINO MAZÓ."

#### SCOTTISH RAILWAY SERVANTS' FRIENDLY SOCIETY.

The thirty-fourth half-yearly report and balance-sheet of this society shows that during the six months 108 new members had been added to the roll, which, at the commencement of the half-year, numbered 3,783, but during the six months 57 withdrew, 85 were expelled, and 16 died, thus reducing the membership by 50, leaving the number now on the roll at 3,733. The financial statement shows the income for the benefit fund to amount to 2,005*l.*, there being one payment less this half-year; and the expenditure, including 186*l.* transferred to the management fund, amounted to 1,573*l.*, making a net gain for the half-year of 431*l.*, enabling a balance to be carried forward to next half-year of 8,791*l.* The amount expended for sick aliment was 1,147*l.*, and the sum paid for death benefit 240*l.*—both items of expenditure being in excess of last half-year. Since its commencement in March, 1881, the society has paid 16,396*l.* as sick aliment, and 3,763*l.* as death benefit. The management fund continues in a satisfactory condition, and has a credit balance of 631*l.* The benevolent fund has also a balance in hand of 206*l.*, while the auxiliary benefit fund has also a credit balance of 67*l.* The most of the spare cash is deposited in safe investments.

#### FOREIGN AND COLONIAL ITEMS.

It is announced from Constantinople that the construction of a new railway line of great economic and strategic importance is about to be begun. The line will unite the railway systems of Bosnia, Herzegovina, Brod-Serajevo, Mostar, and Metkovitch with the ports of Ragusa and Castelnovo in Dalmatia, and will start from Gravosa in the environs of Metkovitch.

The revenue of the Paris Lyons and Mediterranean Railway last year amounted to 16,053,240*l.*, as compared with 15,440,080*l.* in 1896, 15,183,520*l.* in 1895, 14,824,680*l.* in 1894, and 14,461,440*l.* in 1893. The working expenses last year were 7,172,000*l.*, as compared with 6,911,440*l.* in 1896, 6,871,520*l.* in 1895, 7,115,840*l.* in 1894, and 7,579,000*l.* in 1893. The net revenue last year was accordingly 8,881,240*l.*, as compared with 8,528,640*l.* in 1896, 8,312,000*l.* in 1895, 7,708,840*l.* in 1894, and 7,082,440*l.* in 1893. It will be seen that while working expenses have a great tendency to increase on English systems, they have declined during the last five years on the Paris Lyons and Mediterranean; the ratio of expenses to receipts was brought down, indeed, last year to 44½ per cent., as compared with 51 per cent. in 1893.

**Simplon Tunnel.**—The work about to be undertaken by this company will consist of the piercing of a tunnel for a single line railway measuring about 17,730 metres in length, and eventually of another tunnel running parallel with the first at a distance of 17 metres, being, however, in communication with it by means of cross-galleries. The first tunnel, as well as the main level of the second, has to be completed and put into operation five years and a half after the beginning of the piercing. A premium of 5,000*fr.* per diem is promised in case the contractor is ready before the fixed date. Should he, however, be late in his works, he is liable to a fine of the same amount for every day of delay. The total cost of the tunnel with one line and an auxiliary gallery is to be 58,820,000*fr.*, whilst the construction of the second will require 15,000,000*fr.*, to which the company will add 1,220,000*fr.* for the ballasting of the line and general expenses. The cutting of the tunnel—2 to 5 metres per day—will be begun from both ends, and the side gallery is to be constructed at the same time as the principal tunnel.

#### WEST AUSTRALIAN HARDWOODS.

## KARRI & JARRAH

FOR  
SLEEPERS, STAIR TREADS, BRIDGES, PILES,  
PLATFORMS, CHAIR KEYS.

REGISTERED TRADE MARKS:—

Full Particulars and Prices on application to—

#### MILLARS' KARRI & JARRAH FORESTS, LIM.

72, BISHOPSGATE-STREET WITHIN, LONDON, E.C.

Cable advice from Company's Mills gives the output of Karri and Jarrah for the months ending June 30, 1898, as 33,371 loads, or 20,022,800 feet super.

Telegraphic Address—"Jarrah, London." Telephone—290, London Wall.

#### METROPOLITAN RAILWAY CARRIAGE AND WAGON COMPANY, Limited.

SALTLEY WORKS, BIRMINGHAM.

Successors to Messrs. Joseph Wright and Sons.

MANUFACTURERS of RAILWAY CARRIAGES, TRAMWAY CARS  
WAGONS, and RAILWAY IRONWORK of every description. Rail  
way Carriages and Wagons built for cash, or upon deferred payment,  
extending over a period of from three to ten years. A large number of  
Coal, Ironstone, Ballast, and other wagons to be let on hire.

Manufactory and Chief Offices—Saltley Works, Birmingham.

ESTABLISHED 1774.

# BLAENAVON COLD BLAST PIG IRON

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

- No. 1 Foundry.**—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.
- No. 2 Foundry.**—A more Open Quality, used for similar purposes, and largely by nail makers.
- No. 3 Foundry.**—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.
- No. 4 Grey Forge.**—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.
- No. 5 Common Forge.**—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plates, and B.B. Merchant Bars.
- No. 6 Strong Forge.**—A still harder and closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

**MOTTLED.**—Used for Chilled Rolls in tempering; and for other similar purposes. These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4971, Session 1898.

## LANCASHIRE and YORKSHIRE RAILWAY.

At the ONE HUNDRED and TWENTY-FOURTH HALF-YEARLY GENERAL MEETING of the Proprietors of the Lancashire and Yorkshire Railway Company, held at the Company's Offices, Hunt's Bank, in Manchester, on Wednesday, the 10th day of August, 1898—

W. TUNSTALL, Esq. (Deputy-Chairman of the Board of Directors), in the Chair—

The Advertisement convening the Meeting having been read, the Common Seal of the Company was affixed to the Register of Proprietors, and the Report of the Directors was submitted, and by consent of the Meeting taken as read; and the following Resolutions were then passed viz.:

1st. That the Report of the Directors, now read, be received and adopted, and that their proceedings be approved and confirmed; and that the accounts to the 30th June last be passed.

2nd. That Dividends be now declared for the Half-year ending 30th June, 1898, upon the several Stocks of this Company, already issued, at the rates following, viz.:

Of £3 per £100 of Minimum Six per Cent. Preference Stock.

£2 10s. per £100 of Minimum Four-and-a-half per Cent. Preference Stock.

£2 per £100 of Consolidated Guaranteed Four per Cent. Stock.

£1 10s. per £100 of Consolidated Preference Three per Cent. Stock.

£1 10s. per £100 of Three per Cent. Preference Stock, 1897.

£2 10s. per £100 of Ordinary Stock.

All such Dividends to be subject to Income-tax, and to be payable to the respective holders of Stock on the 11th day of August instant.

3rd. That the Directors be authorised to expend not exceeding £348,202 on Capital Account for general purposes.

A SPECIAL or EXTRAORDINARY MEETING was then held, and the following resolution was unanimously passed:—

Resolved—

That subject to the restrictions and conditions contained in the Acts of Parliament hereinafter mentioned, and the Acts of Parliament incorporated therewith, this Meeting doth authorise the Directors of the Company to borrow on mortgage the sum of £482,000, being as to £132,000 the amount which the Company is authorised to borrow under the Lancashire and Yorkshire Railway (Various Powers) Act, 1892; as to £200,000, the amount which the Company is authorised to borrow under the Lancashire and Yorkshire Railway Act, 1893; and as to £150,000, the amount which the Company is authorised to borrow under the "Lancashire and Yorkshire Railway Act, 1894."—That the Directors may raise, from time to time, all or any part of the said sum of £482,000 in addition to the sums which the Company is empowered to borrow by any other Act or Acts of Parliament relating to the Company; and if, having borrowed all or any part of the moneys which they are hereby authorised to borrow, the Company shall pay off the same, it shall be lawful for the Directors to re-borrow the amount so paid off when and as the Directors shall, from time to time, see fit.—That this Meeting doth authorise the raising from time to time of all or any part of the said sum of £482,000 by the creation and issue of Debenture Stock, in accordance with the provisions of Part 3 of the Companies' Clauses Act, 1863, such Stock to be called "Lancashire and Yorkshire Railway Debenture Stock," and to be created and issued on the terms and conditions, and with the rights and privileges, contained in the resolution passed at a Special or Extraordinary Meeting of the Company held on the 14th day of August, 1897.

W. TUNSTALL, Chairman.

The Chairman having left the Chair, the best thanks of the Meeting were unanimously voted to him for his able and satisfactory conduct in the Chair.

C. W. BAYLEY, Secretary.

**WANTED, a TRAFFIC MANAGER,** for the Wirral Railway. Salary £350 per annum.

Applications, with full details of experience and testimonials, to be sent to the Secretary of the Wirral Railway Company, St. John's Chambers, Chester, on or before Monday, the 22nd August, 1898.

## MIDLAND GREAT WESTERN RAILWAY OF IRELAND.

### RESOLUTIONS PASSED AT THE MEETING.

At the ONE HUNDRED and SIXTH HALF-YEARLY GENERAL or ORDINARY MEETING of the Company, held at their Office, Broadstone Terminus, Dublin, on Thursday, the 11th August, 1898.

Sir RALPH S. CUSACK, D.L., Chairman of the Company, in the Chair.

It was proposed by the Chairman, seconded by Capt. Thos. J. Smyth, D.L., resolved—

That the Seal of the Company be affixed to the Register of Stockholders of the Company.

Proposed by the Chairman, seconded by Chaworth J. Ferguson, Esq., J.P., resolved—

That the Report of the Directors and Statement of Accounts, as printed and forwarded to the Proprietors, be received and adopted.

Proposed by the Chairman, seconded by Richard O. Armstrong, Esq., J.P., resolved—

That interest at the rate of 5 per cent. per annum on the Five per Cent. Preference Stock, and of 4 per cent. per annum on the Four per Cent. Preference Stock, be paid for the Half-year ended 30th June last; and a Dividend at the rate of 4 per cent. per annum be declared and paid on the Ordinary Stock of the Company, the warrants for which will be payable on and after the 1st day of September next.

Proposed by the Chairman, seconded by Hon. Richd. A. Nugent, J.P., resolved—

That Sir Ralph S. Cusack, Mr. R. O. Armstrong, and Mr. Philip O'Reilly, the Directors who retire by rotation, be and they are hereby re-elected.

RALPH S. CUSACK, Chairman.

The Chairman having vacated the Chair, and Captain Thomas J. Smyth, D.L., being called thereto, it was—

Proposed by Major J. Wilson Lynch, seconded by Andrew Moore, Esq., and unanimously resolved—

That the best thanks of the Shareholders be and are hereby given to the Chairman, Directors, and officers for their unremitting attention to the business of the Company, and for the satisfactory report this day submitted and approved.

THOS. J. SMYTH, Chairman.

GEO. WM. GREENE, Secretary.

Broadstone Terminus, Dublin, 11th August, 1898.

## FURNESS RAILWAY COMPANY.

NOTICE is hereby given, that the next ORDINARY GENERAL MEETING of the Furness Railway Company will be held at the Offices of the Company, Barrow-in-Furness, on WEDNESDAY, the 24th day of August, 1898, at Two o'clock in the Afternoon, for the transaction of the general business of the Company.

And Notice is hereby given, that the said Meeting will be made SPECIAL for the following purpose:—To confirm the expenditure upon Steamboats during the past Half-year.

By order,

DEVONSHIRE, Chairman.

ALFRED ASLETT, Secretary.

General Offices, Barrow-in-Furness, 8th August, 1898.

## THE CANADIAN PACIFIC RAILWAY COMPANY.

The undermentioned DIVIDENDS have been DECLARED for the Half-year ended June 30th, 1898:—

On the Preference Stock Two per Cent.

On the Common Stock Two per Cent.

The Common Stock Transfer Books will Close in London at 3 p.m. on Friday, 28th August, and in Montreal and New York on Friday, 9th September.

The Preference Stock Books will Close at 3 p.m. on Friday, 2nd September.

All books will be reopened on Monday, 3rd October.

Warrants for the Common Stock Dividend will be mailed on or about the 1st October to Shareholders on record at the closing of the books in New York and London respectively. The Preference Stock Dividend will be paid on Saturday, 1st October, to Shareholders on record at the closing of the books, and the Warrants will be posted from the Company's London Office.

By order of the Board.

CHARLES DEINKWATER, Secretary.

Montreal, August 8th, 1898.

## THE BURMA RAILWAYS COMPANY, Limited.

The Board of Directors of the Burma Railways Company, Limited, is prepared to receive TENDERS for:—

MISCELLANEOUS TOOLS AND STORES.

WHEELS and AXLES for CARRIAGES.

VOLUTE and SPIRAL SPRINGS.

ELLIPTICAL BEARING SPRINGS.

TROLLEY WHEELS and AXLES.

PREPARED ROOFING CANVAS.

Specifications and Forms of Tender can be obtained at the Company's Office, 76, Gresham House, Old Broad-street, E.C.

For each Specification a fee of 10s. will be charged, which will not be returned.

Tenders to be delivered not later than Noon on Tuesday, 30th August, 1898.

By order of the Board.

A. G. BEGBIE, Managing Director.

12th August, 1898.

## AMERICAN RAILWAY SHARES AND BONDS.

THE ENGLISH ASSOCIATION of AMERICAN BOND and SHARE HOLDERS, Limited, Register Shares, Collect Dividends, and Cash Coupons. Shares may be registered either in owners' names or in that of the Association. In the former case dividends are collected by Powers of Attorney (forms supplied at the office), and on shares in Association's name on presentation of the shares certificates. The Association also issues its own certificates good to bearer or registerable, counter-signed by the London and Westminster Bank against the deposit of the original shares. These certificates save great trouble to Executors as they can be distributed, avoiding the expense of sending the original shares and certified copies of Wills to America.

Particulars and Forms may be obtained at the Association's Offices, 51, Great Winchester-street, London, E.C.

JOSEPH PRICE, Managing Director.

T. LINDLEY, Secretary.

## THOMAS CHATWIN, GREAT TINDAL STREET, BIRMINGHAM, MANUFACTURER OF

STOCKS DIES, & TAPS SCREWING MACHINES RIMERS STANDARD CYLINDRICAL GAUGES  
TWIST DRILLS MILLING CUTTERS RATCHET BRACES AND GENERAL TOOLS.

Established in 1849.

Received highest awards at Calcutta, Adelaide, Stockholm, and Melbourne Exhibitions

London: Printed for the Proprietors at 5, Bury-street, W.C., and Published by LIONEL BRIDGLAND, at 2, Exeter-street, Strand, W.C., SATURDAY, AUGUST 13, 1898.

# Supplement TO The Railway Times

No. 3,162.  
Vol. LXXIV.—No. 7.

SATURDAY, AUG. 13, 1898.

[GRATIS.]

## Meetings.

### GREAT NORTHERN RAILWAY.

The half-yearly general meeting was held on Thursday, at King's-cross Terminus; the Right Hon. W. L. JACKSON, M.P., presiding.

The SECRETARY (Mr. William Jatta) read the notice convening the meeting. An analysis of the report and accounts has already appeared in THE RAILWAY TIMES.

The CHAIRMAN then said—Gentlemen, it is my duty, first, to affix the seal of the company to the register of proprietors, which I accordingly do; and it may interest you to know that the number is 24,395, being an increase of 1,481 as compared with last year. Assuming that you will take the report as read, I will call your attention to the accounts, although there is not very much, I think, which calls for any special remark. Starting, first, with the figures appearing in the capital account, the capital powers of the company, as shown in the accounts, remain the same as at December 31st last, and amount to 54,587,151l. These sums include the nominal additions due to the consolidation and conversion of the stock. The expenditure on capital account for the past half-year amounted to 773,183l. The appropriation of this total is roundly as follows:—Expended on lines and works opened for traffic, 281,000l.; on new lines and depots, 355,000l.; working stock, 114,000l.; subscriptions to joint lines, about 42,000l. The amount received on capital account is 892,235l., of which 593,000l. is preference stock, and 275,000l. debenture stock and some amount obtained for premiums. The total receipts on capital account to date are 46,201,915l.; the total expenditure has been 45,628,886l. The balance to the credit of capital is therefore 573,029l. The estimated capital outlay for the current half-year is 700,000l., and it may be roughly appropriated for land chiefly at Manchester, Nottingham, and Leam Valley, 83,000l.; sundry works of the engineer, including widening, 305,000l.; new lines in progress, 192,000l.; working stock, 100,000l., and subscriptions to joint lines, 20,000l. You are asked to sanction expenditure for new works and rolling stock required for the accommodation of the increasing traffic to the amount of 269,082l. You will find the details on page 4 of the report, in paragraph 7. Roughly, they are for new works, 159,000l., and for rolling stock, 110,000l. Coming to the revenue account, the gross receipts for the half-year were 2,527,568l., showing an increase over the corresponding period of last year of 118,184l. It may perhaps be right that I should say that the published accounts were under-published about 20,000l., the fact being that in the last three months—the last two months particularly—the receipts were rather larger than the estimate. As you know, the published figures are always necessarily estimates, because we have no facts, and there was an amount of about 8,000l. which is due to odd days which could not be taken into account in the publication. Therefore, really the published figures were within, you may say, 20,000l. of the total as it appeared. The receipts from passengers, parcels, and mails were 884,900l., an increase of 30,211l. Merchandise, live stock, and minerals gave us a total receipt of 1,252,320l., being an increase of 74,782l. The joint and works lines show an increased receipt of 12,600l., and the gross tonnage of goods shows an increase of 360,461 tons. The mineral traffic shows an increase of 409,610 tons; grain, potatoes, and live stock all show decreases. I may say with regard to these tonnages, both of goods and coal, that they are by far the largest figures we have ever had on the Great Northern, and it is interesting, perhaps, to you to know that although it is what we call the thin half-year, the goods are in excess of the highest figure ever reached for the December half-year, and the coal traffic is within a very little of the highest figure that has ever been reached even in the December half-year, and the December half-year, hitherto, has usually been about 400,000 tons more than the traffic in the June half-year. In the number of passengers carried, there is a total increase of 792,000, of which about 754,000 are third-class. When I say third-class, perhaps I ought to have said that they are neither first nor second class, because, as you know, the third-class includes workmen's trains, which are certainly not carried as third-class fares. The per-centage of classes remains precisely the same. It may interest you to know that of the principal increase in the number of passengers 442,000 are due to London and suburban traffic, 123,000 increase in Yorkshire, 88,000 in the Nottingham district, and 140,000 straight off the main line. It is estimated—I say estimated, because we cannot state exactly the number of journeys, but according to the best estimate we can make—we have carried by workmen's and cheap trains an equivalent of 2½ millions journeys in the half-year. I think you will agree, therefore, that the provision that the Great Northern has made in dealing with that important question has not been inadequate to the occasion. Turning to the expenditure, the total expenditure on revenue account is 1,601,619l., showing an increase of 92,748l. The engineers' expenditure remains at about the same figure. Locomotive power shows an increase of 27,716l., of which about 12,000l. is wages, 7,500l. coal, and 5,500l. engine repairs and renewals. Additional train miles have been run to the extent of 568,752 miles. These additional train miles would account for about 21,600l. of the increased expenditure for locomotive power, the balance, about 6,000l., being due to increased mileage cost, due partly to the larger proportion of goods and mineral trains that have been run during the half-year, and also partly to the increased cost of coal. It is right

that I should point out that the expenditure includes the cost of rebuilding forty engines in the half-year, ten of which are entirely new, and in addition to those forty engines twenty-four engines have been provided with new copper fire-boxes. Carriages and wagons show an increased expenditure of about 10,000l., but this item includes nearly 3,000l. for the additional cost of wagon hire, in order to deal with the increased coal and goods traffic. The traffic expenses show an increase of 32,737l., of which about 27,000l. is for salaries and wages. Rates and taxes are up about 2,300l. The expenses per train mile work out at 30'18d., against 29'89d. last year, being an increase of 0'29d. per train mile. The receipts work out at 48'9d., compared with 48'29d., being a decrease of 0'20d., equal to a farthing per train mile. The percentage of expenses to receipts is 62'76, compared with 61'91, the increase being 0'85. The revenue balance is 925,979l., against 900,543l., an increase of 25,436l.; and, after providing for all fixed charges and the interest on preference stock and 3 per cent. of interest on the ordinary stock, there remains a balance of 37,192l., out of which it is proposed to set aside 21,079l., the equivalent of ½ per cent. on the deferred and A stocks, carrying forward a balance of 16,113l., compared with 4,595l. in the corresponding period of the previous year. That, I think, is all I need say as regards the figures; but I will make one or two observations upon the accounts. I would say, however, that in view of the general results of railways as declared for the half-year, the figures can well, I think, be deemed fairly satisfactory. As regards the accounts themselves, there is very little to call for special remark. You will observe that we have spent rather more than our estimate on capital expenditure during the past half-year. That is due to the fact that we have pushed on with the work, and that we have made more progress than we could have anticipated when we made the estimate. During the current half-year we expect to complete a good many of the large works which we have in hand, which we hope will bring us increased facilities. Of the engineer's expenditure I need say nothing, except that it shows a slight increase. The locomotive expenditure is considerably higher altogether, but that is mainly accounted for by the increased number of miles run and the additional cost of coal. The traffic expenditure figures show a considerable increase, a large proportion of which is in wages, but it is only fair to the traffic department to remind you that there has been a very large increase in the tonnage of goods and coal which have been carried and handled, and also in the number of passengers which has been carried. Of course, the increase in train mileage really means increased labour and increased wages. The mileage increase has been very large, but it has been necessary in order to deal with the growing traffic. The earnings per train mile are nearly, but not quite, maintained. You will observe that that there has been a considerable increase in the coal traffic, and the receipts for the half-year are up 35,000l. The bulk of this, I fear, is due to the fact that there has been a strike in the coal trade in South Wales. It may interest you to know that the increased traffic in coal has come, I may say, entirely from Nottinghamshire and Derbyshire, showing that the expenditure which you sanctioned years ago for making direct connection with that large and important coalfield is now bringing about satisfactory results. I may also observe that we have an increasing traffic from that little line, the Lancashire and Derbyshire, which is handed over to us at Uxford, and which shows, so far as we can judge, a growth which may be expected to continue in the future. We have, as you know, been incurring great expenditure during the past two years in widening lines. A useful portion has already been brought into work, and has been of the greatest assistance to us in enabling us to carry the larger traffic. Without the widened lines it would have been impossible to carry the increased traffic anything like so well as we have carried it. In connection with the increased expenditure on these lines, I feel justified in saying that it looks as though we are beginning to reap some of the benefits which they will bring, and which the additional facilities will enable us to obtain. Now, a word with regard to the dividend. I have mentioned the fact that we have set aside 21,000l., the equivalent of ¼ per cent. dividend on the deferred and A stocks. The board have decided not to recommend the present distribution of this ¼ per cent. dividend which has been fully earned on the deferred and A stocks, and the reasons for this decision may be said to be the two—legality, and the other prudence. As regards legality we are advised that, inasmuch as the deferred and A stocks are not entitled to receive any dividend until the preferred and the B stocks have received their full amount for the year, we should be placed in a very difficult position if we distributed dividends to the deferred and the A stocks in the first half of the year, which the second half of the year may prove to have been improperly distributed. This is a hope, and I trust a well-founded hope; it is only keeping it in hand for six months, when we hope you will get the full advantage of the distribution. As regards the second reason, although, perhaps, you may think that any further reason than legality is superfluous, the Great Central line, as you are aware, has been open for coal traffic, and is expected to be open for goods traffic during the current half-year. Whilst there is no evidence present to us that the current half-year will not be as good for Great Northern shareholders as the corresponding period of last year—traffic returns, as you see, are not only being maintained, but are showing large increases—still the board thought it right to lean to the side of prudence and safety, and I am glad to see that the board's decision in this respect appears to have been received with general approval. It will interest you to know that at Liverpool, where we have a new depôt which was opened about six

months ago, assisted as it is by our own cartage staff there, has resulted in a growing increase of our Liverpool business. We think this will continue. In Manchester, although we have only been at work with our own cartage staff, and only a portion of the large depot we are building there, since July 1st, I am glad to be able to say that the business shows a growing increase in volume; which we also believe will continue. At Nottingham our line connecting with the new station there has made rapid progress. It will be ready very soon, and we can say with confidence that it will be ready before the station is ready to receive us. You will notice that, step by step, we have endeavoured in all respects to keep well ahead as regards the changes that have taken place, and so far we have not been disappointed. As showing the steps taken, I may remind you that last year we ordered seventy new engines to be built outside of Doncaster works. We hope to get delivery of a considerable portion of that seventy during the current half-year, and I shall be very much disappointed if we do not get the whole of them before the pressure comes upon us to run our own passenger trains to Manchester. I only mention those facts to show you that the board have endeavoured to protect your interests by keeping well ahead of events. I want to say one word about the form of accounts. As you are aware, it has been explained on several occasions that the Great Northern proportion of works lines is larger than that of most other companies, and the working of our own goods traffic to Manchester, which began on July 1st, emphasises and accentuates the position, because of the mileage to Manchester 70 miles are worked over the Great Central Company's property. For this working, as you know, we received barely the cost. I mention this now because it may become necessary to consider whether we should not give in the accounts some further information in order to make clear to the proprietors the effect of this additional working. Nothing has yet been decided with regard to it, and no change will be made without the approval of the auditors, I need hardly say, if any change is made at all. In any case, we shall have an account prepared, so as to be able to supply information to what extent the working cost per cent. is affected by the working to which I have referred. I am glad to be able to say, because I remember in this room we are often advised to try and cultivate friendly relations with our neighbours, that I believe the friendly relations existing between the Great Northern and the other companies never were better than they are at present. We have, as you know, agreed with the Great Eastern to make a joint line between Yarmouth and Lowestoft. That line is to be made by a joint committee consisting of the Great Eastern, the Midland, and Great Northern directors, and made with capital provided severally by those three companies. Then, there is a very growing district, and I may say a very beautiful district, along the coast from Cromer southwards. There is a large population at Yarmouth, and there is a tendency, as shown by the traffic, a desire by the people residing in the midland counties and in Yorkshire to reach those beautiful watering places. The arrangements that have been made in a perfectly friendly and amicable way will tend largely to the facilities afforded to the public both from the north and the south of the midland counties to reach those places. That has been done, I think, in a manner to create the least friction, and the least hostility between the companies that is possible. Now, with regard to the future, I think we are justified in taking, I won't say a sanguine, but, at all events, a hopeful view. Our traffics are very large, and sometimes they put a considerable strain upon our officers and the servants of the company, and I should be neglecting what I feel to be my bounden duty if I did not recognise to you, and say to you that the board appreciate the efforts that have been made by the officers and the staff of the company during the half-year, and certainly during this month of August, when the pressure has been greater than has ever been known before on the Great Northern system. We appreciate the efforts that are being made, not only for enabling the enormous traffic to be carried, but to be carried efficiently and well, and to the comfort of the passengers concerned. Broadly, then, I may say, this is the position in which we stand to-day. The figures I have given you show that notwithstanding these important facts, which I would beg you to bear in mind, that we are bearing an interest charge upon nearly 2,000,000*l.* of capital which has been expended on the works which are in progress, and which, therefore, at present are unproductive; that we have been called upon by action which was not of our making to open a great many new agencies where we have to provide cartage staff and a canvassing staff at great cost, and which necessarily, at present, is not producing its full result. Notwithstanding the increased expenses which we have been called upon to bear, we show you to-day a net profit larger than it has ever been before in a corresponding period. (Applause.) We have provided for the payment of the full dividend which was paid at this time last year, and we carry forward an additional balance of 11,000*l.* on the half-year, and this after strengthening every position on the Great Northern, after great expenditure both on road and rolling stock, in order to make its position not only perfect, but also to anticipate the requirements of the future. (Applause.) That, I think, cannot be deemed otherwise than as a satisfactory result for the half-year, especially if you look round and see what have been the results generally of the half-year. And I am glad to be able to say this, that the board, whilst not underrating the difficulties which are in front of us, efforts that will have to be made to continue the growth of the traffic which has now been progressing for so long on the Great Northern system—the board look forward, facing the future, with a full measure of confidence in the continued prosperity of the Great Northern Railway. (Applause.) I now beg to move—

"That the report and accounts, as presented, be accepted and adopted."

Hon. REGINALD A. CAPEL (deputy-chairman) seconded the motion, which was unanimously adopted.

The dividends were then declared.

Mr. LEMARE, in proposing a vote of thanks to the chairman, said he had been in hopes of hearing something regarding the Great Northern and City line now that the company had gone to allotment.

A SHAREHOLDER asked the directors whether it was not desirable to

advertise on the Continent as was done by the London Chatham and Dover and the Midland Company.

The CHAIRMAN said that probably it was true the Great Northern did not advertise so much abroad as the Midland Company. They, however, kept an officer to look after the foreign business, and they had established a good many agencies on the Continent in order to keep the Great Northern before the eyes of the public. They were satisfied that these agencies were doing what they could to make known the facilities afforded by the Great Northern Company. As to the Great Northern and City Railway, the reason he did not mention the subject was because he had no official information with regard to the position of the company. Officially, all he knew was that the Bill they had in Parliament was practically withdrawn. He had heard, unofficially, what Mr. Lemare had mentioned, that the company had gone to allotment, but he really knew nothing except what was known by the general public.

The vote of thanks having been passed,

The CHAIRMAN replied, remarking that the directors gave their best attention to the interests of the company, and they felt that, at the present time at all events, they could stand before the shareholders with some degree of confidence and show that the work which had been done, and which had been so ably assisted by the officers to whom he had referred, had been successful during the past half-year.

### NORTH STAFFORDSHIRE RAILWAY.

The 105th half-yearly ordinary general meeting was held on Tuesday at the Cannon-street Hotel, E.C.; Mr. THOMAS SALT presiding.

The SECRETARY (Mr. R. E. Pearce) read the notice convening the meeting, and the chairman affixed the seal of the company to the register of shareholders. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN then said—Gentlemen, the first resolution is—"That the report of the directors with the accounts appended thereto be, and the same is hereby, received and adopted." Compared with the corresponding half-year of 1897, we show a certain amount of progress. You will observe in the accounts that there is a net increase in the receipts of 13,373*l.*, but, on the other hand, there is an increase in the expenditure of 13,007*l.* The increase in the receipts and the increase in the expenditure are spread over the whole of the works of the railway. Of course, it is not altogether satisfactory that the whole of the increased receipts should be absorbed practically in increased expenditure, but there are many things we have to provide for in these days which did not fall upon our predecessors. We have to provide increased wages for the men, we have to provide more comforts and facilities for the travelling public, we have to deal with constant requirements from the Board of Trade, and we have sometimes to deal with the increased cost of material. All these things mount up, and I think, on the whole, we may be fairly satisfied if we can hold our own, and keep up a moderate and steady dividend. We may be very thankful that our accounts are as good as they are, and I think our engineer would say that we perhaps have erred a little too much on the cautious side of charging a good deal of our expenditure to revenue instead of to capital. But if it is a fault I think it is a fault on the right side, and one which tends in the long run to build up your property, and really to maintain your dividend. ("Hear, hear.") In the traffic department we find quite a new feature, which is rather interesting. On almost every occasion on which I have had the pleasure of meeting you I have told you of the increase in the third-class passenger traffic, both with regard to the number of passengers and with regard to the receipts in money. On this occasion we have a substantial decrease in the third-class. In numbers there are 13,230 less, and in money a decrease of 1,456*l.*; but on the other hand we have an increase in the second-class, which has been unusual. The increased numbers in the second-class are 78,998, and the increase in money is 2,348*l.*, which shows that the policy of reducing the fares in the second-class has had very substantial results. I think that those results tend both to the convenience of the public and to the advantage of your company. Of course it is not a very large matter; it is to a great extent a transfer of third-class passengers to the second-class. On the whole the trade of the district has been fairly good. We are all inclined to grumble, and to hear complaints on this side and on that, but the result of our figures and the constant employment of our staff, carriages, wagons, and so forth, is a sign which you cannot deny that there is a very large amount of trade in the North Staffordshire district. The pottery trade naturally causes us much anxiety, and that arises from the American war; yet as peace is most likely about to be concluded that trade, we hope, will revive. Of course we have always the difficulty of contending with heavily hostile tariffs. In the mineral traffic there is an increase which we hardly expect to maintain, and I think I may add further, which we do not wish to maintain, because we have had a certain amount of traffic in consequence of the Welsh coal strike. It is not large, but we have had some increase of traffic in that direction. With regard to the engineers' department, that department has been very active throughout. We are making progress with the reconstruction of our bridges. All over the line we are replacing the old cast-iron bridges and wooden bridges by the best class of wrought-iron bridges which modern engineering has devised. We have nearly completed the widening of the line between Ashbourne and Clifton, and there are many improvements to the stations and various places which I need not describe in detail, but I may say that that work is in progress, and that we have many other improvements of a smaller or larger character which we shall hope to carry forward in the course of the next few years. In the locomotive department we are spending money upon carriages, engines, and wagons, both upon capital and revenue account, rather freely. We find it necessary, and we believe it to be to our interest, that we should raise the character of our stock throughout. We are also making additions to quantity. Now, so much with regard to the detail of your railway. I will touch just for a minute upon one or two questions of a more general character. You know that we are promoting, with the aid of our friends in the neighbourhood, a light railway in the north of the county of Stafford. We have had long delays and a good deal of trouble with the Govern-

ment departments. I think, perhaps, that was only to be expected, but those difficulties are gradually being overcome, and I hope in the autumn we shall be in a position to find ourselves clear of all preliminary difficulties, and in a position to consider seriously the commencement of the railway. There are other schemes for improvement in the district which I am not in a position at this moment to mention, because they are not in any way developed. At the same time, I am glad to take this opportunity of telling you, and I think it our duty that we should tell you, that we have schemes for various developments and improvements of your line which, when they are put into proper shape and authorised by Parliament, will, I hope, meet your sanction and tend to the advantage both of the public and of your company. There is one matter that has caused us a good deal of trouble and anxiety, but in that respect we are by no means alone—I refer to the Workmen's Compensation Act. We had to go into that matter very carefully, because the question naturally arose whether we should be our own insurers, or whether we should insure for the losses possible under that Act with some large insurance company. We came to the conclusion that it would be best that we should be our own insurers. So far as we can make out without practical experience of the working of the Act, the course that we suggest to you is much less costly than the payment of insurance to any insurance company. The method that we propose is to establish what will be called a suspense fund; but to that suspense fund we shall contribute a certain sum every half-year. The first payment will be seen in the next half-year's accounts, and you will then see the position of the account. I shall be very pleased to give any information about it at that time, but the plan we have adopted is to pay a lump sum into what is called a suspense account, which is really a reserve account, and charge all losses under the Workmen's Compensation Act, and certain other payments which we make for insurance and so forth, to that fund. We have so framed our figures as to prepare for a surplus. I hope we shall find the existence of the surplus we expect a reality. That surplus will, of course, grow up year by year, and if ever it arrives at a large and respectable position, we should be able to deal with it as we find best for other purposes than those we contemplate at present. I call this matter of the Workmen's Compensation Act to your notice specially, in order to explain to you that this is a matter which has been put upon us by Parliament, and which apparently will cause us a considerable expense, and an expense which we are utterly unable to prevent. I do not think I have any other matter which it is my duty to bring before you at this moment. If I have omitted anything I hope that somebody will kindly remind me. We may, as I think, be grateful that, on the whole, we appear to be in a strong and in a prosperous position. Much of that is, I believe, due to the very remarkable business district in which our railway is placed; but it is due to something else besides. It is also due to the extreme loyalty and diligence of all our servants, from the highest to the lowest. ("Hear, hear.") We hear a great deal about the disaffection of railway men, and no doubt they are sometimes very troublesome, but I do believe that the large bulk of our men are thoroughly loyal and are proud of their company. With regard to those who are in the higher places as managers of the company, I am bound to say I can only speak in the highest terms of the work that they do for us, and of the time and labour that they give in promoting your prosperity. (Applause.)

Mr. A. MILLS seconded the resolution.

Colonel JELF considered the station at Ashbourne was a disgrace to the company. To his knowledge there had been no waiting-room for the last thirty-five years, but only a small booking-hall in which the children of the locality congregated to warm themselves by the fire.

The CHAIRMAN said the station at Ashbourne had caused the board much anxiety for a number of years. The reason why nothing had been done to it was that the North Western were bringing a line into Ashbourne, and this company would have a share of their station.

The resolution was then put and carried unanimously.

The CHAIRMAN further moved:—"That dividends for the half-year ending June 30th, 1898, be and are hereby declared at the following rates:—3 per cent. per annum upon the 3 per cent. preference stock, and 4 per cent. per annum upon the ordinary stock; and that the same be paid on and after the 19th inst."

Mr. MILLS seconded the resolution, which was agreed to.

### MIDLAND RAILWAY.

The half-yearly general meeting was held at Derby, on the 5th inst.; Sir GEORGE PAGET presiding.

The SECRETARY (Mr. James Williams) read the notice convening the meeting. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN said—I am sure you will see with a good deal of satisfaction that Mr. McDonald reports that the Somers-town and Camden and Kentish Town works have made such satisfactory progress that they will be opened in the current half-year. This will relieve us to a very great extent in getting into St. Pancras station, and also will give us very good accommodation for the coal at St. Pancras. (Applause.) The engineers also report that good progress has been made in the works at Heysham. I am happy to say that everything has turned out rather favourably for the contractors at Heysham, who are getting on with the works. The material which they have on the ground has turned out to be better than they expected, and if this goes on the good progress which has been made hitherto will be continued. I hope it may be so, for it is very desirable we should have the harbour opened as soon as possible. ("Hear, hear.") The report mentions that while our Bill was in Parliament for making lines to Huddersfield, Halifax, and Bradford, certain alterations were made in consequence of arrangements with the Lancashire and Yorkshire Company, upon which the branch to Huddersfield and Halifax was withdrawn, in view of the Midland Railway Company obtaining access to those towns by connections and by running powers over certain portions of the Lancashire and Yorkshire Railway. The Lancashire and Yorkshire Railway at the same time will receive running powers in exchange over the proposed lines and some part of

the existing lines of the Midland. This will be beneficial to the Midland, as, in the first place, it will do away with the necessity of very considerable capital expenditure, and I hope that by this means we may obtain access to Huddersfield and Halifax perhaps rather more conveniently than we should have done by our own independent line. (Applause.) This will necessitate an application to Parliament in the next session for the lines to connect our railways with those of the Lancashire and Yorkshire. Our Omnibus Bill has also received the Royal Assent, and I do not think I need say much about this. The works authorised are almost entirely in the nature of widenings of our lines, and I can only say with reference to that matter, as I have said very often before, that every expenditure on the widening of our line, in the very busiest part of it, is not only beneficial, but absolutely essential to the proper and safe working of our railway. Then with reference to the Workmen's Compensation Act. Owing to the passing of this Act in 1897, and its coming into operation on July 1st last, a very considerable alteration has had to be made in our friendly society. This is a matter of some importance, and in order that you may properly understand it I must ask you to go back with me to the commencement of the society, in order that I may explain to you the alterations that have been made from time to time in the contributions of the company and in the contributions of the men, as well as in the benefits which have resulted from membership. The society was established in the year 1859, and it was an extension of the Birmingham and Gloucester Railway Friendly Institution. All servants of the company, independent of age, were asked to join this society up to the first four months of its existence. In 1860 those only who were under the age of forty were admitted, and the newly appointed weekday staff who had to do with the moving of the traffic were all required to join the society. At first the company contributed at the rate of 500*l.* a year; in 1867 that was altered to 1,000*l.* a year; and in 1875 to 2,000*l.* a year. This was the rate of contribution by the proprietors of the Midland Railway Company up to the year 1879, the men's contribution being at the rate of 6*d.* per week. In 1879 it was thought advisable to add superannuation to the benefits arising from allowance for sickness, and the proprietors were asked to contribute the amount of 9,000*l.* a year. This was agreed to, and the subscriptions or contributions of the men were to a certain extent altered in this way, that any man joining under the age of twenty-five years paid 7*d.* per week; from twenty-five to twenty-eight they paid 8*d.*; from twenty-eight to thirty-one, 9*d.*; and from thirty-one to thirty-five they paid 10*d.* a week, and none were admitted over the age of thirty-five years. The amount of superannuation that was fixed was 6*s.* per week, on retirement at the age of sixty-five years. With reference to this 9,000*l.* a year, 4,500*l.* of it was the estimated allowance for men who were injured or killed in the performance of their duty. In 1887 this 4,500*l.* a year was altered to a capitation grant of 6*s.* per member per annum; that is to say, the half of it; and it was computed that this 6*s.* per head per annum would be sufficient to pay for the allowance for the men who were injured in the performance of their duty without in any way burdening the funds of the society. This proved to be the case, and this I want to point out to you is a very important matter for this reason: if we had chosen now on the passing of the Compensation Act to recommend you to adopt that Act—you must do it as far as that goes, but I mean adopt it independently of the society—no member of the society would have had any grievance, or have been able to establish a grievance, on the ground that he had been paying his subscription to the society compulsorily, because all the subscription that he paid—it is quite true he did pay compulsorily—went not in any part to those who were injured, but entirely for the sickness and the superannuation. So that he did not pay in any way to the accidents contemplated by the Act; and, as I say, that is very important. We do not propose that you should adopt the Act absolutely, and to give no benefit at all from the Friendly Society, as I will explain. Then the next alteration was in 1893, and then the actuaries having reported that there was a considerable deficiency in the funds of the society, and that they must be strengthened, they recommended very strongly that the 4,500*l.* a year which was paid by the company in contribution towards the sickness and superannuation should be changed in the same way as the other half had been and should be in the nature of a contribution of 6*s.* per member per annum, thus making it 12*s.* per member per annum, or in the year 1897, 16,700*l.* This the proprietors agreed to. According to the last actuarial examination, still further assistance is required to the society; and now we come to the time when this Act comes into force. As you know, the company thereby are compulsorily made to give allowances in cases of men being injured or being killed by accident in the performance of their duty. We have given the very greatest care and deliberation to the question as to what should be our recommendation to you in view of the operation of the Act, with reference to the company as well as to the society; and, in conjunction with the representatives of the men, we have come to a conclusion which I hope will be acceptable to you. We have had many schemes before us. We have considered the question of working the Act and the friendly society together, with the sanction of the registrar, as provided by the Act; but we found so many difficulties in the way that we came to the conclusion, after mature deliberation, that the company must accept the liabilities under the Act, without any reference to the society. We then had to consider whether we should take away altogether the 6*s.* per year capitation grant which applied to accidents, leaving the other 6*s.* to provide for the ordinary sickness and the superannuation; but when we came to consider that, we found that if we did so the men in most cases would be worse off under the operation of the Act than they were under the operation of the Friendly Society. In the first place, they would get nothing at all for the first fortnight that they were injured. We therefore agreed that for that first fortnight they should receive the ordinary sick pay—that is to say at the rate of 12*s.* per week. We found also that in most cases there would be less money payment to the men under the Act after the first fortnight than there would have been under the provisions of the society. When men were injured under the society the allowance to them was 15*s.* a week; under the Act it is half wages. So that you will see at once, to take the case of a man receiving 20*s.* a week wages, if he were injured he would get

10s. a week under the Act; but if he had been injured when the Friendly Society was in force, he would have received 15s. a week. In consultation with the representatives of the men, they suggested that in addition to what the company paid—that is, half the wages—the society should pay 6s. a week in each case where a man was injured; and they suggested also that in case of a man being killed, his representatives should immediately receive 12l. It was pointed out that that was the very time they wanted immediate help, and they suggested that in order to meet this the men themselves should pay an extra 1d. per week. It was found that this extra 1d. per week would probably hold the society harmless, and the men could have this benefit, and therefore we agreed to it in conjunction with the men's representatives. The men have been polled, I believe, on this question, and have agreed to pay the extra 1d. We also considered it very desirable that the superannuation fund should be increased from 6s. to 8s. a week; and we now, therefore, recommend that instead of the 12s. capitation grant which you have hitherto been paying, you should pay 10s. per annum per member, believing that this will give to the members a very large increased benefit, while at the same time it will sufficiently help the funds of the society. There is a great deal of detailed information which I might have gone into with regard to this matter, but it will be difficult to explain, and I am sure it would be wearisome to you to listen to; but I have thought it important to put before you the heads of this matter, in order that not only you, but the men themselves, may be made aware of the new arrangement. Now, taking the accounts on the first page, you will find in Statement No. 1 that the amount of nominal additions to capital by the alterations in the stock has been about 70,000,000l.; it was 104,000,000l., and it is now 175,000,000l. That is a large amount, but, of course, it does not in any way affect the matter of dividend. Then as to Statement No. 2; you will find the stock and share capital showing the proportion. I do not know that I need say much about that. Then the statement of capital raised by loans and debenture stock is very simple. Then you will see by Statement No. 4, page 5, that capital is indebted to revenue to the extent of 728,000l. The details of expenditure during the half-year you will find in Statement No. 5, and the return of working stock in Statement No. 6. I do not think there is anything in those that I need remark upon. Then the total estimated expenditure of capital is 8,206,107l., and this, of course, is a very large amount. It is made up very largely of the lines to Bradford, the line to Stockport, and so on, but I believe everything there is in there will be remunerative eventually to the company. Then turning to the revenue account—traffic receipts—there have been 10,795 more first-class passengers carried than in 1897; and 470,290 more third-class passengers than in 1897. The receipts from first-class have been 1,388l. less, and from third-class 42,553l. more. (Applause.) The season-tickets have been more in number by 2,057, and more in money by 4,946l. The coaching receipts show an increase of 48,471l. The train miles run have been 8,249,510, or 324,604 miles more. The earnings per train mile have been 4d. less. The merchandise receipts show an increase of 69,346l.; the cattle a decrease of 2,025l. Minerals and canals show an increase of 97,113l. The total tonnage conveyed during the half-year has been—Merchandise 7,903,886 tons, or 268,341 tons more; minerals 10,412,436 tons, or 667,542 tons more. The total traffic receipts from all sources show an increase of 212,905l.; the miscellaneous receipts show an increase of 8,338l. Altogether the receipts from all sources show an increase of 219,349l. (Applause.) The working expenses, maintenance and renewal of way, show an increase of 42,458l.; the relaying has been—with 85lb. steel rails 47 miles, and with 100lb. steel rails 34 miles, in all 81 miles, as against 72 miles with 85lb. rails in 1897. The length of single line maintained has been 15 miles more. The locomotive power shows an increase of 55,813l.; the running expenses show an increase of 40,356l.; the cost of coal has been 7s. 2d., or 1½d. per ton more. The repairs and renewals of engines show an increase of 18,211l.; the renewals of engines have been 70, as against 65. The repair and renewal of carriages and wagons show an increase of 17,413l.; traffic expenses show an increase of 68,771l.; salaries and wages are more by 70,742l.; general charges show an increase of 7,218l.; law and Parliamentary a decrease of 768l. Rates and taxes show an increase of 2,559l. Altogether the working expenses show an increase of 196,096l. The rate of working expenses has been 59l. 11s. 1½d., as against 58l. 1s. 5½d., or more by 1l. 9s. 8d. per cent. The traffic receipts are more by 212,905l., the miscellaneous receipts by 8,338l., total 221,243l., from which must be deducted the smaller balance brought into the half-year of 1,894l., making a total of 219,349l. The working expenses are more by 196,096l.; interest and dividend charge on increased capital is more by 24,244l.; the increased balance carried forward 59l., and that makes 220,399l., less the contribution to the Prince of Wales's Hospital Fund 1,050l., or a total of 219,349l. I think, gentlemen, that I may congratulate you fairly on this account. I think it comes out very well, but I should call your attention to two facts; that we have been very much assisted this half-year, in the first place, by comparing with the Jubilee of last year. That caused us considerable loss of revenue. Another thing is that we are benefiting by the misfortunes of our neighbours with regard to the question of this Welsh coal strike. Had it not been for these two circumstances the dividend certainly could not have been maintained, looking at the enormous excess of expenditure that there is from sources which I have over and over again explained.

Mr. CHARLES THOMAS (deputy-chairman) seconded the motion.

Mr. TUCKWOOD asked whether Mr. Hooley, who had been renting rooms for office purposes at the St. Pancras Hotel at the rate of 200l. per week, owed the company anything.

The CHAIRMAN, in reply, said that Mr. Hooley's indebtedness to the Midland Railway Company would have no effect upon the dividend.

The motion was then put to the meeting and agreed to.

The CHAIRMAN—I now move:—

"That a dividend is hereby declared (less income-tax) of 2l. 12s. 6d. on each 100l. of the former consolidated ordinary stock. This will give 1l. 5s. on each 100l. preferred converted ordinary stock, and 1l. 7s. 6d. on each 100l. deferred converted ordinary stock; 1l. 1s. on each 100l. 2½ per cent. consolidated perpetual guaranteed preferential stock; 1l. 5s. on each 100l. 2½ per cent. consolidated per-

petual preference stock, and such of the 11l. shares as have not yet been consolidated. All such dividends to be payable on and after Saturday, August 13th instant."

There used to be a good old custom of paying Midland dividends on September 1st and March 1st. We are getting a long way into the year by paying the dividend on August 13th, but I suppose you will not object to it. ("Hear, hear.") It is hardly desirable, perhaps, that we should go back to September 1st.

The DEPUTY-CHAIRMAN seconded the resolution, which was carried unanimously.

The CHAIRMAN—I beg to move:—"That the annual contribution from the funds of the company to the Midland Railway Friendly Society be at the rate of 10s. per member, as from July 1st, 1898, instead of at the rate of 12s. per member as heretofore, under resolution of February 17th, 1893."

The DEPUTY-CHAIRMAN seconded this resolution also, and it was carried unanimously.

The remaining proceedings were purely formal.

## LANCASHIRE AND YORKSHIRE RAILWAY.

The half-yearly general meeting was held on Wednesday, at Manchester; Mr. W. TUNSTALL (deputy-chairman) presiding, in the absence, through indisposition, of Mr. Armytage.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said—The accounts will show you that we are in a position to recommend you to declare the same dividend that we did twelve months ago—namely, 5 per cent. Our capital chargeable to revenue is 60,463,275l., which shows an increase of 6,258,546l., as compared with this time last year, but as was explained to you in February last, 5,240,012l. of this is a nominal addition, caused by the consolidation of our preference stocks; the actual increase for the past six months is 540,658l. We have expended on capital account for general purposes during the half-year 296,538l., which is 1,574l. more than the estimate, and on new works we have expended 109,117l., principally on the Ship Canal branch, which was opened on March 28th last, widening the line from Salford to Windsor Bridge, Bury connecting line, and widenings in other places, the completion of the carriage works extension at Newton-leath, and the purchase of land for the Manchester loop line. We shall submit a resolution to you asking for your sanction for our estimate of capital expenditure on general purposes during the current half-year, which is 348,202l., and we estimate that our expenditure on new works will be about 143,611l., which includes the unfinished works which I have already mentioned, and others for which we have obtained powers, and which we hope to commence during the half-year. Our available capital powers to meet our future expenditure are 5,034,315l. In accordance with the authority which you gave us, we have from time to time issued 3 per cent. preference stock of 1897, as required, at the market price of the day. At the close of this meeting there will be a special meeting, for the purpose of obtaining your authority to enable us to raise by loan or debenture stock the whole or any part of the sum of 482,000l., which we are entitled to under our Acts of 1892, 1893, and 1894. I will now take you to the revenue account. Our gross receipts amount to 2,476,084l., an increase over the corresponding period of 90,842l., or 3·80 per cent. We have carried 27,519,179 passengers, which is an increase of 2,284,999, or 9·06 per cent. In the first-class there is a decrease of 8,993 passengers and 1,997l. in money, but this is compensated for in the first-class contract tickets, where there is an increase in numbers of 149, and 2,007l. in money. You will remember that you were told at our last meeting that we had revised our second-class fares, and that during the half-year we had an increase of 154,186 second-class passengers, equal to 20·43 per cent., and 7,576l. in receipts, or 28·62 per cent. I am glad to be able to tell you now that during the past half-year we have had an increase of no less than 691,535 passengers, or 91·56 per cent., and 28,953l. in receipts, or 111·76 per cent. You will observe that the money still increases at a greater ratio than the passengers, which proves the popularity of this class for greater comfort and longer journeys. This is the greatest number of second-class passengers that we have carried in any half-year since December, 1878. There has been an increase of 1,602,457 passengers in third-class, or 6·68 per cent.; but there has been a decrease of 6,598l. in receipts, or nearly 1 per cent. This requires explanation, and is brought about by the increased issue of daily workmen's tickets at low fares, which has materially upset the comparison, and, no doubt, a good deal is to be attributed to the migration of the third-class long-distance passengers into the second-class. The total tonnage of merchandise, minerals, and coal we have carried is 10,261,588 tons, an increase of 523,197 tons, or 5·37 per cent.; the average rate per ton is 2s. 9·03d., against 2s. 9·25d. Our expenditure on revenue account has been 1,375,415l., an increase of 62,914l.; the expenses per train mile are 3s. 1·46d., against 3s. 1·43d., or an increase of ·03d. In maintenance of way and works there is an increase of 19,019l. Of this amount 1,300l. is due to advances in wages, about 6,000l. to maintenance of West Lancashire Railway taken over on July 1st last year, 2,000l. additional placed to the credit of relaying, 5,000l. additional placed to the credit of replacement of stations fund, which was explained at the last meeting, and the balance to heavy renewals of bridges and increased cost of rails. In the locomotive department there is an increase of 8,211l.; about 2,500l. of this is in increased wages, and the balance is fully accounted for by the increased mileage which has been run. In the carriage and wagon department there is an increase of 5,127l., which is spread over the various items, and is not out of proportion to the increased stock we have had to maintain. In the traffic department there is an increase of 31,752l.; no less than 12,274l. of this is attributable to advances in wages and shorter hours. There is an increase of 1,041l. in the cost of provender, and 2,524l. in printing; this account also includes the West Lancashire staff, which we have taken over. The other items are generally spread over the account. In general charges you will observe there is a decrease of 2,067l., chiefly caused by ceasing to charge premiums on the buildings and works insured in the company's own Fire Insurance Fund, interest only being credited to the reserve, as was explained to you at the last

meeting; yet notwithstanding this our fund has increased by 2,279l. during the half-year. There is a slight increase of 326l. in the law charges, and a decrease of 2,506l. in the Parliamentary expenses, owing to that amount having been charged on account of special circumstances twelve months ago. In the passenger compensation I am sorry to have to report an increase this half-year of 1,969l., which, as you will no doubt anticipate, arises from the unfortunate accident at Leyland last Whitsuntide. I feel sure that the shareholders, with the directors and officers, entertained the greatest sympathy with those who were injured in that accident. It is hardly necessary, however, for me to inform you, as doubtless you will have made yourselves well acquainted with the circumstances, that it arose from no fault whatever of the management, but entirely from the carelessness of one man, who did not obey his signals. The law has punished him for that offence, and it is not necessary for me to deal further with the matter. There is a slight increase in the goods compensation of 239l., and an increase in the Government duty of 911l., caused by the increase in the second-class traffic. It was mentioned to you at the last meeting that the board were considering the question of dealing with the Workmen's Compensation Act, which came into operation on July 1st. You will observe by the paragraph in the report that we have decided to deal direct with our own servants in respect of all claims which may arise under the Act, and not through any insurance company. No one is able to estimate with any degree of accuracy the amount which may be required for this purpose, but we have every reason to believe that our own staff is capable of dealing with these claims as well as any outsiders. Hitherto our workmen have had an Insurance Fund, to which they subscribed weekly, and to which the company contributed annually the sum of 1,500l. Of course that contribution cannot be continued, but seeing that the Act provides that no claim can be made upon the company for injuries until after the second week following the date of the accident, it has been found necessary to revise the workmen's insurance scheme, so that they may have some means of obtaining assistance during this period, and to enable them to continue other benefits which they received and which are not provided for under this Act. A revised scheme has been approved by the men, and is now in force, and although the company are not contributing to it, they are affording every facility for its effectual working. Since our last meeting the new steamer, called *Duke of Cornwall*, which has been built for the Lancashire and Yorkshire and London and North Western Joint Companies, has been completed, and placed on the Fleetwood and Belfast route. Her trials have been perfectly satisfactory. We have now got four first-class twin-screw vessels on this service, which will complete the fleet, and we hope to carry our full share of the important traffic with the North of Ireland. The excellent train service which is now run, both from our system and the London and North Western Company, in connection with these boats, leaves little undone to make this the most popular route. You have probably seen in the papers that a circular has been addressed to the railway companies by the Board of Trade calling attention to the present means of communication between drivers and passengers. I think we can all admit that in these days of progress in inventions the present system is somewhat antiquated, but it has one advantage, and that is that it is entirely universal, and, consequently, can be used on trains composed of carriages of any railway company. I am glad that the Board of Trade have taken the matter up, and I sincerely hope that before giving their sanction or consent to any system they will insist upon a ruling principle that it shall be operative whenever the carriages of one company are connected with those of any other company; if they do not, and if each company is allowed to use its own particular fad, we shall have a repetition of the mistake which was made some years ago, when an opportunity arose for agreement amongst the companies to use an universal brake. I hope the present chance of agreement will not be missed as it was then. I do not think I have anything more to tell you except that your officers have during the half-year, as indeed always, worked faithfully and energetically in your interests. Although our gross revenue shows a material increase of some 90,000l., yet, looking at the accounts of our neighbours, I feel convinced that it will not be a matter of surprise to you that we have been unable to increase our dividend. The enhanced cost of labour is manifest directly and indirectly in every department; the advances we have conceded to our staff, and the wages on the increased scale for additional staff, consequent upon shortened hours and increased traffic, have absorbed no less a sum than 41,206l. The cost of materials we have had to purchase has been increased from the same cause, and I would also remind you that we have brought into our account from last half-year a balance of 7,695l. less than twelve months ago. These items, together with additional interest on capital, inclusive of the West Lancashire rent-charge, practically dispose of the 90,000l. It is, therefore, satisfactory to realise that notwithstanding these circumstances, we have been enabled to maintain our dividend, and carry forward a substantial balance.

Sir EDWARD GREEN seconded the motion.

Suggestions were made by shareholders that second-class passengers now on the increase through the reduction in fares should be encouraged by further concessions to take week-end tickets to the sea-side; also that their season-ticket terms should be lowered.

The CHAIRMAN replied that these proposals would receive sympathetic consideration, and in regard to a complaint that second-class carriages were deficient in number he explained that more were being built.

The motion was then agreed to and the dividends recommended in the report were declared.

At a special general meeting held subsequently the following resolution was unanimously passed:—

"That subject to the restrictions and conditions contained in the Acts of Parliament hereinafter mentioned, and the Acts of Parliament incorporated therewith, this meeting doth authorise the directors of the company to borrow on mortgage the sum of 482,000l., being as to 132,000l., the amount which the company is authorised to borrow under the Lancashire and Yorkshire Railway (Various Powers) Act, 1832; as to 200,000l., the amount which the company is authorised to borrow under the Lancashire and Yorkshire Railway Act, 1893; and as to 150,000l., the amount which the company is authorised to borrow under the Lancashire and Yorkshire Railway Act, 1894. That the directors may raise, from time to time, all or any part of the said sum of 482,000l. in addition to the sums

which the company is empowered to borrow by any other Act or Acts of Parliament relating to the company; and if, having borrowed all or any part of the moneys which they are hereby authorised to borrow, the company shall pay off the same, it shall be lawful for the directors to re-borrow the amount so paid off, when and as the directors shall, from time to time, see fit. That this meeting doth authorise the raising from time to time of all or any part of the said sum of 482,000l. by the creation and issue of debenture stock, in accordance with the provisions of Part III. of the Companies' Clauses Act, 1863, such stock to be called 'Lancashire and Yorkshire Railway debenture stock,' and to be created and issued on the terms and conditions and with the rights and privileges, contained in the resolution passed at a special or extraordinary meeting of the company held on August 14th, 1897."

### RHYMNEY RAILWAY.

The half-yearly general meeting was held at Cardiff on the 5th inst.; Mr. WILLIAM AUSTIN presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said they met under a combination of depressing circumstances. In addition to the strike, they had the attack of the Bute upon them in Parliament, and there was the misfortune to the district of the passing of the Workmen's Compensation Act, which was a serious blow to all the collieries in South Wales. The greatest of these three misfortunes was, of course, the strike, which, during its continuance, had deprived the company of two-thirds of its traffic. It was a slight consolation, however, that the traffic for the first three months of the year had proved larger than any three months of the company's existence. The receipts for the first quarter of 1894 were 53,000l.; 1895, 52,000l.; 1896, 58,000l.; 1897, 64,000l.; and 1898, 65,977l. This last figure showed an increase of 12,500l. over the receipts in respect of the 1894 quarter, and proved that the earning powers of the line during a normal state of things were as good as ever. As showing the deadness of the traffic produced by the strike, it appeared from the return for the week ended July 30th Messrs. Crawshaw Brothers paid them 3l. 11s., instead of as usually about 600l.; the Dowlais Iron Company, 33l. 6s. 1d., instead of between 900l. and 1,100l.; Nixon's Navigation, 6l. 1s. 9d., instead of 300l. or 400l.; and the Rhymney Iron Company, 48l., instead of about 400l. Referring to the strike, the chairman said it entailed what might almost be called the misfortunes of a civil war, and suggested whether action of this kind should not be put a stop to by the Legislature. If the workmen combined to entirely stop the prosperity of a district in this way it appeared so uncivilised an act that if legislation could put an end to it it would appear that it ought to be done. It should be pronounced unlawful for any parties to combine together to stop the business of the country, for they not only stopped the business in which they themselves were engaged, but they stopped all other businesses with which they were connected, and spread distress of the most lamentable character amongst their fellow-workmen and caused loss to the owners of property. He strongly approved the attitude of the colliery-owners in refusing at any cost to consent to the appointment of an arbitrator, since an employer would have infinitely more to lose by an unfavourable decision in a dispute than the workman, who could go and obtain employment elsewhere. He was in favour of a law being passed to prevent the combination either of the men against the masters or of the masters against the men. A law of this kind would in no way trench upon the liberty of the workman, for it would always leave him free to seek better employment elsewhere. Not a few colliery-owners were looking forward to the day when they might be able to dispose of their property. With regard to the Parliamentary position of the company, one could not help looking to a year ago when they had the chance of getting preference stock at 10 per cent. Certainly the value of their property would have been greater now if they had not been prevented from carrying the arrangement through; and it was also said that their refusal to amalgamate had driven Lord Bute to seek the present extensions. It had been said widely, and he believed with truth, that other parties participated in preventing that arrangement, and whether the shareholders generally repented their opposition it should be a lesson to them to place greater confidence in the directors, since as a united body they were much more likely to prosper. Alluding to the Bute railway scheme, the chairman proceeded to deprecate what he considered as the insufficient protection afforded to existing railway companies, particularly in South Wales, by the sanction too freely given to new and competitive undertakings by Parliamentary Committees composed of members too often ill qualified for their difficult duties. This over-competition was also injurious rather than beneficial to the public; as the state of things in the south-east of England showed. The Rhymney Company, however, still had some crumbs of comfort, for in addition to the record first quarter of the year agreements had been made for securing the traffic of their two largest iron-works and collieries for seven years, with every probability of renewing these agreements for twenty-one years. The Bute scheme would not, if successful, do them the same amount of injury as their neighbours, and they hoped to defeat the greater portion of it. At the same time, it could not be denied that it was a critical time for the company, and it behoved them all to use their influence to prevent the extension and to check the internecine war which was taking place between the different railways in the district.

Mr. J. HUDSON SMITH (Bristol) seconded the motion.

Mr. F. J. BEAVAN (Cardiff) said he could not allow the chairman's remarks anent the strike to pass unchallenged. The country, at any rate, he hoped would not share the chairman's views, for it was neither correct nor fair to describe the men as having combined to stop the collieries. ("Hear, hear.") To talk of making combination on the part of the men unlawful, and to prevent it at the point of the bayonet, or in some such way, was altogether out of keeping with the spirit of the times, and could not be entertained for a moment, and, however much as railway proprietors they might suffer from the strike, it did not help matters to talk in that way, but only inflamed the passions of men, was altogether beside the mark, and calculated to produce a deal of mischief. The views expressed by the chairman were not those generally entertained, and it would be far better if he remembered that he was living in the latter half of the nineteenth century. (Applause.)

Mr. WHITE (Melksham) emphatically denied the chairman's insinuation that the opposition to the amalgamation scheme had been pro-

moted in the slightest degree by any outside interested parties. If the directors were to command the greater confidence of the shareholders, they would have to treat them honestly. If the directors had not endeavoured to "rob" the 6 per cent. preference holders by transferring 1 per cent. on their stock to the Marquis of Bute, the amalgamation would never have been opposed.

Mr. THOMAS DAVIES (Bhymney) on the other hand, expressed complete confidence in the integrity and ability of the directorate, and hoped the amalgamation scheme might be revived and successfully carried through.

The CHAIRMAN, in reply to Mr. White, objected to the expressions applied to the directorate charging them with dishonesty and robbing as altogether unjustifiable. The amalgamation proposal had been made in the best interests of the shareholders.

The motion adopting the report and statement of accounts was then carried.

### BELFAST AND NORTHERN COUNTIES RAILWAY.

The half-yearly general meeting was held on Monday, at Belfast; the Right Hon. J. YOUNG presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said upon the whole he thought the statement of affairs would be considered by the shareholders fairly satisfactory, considering the times and the various difficulties that railway companies had encountered during the past half-year. Their receipts had shown a fair advance. Upon the whole increase of 4,077l. the passenger traffic showed a net increase of 430l. In the expenditure there had been a considerable increase—an increase, he might say, that was spread over the various items of expenditure. The permanent way resulted in over 1,000l. outlay, the locomotive department of 2,200l., the traffic of nearly 600l., while the taxes and general charges, like every other item, had gone up. The locomotive expenses were to be accounted for by the additional price paid for coal and by the additional amount of coal that has been required to be used on account of the larger number of train miles run during the half-year. They had been giving a larger amount of accommodation to the public, giving them more trains, and running them faster. These things could not be done without increased cost, which was not always repaid at the beginning of service, but eventually they hoped it would lead to a larger increase in the receipts. If they examined the expenditure and receipts they would see that the expenditure had more than absorbed the increased receipts. They hoped that this would not always be so. Some of the expenditure, they expected, would turn out to be temporary, but still the additional expenditure had been large, including every item down to wages. However, the result was, considering the figures on the whole, that the board were able to recommend the same dividend as before, 5½ per cent. per annum, 1,000l. being placed to the reserve fund, and carrying forward 4,972l. 14s. 8d. (Applause.) He might remark that this was the fiftieth year they had paid a dividend; they had, indeed, paid a dividend every year since the railway was opened. Regarding the Workmen's Compensation Act, they did not believe that that Act would make any difference in the financial affairs of that company. In looking back over the last five or ten years, so far as they could calculate what the results would have been in case the Act had been in existence during those years, they could not see that any of their employes' meeting with accidents would have improved their positions under the Act as compared with the way in which they had been dealt with by the board of directors. They had declined insurance against the consequences of the Act, believing that they could manage their own affairs, and provide, as they had done in past years, against any probabilities of misfortune that might happen to the company. They had always paid particular attention to the tourist traffic. It had been one of Mr. Cotton's fads to induce people to come from north, south, east, and west, and visit the Northern Counties Railway. Last year they joined an office in London, where tourist tickets could be had for their line and other lines in Ireland. This year they had followed the example of the Great Northern, the London and North Western, and other lines, in opening a ticket-office in Royal Avenue, which they expected would give great convenience to travellers and promote the passenger service of the line. Dealing with the question of pensions, he said that three years ago the shareholders gave the directors power to subscribe to any fund that they might think it right to establish for the benefit of the employes. They took advantage of that provision in creating a pension fund for the employes on the permanent way service. This had been pretty loyally availed of by the men in Mr. Wise's department; and, as a result of this experience, the Board had recently come to the determination of extending the same principle to all the employes in the service, except in the mechanics' shop, where the men were better paid, the employment more of a casual nature, and the men did not engage in the company's service for life, as in the other departments. What they desired was that their employes receiving a weekly wage should be in as good a position as the salaried officers, who were provided for by the superannuation fund established by the Clearing-office, and to which they were subscribers. Under the scheme they proposed, every day labourer receiving his weekly wage would be in a position to know that when he was unfit for work, or had reached a certain age, he would be provided for by a pension. This would give confidence to the men, give them an assured position in old age, and he believed it would be generally accepted as a boon. It was proposed that the company should contribute *pari passu* with the men.

Mr. H. H. McNEILE seconded the motion, which, after a brief discussion, was carried.

### BELFAST AND COUNTY DOWN RAILWAY.

The half-yearly general meeting was held on Tuesday at Belfast; Mr. THOMAS ANDREWS presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said that comparing the half-year ending June 30th last with the

corresponding period of 1897, they found that their receipts had decreased by the sum of 187l. The half-year against which they were comparing was undoubtedly one of the wettest on record, but some of them would be surprised to learn that the last half-year, the one they were now considering, was not very far behind it. There was another potent factor in the reduction of their receipts on this occasion. They would all recollect that in June, 1897, they had the Jubilee week, when their receipts rose by over 1,000l. It was old news now to tell them that the Slieve Donard Railway Hotel was opened on June 21st, and opened to paying visitors on June 24th. The half-year they were now considering had only some four or five days out of their hotel, and that was not worth speaking of. During the erection of that hotel some of their cautious friends told them they were building it too large, and that they scarcely expected to see it filled during their lives, and further that it would have been a great deal better for them to be content with a much smaller structure. However, since the hotel was opened the visitors had been gradually and quickly increasing, so that at the last board meeting, held on Saturday, they received the pleasing intelligence that the hotel was quite filled, with the request that in the circumstances the ticket-office should issue no more tickets for it. The directors visited the hotel yesterday afternoon, and found that not only was it quite full and rooms refused to a number of people who applied for them, but there was every prospect from the bookings of the hotel remaining full for the next two months at any rate. During Saturday and Monday last the directors visited every station on the line, and were very pleased to see the high state of repair in which all the stations were. The stationmasters seemed to be doing their best to keep the stations neat, and prizes had been distributed amongst them for their gardens and the general cleanliness of the stations. He thought they might, therefore, be satisfied, on the whole, with the condition of affairs. Given average fine weather and a continuance of the prosperity of this great city, of which that railway was rapidly becoming the centre, the directors had no fear for the future.

Mr. D. B. LYLE seconded the motion, which, after a brief discussion, was agreed to.

### NORTH EASTERN RAILWAY.

The half-yearly general meeting was held at York on the 5th inst.; Sir J. W. PEASE, M.P., presiding.

The SECRETARY (Mr. C. N. Wilkinson) read the notice convening the meeting. The report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES) were taken as read.

The CHAIRMAN said he believed their accounts showed a larger gross revenue for the June half-year than for any other June half-year since the formation of the united companies. The expenditure on capital during the half-year had amounted to 490,820l. The mileage run had increased in every department. The passenger mileage had increased by 466, goods and coal by 489, and minerals by 408 per cent., with a total increase in mileage of 612,000 miles, or an average on the whole of 4.57 per cent. The gross revenue receipts were 3,900,000l. The first-class passengers had increased in number by 44,000, or 9.6 per cent.; the second-class showed a decrease of 3,400, or nearly 5 per cent.; and workmen and third-class passengers showed a decrease of 25,000, or 0.12 per cent. The total increase of passengers carried was 15,000, with an average increase of 0.07 per cent. The receipts were, however, rather curious. There was an increase on first-class passengers of 4,798l., or 7 per cent.; a decrease in second-class of 95l., or nearly 6 per cent.; and an increase in third-class of 20,000l., despite the decrease in numbers. In goods there had been a decrease of 2.32 per cent. The total goods tonnage was 5,455,000 tons, an increase of 183,520. There had been an increase of 816,000 tons in coal shipment, which amounted to nine millions of tons. In mineral traffic the receipts showed an increase of 54,736l. Having dealt with the items of expenditure, the chairman went on to speak of the general policy of the directors. He said he thought they would agree that the half-year had been a very satisfactory one, although their working expenses had, like the expenses of every other company, crept up. The money had gone in the increased price of materials, and to a large extent in advanced wages and shorter hours. They had endeavoured in various ways to meet the wants of the public, and in the Newcastle district they had adopted a system of workmen's tickets—to include both young men and young women. As to the Workmen's Compensation Act, there was little to say. The directors, of course, intended loyally to obey the law. What the effect of it would be on the funds of the company, or the dividends of the shareholders, no one could tell, but he had never felt that it would be serious. The Act altered the company's system of dealing with their workmen in case of accident, and the workmen were aware of that. They would be provided for under the terms of the Act, but there was a fortnight—he would call it a very bad fortnight—for which no compensation would be paid under Mr. Chamberlain's Act. Therefore the directors had told their men that if they desired the company's co-operation in arranging some mutual scheme to get over the difficulties of that fortnight the directors would be glad to communicate with them, on the ground that the scheme should be a mutual one, to which the shareholders of the company and the workmen would contribute. In order to encourage holiday resorts they had introduced a smaller sample of tourist ticket, which would be available for a certain selected district. For example, a tourist at Scarborough could cover the whole distance between Bridlington and Whitby for 11s. 6d. a week. One gentleman had been so favourably impressed with the scheme that he had already ordered one batch of those tickets, covering 1,831 miles. The one thousand mile tickets retained their popularity. For the convenience of cyclists the company were fitting up vans with a simple and effective contrivance in order that they might carry cycle safely and in as little room as possible. They were also putting up bicycle stables in different places, where for a shilling a week or eightpence a fortnight cyclists could store their machines. He now came to a larger question—that of docks. In former speeches he had alluded to the measures which they had been obliged to take at their various ports in order to accommodate the larger-sized ships with a greater depth of water, and with the facilities required by those ships in order to get in and out of the

ports and to be loaded and unloaded as quickly as possible. The contract for the improvement of the Middlesbrough Docks had been let to Mr. John Scott for 382,000*l.* The works had been designed by the company's consulting engineer, Sir John Wolfe Barry. It was proposed to provide an entrance with 33*ft.* of water on the sills and 80*ft.* wide, and the water area of the dock would be considerably increased. They had provided Hartlepool Docks with a new coal hoist and additional quays for timber—indeed, they had already expended practically in the last few months 120,000*l.* in Hartlepool. He had now to refer to Hull. They would recollect that at the last meeting he informed them the directors had great doubts as to proceeding with the scheme then before Parliament, owing to its reception in Hull. They had proposed to expend on the Victoria Dock 261,000*l.*, on the Western Dock 929,000*l.*, making a total of 1,190,000*l.* When they were told that they could not have the spare land except at a very large price, that the Victoria Dock improvement would be opposed by the Hull Corporation, that the company would be opposed also by the Hull Conservancy Commission, and that they could not have any of these things without consenting to do away with all the level crossings in Hull at an expenditure which was estimated at from 330,000*l.* to 430,000*l.*, which would have brought the total cost of the scheme to 1,500,000*l.* or 1,600,000*l.*—he need hardly tell them that under these circumstances the directors withdrew their Bill. They had now made arrangements with the Hull and Barnsley Company to make a joint dock, and they would go to Parliament with that scheme as an alternative scheme. The future alone could disclose how it would work, but by the scheme they would have one-half of the enlarged dock, managed probably by a joint committee; and they would gratify their Hull friends by not taking more traffic over the level crossings than the present docks produced. He believed himself, but he did not commit his board to this, that they would have to increase the entrance to the Western Dock, which was not now quite suited to the class of ships to which he had alluded.

Sir LOWTHIAN BELL seconded the motion, which, after a brief discussion, was adopted.

The CHAIRMAN then moved that a dividend at the rate of 5*½* per cent. per annum be declared. This was also seconded by Sir LOWTHIAN BELL and agreed to.

### CAMBRIAN RAILWAYS.

The half-yearly general meeting was held on Saturday, at the Euston Hotel; Mr. F. BUCKLEY presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in *THE RAILWAY TIMES*), said it was satisfactory to find that the revenue showed the substantial increase of 5,485*l.* In common with most, if not all, railway companies, they had to report an increase in the expenditure, which amounted to 8,790*l.* Over 2,700*l.* was debited to the cost of coal. Hitherto locomotive coal had been carried over the line free of charge, but the directors had thought it only fair to debit the departments with cost of working, and this during the past half-year had amounted to 2,478*l.* The directors had continued the policy of curtailing the hours of the men, in order that the work might be more efficiently done, and in paying better wages. They had the satisfaction of being assured that the whole of the staff were working under reasonable favourable conditions and with adequate remuneration for their services. The net revenue for the half-year showed a decrease of 3,305*l.* as compared with the corresponding period of last year, and after providing for the full interest on A, B, and C debenture stocks, a surplus of 2,203*l.* was carried forward to the next half-year. During the half-year the directors had issued 32,000*l.* D debenture stock, and it was a satisfactory guarantee of the confidence of the shareholders that this amount had been readily taken up by them without the assistance of the outside public. The expenditure on lines open for traffic amounted only to 1,067*l.*, the directors having determined, as far as was compatible with the interests of the company and the increasing traffic, to keep down the capital expenditure as much as possible. On working stock 27,080*l.* had been spent. The rolling stock of all kinds, as well as the number of engines, had had to be increased. During previous years large amounts had had to be paid to other railway companies for the use of their rolling stock. Two years ago no less than 2,333*l.* was paid in the half-year. Last year the amount had been reduced to 788*l.*, and this year there had been a further reduction to 241*l.* This decrease was due to the additional number of vehicles which had been provided. In one of the statements of accounts there was provision for the expenditure of 8,000*l.* for additional accommodation on lines open for traffic. Additional accommodation would soon have to be provided at Oswestry and Welshpool. The company had spent a very large sum of money at Aberystwith, and the train service, especially during the summer months, was more than sufficient to carry the heaviest traffic that had ever had to be dealt with. The payment for personal injury, under the heading of compensation, amounted to 4,411*l.* Last half-year they carried forward 3,979*l.*, which they then hoped would cover what they should have to pay further in respect of the unfortunate Welshampton accident. They, however, found some of the claims which they thought excessive were very strongly pressed, and rather than have them taken into court they preferred to pay the slight addition above their estimate. He was informed by the general manager that there was now only one small claim outstanding, and it was a source of extreme satisfaction to the directors that they had thus been able practically to dispose of the whole of those claims without having to resort to legal measures. The severe competition with watering places and health resorts in other parts of the country became keener year by year, and the directors were determined to develop the system to the utmost of their ability; and they thought that in providing the splendid service of trains which they were now running between the large towns in the country and the coast and inland watering places, which were so numerous on the line, that they were pursuing a wise policy which would bear fruit. Traffic had been steadily increasing for some years past, and they had no hesitation in believing that when the district became better known, as it deserved to be, there would be a still further and more extensive response from

all parts of the country which would still further justify the step the directors had taken.

Mr. W. B. HAWKINS seconded the resolution, which was carried without discussion.

### BARRY RAILWAY.

The half-yearly general meeting was held at Cardiff on the 5th inst.; Lord WINDSOR presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in *THE RAILWAY TIMES*), said he could not help considering it a very great misfortune to have to meet the shareholders under circumstances different from those which had ever been his lot since the company started. The fact that the directors had found themselves unable to recommend the payment of any dividend on the ordinary stock put them in a position which they had trusted they should have avoided, at any rate for a great number of years. It was not expedient or right for him to make any comments upon the merits of the different sides in the most lamentable labour dispute now going on, and the only remark he wished to make was to assure the shareholders that the directors had been and were fully alive to the absolute necessity of keeping down the expenditure as much as possible. It was the directors' intention to continue this policy, and they fully realised the necessity of doing all in their power in looking carefully after every detail to minimise as much as possible the very serious results which must inevitably follow in consequence of this most unfortunate strike. He took it that so far as they were all concerned there that day the shareholders would consider the action of the directors as satisfactory, and that the board were doing everything to the best advantage of the company. In any case, this would not have been a very favourable opportunity for comparing the receipts of the company with its total capital. As they were aware—for he had mentioned it before—for some time past they had been spending a vast sum of money on capital account, which up to that moment had not had the opportunity of being productive. Under present circumstances, however, this money spent on capital account did not make so very much difference, because the difficulty for finding work now for a great undertaking like the Barry Company was quite apart from any such consideration as that, and if they had been working as they generally had in ordinary times, he thought that their new dock in which so much of this capital had been sunk would have been completed by this time. He had ventured to prophesy that the dock would be ready for opening this summer, and while he thought it might have been, he pointed out it was obviously unnecessary for the directors to make any urgent effort to complete it under present circumstances. They had taken advantage of the slow times to thoroughly overhaul and repair the outer gates. This was a work much wanted, there having been a serious leakage, which he was glad to say was now stopped. As they were doubtless aware, the company had had a Bill which they had intended to promote in Parliament for a line from Cogan to join the Great Western, but that was withdrawn in consideration of arrangements having been made with the Taff Vale Railway to increase facilities for Barry traffic between Cogan and Cardiff, and also in the agreement was an undertaking by the Taff to reduce their charges. The Barry Company had succeeded in obtaining a short line to join the Brecon and Merthyr Railway, and the directors trusted that considerable benefits would accrue to their shareholders when that small railway was completed.

Mr. ARCHIBALD HOOD (vice-chairman), in seconding, endorsed his lordship's statements, and added, with regard to the new dock, that at a preliminary meeting of the directors held that morning in Lord Windsor's absence the engineer had told them that the works would be quite ready for opening in six weeks.

The proposition was carried unanimously and without further discussion.

Mr. ARCHIBALD HOOD then referred to a question put to the directors at a recent meeting by an esteemed shareholder as to the desirability of reducing the qualification for the directorate. A promise had been given that the board would consider the point; but, as they had been so busy with other things, the matter had not been formally discussed. While acknowledging that there was much to be said on this point *pro* and *con.*, he believed it was wiser that directors should have a substantial stake in the concern.

Mr. CORBY having endorsed Mr. Hood's observations,

The CHAIRMAN declared the business of the ordinary meeting closed.

At a special general meeting held subsequently, the directors were authorised to make an immediate issue of 3 per cent. debenture stock to the amount of 50,000*l.*, and of 420,000*l.* new ordinary stock at a premium of 100*l.* per cent. The new ordinary stock will be offered to existing holders of ordinary and deferred ordinary stock in the proportion of 38*l.* of the new stock for every 100*l.* original ordinary stock and deferred ordinary stock. The new stock will be payable in two instalments of 50 per cent. each on the nominal price, the first instalment to be due on October 1st next, and the second instalment on April 1st, 1899.

Mr. HOOD stated that there had been some conversation among the directors with regard to fusion with the Vale of Glamorgan undertaking. More than that he was not in a position to say at the present time. It must be obvious to all that there would be a considerable saving in the expense of management, the two concerns being so closely connected. The directors were not able to propose anything at present, and, therefore, it would be unwise for him to say more.

### VALE OF GLAMORGAN RAILWAY.

The half-yearly general meeting was held on the 5th inst. at Cardiff; Mr. ARCHIBALD HOOD presiding.

The report and accounts (an analysis of which has already appeared in *THE RAILWAY TIMES*) were taken as read and adopted without discussion.

The CHAIRMAN then said that that proceeding exhausted the business of the meeting, but if he had had anything to observe, his mouth would be closed upon the first thing uppermost in his mind. The noble chairman of the Barry Company had just said that he would not

refer to the strike, and he (Mr. Hood) was still less free to make reference, for he was more closely connected with the conflict that was devastating the district. There was, however, one subject to which he might refer, and that was the everlasting viaduct at Porthkerry. ("No, no, not everlasting," and laughter.) That was a subject never absent from his mind. He had no great progress to report, but the directors were not idle on the subject. They had a loop line around the viaduct, and by it continued the passenger traffic whilst the viaduct was being repaired; and the amount of traffic that came upon it showed the propriety of their having made the loop line. ("Hear, hear.") Unfortunately, there was no mineral traffic at present; but the passenger traffic had developed very much, justifying the statement that the existence of a railway developed traffic. He believed it would do so in that district—at any rate, to a considerable extent. The report showed that only 5,332l. had been spent on capital account; but if they looked at the tables, shareholders would find that much more money had been expended. As, therefore, it was not certain who would have to pay that outlay eventually, the sum had been carried to a suspense account. He dared say some of those present might wish to be enlightened upon what had been mentioned re a fusion with the Barry Company. At the present moment, however, he could not say any more than had been said at the other meeting. No definite arrangement had been made; but when one was proposed it would be such as would be equitable to both parties. ("Hear, hear.") By the amalgamation the enterprise could be conducted more efficiently and more cheaply; and he thought every one was prepared to admit that the two concerns were so closely connected that they could very effectively be united.

Mr. C. H. JAMES (Merthyr) said he thought the suggested fusion a very good idea, and he had no doubt it would be carried out on equitable terms to the shareholders of the two companies.

### NEATH AND BRECON RAILWAY.

The half-yearly meeting was held, on Tuesday, at Charing-cross Hotel; Mr. R. P. LAURIE presiding.

The accounts for the half-year ending June 30th, 1898, showed gross receipts, 16,042l. (against 18,343l.); expenditure, 10,844l. (against 11,776l.); net revenue (including 235l. sundry receipts and 56l. brought forward), 5,539l. After payment of full interest on the "first" debenture stock, 2,529l., and on the "A 1" debenture stock, 3,355l., there remained a debit balance of 345l. Mileage—worked by the company, 11½ miles; worked by the Midland, 29 miles; total, 40½ miles. The capital account showed a total expenditure of 1,335,717l.; whilst the receipts had been 1,332,210l.—viz., ordinary stock, 256,230l.; preference stock, 400,402l.; first debenture stock, 4 per cent., 126,454l.; "A 1" debenture stock, 4 per cent., 167,756l.; "A 2" debenture stock, 4 per cent., 159,156l.; B debenture stock, 4 per cent., 222,112l.

The CHAIRMAN, in moving the adoption of the report and accounts, said there had been a decrease of 2,320l. in the gross receipts, a loss upon the half-year to be attributed almost entirely to the coal strike, which had lasted for sixteen weeks at the principal collieries along the company's line. There had been a decrease in the working expenses of 931l., making a net decrease for the half-year of 1,388l. He was glad to say that since the beginning of July there had been a great increase in the traffic of the company, and the season had just begun when anthracite coal would be largely used in the county of Kent both for hop-drying and malting purposes, and there would be a good demand in consequence.

Sir J. W. MACLURE, M.P., seconded the motion, which was adopted.

The CHAIRMAN next moved that Mr. Thomas Holland, of Malvern Links, be elected a director in the place of Sir Edward Watkin, who had retired through old age.

The vote was seconded and agreed to.

## Directors' Reports.

### RHONDDA AND SWANSEA BAY RAILWAY.

The accounts show a gross revenue for the half-year ending June 30th, 1898, of 34,372l. (against 34,739l.), and an expenditure of 20,064l. (against 18,532l.), leaving a profit of 14,307l. Adding balance from previous account, 512l., and sundry credits 38l., the total net revenue is 14,857l. Of this, prior charges absorb 6,845l., and a dividend at the rate of 4 per cent. per annum on the 5 per cent. preference shares 7,739l., leaving a balance of 273l. to be carried forward. Length of line authorised, 37 miles; line open, 28½ miles. The capital account shows an expenditure of 1,137,379l.; whilst the receipts have been 1,106,689l.—viz., ordinary shares, 421,376l.; preference shares, 5 per cent., 444,756l.; 4 per cent. debenture stock, 234,000l.; premiums, 7,557l. The report states:—

"In common with other railways in the district, the traffic has suffered from the unfortunate strike in the coal trade. The directors are pleased to report that an arrangement has been made with the Taff Vale Railway Company for the through working of coaches between Swansea and Cardiff, thus avoiding change of trains at Treherbert. The time thus saved has enabled considerable improvements to be effected in the connections with the Great Western Company's trains to and from places westward of Swansea.

"The construction of the avoiding line from Danygraig to Swansea has been proceeded with, and the permanent way is now being laid. Good progress has been made with the line between your railway near Pontrhydyfen and the South Wales Mineral Railway in the Avon Valley, more than half the work having been executed. A new station, now in course of erection, will shortly be opened at Jubilee-road, Aberavon. The company's new coal tips in connection with the extension of the Prince of Wales's Dock, Swansea, will shortly be brought into use, and may be expected to cause a considerable accession of traffic. The Bill promoted during the present session of Parliament, referred to in the last report, has received the Royal Assent."

### TAFF VALE RAILWAY.

#### CAPITAL.

June 30th, 1898.—The total expenditure to date amounts to 8,793,702l., whilst the receipts have been 8,710,008l., viz.:—

Ordinary stock (dividend limited to 6 per cent. per annum) .....	£5,192,284
Preference stock .....	2,109,311
Debenture stock .....	1,362,258
Premiums (less discounts, &c.) .....	46,155

Balance to debit of capital account, 83,694l. The capital expenditure for the past half-year was 69,736l., of which 43,972l. was on lines open for traffic, 24,686l. on lines in course of construction, and 1,078l. on working stock. Estimated further expenditure—In the current half-year, 59,514l.; in subsequent half-years (uncertain). Capital powers and other available assets, 703,859.

#### REVENUE.

The account for the half-year ending June 30th may be summarised as follows:—

	1897.	1898.
Passengers, parcels, mails, &c. ....	£71,809	£67,211
Goods, minerals, and live stock .....	278,196	191,262
Shipping receipts .....	17,274	9,925
Dock and harbour receipts .....	31,854	19,837
Miscellaneous .....	3,649	3,255

Total receipts .....	£402,782	£291,490
Total expenditure .....	213,736	175,995

Net receipts .....	£189,046	£115,495
Balance from last half-year .....	1,816	2,315
Sundry credits .....	1,204	1,455

Total .....	£192,066	£119,265
Prior charges .....	£56,112	£52,937
Preference dividends .....	39,186	nil
Dividend on ordinary stock .....	*90,865	nil
Balance to next half-year .....	5,903	66,323

\* At 3½ per cent. per annum on the new stock, being equivalent to 8½ per cent. per annum on the old stock.

The receipts for the past half-year show an increase of 111,292l., the expenditure a decrease of 37,741l., and the net receipts a decrease of 73,551l. The ratio of expenses to receipts is 60·38 per cent. (as against 53·06 per cent.).

#### TRAFFIC, &c.

Half-year ending June 30th.	1897.	1898.
Passengers (total number carried) .....	2,823,924	2,632,805
Season-tickets .....	5,142	4,663
Mileage—Lines owned .....	101	101
" Partly owned .....	1	1
" Leased or rented .....	19½	19½
" Foreign lines worked over ...	31½	30½
" Total .....	152½	151½
Train mileage*—Passengers .....	263,491	275,842
" Goods .....	792,838	564,975
" Total .....	1,056,329	840,817

\* Exclusive of piloting, shunting, and assistant engine mileage as follows:—1897: Passenger trains, 35,637; goods and mineral trains, 667,077; total, 1,739,043. Ditto 1898: Passenger trains, 30,619; goods and mineral trains 513,067; total, 1,381,533.

The report states:—

"Mr. Robert Lowe Grant Vassall, who has been deputy-chairman during Mr. Guest's chairmanship, has been elected chairman, and Mr. Russell Rea deputy-chairman, to fill the vacancies consequent on the death of Mr. Guest.

"The gross receipts are 111,291l. less than those for June, 1897. This very large decrease is due to the unfortunate stoppage of most of the collieries and works in the district during the last three months of the half-year. Owing to the uncertainty existing as to the duration of the strike, the directors have not felt justified in distributing the amount usually paid as dividend on the preference stock for the first half of the year, such dividend being contingent on the profits of the whole year.

"It is manifest that, under the circumstances, the directors are unable to recommend a dividend on the ordinary stock of the company.

"The working expenses amounted to 175,996l., or 60·38 per cent. of the gross revenue, against 53·06 per cent. in the corresponding period, leaving, after payment of the fixed charges, a balance to be carried forward to the current half-year of 66,323l.

"The Barry Company's Bill passed both Houses of Parliament, after that portion of the Bill which materially affected your interests as seeking power to construct a railway from Cogan to Cardiff, had been withdrawn. The Bill, seeking power to construct a dock near the mouth of the river Ely, entitled, 'The Windsor Dock Bill,' failed to receive the sanction of Parliament, after passing through the House of Commons. The Bill promoted by the Cardiff Railway Company was strenuously opposed by the Board in both Houses, and was rejected in the House of Lords, except as regards certain short lines in the neighbourhood of Cardiff, which are mainly modifications of lines authorised in 1897. It was considered desirable to withdraw for this session the Bill promoted by the company.

"An application for power to construct a light railway between Cardiff and Penarth was opposed by the board, and was refused, after the holding of an inquiry by the Light Railway Commissioners."

## **GREAT NORTHERN (IRELAND) RAILWAY.**

The half-yearly general meeting was held on Wednesday, at Belfast; Mr. JAMES GRAY presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said—Gentlemen, the accounts presented to you enable us to recommend the payment of a 6½ per cent. dividend for the half-year, the same as this time twelve months, placing 4,000l. to the reserve fund and carrying forward to the present half-year 24,100l.—that is 2,562l. more than for the corresponding period of last year. Having regard to all the circumstances, and looking to the accounts of other railways in Ireland and England, I think these results should be regarded as very satisfactory. Our working expenses show an increase of 6,038l., and amount to 54·39 per cent. of the receipts as against 54·03 per cent. for the corresponding period, 1,557l. of this being due to the increase in the price of coals. We had coals up to the end of June, but owing to the strike the delivery under these contracts was suspended, and we consequently had to look elsewhere for coals, and buy inferior coals at a higher price; so having regard to these circumstances I think the increase of 1,557l. in this respect is moderate. There are also increases in wages owing to shorter hours and larger wages, but the chief increase is in taxes of 2,680l. I think I mentioned to you some time ago that we had a revaluation of the line, the result of which has been to increase the rates and taxes of the company to 13,000l. a year, which is equivalent to ½ per cent. of the dividend of the line. Our line, rolling stock, and stations have been kept in good order during the half-year, and I may say that each year there is a continued improvement, and we intend for the future to go on acting on the same lines of progression, so that in time the stock will be in perfect order. In connection with that matter you will probably have noticed that the traffic on the line has been for some time steadily advancing, and I think we have no reason to suppose that its developing power has yet been exhausted. I find that in the last five years there has been an increase of 98,000l., and we have from time to time been providing accommodation to handle and work this traffic; but we feel that the time has now come when it is necessary to move further in the same direction. First of all, we have made arrangements to double 20 miles of the line, and we are just completing the building of a new large goods store at Belfast. We are also arranging to provide an additional arrival platform, which, I mentioned to you some years ago, would be necessary, and in connection with that we also propose to give further facilities in connection with this arrival platform at the Belfast station. We have also provided, or have arranged to provide, for the construction of an island platform at Portadown, where so many of our trains concentrate, and we are going to expend further sums of money at Dublin, Dundalk, Newry, and other busy stations. I think you will agree that the directors are right in looking ahead and making provision for a larger traffic than we are even at present enjoying, for I think I am right in assuming that so long as there is any prosperity in Ireland this company will get its full share of it. Our tourist traffic for the months of June and July has been very dull indeed; at the present moment it is assuming somewhat larger proportions, and I hope we will pull up a little before the season is over. But we must remember that this year we have not our American friends here, which accounts to some extent for the falling off. The acceleration and more convenient hours of arrival and departure of the day mail trains between London and Dublin ought to stimulate this traffic. At present passengers can leave London at 8.30 in the morning and reach Belfast the same evening at nine o'clock, and of course reaching intermediate stations much earlier. We have the advantage of a through carriage from Kingstown, and also dining-cars and breakfast and luncheon cars throughout the whole journey between London and Belfast. I mentioned to you at the last half-yearly meeting that the directors were considering the question of establishing a pension fund for the wages staff engaged in working the railway, so that the men, when either from ill health or old age, they should be unfit for duty, would have something certain and reliable to fall back upon. We have almost completed the details of the scheme on the basis of weekly contributions to be made by the men and by the company. We hope that the details will shortly be completed, and the scheme be put into operation. To-day we would ask you to do your part by sanctioning the directors in giving a sum to the extent of 1,000l. per annum towards the support of this fund, and I would just say that if our doing this secures the object we have in view, I think it will be well-spent money. In the beginning of the present year a certain discussion took place between your directors and the managers of the Mourne and Woodside Hotels, in connection with the management of those hotels, the result of this discussion and negotiations being that we succeeded in purchasing those hotels for 14,000l., including furniture, plate, and linen. The hotels have not yet been conveyed over to the company, but we hope that they shortly will, and as soon as that is done we contemplate making some improvements and additions so as to increase the attraction and the comfort for the visitors who may use the hotels. The Workmen's Compensation Act came into operation on July 1st, and the directors have determined to meet any liabilities that may arise under it, instead of contracting with outside parties.

Sir W. Q. EWART, Bart., seconded the motion.

Mr. J. R. GARSTIN said he thought the directors should give more information to the shareholders on various points. Did they, for instance, he would like to know, quietly acquiesce in the proposed large increase in the valuation of the line? In regard to the subject of hotels, they had, he thought, already tried the experiment. They had already 22,000l. invested in hotels, and yet a shareholder, turning to the report to ascertain what was being got from these investments, could not gain any information on the subject. Had they earned one single farthing out of them? The directors, he thought, would be developing the traffic by a better means than by hotels if they gave greater facilities for increased traffic. Then, again, he was of opinion that proper measures had not been taken for the supply of rolling

stock. Frequently great inconvenience was caused to the passengers by overcrowding in the carriages; yet only one carriage had been built for passenger traffic in the last year, while eighty-one wagons had been added to the merchandise stock.

Other speakers addressed the meeting, and

The CHAIRMAN, replying to the various questions asked, said the hotels were bought or subscribed to under Parliamentary powers. Rostrevor hotel, the board felt, had not been properly managed for some time, and the railway traffic was suffering in consequence. After discussions had taken place it was felt that the directors had better take over the hotels to which he had referred than continue to subscribe to them. The dividends from hotels they looked for indirectly, and they thought the traffic conveyed over the railways justified them in all they had done in supporting the hotels. The company's reserve fund was employed on the working of the line. They thought that that was better than raising additional capital at interest. As to the carriage accommodation, Mr. Garstin was in error in saying that only one carriage had been rebuilt in the half-year. One carriage only was built at the expense of capital, but a very large number had been rebuilt at the expense of revenue.

Mr. GARSTIN (interposing) said he did not refer to repairs. He had spoken of construction.

The CHAIRMAN (continuing) said the time had come when they thought that their periodical rushes of traffic in the summer required an addition to their stock, and they had made arrangements for the building of additional stock that year. The work had begun at Dundalk, and it was possible that they might go further still than they had at first intended. They wanted all their passengers to travel as comfortably as possible. Coming to the pension fund, he would say that the matter had received a great deal of the attention of the directors. They had sent the figures to an actuary, and had them worked out. The men, no doubt, had to be consulted, and to give their adherence to the proposal before a scheme could be completed, but the directors asked the present meeting to give them power to negotiate with the men, and to subscribe to the extent of 1,000*l.* per annum. There were two classes of subscriptions payable by employees to the fund, a subscription of 2*d.* per week, and a subscription of 3*d.* per week, according to the men's wages. The subscription of 3*d.* would secure an increased pension. It was not yet known how many men would join, or even if the fund would be operative at all, but he would ask the shareholders at the same time to give power to the board to carry out the arrangement to completion if an agreement should be come to. He was willing, if the meeting liked, to withdraw the resolution for another six months, but he did not see what advantage would arise from such an act. The third-class carriages were being rebuilt on a better basis. In some cases the directors were doubling their length, and then they were lighting them by electricity. As to the third-class passengers travelling by the limited mail he had to say that a passenger holding a third-class ticket to or from England was conveyed by the limited mail, but local third-class passengers were not conveyed by it.

The motion was then adopted.

The CHAIRMAN moved that the directors be empowered to contribute annually the sum of 1,000*l.* towards the establishment of a pension fund for the "wages" staff engaged in working the railway.

Sir W. Q. EWART seconded the motion, which was adopted, Mr. Porter alone dissenting.

Mr. J. G. V. PORTER said it was a positive shame to pass such a resolution. Neither the shareholders nor the railway servants had seen it.

The CHAIRMAN—You may not be correct in saying that. We have not gone behind their backs.

The motion was adopted.

### GREAT SOUTHERN AND WESTERN RAILWAY.

The half-yearly general meeting was held on Saturday at Dublin; Mr. J. J. PIM presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in *THE RAILWAY TIMES*), said the receipts showed a substantial increase up to about six weeks from the close of the half-year, but they suddenly dropped in all classes of traffic from exceptional circumstances, which, he believed, were general in the south. The passenger traffic showed an increase in receipts of 1,476*l.*, and in numbers 49,807. The fishing season had been much more prosperous than in the preceding year, and the takings on the carriage of fish had increased by 826*l.* In live stock there had been a decrease of 16,333 in numbers, which was nearly all in pigs. That was due to the strike that took place in June, 1897, in Waterford and Limerick between the bacon-curing firms and their men. It was to be feared that the company could not expect any large revival of this traffic, as foreign competition was getting more keen every year, principally from Denmark. The traffic showed an increase of 16,491 tons, or 4.47 per cent., and in money of 684*l.*, or 49 per cent. This increase was accounted for by a substantial improvement in sundry mill stuffs at Cork. There was a falling off under the head of minerals of 5,619 tons, or 3.62 per cent., and in receipts of 1,429*l.*, or 6.43 per cent., which was more than represented by the lessened tonnage of coals handled during the half-year, this item having fallen off by nearly 7,000 tons, due principally to the disturbance in the trade caused by the strike in Wales. With regard to working expenses the principal increase was in coal—namely, 4,929*l.* over the corresponding period of 1897, which was due to several causes; first, the price of coal was 6*d.* per ton more than in 1897; the increase of 24,633 train miles, and 18,170 shunting miles; and then came the coal strike, which took place last April, and still continued, raising the price of coal for the whole half-year from 13*s.* 4*d.* to 14*s.* 7*d.*; and, lastly, the extra consumption of 3,597 tons, due to the inferior quality of coal they had to use. The first-class dining-car, as promised, had been run since June 1st, and the second-class one since August 1st, but the receipts up to the present were not as good as they would like to see, particularly having regard to the service that was given.

Mr. WILLIAM ROBERTSON seconded the motion, and after some

observations from Mr. K. B. WILLIAMS, Sir JOHN SCOTT, and Mr. WILLIAM LANE,

Mr. OVEREND said he was deputed by the committee of the Stock Exchange to bring a most important question before the meeting.

The CHAIRMAN said there was nothing in the report in connection with the question, but if the shareholders wished to hear him, he (the chairman) had no objection.

A SHAREHOLDER—What is the question?

Mr. OVEREND said it was the question of the adoption by the company of the Forged Transfers Act, by which any company, issuing stocks transferable by instrument in writing should have power to make compensation out of their funds for any loss arising from transfers in pursuance of a forged transfer. The object of the Act was to make the certificates held by shareholders as holders of stock in point of fact what they were in point of language. The certificate stated that the holder was the registered proprietor. If he held by a forged transfer he should be compensated out of the funds of the company.

Sir JOHN SCOTT thought the matter would be rather a reflection on stockbrokers in general.

Mr. J. V. CARPENTER—It does not arise on the report, and we have nothing to say to this.

Mr. BUCKLEY said the matter was one of the greatest importance. It was important that the shareholders and their property should be above suspicion. At the present moment a shareholder might have a certificate for a thousand or ten thousand and not know whether it was his own or not.

Sir JOHN SCOTT said the remedy was to have business done through a respectable broker.

Mr. CARPENTER—It bears the seal of the company, and that is quite sufficient.

The CHAIRMAN said after the Act was passed it was duly considered by the board, and they were not prepared to ask the shareholders to make a pledge that they would adopt the measures contained in the Act, and therefore they did not do so.

Mr. OVEREND said the shareholders were personally concerned in the matter. He was proceeding to state what took place in February, 1892, in connection with the London and North Western Railway Company, when

Mr. JAMES OGILVY, interrupting, said he did not think the matter was one for a general meeting of shareholders.

The CHAIRMAN—Is it the wish of the shareholders to hear Mr. Overend any more?

There being cries of "No, no," the chairman ruled that the matter could not be further discussed.

The motion was then put to the meeting and agreed to, the dividends were declared, and the retiring directors re-elected.

### SPECIAL MEETING.

A special general meeting was then held for the purpose of considering and, if so determined, passing resolutions approving of the proposed amalgamation of the undertakings of the Waterford Limerick and Western Railway Company and the Waterford and Central Ireland Railway Company with the undertaking of the Great Southern and Western Company, upon the terms agreed between the respective boards of these companies; for authorising the directors to subscribe to and take shares in the undertaking of the Fishguard and Rosslare Railways and Harbours Company in a sum of 250,000*l.*; and for the purpose of creating 250,000 ordinary stock of the company in pursuance of the powers of the Fishguard and Rosslare Railways and Harbours Act, 1898; and for authorising the issue of such new stock at such times, in such amounts and manner, on such terms, and subject to such conditions as the meeting shall think fit.

The CHAIRMAN said—It will be within the knowledge of the shareholders that the Fishguard and Rosslare Railway and Harbours Bill, which was recently under the consideration of a Hybrid Committee of the House of Commons, underwent a very searching inquiry, both before that House and also before the Select Committee of the House of Lords, with the result that it has passed into law. The general object of the scheme is to provide a shorter and a quicker route between the South of Ireland, the South of Wales, and the South West and West of England, bringing into connection the Great Western of England, owning the largest mileage in that part of the country, and the Great Southern and Western of Ireland, which two companies stand as guarantors of the interest on the capital to be raised by the Bill, the arrangements being that the works on the Irish side shall be carried out by the Great Southern and Western, and the works on the English side by the Great Western, the two companies working the portions of the system on the respective sides of the Channel. Your directors have gone into this matter, and they are of the belief that a second route between your system and England was desirable under the circumstances, and in the general interest of the South of Ireland; and while the opening up of this route might appear to be somewhat in antagonism to the existing route by Holyhead, they believe that a good deal of new and a considerable traffic will be induced between the South of Ireland generally and the districts in England and Wales that I have mentioned, and that the scheme is calculated to have very far-reaching beneficial effects on this country. The relations between the Great Southern and Western and the London and North Western Companies remain unchanged, but the directors welcome the introduction of a second great English company into the carrying trade of the south of Ireland, and believe that the interest of the Great Southern and Western Company will be to earnestly protect and forward it. So much in regard to the Rosslare Bill. With regard to the amalgamation with the other two companies, the amalgamation with the Waterford Limerick and Western Company is not a matter of recent date. Negotiations between the companies have taken place from time to time, but the boards have only now arrived at the figure which they have agreed to lay before their respective shareholders for their approval. The result will, I have no doubt, be beneficial not only to the districts served by the railways but also to the public at large and to the shareholders.

The following resolutions were then put severally by the CHAIRMAN and unanimously adopted:—

1. "That the proposed amalgamation of the undertaking of the Waterford Limerick and Western Railway Company with the undertaking of the Great

Southern and Western Railway Company upon the terms agreed between the respective boards of these companies, and stated in the appendix to the report of the directors of the Great Southern and Western Railway Company for the half-year ending June 30th, 1898, be, and the same is hereby approved of, and that the directors be and they are hereby authorised to take all necessary steps to carry the same into effect.

2. "That the proposed amalgamation of the undertaking of the Waterford and Central Ireland Railway Company with the undertaking of the Great Southern and Western Railway Company upon the terms agreed between the respective boards of these companies, and stated in the appendix to the report of the directors of the Great Southern and Western Railway Company for the half-year ending June 30th, 1898, be, and the same is hereby approved of, and that the directors be, and they are hereby, authorised to take all necessary steps to carry the same into effect."

3. "That in exercise of the powers conferred by the Fishguard and Rosslare Railways and Harbours Act, 1898, the directors of the Great Southern and Western Railway Company be and they are hereby authorised in the name of the said company to subscribe for and take shares in the undertaking of the Fishguard and Rosslare Railways and Harbours Company in any amount not exceeding the sum of 250,000l."

4. "That in pursuance of the powers of the Fishguard and Rosslare Railways and Harbours Act, 1898, 250,000l. ordinary stock of the Great Southern and Western Railway Company be now created, and that the directors be, and they are hereby authorised to issue such ordinary stock at such times to such persons on such terms and conditions, and in such manner as they may consider most conducive to the interests of the company."

### TAFF VALE RAILWAY.

The half-yearly general meeting was held on Tuesday at Bristol; Mr. R. L. G. VASSALL presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said it was a depressing circumstance that the directors were not in a position to recommend any dividend, either on the preference or ordinary stock, in respect of the past half-year. This, of course, was entirely due to the miserable strike on the coalfield which had existed since All Fools' Day, and covering a period of nineteen weary weeks. He was not going to say one word on the merits of the dispute, but it had to be remembered that they as a railway company were able to employ a large proportion of their employees only when the mines were in operation, and the position with which they were familiar left them helpless. They could only sorrowfully look on. No discussion could take place at that meeting without running the risk of widening the breach and embittering the relations existing between the two parties in the struggle. What was happening on the coalfield, however, was a national calamity, and they could only hope that there would be an early and satisfactory termination of the dispute, resulting in a resumption of work and a gradual return of prosperity to the district. He believed that the troubles which many must have suffered and the lessons taught during the stoppage justified the hope that once over, the trouble would not recur for many long years. The whole of the falling off in traffic during the half-year had occurred in the latter three months, for their receipts in the first three months exceeded those of the corresponding three months of 1897 by an appreciable sum. Referring to the absence of any recommendation of the directors to declare a dividend on the preference stock, Mr. Vassall remarked that, unlike the Act creating Rhymney preference stock, there was no provision in the Taff Act authorising them to pay the first half-year's dividend without regard to the results of the year's working, and the directors had to keep in mind the uncertainty of the period which the strike would cover and the possibilities of its spreading. But for the strike their traffic in the last three months of the past half-year would probably have equalled that for the corresponding period of 1897, and this, together with the receipts for the first three months, would have enabled the directors to recommend as large a dividend as any paid for many past years. In the balance-sheet they would notice an item of 985l. on account of their employees' accident fund. That item would disappear from further accounts in consequence of the operation of the Workmen's Compensation Act, although the directors hoped to continue the arrangements introduced for pensioning off their old servants. A serious objection to the new Act so far as their railway was concerned was that they would be prevented from maintaining a fund which had been of great advantage to their men in cases of accident disabling them for less than fourteen days, in respect of which no provision was made by the Act. Proceeding to deal with recent private Bill legislation, the chairman described the negotiations conducted with the Barry Company, resulting in the latter withdrawing that part of their Bill relating to the construction of an independent line from Cogan to Cardiff, and undertaking not to make any similar application in consideration of Taff granting them further facilities for the traffic taken over Taff lines. As to the Windsor Dock Bill, promoted in Parliament three times, the Bill had failed to pass through the Committee of the House of Lords, although in the past session it did pass through the House of Commons' Committee. Notwithstanding this rebuff, they thought better justice would have been done if the company had not been refused leave to construct the dock, so as to meet the larger demands for shipment in respect of the output of the Glamorganshire Valleys. Dock extensions for that purpose had been granted to Bute and Barry, thus putting them in a position to monopolise the increase. Although stronger evidence was given in the Lords' Committee than that which satisfied the other House, the former rejected the Bill, to the directors' great regret. The Bill promoted by the Cardiff Railway Company was strenuously opposed by the Taff board, and its rejection in the Lords—except in so far as certain short lines in the neighbourhood of Cardiff were concerned—was due, he believed, to the evidence of their general manager. Too great praise could not be given to their manager for the exertions he had made through the long and anxious time covered by the consideration of the Bills in both Houses. When they remembered the importance of the Bills and the length of time they were under notice, together with the illness of their late chairman and the disastrous effects of the strike, the shareholders would, he was sure, extend the same sympathy to Mr. Beasley as was felt by every member of the board. Every effort had been made by their rivals to find a joint in his armour, but each effort had entirely failed, no sin of commission or omission having been proved. With regard to the future, he could

only say that their board was determined to defend their position, and promote the just claims of the company. They had not been the aggressors, and were not responsible for the state of war which to the present had existed, and they were still, as they had always been, ready to concur in any fair arrangement for the cessation of hostilities. He was glad to state that the name of Guest was not to disappear from their board. Sir John Guest was the first chairman of the company, and his son first died in that position. Now, the grandson, the Hon. Ivor C. Guest, eldest son of Lord Wimborne and future head of the family, had (at a meeting of the board that day) been elected a director, and he believed the shareholders would consider this an acquisition to the board.

Mr. C. THOMAS seconded the motion, which was agreed to. The remaining business was merely formal.

### PORT TALBOT RAILWAY AND DOCKS.

The half-yearly general meeting was held on Wednesday at Port Talbot; Colonel J. R. WRIGHT (deputy-chairman) presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an abstract of which has already appeared in THE RAILWAY TIMES), said when they last met he expressed himself to the effect that if the returns continued as favourable as they then were he should be satisfied as to the success of the undertaking. The returns for the two succeeding months were still more favourable than those of January last, which occasioned that opinion. Since then there had been a gradual falling-off, consequent on the strike. Still, with all this against them, it was a pleasure for the directors to report that the earnings of the company had not only been sufficient to pay the current preferential dividend, but that a balance of over 1,000l. was carried forward, which would be available for the next dividend. To show what the strike had meant to the company, in March a tonnage of 42,000 tons was dealt with, and the receipts from the carriage of coal and coke alone amounted to close on 1,200l. In April, when the strike commenced, the tonnage dropped to 29,000 tons, and the receipts from coal and coke to 539l., or a decrease of over 50 per cent. A very cheering item was the passenger traffic receipts. Trains commenced running on February 14th, and from that date to June 30th over 26,000 passengers were carried. Although the receipts from this traffic had fallen somewhat since the strike, the decrease was so small that the directors had great hopes of a good revenue from the traffic after the strike. The directors regretted the non-completion of the dock, as at the last meeting it was confidently expected that by last July steamers of 3,000 tons burthen could be dealt with. It was some satisfaction to be able to say that he was assured by the chiefs of all the departments concerned that in September they would be able to deal with vessels of 3,000 tons burden, whether export or import cargoes. The new dock would be actually completed as soon as the dam separating it from the river had been removed. The gates and lock were now workable, the inner dam connecting the old dock with the new dock was being cut through, and in a month vessels would be able to go through the new lock to the tips. The north pier was practically completed, and the progress on the south pier was much more satisfactory than it had hitherto been. A Porthcawl reporter a few days ago sent a statement to a news agency which was published by most of the leading papers to the effect that from 300ft. to 400ft. of one of the piers had been destroyed. This was absolutely untrue, the only foundation for the report being that some cement freshly laid had been washed away before it had time to set. This was the whole damage done. The Ogmere Valleys extension line was practically completed, and the company was working traffic on it and delivering to the Great Western Railway at Margam Junction, and as soon as the latter company had completed the erection of the signal box in course of erection at Cefn the junction would be made and through trains run by the Great Western Railway Company direct to the docks from places on the Great Western Railway system which were not served by the Port Talbot Company. They expected this would be completed in about a month. The South Wales Mineral Junction Railway was almost ready for handing over by the contractors. It was reasonable to believe that a substantial increase of traffic would result on the opening of these two railways. The portion of railway No. 1 between Duffryn-yard and Copper Works Junction and railway No. 7 between Copper Works Junction and Margam Junction (connecting with the Great Western Railway) was opened for mineral traffic on the 10th inst. This enabled the company to make delivery direct to the docks from the Duffryn and Garw Valleys without having to pass over the Rhondda and Swansea Bay, which meant a considerable saving. It must be self-evident to all that owing to the delay in completion and the strike it was advisable to defer the issue of the debentures, hence the arrangement for temporary loans. The directors would issue the debentures at the most favourable opportunity for the benefit of the shareholders.

Colonel FRANKLEN seconded the motion, which was agreed to.

Mr. Edward Knox was appointed secretary at a salary of 300l. a year as from May, 1898.

A resolution was passed authorising the directors to raise temporary loans consequent on the deferment of issuing the debentures.

### PRETORIA-PIETERSBURG RAILWAY.

The third ordinary general meeting was held on Thursday at the offices, 13, Austin-friars, E.C.; Mr. ALEXANDER L. SECRETAN presiding. There was a very small attendance.

The accounts for the year ending June 30th, 1898, showed a capital expenditure of 1,112,122l., of which 718,049l. took place during the year. The receipts were 1,074,000l.—viz., 495,000l. from the issue of ordinary shares and 579,000l. from the issue of debentures. There had also been issued 5,000 fully paid ordinary shares of 10l. each in payment for the concession. The report stated:—"The board do not propose to submit detailed audited accounts for this period, but in future to close the accounts of the company on December 31st in each year, this date having been fixed by the Government of the South African Republic as the termination of the financial year. The progress in the works of construction during the period under review has been in every way satisfactory. A copy of the chairman's report to the directors, after his return from visiting the Transvaal, giving a statement of the

amongst the shareholders, your directors propose only to deal in this report with matters which have occurred since then. The total length of the line from Pretoria to Pietersburg is about 285 kilometres. The earthworks are completed and the rails now laid as far as Pietpotgietersrust (225 kilometres), while the ballasting is being proceeded with over the whole of that portion of the line. The permanent bridges are being erected as fast as the ironwork is delivered on the works, and the remaining works to the end of the rails are well in hand. The permanent works for the junction connecting this company's line with the Netherlands Railway are now being undertaken. With the exception of the locomotive and carriage stock, a small proportion of the rails and fastenings and of the ironwork for bridges, all the materials required for the completion of the line have been delivered, including the whole of the wagon stock and goods brake vans. The shareholders are aware that a special commission of the Volksraad was appointed in February 1897, to inquire into the causes of the delays in the construction of the railway. The final report of the Commission has recently been presented to the Volksraad, and the directors are satisfied that the same has shown that the company and its contractors have at all times met the reasonable demands of the Government to comply with the terms of the concession, and carry out the works of construction with all possible speed. A copy of this report in detail may be inspected at the office of the company by the shareholders. The directors have the pleasure to announce that, with the official sanction of the Government, and after their approval of the tariffs and regulations, the section of the line from Pretoria to Nylstroom (134 kilometres) was publicly opened for traffic on July 1st last. The directors regret that unavoidable delay has occurred in the delivery of the locomotives and carriage stock, which has necessitated the use of hired stock for the present traffic requirements. The results of the working of the traffic, so far as advices have been received, are, in the opinion of your directors, satisfactory, and show continued proof of the necessity of the railway for the welfare of the inhabitants of the country traversed by the line. Vicomte A. de Westheimer having vacated his seat on the board, your directors have appointed Sir Charles A. Turner, K.C.I.E., to fill the vacancy, and the shareholders will be asked to confirm his appointment."

The CHAIRMAN, in moving the adoption of the report and accounts, said the progress in the works of construction during the period under review had been very satisfactory, and had far exceeded their expectations. They had had very considerable difficulties to overcome in the various details in connection with the preliminary work, both of the surveys and the construction, but they had done everything possible in their power to avoid delay, and had been at all times anxious to meet the views of the Government and their advisers. In September last they had scarcely begun the works, whereas to-day they had at least completed the principal work on three-fourths of the whole line, and not only that, but were actually running in traffic for the benefit of the company 81 miles of the railway out of a total of 178, or nearly one half. That was very satisfactory and reflected considerable credit upon the way in which the work had been carried out by their contractors. They had ample time under the terms of the concession, still to carry out all that was necessary to complete the railway, provided, of course, no obstacles presented themselves. There still remained the necessary rails to be shipped in order that the plate-laying might be carried through from kilometre 225 to Pietersburg, and these would be shortly shipped from this side; meanwhile, the contractors were employed in preparing the earthworks, so that there would be very little delay on this account. All the rest of the materials, including the wagon stock and the ironwork for the bridges, had been delivered with regularity, but owing to considerable delay in passing the plans for the locomotives and carriage stock, and labour difficulties, the manufacturers were unable to promise delivery of the locomotives before October and the carriage stock before February next. This necessitated the use of hired stock for the present traffic requirements. The arrangements so far enabled them to carry out their traffic without difficulty. Permanent works were in hand for the junction connecting the line with the Netherlands Railway, which would enable through traffic to be handled from Johannesburg, as well as other parts of the Transvaal, Cape Colony, and Natal, all of which would then be connected by this junction. These works were being carried out by the Netherlands Company, and they hoped that every endeavour would be made for the benefit of the community which this railway served to hasten the completion of them. The question of the payment of the cost of the works, which they anticipated would amount to about 25,000*l.*, had yet to be settled as between the Government, the company, and the contractors, and with a view to their settlement he was again visiting Pretoria. A Government Commission was appointed in February, 1897, to inquire into the causes of the delays in the construction of this railway, and from their final report it would be seen that position of the company on April 5th, 1898, having been circulated no blame whatever attached to the company or its contractors. As far as regarded the present working of 81 miles of the line, which was opened to the public on July 1st, the gross earnings for the first month's working amounted to the respectable sum of 2,828*l.*, or at the rate of about 8*l.* 10*s.* per mile per week, which, for a new line, might be regarded as very satisfactory. He saw no reason to suppose that these traffics would not be maintained, if not considerably improved upon, and pointed out that although most of the tariffs had been fixed at a maximum, no efforts would be spared to encourage traffic, and reduce, if the Government consented, any tariffs on goods which could not bear the rates now charged, so long as a reasonable profit could be made upon the working. Their general manager was fully alive to this fact, and would do not only what was fair to the company but just to the traders and those who desired to make use of their railway. He wished, however, the trading community to remember that not only had their line been constructed under considerable difficulties, but that, in order to meet the requirements of the country through which the railway passed, and its inhabitants, they had opened this portion of the line before being in receipt of their own rolling stock. As soon as the line was opened throughout and in proper running order he believed they

would all be thoroughly satisfied with the administration and their charges. He welcomed Sir Charles Turner to a seat on their board, because he felt that he would be of considerable assistance to them, owing to his knowledge and experience in railway matters connected with the Government of India. Concluding, he hoped when he met them in March next he should be able to report that a further portion of the railway, if not the whole of it, to Pietersburg had been opened, and that the traffic on the existing portion would justify the confidence of those who had invested their capital in the undertaking.

Mr. JOHN CARRUTHERS (a director) seconded the motion, which was agreed to.

### CORK BANDON AND SOUTH COAST RAILWAY.

At the half-yearly general meeting the CHAIRMAN (Mr. J. W. Payne Sheares) said—Our receipts for the last half-year amounted to 33,290*l.*, as compared with 36,380*l.* for the corresponding period of 1897, being a decrease of 3,090*l.* The decrease extends over every branch of our traffic, but chiefly in that of passengers. In passengers we had a decrease in number of 37,021, and in money 1,983*l.*, being very close on two-thirds of our entire loss. This is not surprising when we remember the statements made about the condition of the line at meetings of the men during the strike. These statements were quite incorrect, but, no doubt, influenced numbers. I think great credit is due to our engineer, Mr. Kerr, for having the line in such an excellent state when the strike occurred, that it was able to stand several months' work with little or none of the ordinary maintenance, and remains perfectly safe. He now reports the permanent way and works in good condition. The strike greatly affected the progress of all works, but a considerable amount has been done lately. The strike lasted sixteen weeks, and in the first two of these we lost in the traffic nearly one-third of our total loss for the entire time. We were taken by surprise, very few men remained with us, and it was with difficulty we ran any trains at all. We therefore felt it necessary to show the men they could not strike with impunity without giving notice, as required by law. ("Hear, hear.") Accordingly we took proceedings under section 13, 3 and 4 Vict., chap. 97, and section 17, 5 and 6 Vict., chap. 55, and obtained a conviction, which was taken on appeal before the Recorder of Cork, who, in an able judgment confirming the conviction, laid down the law so clearly that it was immediately accepted by the Amalgamated Society, who had the judgment published in full in their own journal in England, and accompanied it with strict injunctions to the officers of their branches not to sanction another strike without due notice being given, and if the men struck without giving it they should not get any strike pay. I believe this has been the first judicial decision given on this question, and it is a valuable lesson not only for employers but for the men; it will give the latter time for reflection before they strike, and it will give the companies time to prepare to meet it. It now gives me great pleasure to tell you of the valuable assistance we received during the strike from our officers and the staff and the men who stood by us. They threw themselves heartily into the struggle: the officers and the clerical staff put their hands to any description of work that was required. They acted as signalmen, drivers, guards, porters, &c.; did their work well, and have our best thanks. I cannot say how deeply we are indebted to the officers and men of the R.I.C. for their invaluable services; they watched the line night and day during and after the strike; nothing could exceed their zeal and attention. In several instances members of the force gave proof of great intelligence. We simply could not have got on at all without their assistance, and I wish our ability were at all equal to our desire to compensate them properly. After providing for interest on debentures, preference stock, and other charges, a balance remains of 2,468*l.*, which we recommend should be carried forward to next account. ("Hear, hear.") As a director, I regret extremely that we cannot recommend the payment of a dividend on the ordinary stock, but as the holder myself of a considerable amount of that stock I am perfectly satisfied. I do not think that any dividend I might receive could be better applied by me than it has been in resisting the foolish and utterly unreasonable demand of the men. To have yielded to it would simply have been to abdicate our position on this board, and place the line under the absolute control of the men, and in that case I have no doubt we would look in vain for a dividend for years to come. ("Hear, hear.")

### RHONDDA AND SWANSEA BAY RAILWAY.

The half-yearly general meeting was held at Swansea on Saturday; Sir JOHN J. JENKINS presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said he did not know which he ought to do first—whether refer to the report or make a statement confirming what they had seen in the papers regarding his intention to resign his seat as chairman of the company. Perhaps he had better first deal with the personal matter, and to say that he was not resigning because there was any disagreement between between his colleagues and himself, because every member of the board worked very harmoniously with him as chairman and with each other in the interest of the company. It was his intention to resign at the end of last year, because he felt he could not devote as much time as he should like to the interest of the company as before he obtained a seat in Parliament, and then he had been suffering from an affection of the throat which had led gentlemen in the medical profession of very high standing to insist on him taking rest. They were well aware his life had been a very busy one; but at the end of the year it was his intention to take a sea voyage. With regard to the undertaking, he must confess he was disappointed with the receipts and the traffic. At the same time he did not think they should look at the matter from a hopeless point of view, especially when they looked at the history of the neighbouring lines, which had, one and all, pretty well gone through the same difficulties which the Rhondda was going through, "and which," he added, "we hope ultimately to overcome." Sir John explained that he used the word "we" because, although it was his intention to resign his seat at the board altogether, but owing to the many kind letters he had received from large shareholders and

the pressure he had received from his colleagues, he had decided to retain his seat to the end of his term. Sir John went on to say he trusted there was a large future before the company. There was a large area of coal not developed in the Avon Valley, and they had reason to believe, from what experts had said, that the coal there would ultimately rank as high as the Rhondda Valley coal does now. A new pit has been sunk close to the Avon Valley by North's Navigation Company, and the coal there proved to be of a very satisfactory quality. In opening up a district of that kind, of course, it took a long time. When the railway was first promoted they had in view this virgin coalfield, and at the same time the facilities they gave to carry coal from the Rhondda to Port Talbot and Swansea. They did expect to carry more Rhondda coal than they had to Swansea. He did not know whether in the future they would get much more than they did now, but if they did not get coal they would certainly increase in their general traffic and in their passengers. The passengers carried during the last six months had largely increased, being 2,420 more than in the corresponding half; but yet their receipts from passengers had fallen off by 521L, which indicated that though there had been a great deal of traffic, owing to the unfortunate strike it had been more local than through, and, consequently, the receipts were smaller because distances travelled had been shorter. There had been an increase in weight of material carried, but they had not carried so much of the expensive materials such as copper and tinplates. In tinplates they had been able to make a reduction of about 1s. per ton from Port Talbot and Briton Ferry, and the rates on copper had been reduced 1s. 9d. Those reductions undoubtedly had been a great advantage to the manufacturers and to the working men they employed. They had also had a very fair remuneration from this particular traffic on the outlay, but, as he had said, they had been disappointed in the quantity of coal they had been able to carry from the Rhondda to Swansea. Sir John then referred to the running of through trains to Cardiff over the Taff Vale Railway, and said he believed the result would be increased traffic. What would doubtless strike them very much was the large increase in working expenses. They would find that was the case with every railway in South Wales, and, with few exceptions, throughout the kingdom. The reason was undoubtedly the unfortunate strike which still existed in the coal trade. Their own working expenses had increased from 53 to 58 per cent., the Great Western from 57 to 62, the Rhymney from 49 to 60, the Taff Vale from 53 to 60, and the Barry from 47 to 57. He did not think there was any immediate prospect of the strike being brought to a close, but he hoped it would not remain in force very much longer, because it disarranged not only the coal trade, but almost every other trade suffered more or less.

Mr. MORGAN B. WILLIAMS seconded the motion.

Mr. W. D. THOMAS (Merthyr) said the report was very depressing. It appeared to him that the line was drifting year by year into the hands of the debenture-holders, for the ordinary shares had gone so low that he did not know what would become of them in the future. He referred to Lord Swansea's predictions when the line was completed, and said instead of them being realised they were going from bad to worse. He complained of the increase in expenses, and commented on the fact that the bank was owed 14,665L, and that there were outstanding accounts of 26,000L due from the company, while there was no less than 10,000L due to the company in debts.

Mr. ROBERT H. LIVESY (general manager, locomotive superintendent, and engineer of the Donegal Railway) as a holder of 100 shares, and a railway manager of over twenty years' practical experience, said there could be no doubt the line had been very extravagantly worked. They paid in wages for the maintenance and renewal of the permanent way equal to 96L 12s. per mile per annum, which was absurd for a line like that, while the 149L down for materials was not sufficient to keep the line in safe working order. On the question of wages, which came to over 10,000L a year, he said either the company had double the staff it required or it was paying three times as much as it ought in wages. To pay this big sum in wages on a little line like that was absolutely absurd, and it was a mystery to him where the money went. Then he certainly thought 450L far too much for staff clothing. He commented on the expenditure on wagon covers, saying if they had 10,000 covered wagons they would not want to spend more than they did, while 1,000L a year was too much to pay the directors for the management of such a paltry line as that.

The CHAIRMAN and other directors put a number of questions to Mr. Livesey with respect to the Donegal Railway, with a view of seeing how it compared with the Rhondda, and

Mr. LIVESY answered them, adding—"I am an old Great Western and North Western man, and know what I am talking about." He went on to criticise the amount of stores, and of the outstanding accounts, which were nearly half the total revenue, and said if half of those should prove bad debts even the debenture interest might be at stake. In concluding he said he would undertake to say that the working expenses might be reduced 5,000L a year.

The CHAIRMAN, in replying, said Mr. Livesey's experience of an Irish railway was quite new to the directors, who had never taken the trouble to compare with an Irish railway, because it did not carry the same kind of traffic, and so Mr. Livesey's experience in Ireland did not apply in Wales. If he had taken the trouble to go to the office, or speak to the directors, they could have enlightened him before the meeting. As to the working expenses, the directors did not see how they could be reduced if the line were to be kept in good order. It was a short line, but they had an expensive bridge at one end and an expensive tunnel at the other, and in that respect they were handicapped perhaps more than any other railway in the kingdom of the same length. Notwithstanding that, he maintained the directors did give close attention to these charges, and they did not need any one to come there and tell them they were high. They could not compare with a light railway in Ireland; but would with those in South Wales. It was all very well to talk out of book as to the amount to be saved on working expenses, but they did not see now they could be curtailed unless they carried on the line in a very inefficient manner.

As to the cost of clothing, they invited tenders from all over the kingdom, and perhaps treated their porters a little better than would pass in Ireland. As to the wagon covers, he pointed out the valuable stuff they carried, and said the expenditure was necessary to keep the company from heavy claims for damage. Answering Mr. Thomas, he reminded him that the Taff Vale shares were once at one-third of par, and he himself had Great Western at 45L, which was rather below the proportionate value of the Rhondda shares at the present moment. They need not lose courage because their shares were so very low, especially when they looked round, that other railways in their immediate neighbourhood had had to undergo the same process. As to the amount owing to the bank, it was at a low rate of interest, and would be repaid when the preference shares were paid up.

Mr. J. P. JOSEPH said the line was made to Swansea in the interest of Swansea, and the result had not been satisfactory support from that town.

The CHAIRMAN said they had been assisted well at Briton Ferry and Port Talbot; but they had not had full support from Swansea, while they had not had what they hoped for from the Rhondda. He reminded them that the greater the traffic the less the proportionate expense would be, and he went on to say that if Mr. Livesey could work this railway and save 10,000L a year—[Mr. LIVESY: I said 5,000L.]—he would, as one of the directors, be willing to engage him to do so, on the understanding that if he failed he should receive nothing, and if he succeeded he should receive a percentage on the amount saved.

The report was then adopted unanimously.

### BRAZIL GREAT SOUTHERN RAILWAY.

The annual general meeting was held on Monday at Winchester-house, E.C.; Mr. W. J. ALT presiding.

The accounts for the year ending December 31st, 1897, show gross receipts of 16,111L (against 20,186L for 1896), and an expenditure of 30,219L (against 29,957L), leaving a loss of 14,108L. Debenture interest absorbed 27,038L, debenture sinking fund 4,930L, London administration 2,357L, interest on loans 453L, loss on ferry 410L, reserve for income-tax 200L, and sundry debits 679L, these outgoings being met by the Government guarantee, 40,500L; transfer fees, 7L; balance from previous account, 7,443L; and profit on exchange, 7,787L. The balance remaining amounts to 5,562L. The balance-sheet shows receipts on capital account to have been 799,281L—viz., preference shares, 225,000L; A shares, fully paid, 40,000L; A shares, issued as fully paid, 85,000L; 6 per cent. debenture stock, 195,000L; 6 per cent. debentures (1886), 208,300L; 6 per cent. debentures (1893), 45,981L. There have also been issued 43,000L 7 per cent. flood loan bonds, and 15,645L have been borrowed against stocks and bonds in hand.

The CHAIRMAN, in moving the adoption of the report and accounts, said—"The company's accounts for the year 1897 do not result in what we have all been so long looking for—viz., the distribution of a dividend. The net loss for the year on railway working, after adjustment of exchange, was 6,321L, being an increase of 2,711L compared with 1896, and this reduces the balance to the credit to 5,561L, as compared with 7,442L, at which it stood at the end of 1896. This balance, it is painful to have again to state, cannot yet be distributed, and I fear we must make up our minds to continue for some time longer the exercise of that virtue, patience, which in our case is becoming a second nature. Now, how is this to be arrived at? What is wanting to transform our line from what it is into a regular dividend-yielding enterprise? Receipts must be increased and expenses be kept down. This may raise a smile, and suggest the remark, "Why have you not found this out before?" We have kept this constantly before us, but hitherto our efforts to these ends have been frustrated by causes entirely beyond our control. Those causes are well known to you; they are chiefly political. Revolutions and local disturbances—both in our own territory and that of our neighbours—have checked all local enterprise, have ruined several promising industries which had been started in the district, and have entailed heavy outlay upon us for the restoration of wilful and other damage done by the insurgents to our property. The Government at Rio de Janeiro, engrossed in politics, has entirely neglected to devote the necessary consideration to the numerous petitions we have presented, calling its attention to the many evils our district suffers from, and pointing out how some simple and easily applied fiscal regulations would remedy these evils and inaugurate an era of prosperity both to our railway and the local population. I need not go into the details of these matters, but we believe that the means we have lately adopted to bring them home to the authorities [will, under the régime to be inaugurated next November under the new President, Dr. Campos Salles, result in such local measures being applied as will bring about the desired end—viz., the stoppage of the contraband trade and consequent flow through the legitimate channel of our railway of the large amount of traffic which has been diverted from it. This alone will result in a considerable increase of receipts, but with the re-establishment of confidence in Brazilian credit, which I also hope to see under the new President, we shall, in conjunction with our friends the North Western of Uruguay Railway Company, be able to raise the capital for the construction of the international bridge at Quarahim—a step which must also greatly facilitate the movement, and consequent increase, of traffic. We are also advised that steady progress is being made in the construction and completion of railways in Rio Grande do Sul and of the trunk line to connect that province with Rio de Janeiro. With regard to the Porto Alegre and Uruguayan Railway, the *Diario Oficial* of March 16th, 1898, contains a decree stating that a contract has been entered into by the Government with a Belgian syndicate for the leasing and working of the line from Porto Alegre to Cacequy, Cacequy to San Gabriel, and Bage to San Sebastian. In the *Diario Oficial* of December 17th, 1897, Congress authorised Government to finish the line from Cacequy to Uruguayana and from Bage to San Gabriel, guaranteeing interest at 6 per cent. upon the capital outlay, and the lessees of the open line have the option of accepting those conditions. With regard to the South Western of Brazil Railway, the section from Cruz Alto to Santa Maria is in traffic, and the section between Cruz Alto and the River Uruguayana is under construction. Work is also being

carried out north and south of Ponto Grossa on the line leading to Itararé. It can be easily seen what an important bearing these railway developments will have in the near future upon our traffic. With regard to expenditure, we see our way to reform in this direction also. For several years past the reconstruction works on the line have necessitated the employment of a resident engineer, involving an expense which we have long wished to put an end to. Towards the end of the year we found we could do this, and Mr. Atkinson, the gentleman in question, returned to this country. About the same time we learned that our general manager (Mr. Charles Stuart) desired to be relieved of the post which he has very ably filled since 1889, and we, therefore, I am glad to say, secured the services of Mr. Atkinson to take his place. Mr. Atkinson carries with him the clearest instructions from the board to bring capital outlay to an end; to economise in every direction; and to make no expenditure not absolutely justified by the necessities of working. I may mention hereafter that Mr. Atkinson has been responsible for the designs of the international bridge. We obtained the approval of the plans by the Brazilian Government, and assisted the officials of the North Western of Uruguay Railway in obtaining the approval by the Uruguayan Government. Notwithstanding the repeated disappointments from which we have suffered, and the dreary waiting productive of despair, we still believe that the day will come when the oft-repeated assurances of our late general manager will be fulfilled—viz., that, with the carrying out of proper fiscal regulations in the district, and the continuance of peace, the line will not only pay its way, but relieve the Government of the burden of its guarantee. With regard to the St. Angelo Extension, at previous meetings I have dilated a great deal upon the benefits that would accrue to the parent line by its construction. I do not withdraw a single word I ever said upon this subject. I know the day will come when that extension will be completed, either from our end, Itaqui, or by the stretching out of other lines to meet and couple up with us. You are aware that we obtained that concession, that we formed a company to carry it out, that that company raised capital, surveyed the route, commenced the works, and constructed about 50 kilometres of line and some stations. The annual guarantee was 75,000*l.* per annum, payable in gold in London. Owing, however, to delays, and what now appears to have been deliberate obstruction in the Government departments in Rio de Janeiro connected with the transfer of the concession, a public issue of capital could not be made before the wave of distrust of Brazilian securities set in, so none of the annual interest to which, under the concession, we were entitled, was collected. The work of construction, however, notwithstanding the depredations of revolutionists, were continued, until, without justifiable cause, the Government issued a decree cancelling the concession. Representations were at once made, and petitions for restitution of our rights were presented to the Government. Repeated assurances were given us that our claims would be favourably dealt with by Congress, until finally we decided to bring the matter to a point by the institution of a formal suit against the Government for indemnification. We intend to press that suit to a conclusion; to claim all the support, public, diplomatic, and otherwise, to which we are entitled; and we believe that the Government has no desire to inflict an injustice upon any body of investors who, like ourselves, have contributed to the building up of Brazilian national wealth; and that, with freedom from political anxieties, which seems to be now established in the country, and under a President who has enlisted the confidence of Europe by his enlightened utterances while over here, we shall succeed in obtaining our just rights. What exact bearing the result may have upon our pockets it is for the moment premature to consider. It must, however, materially improve our position. I trust I have convinced you that nothing has been left undone for the protection of your interests, and that everything possible is being done to bring us ultimately to the goal of a dividend.

Mr. HENRY RAINCOCK seconded the motion, which was carried.

#### LONDON GENERAL OMNIBUS COMPANY, LIMITED.

The half-yearly general meeting was held on Thursday, at the offices of the company, 6, Finsbury-square, E.C.; Mr. JOHN POUND presiding. The accounts for the half-year ending June 30th, 1898, showed a gross revenue of 553,224*l.* (as against 539,438*l.*), and an expenditure, including 57,946*l.* on horse stock and 42,997*l.* on omnibus stock, harness, fittings, &c., of 512,195*l.* (as against 479,721*l.*), leaving a profit of 41,029*l.* (against 59,717*l.*). Adding 4,950*l.* interest and dividends on investments, 4,458*l.* mortgage debenture premiums, 148*l.* sundries, and 15,053*l.* balance from previous half-year, the total net revenue was 65,638*l.* Of this debenture interest absorbed 3,038*l.*; amount carried to reserve, 10,000*l.*; and dividend and bonus at the rate of 10*½* per cent. per annum, 38,291*l.*, leaving a balance of 14,309*l.* to be carried forward. The average number of omnibuses worked was 1,190 (against 1,100); average receipts per omnibus per day, 2*l.* 10*s.* 1*½*d. (against 2*l.* 12*s.* 11*½*d.); number of passengers carried, 89,569,124 (against 83,277,814); the number of horses, 14,991 (against 13,740). The paid-up share capital is 700,000*l.*, and 4 per cent mortgage debentures have been issued to the extent of 192,800*l.* The general reserve fund now stands at 165,000*l.*, and the horse stock reserve fund at 10,000*l.*, together 175,000*l.* The whole of this is invested outside the company's business. The report states:—"The expenditure on capital account having been found to be greatly in excess of the amount paid up, your directors decided in April last to issue a further 75,000*l.* 4 per cent. debentures. These were offered to the proprietors and the public on tender at the minimum price of 110*l.*, and 42,800*l.* were placed up to the end of the half-year at an average price of 111*l.* 2*s.* 2*d.* per cent."

The CHAIRMAN, in moving the adoption of the report and accounts, said the receipts for the period under review were 533,939*l.*, and the expenditure 512,194*l.*, the profit on the working being 41,000*l.*, as against 59,717*l.* in the Jubilee half of last year. They had run ninety more omnibuses, 1,000,000 more miles, and carried 6½ millions more passengers, and the total receipts showed an increase of 13,835*l.* A drop in the receipts of 1*s.* 9*d.* per omnibus per day made a difference in

the half-year of nearly 20,000*l.*, which more than accounted for the variation in the profits. Although the expenses showed an increase of 32,474*l.*, they were proportionately less than last year. The price of provender had been slightly against them, but this excess had been more than neutralised by economies in other directions. The horse crop had been well maintained, and the average life had exceeded that of the corresponding period. Turning to the balance-sheet, they would, he said, notice the item of "freehold land, buildings, and leaseholds" showed an increase of 50,500*l.*, rather more than half of which was represented by new stables, while the balance had been spent on the new depot at Bromley. The East-end depot at Bell-lane had been destroyed by fire. With regard to the much-talked-of steam or electric 'buses, even supposing the Steam Omnibus Company were in a position to put motors on the road, the board considered that they had no vehicles which could compete with the horse-drawn omnibus. ("Hear, hear.") The profit on the working for the half-year was 41,000*l.*, the amount brought forward 15,000*l.*, which with other items gave them a sum of 62,600*l.* to deal with. They had placed 10,000*l.* to reserve, bringing it up to 175,000*l.*, proposed to pay a dividend of 8 per cent., and a bonus of 2*½*%, equal to 10*½* per cent. per annum, which would absorb 38,291*l.*, leaving 14,309*l.* to be carried forward. The total number of passengers carried was 89,569,124.

Mr. H. HICKS (deputy-chairman) seconded the motion, which was unanimously carried.

Mr. HORTON moved a resolution authorising the directors in future to abstain from putting in the report the price paid by them for provender. He considered that it militated against them and was not in the best interests of the company.

Mr. COSTELLO seconded the proposition.

A SHAREHOLDER opposed the motion, and objected to the directors being invested with this further power.

The CHAIRMAN having expressed the opinion that the suggestion was in the interests of the shareholders, the resolution was put and carried by a small majority.

#### RAILWAY PATENTS.

16,235. W. Griffiths, Lloyd's Bank Buildings, Bristol—Improvements in securing rails to metal sleepers, in colliery tramroads, and the like.

16,282. G. A. Weber—Improvements in bonds or connections for the rails of electric railways.

16,289. T. B. Turner—Improvements in convertible berths and settees for ships, vessels, and railway cars.

16,372. Thomas Walrond Smith—Improvements in signalling on railways.

16,483. James Eastwood, Junior—Improvements in couplings for railway carriages and wagons.

16,525. Andrew Erskine Muirhead, Art Forge, Glasgow—Improved railway chair.

16,698. F. A. Pyke, 17, Hanover-street, Keighley—Improved apparatus for signalling between passengers and officials on railway trains.

16,716. British Thomson-Houston Company, Limited—Improvements in systems of train control. (Edwin Wilbur Rice, jun., United States.)

16,794. P. U. Ashham and W. Marshall, 15, St. James's-row, Sheffield—Improvements in rails and sleepers for tramways and the like.

16,817. Leandre Leduc—Improvements in automatically operated electric signalling apparatus for railways and the like.

16,822. Herbert Tomlins and Elizabeth Lilly Tomlins, 53, Chancery-lane, London—Improvements in railway signal apparatus.

16,861. William Barker, 12, Standish-street, Burnley—Improvements in and relating to apparatus for signalling on railways and stopping trains in case of danger.

16,872. Alexander Shiels, 100, Wellington-street, Glasgow—Improvements in electrical signalling on railway trains.

16,942. Adolf Heinrich Marwede—Improved automatic brake for railway and other vehicles.

#### SPECIFICATIONS (1897).

15,196. Slack and Marriott—Locks for railway carriage doors and the like.

17,203. Taylor and Abel—Means for raising and lowering railway carriage and similar windows.

22,221. Fisher—Rail joints for railways and the like.

24,821. Renton—Railway signal apparatus.

#### STRONGEST LIFE OFFICE IN THE WORLD.

#### THE EQUITABLE LIFE ASSURANCE SOCIETY of the UNITED STATES.

ASSETS .....	£49,349,231 Sterling.
RESERVE .....	10,508,945 Sterling.
TOTAL INCOME .....	10,989,909 Sterling.

Paid to Policy-holders during 1897 over £4,390,000 sterling.

Paid to Policy-holders in less than thirty-nine years over £57,290,000 sterling.

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months	£0 7 0
Six Months	0 13 0
Twelve Months	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

- Aug. 22—Dublin Wicklow and Wexford Railway (Half-yearly), Dublin at 2.
- Aug. 24—Blackpool and Fleetwood Tramroad Company (Half-yearly), Bispham, at 2.30.
- Aug. 24—Furness Railway (Half-yearly), Barrow, at 2.
- Aug. 24—Maryport and Carlisle Railway (Half-yearly), Maryport, at 12.
- Aug. 25—Midland and South Western Junction Railway (Half-yearly), Swindon, at 2.30.
- Aug. 26—Birmingham Canal Navigations (Half-yearly), Birmingham.
- Aug. 26—Cleator and Workington Junction Railway (Half-yearly), Workington, at 11.

- Aug. 31—South Yorkshire Junction Railway (Half-yearly), 23, Queen Victoria-street, E.C., at 12.
- Sep. 6—North Metropolitan Railway and Canal (Half-yearly), 138, Leadenhall-street, E.C., at 12.
- Sep. 13—Glasgow and South Western Railway (Half-yearly), Glasgow, at 12.
- Sep. 20—Caledonian Railway (Half-yearly and Special), Glasgow, at 1.
- Sep. 22—North British Railway (Half-yearly), Edinburgh, at 12.30.
- Aug. 26—Waterford Limerick and Western Railway (Half-yearly), Waterford.

The report of the Railway Commissioners of New South Wales for the year ended June 30th shows that there are now 2,691 miles of railways open, and of tramways 65 miles. The total earnings amounted to 3,340,600*l.*, showing an increase of 20,000*l.* over the previous year, notwithstanding the late drought and the great decrease in pastoral produce. The increase is largely due to mining and agricultural development. The net earnings amounted to nearly 150,000*l.*, being equal to 3½ per cent. on the capital invested.

AUGUST 20, 1898.

## THE SOUTH WESTERN AND THE MANŒUVRES.

A wave of optimism in traffic anticipations is generally found to follow upon the periodical Government proposals for the increase of the navy. It is an undoubted fact that a heavy shipbuilding programme is a genuine "bull" point for the railways principally concerned in serving the iron, coal, and dockyard centres; and, although the benefits consequent upon the large disbursements of public money are no doubt not strictly confined to these railways, but operate to the advantage of all in increasing the business activity of the country, yet the lion's share of the traffic is as a rule carried off by the Scotch and northern lines. There is thus a certain railway appropriateness in the selection by the War-office of its manœuvre area, the yard in which the raw elements of land warfare are to be welded by experience into the perfect fighting machine, in such a hitherto unexploited district as that of Salisbury Plain, bringing, as the autumn concentration of large bodies of troops must, the bustle of profitable business to which the local inhabitants have long been strangers. Nor, while the Scotch and northern lines are benefiting from the Admiralty outlays, is it other than fair to find that the South Western and other railways in the South of England will take the greater part of the heavy railway expenditure of the War-office on the transport and maintenance of large bodies of troops so far from the normal military centres. Some faint appreciation of this fact was, indeed, shown at the time of the announcement by Mr. St. John Brodrick of the official intention to establish this new Aldershot; but like many of the levers which are made use of for discounting the future in the City of London, its existence seems to have faded out of mind as the time for realisation approached. During the past week troops, horses, guns, and military vehicles and stores of all kinds have been pouring into Wiltshire and Dorsetshire, and the wayside stations at Wareham and Ludgershall, enlarged by the special preparations of the railway authorities into temporary semblance of Clapham or Crewe, have been the centres of a traffic which, in volume, in perfection of management, and in profitable character, would compare favourably with that of a heavy race day at Epsom or Doncaster. By the end of the month it is understood that no less than 65,000 men and 7,000 horses will be encamped on the Plain, the greater number being carried for long distance by rail. When to these are added the guns and other impedimenta, to say nothing of the hired transport vehicles and the persons and property of contractors and other camp followers, it will be seen that the comparison with the Doncaster race gathering—the biggest thing of its kind from a railway standpoint—falls far short of the actuality. The racegoer's call upon the services of the railways is complete in one day, or at most in three; his wants are small; a certain increase in the consumption of hard-boiled eggs and sandwiches, with a marked demand for liquid refreshment, alone indicates the stress laid upon the normal resources of the town. But these autumn manœuvres represent no less than the setting up for some three or four weeks of a large town complete, with inhabitants, who bring with them their very houses, and whose every want, down to a farrier's shoe nail, has to be supplied by the railways, in addition to the

day by day requirements of the ordinary population. It is not surprising to find that it has been estimated that of the 140,000*l.* set aside as the cost of the manœuvres, no less than 75,000*l.* will go to the railway companies for the transport of troops and supplies. In the absence of detailed information, it is difficult to state with any precision the proportions in which this large sum will fall to the different companies, since there are few which will not be to some extent involved in the operations. On the basis, however, of the time-tables published by the War-office itself, it appears that out of the 96 military units, or over 35,000 men, therein referred to—in itself by no means the whole of the manœuvring force—no less than 91 units make their journey in whole or in part over the South Western system, while forty-five of these do not leave South Western metals between London and Wiltshire. Add to this, the heavy stores traffic emanating at the military centres of Aldershot and Woolwich, and also carried by this company, and it would not appear extravagant to credit the South Western Railway with less than two-thirds of the manœuvre traffic, or, say, a gross return of 50,000*l.* Specially reduced as are the rates and fares for military traffic, averaging, when large bodies of men and horses are involved, not more than one-half of the corresponding charges to individual members of the general public, it must be borne in mind that the business is devoid of the speculative risk attending excursion and other traffic induced and fostered by exceptional rates. The costs of working, when numbers and other details are accurately known beforehand, are also small, and the loss upon unprofitable haulage can be greatly reduced or obviated altogether. In short, such traffic can be and is normally worked upon a 50 per cent. ratio, and the larger the volume, as in this case, the less costly are the administrative and other special expenses involved. If our premisses are correct, the South Western may be expected to benefit directly by the manœuvres to the extent of 25,000*l.*, while the proposed establishment of a standing camp on the Plain, for the service of which a light railway has been promoted by the parent line, combined with a permanent increase of civil population, may be held to be worth not less than another 10,000*l.* a year net. We thus arrive at the value to the South Western of this important step of the War-office, as not less than 35,000*l.* annually, or rather more than sufficient to pay  $\frac{1}{4}$  per cent. upon the ordinary capital of the company, taking converted and unconverted together. This is a matter on which the South Western is heartily to be congratulated, and it is not too much to say that the well-known energy and experience of this line in dealing with troop traffic will afford not the least of the valuable object-lessons of the military operations as a training for the more serious business of war, so dependent as the latter is nowadays on the proper utilisation of railway resources.

### NITRATE NOTES AND QUERIES.

Through force of circumstances rather than from inclination, THE RAILWAY TIMES has taken a not inconspicuous part in the exposure of the impositions perpetrated on the British public in connection with the promotion, flotation, and management of nitrate companies. It may be thought that the damage being done, it is mere waste of time to harp upon the subject; but the fact is that such interests as remain to the unfortunate holders of nitrate shares are being surreptitiously undermined, and, in the absence of a timely warning, will soon disappear altogether. Therefore, although the inspection of Augean stables is at best an unpleasant task, we propose to continue throwing from time to time a search-light on the dark corners of Anglo-Chilian finance. Should fresh developments of the sufficiently ugly situation seem to warrant such a course, we may even go the length of

reviewing *seriatim et ab initio* the different companies which have levied toll on the investor. Not that readers of THE RAILWAY TIMES are likely to be numerous among the sufferers; neither is any kudos derivable from showing up the tricks and meannesses of third-rate cosmopolitan financiers; but in these days of Hooleys and Hooligans, it behoves him not to hold his tongue who possesses information of value to the public. Both on account of its capital and of the notoriety acquired through the performances of its famous "Investigation Committee," the Nitrate Railways Company bulks largest in general interest, not to say in inverse ratio to the prospective interest receivable by its unfortunate shareholders. The total shipments of nitrate from all Chilian ports in the seven months to July 31st, 1898, amounted to 520,000 tons against 470,000 in the same period last year, and it might reasonably be supposed that the Nitrate Railways Company would have had its share of the extra 50,000 tons. One-half at 6*d.* per quintal would represent 27,500*l.*, and did not Mr. Robert Harvey only three months ago unfold a charming vista of fresh feeders and lambs returning to the fold? Alas! for the frailty of human hopes, even of so noted an "expert," backed by the technical experience of the gallant Colonel Oldham, the Trust-y Mr. James Head, of *Financial News* fame, the simple Mr. Symons, their foreign allies Messrs. De Burlet and De Wandre, the mathematical Mr. Manby, and last, but not least, that Fidus Achates, Mr. George Bush, C.E. (consulting engineer to the Nitrate Railways Company, director of the Santa Elena and San Sebastian Nitrate Companies, &c.). Not all the above galaxy of talent and expertness has prevented a decrease of 17,292*l.* in the traffic receipts from January to July, whilst the first fortnight of August fills the cup with a further drop of 6,850*l.*, making a total decrease to date of 24,142*l.*, or 9½ per cent.! If the "economies" promised by Mr. Harvey pan out in the same way as his estimated increased traffics, we do not envy him the next meeting with his constituents. How awkward, for instance, to be reminded of the statement that the requirements of the nitrate trade would be supplied by the great Lagunas district oficinas, together with the San Jorge, Ramirez, and Puntilla de Huara works, all using the Nitrate Railways. Mr. Harvey's "North Lagunas" oficina has been working full tides and selling nitrate at ruinous prices, with the laudable object of meeting syndicate debenture charges and law costs, but his pet "Ramirez" (Liverpool Nitrate Company) stood still for six months on end to June 30th last, and, for all we know, may be shut down at the present time. As stated in THE RAILWAY TIMES last week, Mr. Harvey is understood to be treating for new ground with the owners of the adjoining "Santiago" oficina, who, by the way, have not yet paid for the property, having availed themselves of the option paternally granted by the Chilian Government to native purchasers at the auctions in 1894 to pay by instalments spread over several years. This is, of course, a mere detail, which need not necessarily stand in the way of a "deal;" but it is interesting to note that "Ramirez" is in want of new ground. The oficina has, it is true, been working for more than twelve years, but the property was an extensive one to begin with, and the Liverpool Company is taxed by the Government with having filched no less than 166 estacas (some 1,000 acres) of State lands. Can it be that restitution is about to be enforced? If so, we pity the shareholders of the Liverpool Nitrate Company, hitherto the flower of a ragged flock. The "San Jorge" is doing its level best for the Nitrate Railways Company, cheerfully paying it 6*d.* per quintal (plus 1½*d.* shipping charges) instead of 5*d.* inclusive to the Agua Santa line passing its door, but as in the case of the "Ramirez" the caliche cupboard will soon be bare, and there is no virgin ground (Government or other) conveniently to hand. The Lagunas Syndicate's "South"

oficina has been closed for more than eighteen months; "La Pranja," a large customer of the Nitrate Railways Company, is also the most distant from Iquique—*ergo*, the least remunerative; whilst the great "Alianza," about which we shall have more to say on a future occasion, only commenced operations a few weeks ago and will be a minor factor this year. The Lagunas Company has judiciously kept its powder dry, and abstained from working during the period of low prices for summer shipment, whilst the Puntilla de Huara oficina of the Rosario Company has remained idle for reasons connected with the debenture service. So much for Mr. Robert Harvey's chief "feeders." The lot of the nitrate prophet is not always a happy one, and the desirability of a good memory will be borne in on the chairman of the Tarapaca railways when he faces the music at the next annual meeting, unless the band should strike up in the interval. This is by no means impossible, as it is whispered that the foreign shareholders are growing restive under their betrayal. The company will derive some benefit from the return to a paper currency in Chili, provided the directors do not dabble in exchange, as on former occasions; and it is quite on the cards that there may be some recuperation in traffics in October and November. In the meantime, we commend the following evidence of crab-like progression to the *Daily Mail* and *Vanity Fair* as an antidote to inspiration in the matter of "nitrate rails":—Traffic January 1st to August 15th, 1895, 368,362*l.*; 1896, 359,648*l.*; 1897, 257,935*l.*; 1898, 233,793*l.* On Saturday last the former paper preluded its fatal "bull-tip" on "Trunks" by dishing up the old Nitrate Railway Company story of a probable issue of new shares in order to admit of the distribution of the still undivided net earnings of 1896 and 1897. "There will probably," we were also told, "be some definite figures from the company on Monday." The figures came on Thursday, and were definite enough, but they consisted of the traffic decrease of 6,850*l.* The Nitrate Railway directors are too expert to fritter away the dog days in hatching a scheme likely to be more successful later on as a peg on which to hang a rig in the shares—the last dying flicker perhaps. Something will, of course, have to be done to keep the electorate in a good temper, but at the present time the directors are probably considering the chances of the line being used as a cockpit, as it was in 1891. Nitrate Railways "ordinary" are probably not worth their present price, but to say that the "preferred" and "deferred" combined are worth as much—and a little more—is a mere truism. The preferred will get their share of new stock, and although the deferred are hardly likely to enter the dividend list on this side of the Greek kalends, a 10*l.* railway share at 10*s.* or less should be worth buying, if only as a lottery ticket. The developments in connection with the Antofagasta (Chili) and Bolivia Railway, anticipated in our article of the 6th inst., have taken place even sooner than we expected. The July traffic shows a decrease of \$156,000—equal to 27½ per cent.—and the dividend on the ordinary stock is within measurable distance of being wiped out by the fall in exchange. These are scarcely times when one would expect to find a nitrate company announcing its maiden dividend, but the Salar del Carmen Syndicate on Thursday somewhat unexpectedly came out with a modest interim payment of 2*s.* 6*d.* per 5*l.* share. As the sum required is, however, only 2,750*l.* the achievement is not a vast one. Comment on the position of the Bank of Tarapaca and London must stand over for the present.

### THE RAILWAY RETURNS FOR 1897.

The Board of Trade railway returns for the year 1897—of which we give a careful analysis in another column—though covering results now long past, are useful

as affording a good basis for general comparison with the outcome of former years. In their detailed examination of the results shown in the annual return for the year 1896 the Board of Trade officials pointed out that, whilst an improvement had been afterwards shown in the first half of 1897, the outcome for the latter year as a whole was not likely to be better than that for 1896. This anticipation is certainly borne out to the letter by the returns now before us. In fact the proportion of net receipts on the total capital—which is the essence of this annual return—is actually lower for 1897 than it was for 1896, the figures for the last ten years comparing as follows:—

Year.	Proportion of Net Receipts to Total Capital.
1888 .....	4·06 per cent.
1889 .....	4·21 "
1890 .....	4·10 "
1891 .....	4·00 "
1892 .....	3·85 "
1893 .....	3·60 "
1894 .....	3·77 "
1895 .....	3·80 "
1896 .....	3·88 "
1897 .....	3·73 "

A glance at the above comparison shows that the 1897 ratio was lower than any except 1893, and that was the year of the disastrous coal strike. Compared with 1896 there was a decline in the average net return of 0·15 per cent. The remarkable fact is disclosed by an examination of the return that only once since 1860 has the average net yield been lower than it was last year, and that occasion was the aforementioned year 1893. In reviewing the corresponding figures published for 1896 we pointed out that this average net yield is a trifle misleading, inasmuch as it makes no allowance for the increasing amount of "water" included in the total capitalisation shown in the return. As this "watering" process has been going on at a very rapid rate, it naturally tends to reduce the apparent yield. For the year 1897, for instance, the total paid-up capital of the railways of Great Britain and Ireland was 1,089½ millions, though of this large total the amount of merely nominal additions of "water" was nearly 152½ millions. The real amount of capital may thus be put at 937¼ millions. On this reduced amount of capital the average return works out at over 4 per cent., compared with only 3·73 per cent. shown in the annual return now before us. After all is said and done, however, it is evident that the net yield is declining. Last year was a comparatively good year, and whilst the average return then secured on railway capital was about 4 per cent., if we go back to 1889 we find the net return shown on a capital including large nominal additions was 4·21 per cent. As a decline of only ·21 per cent. represents 2½ millions, practically all of which loss would fall on the ordinary shareholders, the reduction in the net yield is a matter of considerable importance. Certainly the temptation to embark new capital in railway enterprises is not very great, and is moreover yearly becoming less. In fact, for the most part the capital now being expended is being provided by old-established undertakings. These, as we have had occasion to point out lately, have recently been spending rather too freely, with results which are painfully apparent in the dividend outcome for the past six months, and are likely to be even more in evidence this half-year. During 1897, the total addition to the paid-up capital was 60·3 millions, compared with 50·6 millions in the preceding year, though both figures include the large nominal additions made in the conversion and consolidation of stocks of which the Midland Railway conversion alone accounted for nearly 45 millions. Though the average return on the 937¼ millions of real capital was over 4 per cent., the fact remains that no less than 58·4 millions received no return whatever, whilst about 213 millions sterling in all had to be satisfied

with the utterly inadequate return of less than 3 per cent. These figures exclude the capital of lines under construction, and not yet in a position to yield anything to their shareholders. Turning from capital to revenue results, we find that during last year 3,617,932*l.* were added to gross receipts, compared with 4,196,420*l.* during the previous year. The addition to working expenses in 1897 was 2,891,380*l.*, thus leaving an increase in net revenue of only 726,552*l.*—a sum quite insufficient for the purpose of providing interest on the new capital embarked on railway enterprises, much less sufficient to provide increased average dividends. During 1896 the net profit advanced by nearly 1,900,000*l.* The following figures, bearing on the rapid advance in working expenses, are eloquent:—

Year.	Gross receipts.	Working expenses.	Net receipts.
1889 .....	£77,025,017	£40,094,116	£36,930,901
1897 .....	93,737,054	53,083,804	40,653,250

Thus an addition to gross revenue of 16 $\frac{3}{4}$  millions sterling has only yielded an addition of about 3 $\frac{3}{4}$  millions to the net profit. To complete the tale, we may add that capital between 1889 and 1897 increased by 213 $\frac{1}{4}$  millions sterling, and the addition to mileage open for traffic was 1,490 miles. The results disclosed are certainly not cheerful reading to railway shareholders, for, whilst impressing one with the vast importance of the railway industry, they clearly point to the inadequate rate of remuneration yielded for those who have provided the capital. And the worst of the matter is that from almost every standpoint the outlook is for a still lower return in the future. The trading and travelling public in their agitation for lower rates and extended facilities, and the labour agitators as well, might well stay their hands in the light of the facts disclosed, though we are much afraid it is a side of the question which they studiously ignore.

### PASSING NOTES.

The traffic receipts for the week ending August 14th, on thirty-three of the principal lines of the United Kingdom, amounted to 1,890,703*l.*, which was earned on 19,253 $\frac{1}{4}$  miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,846,507*l.*, with 19,034 $\frac{1}{4}$  miles open. There was thus an increase of 44,196*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for seven weeks to date amounted on the same thirty-three lines to 13,153,969*l.*, in comparison with 12,906,177*l.* for the corresponding period last year; increase, 247,732*l.*

A correspondence has taken place between the Southampton Chamber of Commerce and the Postmaster-General as to the Cape mails. A deputation recently waited on the Duke of Norfolk, headed by Sir Edward Clarke, M.P., from Plymouth and other places, urging that there should be an alteration in the present system by which the incoming mails from the Cape were landed at Southampton and not at Plymouth. The Southampton Chamber of Commerce offered to send a deputation to place the case for the southern port before the Postmaster-General if he so desired, but his secretary replied that the Duke was fully acquainted with the whole facts, and he did not think the proposed deputation necessary.

A point of some interest to railway travellers arose at Bolton County Police-court on Thursday. A man named Fairclough was summoned for being abusive and interfering with the comfort of passengers on a Lancashire and Yorkshire Railway train to Horwich on Bank Holiday. The defendant was travelling with his face towards the engine, and insisted upon the windows being closed. The occupants of the compartment sitting opposite him objected, on account of the heat, and complaint was made at the next station. For the defence it was urged that the defendant had a right to control the window. He was fined 10*s.* for abusiveness.

The gross receipts for the twelve leading English railways for the half-year ending June 30th, 1898, amounted to 33,750,000*l.* (an increase of 947,000*l.* on the corresponding half of 1897); the

expenditure to 20,082,000*l.* (an increase of 1,198,000*l.*); and the net receipts to 13,668,000*l.* (a decrease of 251,000*l.*). The sum distributed by these twelve lines as dividend on their ordinary stocks (Chatham second preference for this calculation being reckoned as an ordinary stock) was 4,733,000*l.* in the past half-year, as against 5,122,000*l.* in the corresponding previous period, the balances carried forward amounting to 269,000*l.*, as against 229,000*l.*

The Board of Trade has granted a further extension of time under the provisions of the Railway and Canal Traffic Act, 1894, section 1 (5), to December 31st next, within which traders who filed complaints at the Board of Trade prior to February, 1895, and who are anxious to claim damages against railway companies for matters relating to increases in railway rates, must lodge their claims with the Railway and Canal Commissioners. The Board of Trade has granted as many as fourteen extensions of time, covering a period of nearly four years, and we understand that it is not proposed to grant any further extension.

The views of THE RAILWAY TIMES on the question of hereditary directorships are already known, and last found expression when Mr. J. B. Fielden was elected a director of the Lancashire and Yorkshire Railway, and when Mr. A. Drysdale joined the boards of the Railway Share Trust and Railway Debenture Trust companies. Now we observe that another member of the Guest family, the Hon. Ivor C. Guest, has been elected to the board of the Taff Vale Railway, in succession to the late Mr. Arthur Guest, whose chairmanship, to say the least of it, was not a brilliant success.

The half-yearly report of the Londonderry and Lough Swilly Railway Company states that since the date of the last half-yearly meeting there have been extensive correspondence and several interviews with the Board of Works, with reference to the proposed railway from Letterkenny to Burtonport. The working drawings and specification have been prepared, and tenders for the construction of the line will be invited at an early date. The directors trust the construction of this line and of the Carndonagh extension will be undertaken without further delay.

A vacancy having occurred at the head of the stores department of the Great Northern Railway at Doncaster, the directors advertised for candidates, and upwards of 300 applications were received. The committee reduced them to some half-dozen, and out of these the successful candidate is an official on the North British Railway—Mr. William T. Weeks, who is assistant to Mr. J. J. Smith, the stores superintendent of the North British Railway at Cowlairs. Mr. Weeks expects to take up his new duties about the end of next month or the beginning of October.

The half-yearly report of the Cawood Wistow and Selby Railway states that the railway was opened for passenger traffic on February 16th last. The balance to the credit of net revenue was 859*l.*, out of which it was proposed to pay dividends at the rate of 4 per cent. per annum on the preferred half-shares, and at the rate of 3 per cent. per annum on the deferred half-shares. A balance of 439*l.*, is to be carried to the next half-year. The quantity of merchandise traffic received and forwarded was 15,777 tons, and the number of passengers carried 6,819.

The following dividends have been declared during the past week:—Festiniog Railway, at the rate of 4 per cent. per annum; Londonderry and Lough Swilly Railway, at the rate of 7 per cent. per annum; Shropshire Union Railway and Canal, at the rate of 3 $\frac{1}{2}$  (against 3 $\frac{1}{4}$ ) per cent. per annum; Cleator and Workington Junction Railway, at the rate of 4 (against 3 $\frac{1}{2}$ ) per cent. per annum; Rochdale Canal, at the rate of 1 per cent. per annum; Forth and Clyde Junction Railway, at the usual rate of 7 per cent. per annum.

The contractors for the construction of the Central London Railway have just commenced the construction of an air-lock at the Davies-street Station, near Oxford-street. The difficulty of tunnelling at this point necessitates the use of compressed air, the excavation coming into contact with one of the rivulets of the London of bygone times. Rapid progress has been made with all branches of the work, and it is now possible, the City

*Press* says, to walk along the line from Chancery-lane to Davies-street Station.

A special general meeting of the Caledonian Railway Company will be held on September 20th for the purpose of authorising the exercise of the powers of subscription conferred upon the company by the "Callander and Oban Railway Act, 1896," and the "Lanarkshire and Dumbartonshire Railway (Capital) Act, 1898."

The Cricklewood Kilburn and Victoria Railway Construction Syndicate, Limited, is the title of a company which has just been formed with a capital of 20,000*l.*, in 10*l.* shares, to carry on business in the manner suggested by the title. The regulations of Table A in most cases apply. Registered office—28, Victoria-street, S.W.

Last Tuesday's *London Gazette* contains a notice referring to the liquidation of the Banbury and Cheltenham Direct Railway Company, and giving details of the distribution of certain moneys to stockholders coming to the liquidator under an agreement with the Great Western Railway Company.

At the half-yearly meeting of the Millwall Dock Company, yesterday, the chairman said they had insured their risks under the Workmen's Compensation Act at a rate of 12*s.* per cent., but the insurance companies had now raised their rates to such an extent that they had decided to accept the risk themselves.

The directors of the North British Railway, at their meeting last week, appointed Mr. John Gray as engineer of the Western district of that system. Mr. Gray was the chief assistant to Mr. Thomas P. Carswell, whose resignation we recently announced.

Mr. T. A. Wilson, manager of the Highland Railway, has received a very handsome silver bowl, with stand, from the officials of the North Eastern Railway Company, "in remembrance of friendly relations with him in the service of the company."

Victims of the recent rig in Pekin Syndicate shares, referred to in our leader columns a week ago, will find food for reflection in an article from the Shanghai correspondent of the *Times*, which appeared in Wednesday's issue of that journal.

The Great Western Railway Company, from August 15th until October 15th inclusive, will run a specially accelerated daily service (Sundays excepted) to and from Killarney and the whole of the South of Ireland, *via* Milford and Waterford.

Another attempt is being made in the City to underwrite the bonds of that precious concern, the Atlantic and Lake Superior Railway Company, with a view, of course, to their being subsequently foisted upon the investing public. *Cave!*

The London General Omnibus meeting on Thursday gave a beautiful example of what is vulgarly known as a "put up job." *Vide* report of the proceedings following on the adoption of the report and accounts.

The Board of Trade has issued a certificate sanctioning running cars on the New Cliff Tramways at Swansea, declaring the same fit for traffic. The line will be opened forthwith.

The North Eastern Railway Company are making arrangements for the construction of a new high-level bridge over the Tyne, to carry four lines of rails.

The death is announced of Mr. Charles Hull, chief of the estate department of the London and North Western Railway Company.

## Money and Stock Markets.

*The monthly settlement in Consols takes place on the 1st prox.; the fortnightly settlement in other Securities commences on the 29th inst.*

CITY, FRIDAY EVENING.

With an abundant supply of money, and a very quiet demand, rates in the MONEY MARKET naturally continue low, and no difficulty is experienced in obtaining day to day accommodation at  $\frac{1}{4}$  to  $\frac{1}{2}$  per cent., loans for a week commanding very little more, if any more, than the latter

figures. There are very few bills about, and the rate for three months' paper is easy at 17-16 per cent., whilst six months' drafts are quoted 2 $\frac{3}{4}$  per cent. The Bank Return, issued yesterday, shows an increase (chiefly due to the receipt of coin and bullion from home and abroad) of 548,000*l.* in the reserve, which now stands at 23,773,000*l.*; its proportion to the current liabilities is 1 $\frac{1}{2}$  higher at 47 $\frac{1}{4}$  per cent. Heavy revenue payments are shown in an increase of 1,232,000*l.* in the public deposits, and there has been a further reduction in the Bank's holding of Government and "other securities," the latter item showing a decrease of 1,223,000*l.*, part of which may perhaps be accounted for by the maturing of Indian Government debentures. These movements have left the market nearly two millions poorer. The only bullion movement since the issue of the Return has been the sale of 25,000*l.* in French gold coin.

The Bankers' Clearing-house return for the week ending August 17th, 1898, shows a total of 161,808,000*l.*, as compared with 171,729,000*l.* for the corresponding period last year.

Silver bars are now quoted at 27 $\frac{3}{4}$ d. per oz., being 1-16d. lower on the week. A year ago the price was 24 $\frac{1}{4}$ d.

Eastern exchanges are telegraphed as follows:—Bombay, 1*s.* 3 $\frac{1}{4}$ d.; Calcutta, 1*s.* 3 $\frac{1}{4}$ d.; Hong Kong, 1*s.* 11 $\frac{1}{4}$ d.; Shanghai, 2*s.* 7 $\frac{1}{4}$ d.; Singapore, 1*s.* 11 $\frac{1}{4}$ d.

The premium on gold at Buenos Ayres has fallen during the week from 176-10 to 164-80 per cent., making the paper dollar (nominally worth 4*s.* 2d.) now actually worth 1*s.* 5-98d. A year ago the premium was 192 per cent., and the value of the paper dollar 1*s.* 4-31d.

The Valparaiso 90-day exchange comes over to-day at 13 $\frac{1}{4}$ d. A year ago it was 17 $\frac{1}{4}$ d.

The Rio de Janeiro exchange on London is 7 5-16d., being 1-32d. lower on the week. A year ago it was 7 $\frac{1}{4}$ d.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£34,984,867	£36,058,708
Total Reserve .....	£23,772,837	£24,965,308
Proportion of Reserve to Liabilities...	47 $\frac{1}{4}$ per cent.	53 $\frac{1}{4}$ per cent.
Notes in Circulation .....	£28,012,030	£27,893,400
Bank Rate of Discount .....	2 $\frac{1}{2}$ per cent.	2 per cent.
Open Market ditto .....	1 $\frac{1}{2}$ per cent.	1 $\frac{1}{2}$ per cent.
Consols (account) .....	110 $\frac{1}{2}$	112 $\frac{1}{2}$
French Rentes (account) .....	103 <i>f.</i> 52 <i>c.</i>	104 <i>f.</i> 90 <i>c.</i>
Paris Cheque Exchange .....	25 <i>f.</i> 24 $\frac{1}{2}$ <i>c.</i>	25 <i>f.</i> 18 $\frac{1}{2}$ <i>c.</i>
New York 60 days ditto .....	\$483 $\frac{1}{2}$	\$483 $\frac{1}{2}$

The STOCK MARKETS are gradually shaking off their "Far-East" fever, and all that is now needed to restore activity is the return of the holiday-makers, which, however is not likely to take place so long as the present brilliant weather here and on the continent lasts. Allowing for the sparse attendance, and the natural paucity of business, the tone must be regarded as good, and in nearly every department an improvement in prices has been established during the week. One of the exceptions is British Government stock, Consols being down  $\frac{1}{2}$ ; but the gilt-edged securities, generally speaking, hold their own. British railway stocks do not show many changes, but what few there are are mostly upward, the recovery in Great Western being partly due to a supposed prospect of ending the Welsh coal strike. South Western issues are unaltered, but should benefit by the enormous traffic likely to accrue from the military manœuvres, to which we refer at some length in our leader columns. Yankee rails, with the exception of Atchisons, have again been rampant, and are now reaching a level at which it behoves operators to be extremely cautious in their purchases. There were signs of a set back to-day, but on the week an important and all-round rise is established, as will be seen below. Canadian Rails have recovered somewhat from the scare which set in at the close of last week, and on the week both Trunks and Canpacs are better. The market in the former is, however, very dead now that the bears have covered. Indian Rails are flat, and mostly a point or two lower;

whilst, in the case of Bombay and Baroda, the fall is as much as 4. Foreign Rails have a rather better appearance, and in this department we look for an important upward movement in the autumn should the markets be undisturbed by international politics. One of the interesting features of the week has been an inquiry for Manila debentures, and it is remarkable that the old 6 per cents., with about 40 per cent. of overdue coupons attached, can still be picked up at about 25. Should the Americans definitely elect to annex the Philippines and adopt a gold standard for the islands these bonds would speedily go to par or more. The rise during the past week is 3 points, and it may be remarked that the lowest these debentures touched during the war was 21. The prior lien bonds, both A and B, come in a different category, and are both excellent speculative investments for "mixing" with other 6 and 7 per cents. Argentines are quiet, with few exceptions. Cordoba and Rosario first debenture stock is up 4; whilst Cordoba Central first preference is down 3. There has been some inquiry for Costa Rica rails, and the shares are up  $\frac{1}{4}$  on the week, the second debentures 3, and the firsts 1. Both these are excellent 6 per cent. investments, whilst the shares perhaps offer greater attractions as a speculation, carrying, at the same time, a good return on capital. The A and B bonds of the Costa Rica Government are a good buy at present prices. Nitrate Rails, to which we refer in our leader columns, are unaltered on the week. On Wednesday the deferred ordinary shares were quoted 7s. 6d. to 10s., without attracting buyers. Mexican Rails are quite neglected for the moment. Brazil Great Southern first debentures have fallen two on the meeting. Great Western of Brazil debenture stock is up 2. Amongst miscellaneous descriptions, Manchester Ship Canal debentures are up 2, and Railway Share Trust shares  $\frac{1}{4}$ .

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.

The Stock Exchange will be closed to-day (Saturday).

It is officially announced that Messrs. Geoffrey R. Guscotte and Evelyn R. Sandwith, trading as Messrs. Hodson, Jarrett, Guscotte and Co., at 7, Drapers'-gardens, E.C., have been declared defaulters upon the Stock Exchange.

## Directors' Reports.

### DUBLIN WICKLOW AND WEXFORD RAILWAY.

#### CAPITAL.

June 30th, 1898.—The expenditure on this account amounts to 2,573,001*l.*, whilst the receipts have been 2,542,437*l.*, viz.:—Ordinary stock, 700,150*l.*; preference stocks, 1,070,000*l.*; debenture stock, 753,227*l.*; premiums, 19,061*l.* The expenditure on capital account during the half-year amounted to 1,460*l.*, of which 1,250*l.* was on lines open for traffic, and 210*l.* on lines in course of construction. Estimated further expenditure—During the current half-year, 2,000*l.*; in subsequent half-years (not stated). Capital powers and other available assets, 79,292*l.*

#### REVENUE.

Subjoined is an abstract of the revenue account for the half-year ending June 30th:—

	1897.	1898.
Passengers, parcels, &c.	£87,510	£86,785
Goods, minerals, and live stock	32,444	33,841
Miscellaneous receipts	4,256	4,342
Gross receipts	£124,250	£124,968
Total expenditure	74,415	75,031
Net receipts	£49,835	£49,937
Prior charges	£36,317	£36,302
Preference dividends	13,500*	13,500*
Balance to next half-year	18	135
Total	£49,835	£49,937

\* On the 1887-1890 preference stocks.

The gross receipts for the past half-year show an increase of 718*l.*, the expenses an increase of 616*l.*, and the net receipts an increase of 102*l.* The ratio of expenses to receipts is 60·04 per cent., as against 59·89 per cent.

#### TRAFFIC, &c.

Half-year ending June 30th.	1897.	1898.
Passengers (total number)	2,364,960	2,476,452
Season-tickets	3,650	3,700
Merchandise (tons)	73,426	75,525
Live stock (number)	65,009	67,924
Minerals (tons)	39,011	44,915
Mileage—Lines owned	133½	134½
" Lines partly owned	1½	1½
" Leased or rented	6	6
" Total	144	144
Train mileage—Passengers	527,661	547,117
" Goods	120,740	118,004
" Total	648,401	665,121

The report states:—

"The traffic receipts for the half-year ended June 30th, 1898, were 631*l.* in excess of those for the corresponding half of 1897. There were increases in receipts from passengers, goods, minerals, and cattle, but a decrease in coal and in parcels. The decrease in parcels, however, is only apparent, the return in 1897, owing to a change in the mode of keeping the accounts (in order to bring everything more fully up to date than had previously been the case) having contained more than six months' receipts for the half-year.

"There was a small saving in cost of locomotive power. This would have been very considerable but for the South Wales coal strike, which made it necessary to use inferior coal at a higher price during the last three months of the half-year. There were also savings in the maintenance of rolling stock, and in traffic expenses, but against these there was a continued heavy expenditure on the permanent way and works. The relaying of the line is being pressed forward. The up line between Westland-row and Kingstown has been completed, and progress is being made with the down line. The principal works for the defence of the coast between Killiney and Greystones have been carried out; but the severe and long-continued storm of March last caused very extensive denudation of the beach between Greystones and Wicklow. This has necessitated a large expenditure in piling at several places along the line, which is not yet complete. There have been completed in the company's works in renewal of old rolling stock during the half-year—one new engine, two third-class brake vans, twenty-five box wagons. Besides these one engine has been reconstructed and made much more powerful, and a second-class carriage has been rebuilt. The whole cost of these has been defrayed out of revenue.

"The Great Western Railway Company having unexpectedly purchased the undertaking of the Fishguard and Rossclare Railways and Harbours Company, and having also in conjunction with the Great Southern and Western Company adopted the South Wexford Railway scheme, which they had previously assisted your directors in opposing, the Bill was referred to a Hybrid Committee of nine members of the House of Commons instead of the usual Private Bill Committee. The scope of the inquiry was thus greatly enlarged, and the cost of the opposition necessary to defend your rights and interests in regard to your New Ross and Waterford Extension Line, sanctioned by the Act of 1897, was consequently much increased. That opposition resulted in a considerable reduction of the capital outlay required at the Waterford end of the extension line. The cost will be charged against the separate capital. The plans for the line are now ready for lodging with the Board of Works, with a view to the appointment of an arbitrator and the purchase of the land.

"Your directors being fully convinced that the extension of your line to Waterford is of vital importance for the future welfare of the company, intend to set about the work of construction at once. They

propose in issuing the separate capital to offer it in the first instance to the shareholders of the company.

"Mr. T. B. Grierson having resigned his position early in the year, Mr. Samuel J. Shannon, who has filled the position of assistant-engineer for several years, has been appointed engineer."

### FURNESS RAILWAY.

#### CAPITAL.

June 30th, 1898.—The total expenditure amounts to 6,465,730*l.*, whilst the receipts have been 6,441,211*l.*, as follows:—

Ordinary stock .....	£2,642,000
Preference and guaranteed stocks .....	2,151,500*
Debenture stock .....	1,629,457
Premiums .....	18,254

Balance at debit of capital account, 24,519*l.* The expenditure in the past half-year was 13,710*l.*, of which 4,063*l.* was on lines open for traffic, 4,749*l.* on working stock, and 4,897*l.* on docks, &c. Estimated further expenditure—In the current half-year, 27,402*l.*; in subsequent half-years, uncertain; total, 27,402*l.* Capital powers and other available assets, 195,922*l.*

\* This is the amount actually received. The amount entitled to dividend is 2,629,35*l.*, the difference being due to nominal additions on consolidation of stocks.

#### REVENUE.

Subjoined is an abstract of the revenue account for the half-year ending June 30th:—

	1897.	1898.
Passengers, parcels, mails, &c. ....	£51,382	£50,977
Goods, minerals, and live stock .....	175,889	185,386
Miscellaneous .....	7,459	7,861

<b>Total .....</b>	<b>£121,262</b>	<b>£128,906</b>

\* At the rate of 1½ per cent. per annum. † At the rate of 2 per cent. per annum. The receipts for the past half-year show an increase of 9,494*l.*, the expenses an increase of 4,256*l.*, and the net receipts an increase of 5,238*l.* The ratio of expenses to receipts is 50.56 per cent. as against 50.79 per cent.

#### TRAFFIC, &c.

Half-year ending June 30th.	1897.	1898.
Passengers carried (total number) .....	1,003,641	1,037,539
Season-tickets .....	435	438
Merchandise (tons) .....	285,341	305,654
Minerals (tons) .....	1,926,030	2,030,950
Mileage—Lines owned .....	117½	117½
" Partly owned .....	33½	33½
" Lines worked .....	19½	19½
" Total .....	170½	170½
Train mileage—Passengers .....	300,872	299,998
" Goods .....	358,648	363,624
" Total .....	659,520	663,622

#### The report states:—

"The following table will show the steady growth of the passenger business within the last three years:—Half-year ending December, 1895, 26,437; June, 1896, 64,305; December, 1896, 71,407; June, 1897, 11,609; December, 1897, 57,242; June, 1898, 33,878; total increase for three years, 26,437.

"The receipts for merchandise, minerals, &c., also show the substantial increase of 9,496*l.* The retrospective payment of 2,251*l.* for the conveyance of her Majesty's mails was brought into the accounts for the half-year ending June 30th, 1897, which will explain the decrease in that section of the receipts. The total increase in the traffic receipts was earned by running only 4,102 extra train miles.

"The directors have continued their policy of increasing the stability of the permanent way by relaying with heavier materials. The revenue for the half-year has been debited with the further sum of 4,490*l.* in replacing two additional engines. The directors propose to continue replacing the company's old engines, with a view to increase the haulage power and eventually reduce working expenses by spending less money in repairs and renewals.

"The Workmen's Compensation Act, 1897, came into force on July 1st last. The directors, after giving the matter very careful consideration, have decided for the present to deal direct with their staff, and not through the medium of any assurance or guarantee association."

We have received the following, dated August 16th, from the Agent-General for New Zealand:—"Referring to my letter of the 11th instant, relating to the price of ten locomotives ordered by the New Zealand Government of the Baldwin Locomotive Works at Philadelphia, I am directed by the Agent-General to state that by subsequent advices he has been informed that the price as finally settled of each engine is 1,675*l.* (not 2,000*l.*), c.i.f. Wellington, to be shipped in ninety days."

### PRIVATE BILLS OF 1898.

#### RESULTS OF THE SESSION.

Where the name of the Bill is followed by a date only, it signifies that the Royal Assent was given on such date. In the case of Bills which were not passed their fate is stated.

Andoversford and Stratford-upon-Avon Railway, Bill read third time April 18.  
Barry Railway, Royal Assent July 25.  
Barry Railway (Steam Vessels), preamble not proved.  
Belfast Harbour, July 25.  
Bideford and Clovelly Railway, July 25.  
Birmingham North Warwickshire and Stratford-upon-Avon Railway (Extension of Time), August 2.  
Blackpool and Fleetwood Tramroad (Tramway Extensions), July 25.  
Bombay Baroda and Central India Railway Company, July 1.  
Brecon and Merthyr Tydfil Junction Railway, withdrawn.  
Brighton Underground Railway, Bill not proceeded with.  
Buenos Ayres Northern Railway, July 25.  
Caledonian Railway, August 2.  
Cardiff Railway, August 12.  
Charing-cross Euston and Hampstead Railway, July 25.  
Chipstead Valley Railway, May 23.  
City and Brixton Railway, July 1.  
City and South London Railway, May 23.  
Cranbrook and Paddock Wood Railway, withdrawn.  
Crowhurst Sidley and Bexhill Railway, July 1.  
Dover Harbour, July 25.  
Dublin Port and Docks, August 2.  
Dundee Suburban Railway (Extension of Time), not proceeded with.  
East and West Wales Railway, preamble not proved.  
Easton and Church Hope Railway (Extension of Time), August 2.  
Exeter Teign Valley and Chagford Railway, August 12.  
Fishguard and Rosslyn Railways and Harbours, August 12.  
Glasgow and South Western Railway, July 25.  
Great Central Railway, August 12.  
Great Eastern Railway Company and Midland and Great Northern Railways Joint Committee, July 25.  
Great Eastern Railway (General Powers), July 1.  
Great Eastern Railway (Pensions), July 25.  
Great Northern and City Railway, withdrawn.  
Great Northern Railway, July 25.  
Great North of Scotland Railway, August 12.  
Great Orme Tramway and Tramroad, May 23.  
Great Western Railway (Dublin Wicklow and Wexford Railway), withdrawn.  
Great Western Railway (General Powers), August 2.  
Great Western Railway (New Works), August 12.  
Hull Barnsley and West Riding Junction Railway and Dock, July 25.  
Isle of Wight Railway (Brading Harbour and Railway), August 2.  
Kingstown and Kingsbridge Junction Railway (Abandonment), August 12.  
Knott End Railway, August 12.  
Lancashire and Dumbartonshire Railway, July 1.  
Lancashire and Yorkshire Railway, July 1.  
Lancashire Derbyshire and East Coast Railway, August 12.  
Latimer-road and Acton Railway, withdrawn.  
Lincoln and East Coast Railway and Dock, August 12.  
Llanelli and Pontardulais Railway, Bill read third time May 12.  
London and North Western Railway, August 12.  
London and North Western Railway (Steam Vessels), May 23.  
London and North Western Railway (Wales), August 2.  
London and South Western Railway, July 25.  
London Brighton and South Coast Railway, July 25.  
London Chatham and Dover Railway, July 25.  
London Tilbury and Southend Railway, August 2.  
London Walthamstow and Epping Forest Railway (Abandonment), withdrawn.  
London Walthamstow and Epping Forest Railway, July 1.  
Marianao and Havana Railway Company, May 23.  
Mersey Docks and Harbour Board (New Works), May 23.  
Mersey Docks and Harbour Board (Various Powers), May 23.  
Mersey Railway, August 12.  
Metropolitan Railway, August 2.  
Midland Railway, July 1.  
Midland Railway (West Riding Lines), July 25.  
Milford Docks, July 1.  
Mumbles Railway and Pier, July 25.  
Muswell-hill and Palace Railway, apparently not proceeded with beyond second reading.  
Neath Pontardawe and Brynaman Railway, July 25.  
Newhaven Harbour, July 25.  
Newhaven Harbour and Ouse Lower Navigation, July 1.  
North British Railway, August 12.  
North Eastern Railway, August 2.  
North Pembrokeshire and Fishguard Railway, withdrawn.  
Rhondda and Swansea Bay Railway, July 25.  
St. David's Railway, August 2.  
Seaham Harbour, August 12.  
Sheffield District Railway, August 12.  
South Eastern Railway, July 1.  
Taff Vale Railway, apparently not proceeded with beyond second reading.  
Tenterden Railway, Bill not proceeded with.  
Torrington and Okehampton Railway, July 1.  
Usk Valley Railway, August 2.  
Waterford, Dungarvan and Lismore and Fermoy and Lismore Railways (Vesting), withdrawn.  
Whitechapel and Bow Railway, August 12.

Windsor and Ascot Railway, August 12.  
Windsor Dock, Cardiff, Bill read third time June 23.  
Wirral Railway, July 1.  
Wolverhampton and Easington Mineral Railway, Bill not proceeded with.  
Workington Railways and Docks, Bill not proceeded with.

### THE COMPANIES ACT, 1898.

The Act which will hereafter be known as the Companies Act, 1898, comes at once into full force and operation. This Act has been passed to amend section 25 of the Companies Act, 1867, which enacts that "every share in any company shall be deemed and taken to have been issued and to be held subject to the payment of the whole amount thereof in cash, unless the same shall have been otherwise determined by a contract duly made in writing and filed with the Registrar of Joint Stock Companies at or before the issue of such shares." Although the meaning of this section is apparently clear, inasmuch as it simply prohibits the issue of shares otherwise than for cash, except under the terms of a registered contract, few sections in the company law have given rise to more litigation. The object of the new law is to empower the court to grant relief for non-compliance with this section by a procedure similar to "an application to rectify the register of members." The operative clause in this short Act enacts that "whenever, before or after the commencement of this Act, any shares in the capital of any company under the Companies Acts, 1862 and 1890, credited as fully or partly paid up, shall have been, or may be, issued for a consideration other than cash, and at or before the issue of such shares no contract or no sufficient contract is filed with the Registrar of Joint Stock Companies in compliance with section 25 of the Companies Act, 1867, the company or any person interested in such shares or any of them may apply to the court for relief, and the court, if satisfied that the omission to file a contract or sufficient contract was accidental or due to inadvertence, or that for any reason it is just and equitable to grant relief may make an order for filing with the Registrar of a sufficient contract in writing, and directing that on such contract being filed within a specified period it shall, in relation to such shares, operate as if it had been duly filed with the Registrar aforesaid before the issue of such shares." The sub-sections to this clause set out the procedure that is to be followed to obtain relief from the court, and they also provide that the application may be made "either before or after an order has been made or an effective resolution has been passed for the winding-up of such company, and either before or after the commencement of any proceedings for enforcing the liability on such shares consequent on the omission aforesaid, and any such application shall, if not made by the company, be served on the company." The Act also empowers the court to make its order on such terms and conditions as it "may think fit," and "where the court in any such case is satisfied that the filing of the requisite contract would cause delay or inconvenience, or is impracticable, it may, in lieu thereof, direct the filing of a memorandum in writing in a form approved by the court, specifying the consideration for which the shares were issued, and may direct that on such memorandum being filed within a specified period it shall in relation to such shares operate as if it were a sufficient contract in writing within the meaning of section 25 of the Companies Act, 1867, and had been duly filed with the Registrar aforesaid before the issue of such shares."

### CHINESE RAILWAY CONCESSIONS.

In the House of Commons, on the 12th inst., just before the prorogation of Parliament,

Mr. DRAGE asked the Under-Secretary for Foreign Affairs whether any information had reached the Foreign-office to the effect that a separate agreement had been drawn up in connection with the Peking-Hau-kau Railway concession, under which the Minister at Peking of the country which had the largest financial interest in the said concession was appointed arbitrator in any question under dispute, thus giving the Russian Minister at Peking an absolute power in all disputes; and, if so, whether her Majesty's Government had through Sir Claude MacDonald expressed to the Chinese Government their disapproval of this provision.

Mr. BALFOUR—No information has reached us since yesterday to modify the statement then made. We have not the information for which the hon. member asks.

Mr. JOSEPH WALTON asked the First Lord of the Treasury whether her Majesty's Government would use their influence at Peking to prevent the ratification of the Peking Hankau Railway concession in favour of any foreign Governments or syndicates; and whether, in order to secure the neutralisation of this railway, they would facilitate its construction by the Chinese Government, and, if necessary, guarantee a loan for this purpose.

Mr. BALFOUR—I cannot give the hon. member the guarantee for which he asks.

Mr. LOWLES asked whether, in the event of concessions already acquired by French or Belgian syndicates for railway construction in the Yang-tze Valley being bought by English capitalists and worked by English companies, they would receive the recognition of her Majesty's Government.

Mr. BALFOUR—Every legitimate commercial enterprise in China will receive the support of the Government.

Mr. LOWLES—In the event of their wanting any information with regard to the validity of a concession, will the Foreign-office assist them?

Mr. BALFOUR—Yes; every assistance will be given both at Peking and in London to any companies like those indicated. (Cheers.)

### PRIVATE BILL PROCEDURE (SCOTLAND) BILL.

A Parliamentary paper containing the report and special report of the Select Committee on the Private Bill Procedure (Scotland) Bill, with the proceedings of the committee, has been issued. The special report states that the Bill differed from all former Bills, inasmuch as it did not propose to alter the procedure connected with the passing of private Bills. It rather sought to provide for a method of obtaining provisional orders which should have the same effect as Acts of Parliament, in all cases which were appropriate for such procedure, leaving other matters to be dealt with as at present by private Bill. The committee came to the conclusion that the scheme of the Bill was preferable to any scheme not embodying the provisional order system. In dealing with the constitution of the tribunal to hold local inquiries, the committee discussed the advantages and disadvantages of a commission composed of members of the two Houses of Parliament and of a body formed of persons who are not necessarily members of either House of Parliament. It is the last-named view which the majority of the committee favour. A recommendation is also made that the fees charged by the two Houses in connection with private business should be reduced.

## American & Canadian Railways.

### NORFOLK AND WESTERN.

The company, in connection with the declaration last week of a 2 per cent dividend on the preferred shares, issued the following statement:—

	1896-97.	1897-98.
Passenger mail and express .....	\$1,760,373	\$1,832,419
Freight .....	8,777,350	9,403,703
Total earnings .....	\$10,537,723	\$11,236,123
Expenses and taxes .....	7,903,448	7,886,098
Net earnings .....	\$2,634,275	\$3,350,024
Other income, interest, and dividends .....		32,963
Total income .....		\$3,382,987
Funded debt charges .....		\$2,211,086
Car trust obligations .....		28,358
Advances to subsidiary companies .....		4,605
Surplus for fiscal year ending June 30, 1898 .....		\$1,138,937
Dividends on pref. (1 per cent. Feb., 1898; 2 per cent. Aug., 1898) .....		690,000
Surplus balance .....		\$448,937

### ST. LOUIS AND SAN FRANCISCO.

The following is an official statement for the late fiscal year in comparison with similar statements for earlier years:—

	1897.	1898.
Gross earnings .....	\$5,993,336	\$6,886,468
Operating expenses .....	3,483,628	4,030,109
Net earnings .....	\$2,509,708	\$2,856,359
Miscellaneous income .....	7,066	40,599
Total net income .....	\$2,516,774	\$2,896,958
Taxes, interest on bonds, rentals, &c. .....	2,185,707	2,239,673
Balance for year .....	331,067	\$657,285

For 1896-7 a dividend of 2 per cent. was paid on \$5,000,000 first preferred stock, absorbing \$100,000, and leaving a surplus of \$231,067. For 1897-8 a dividend of 4 per cent. was paid on the first preferred, absorbing \$200,000, and 1 per cent. on \$14,335,700 second preferred, absorbing \$143,357, leaving a surplus balance of \$313,928.

### UNION PACIFIC.

The Reorganisation Committee of the Union Pacific Railroad Company, at its final meeting, passed the following resolution:—  
"Whereas the Reorganisation Committee of the Union Pacific determined not to include a compulsory voting trust as a

condition of its plan, but at the close of its labours to create a Proxy Committee, to which the shareholders might voluntarily intrust their proxies, while satisfied with and desiring to continue the policy and management inaugurated by the committee, resolved that the Reorganisation Committee hereby nominates and selects as such Proxy Committee Messrs. Fitzgerald, Schiff, Pierce, Ames, and Harriman to permanently represent at the annual and other meetings such holders of the common and preferred stock as may desire to intrust their proxies to the committee for the purpose of maintaining the management and general policy inaugurated by the Reorganisation Committee."

#### DENVER AND RIO GRANDE RAILROAD.

The following is an official statement for the last two fiscal years in comparison with the years 1895-6 and 1894-5:—

	1896-7.	1897-8.
Gross earnings.....	\$6,945,114	\$8,342,926
Operative expenses .....	4,075,336	5,017,599
Net earnings .....	\$2,869,778	\$3,325,326
Charges, taxes, &c.....	2,365,582	2,476,824
Surplus for year .....	\$504,195	\$848,502
Dividend on preferred stock .....	478,000	591,250
Remaining surplus .....	\$31,195	\$257,252

The dividend on the preferred stock for 1896-7 was 2 per cent., and for 1897-8 2½ per cent.

#### LATEST EARNINGS.

Second week of August.—Chicago Milwaukee and St. Paul, \$623,000—increase, \$36,000; Denver and Rio Grande, \$165,000—increase, \$17,000; Texas and Pacific, \$101,000—decrease, \$21,000; Baltimore and Ohio South Western, \$133,000—increase, \$4,000; Chesapeake and Ohio, \$207,000, decrease, \$17,000; Chicago Great Western, \$104,000—increase, \$6,000; Mexican Central, \$243,000—increase, \$27,000; Missouri Kansas and Texas, \$176,000—decrease, \$7,000; Missouri Pacific, \$476,000—decrease, \$27,000; New York Ontario and Western, \$87,000—increase, \$1,000; Wabash, \$283,000—increase, \$4,000.

First week of August.—Cleveland Cincinnati Chicago and St. Louis, \$263,000—decrease, \$15,000; St. Louis and San Francisco, \$122,000 (same as last year); Louisville and Nashville, \$388,000—decrease, \$18,000; Norfolk and Western, \$215,000—decrease, \$4,000; St. Louis South Western, \$90,000—increase, \$12,000; Southern Railway, \$408,000—increase, \$31,000; Northern Pacific, \$457,000—increase, \$68,000. The gross earnings of fifty-seven roads in the first week of August show an increase of 1·70 per cent.

Month of July.—Illinois Central, gross, \$2,043,000—increase, \$59,000; Pittsburg Cincinnati Chicago and St. Louis, gross, \$1,232,000—increase, \$61,000; net, \$360,000—decrease, \$22,000; surplus after charges, \$73,000—decrease, \$82,000. The gross earnings of 132 roads in the month of July amounted to \$41,432,712, being an increase of \$723,467, or 1·78 per cent.

Month of June.—Missouri Kansas and Texas, gross, \$666,000; net, \$121,000; deficit after charges, \$165,000. Illinois Central, gross, \$2,138,000—increase, \$341,000; net, \$597,000—increase, \$377,000.

#### RAILROAD NOTES.

A New York correspondent, telegraphing on Tuesday, says:—Mr. Joseph Price, vice-president of the Grand Trunk, speaking of the rate war, said to-day:—"In all probability Sir Rivers Wilson and Mr. Van Horne will have a conference before the former's return to England. Remember, this is not a rate war between the Grand Trunk and the Canadian Pacific, but between the Canadian Pacific and the Western American lines." The reporter asked with which party the Grand Trunk is in sympathy. Mr. Price replied:—"That is scarcely the way to put it. We have connections with the western lines; we sell their tickets, and are thus brought into immediate business relations with them; but the Grand Trunk can never desire rate-cutting or rate wars. Our policy has always been to maintain rates at a fair standard, and anything which the officers of the Grand Trunk can do to bring about a restoration of rates will certainly be done."

The reorganisation plan of the Baltimore and Ohio Railroad Company having been declared operative, the reorganisation managers remind holders of securities affected by the plan that Saturday, August 20th, is the last day on which bonds and stocks can be deposited without fine. After this date, but only for such time as the managers may fix by notice, deposits of bonds and stocks will be accepted only upon a cash payment of 2

per cent. of the par value of bonds and an additional cash payment of \$2 per share of stock deposited.

The report of the Interstate Commerce Commission on the recent passenger rate case will not be ready for promulgation for some time. The report has not yet been prepared, and after it is prepared it will have to be submitted to all the members of the Commission, who are now widely separated. The Commission is without any authority to change the existing conditions; the most it can do will be to recommend to Congress such legislation as will remedy the evils complained of.

President Hill, of the Great Northern, in an interview on Monday, said that the company had been compelled to refuse shipment of 60,000 tons of steel rails and 30,000,000lb. of cotton, all demanded by Asia, simply because it had no water facilities by means of which to transport the goods to the Asiatic ports. He says the Pacific commerce is fraught with all that is propitious for the future.

The gross earnings of the New York Ontario and Western for the fiscal year ending June 30th last amounted to \$3,914,600, and the net earnings to \$1,113,000, against \$3,894,460 and \$1,113,900 in 1897. After paying interest, rentals, and charges, the surplus is \$402,500, against \$399,900 in the previous year.

The directors of the Atlantic and Danville have declared a dividend of 1 per cent. on the preferred stock, payable on and after September 1st, at the offices of the company, Norfolk, Va., or at the office of B. Newgass and Co., 7, Lothbury, E.C.

The Chicago Burlington and Quincy has declared a quarterly dividend of 1½ per cent., putting the stock back to a higher dividend basis than in any year since 1887, which was the last of a series of six years when the rate was 8 per cent.

President A. B. Stickney, of the Chicago Great Western, says that his engineers are engaged in surveying the route of the new tracks it is proposed to build, but that it is not likely much actual mileage, if any, will be built this year.

For the year ending June 30th, 1898, the Missouri Kansas and Texas shows:—Gross earnings, \$12,047,233; operating expenses and taxes, \$8,182,390; net earnings, \$3,864,843; interest on bonds and rentals, \$3,427,161; surplus, \$437,682.

Concerning the reported consolidation of the Cleveland Cincinnati Chicago and St. Louis with some outside roads, President Ingalls on Wednesday said that the matter was entirely in the air.

Last week's eastbound all-rail freight tonnage from Chicago amounted to 51,000 tons, the Erie Road leading with 8,000. The figure for the corresponding week last year was 56,000 tons.

There is some talk that the next dividend on the 5 per cent preferred stock of the Southern will be 2 per cent. The last distribution was in January, when 1 per cent. was paid.

Letters of allotment for the 250,000l. 6 per cent. first mortgage debenture stock in the White Pass and Yukon Railway Company, Limited, have been posted.

It is announced that Mr. Scott has resigned his position as a director of the Central Pacific, and that he is succeeded by Mr. Joseph D. Grant.

The St. Louis and San Francisco Railroad will operate the Kansas City and Osceola Southern Road from September 1st.

The Western line presidents are arranging another conference to consider the question of passenger rates.

**Railway Accidents in France.**—The Minister of Commerce on Thursday published the statistics of railway accidents which have taken place in France during the first three months of the current year. They show a total of 284 persons killed and 3,860 injured. The average is over two persons killed and thirty injured daily. Among the killed were 119 employes of the railway companies; 954 of the wounded belonged to the same category. The number of persons killed and wounded in consequence of crossing the railway track within a station was sixty-five and thirty-six respectively. In the cases of 140 persons killed and 365 injured, the cause is attributed to the imprudence or negligence of the victims.

## General News.

## RAILWAY STATISTICS, 1897.

The Railway Returns for England and Wales, Scotland, and Ireland for the year ending December 31st, 1897, have been issued by the Board of Trade. The following are the most salient features:—

## MILEAGE.

Length of line (in miles) open for traffic:—*England and Wales*—Double line, 9,705; single line, 5,113; total, 14,818. *Scotland*—Double, 1,408; single, 2,039; total, 3,447. *Ireland*—Double, 619; single, 2,549; total, 3,168. *United Kingdom*—Double, 11,732; single, 9,701; total, 21,433.

## CAPITAL.

Authorised Capital:—*England and Wales*—Shares and stock, 708,423,602*l.*; loans and debenture stock, 282,444,279*l.*; total, 990,867,881*l.* *Scotland*—Shares and stock, 118,286,280*l.*; loans and debenture stock, 37,196,794*l.*; total, 155,483,074*l.* *Ireland*—Shares and stock, 30,579,111*l.*; loans and debenture stock, 13,085,109*l.*; total, 43,664,220*l.* *United Kingdom*—Shares and stock, 857,288,993*l.*; loans and debenture stock, 332,726,182*l.*; total, 1,190,015,175*l.*

Paid-up Stock and Share Capital:—*England and Wales*—Ordinary, 343,806,353*l.*; guaranteed, 86,776,086*l.*; preferential, 216,729,104*l.*; total, 647,311,543*l.* *Scotland*—Ordinary, 65,248,995*l.*; guaranteed, 13,076,198*l.*; preferential, 44,311,460*l.*; total, 122,636,653*l.* *Ireland*—Ordinary, 16,446,234*l.*; guaranteed, 3,208,991*l.*; preferential, 8,332,876*l.*; total, 27,988,101*l.* *United Kingdom*—Ordinary, 425,501,582*l.*; guaranteed, 103,061,275*l.*; preferential, 269,373,440*l.*; total, 797,936,297*l.*

The subjoined figures show the amounts (included in the figures of the preceding paragraph) by which the paid-up stock and share capital of the companies has been nominally increased:—*England and Wales*—Ordinary, 50,149,528*l.*; guaranteed, 7,212,908*l.*; preferential, 20,148,944*l.*; total, 77,511,380*l.* *Scotland*—Ordinary, 27,705,286*l.*; guaranteed, 2,721,650*l.*; preferential, 6,294,921*l.*; total, 36,721,857*l.* *Ireland*—Guaranteed, 141,854*l.*; preferential, 132,707*l.*; total, 274,561*l.* *United Kingdom*—Ordinary, 77,854,814*l.*; guaranteed, 10,076,412*l.*; preferential, 26,576,572*l.*; total, 114,507,798*l.*

Capital raised by Loans and Debenture Stock:—*England and Wales*—Loans, 11,399,898*l.*; debenture stock, 237,699,602*l.*; total, 249,099,500*l.* *Scotland*—Loans, 580,491*l.*; debenture stock, 30,670,451*l.*; total, 31,250,942*l.* *Ireland*—Loans, 527,364*l.*; debenture stock, 10,950,992*l.*; total, 11,478,356*l.* *United Kingdom*—Loans, 12,507,753*l.*; debenture stock, 279,321,045*l.*; total, 291,828,798*l.*

The subjoined figures show the amounts (included in the figures of the preceding paragraph) by which the debenture stock capital of the companies has been nominally increased:—*England and Wales*—34,407,271*l.* *Scotland*—3,345,786*l.* *Ireland*—209,274*l.* *United Kingdom*—37,968,273*l.* (including 5,942*l.* nominal increase in "loans," England and Wales).

Total Capital paid up and raised by Loans and Debenture Stock:—*England and Wales*—896,411,043*l.* *Scotland*—153,887,595*l.* *Ireland*—39,466,457*l.* *United Kingdom*—1,089,765,095*l.*

The following figures show the amounts (included in the preceding paragraph) by which the paid-up share and loan capital has been nominally increased:—*England and Wales*—111,924,593*l.* *Scotland*—40,067,643*l.* *Ireland*—483,835*l.* *United Kingdom*—152,476,071*l.*

Subscriptions to other companies:—*England and Wales*—33,798,015*l.* *Scotland*—1,692,503*l.* *Ireland*—287,630*l.* *United Kingdom*—35,778,148*l.*

## DIVIDENDS AND INTEREST.

The stock and share capital of new companies in the United Kingdom, the lines of which were in course of construction on December 31st, 1897, amounted to 2,938,662*l.* On 723,595*l.* of this no dividends were paid, and on 2,215,067*l.* there was paid 3 per cent. The stock and share capital of constructed lines upon which no dividend was paid amounted to 58,429,008*l.* On 5,153,634*l.* of stock and share capital dividends of not more than 1 per cent. were paid; on 21,387,221*l.*, dividends were paid exceeding 1 and not exceeding 2 per cent.; on 128,061,784*l.*, dividends were paid exceeding 2 and not exceeding 3 per cent.; on 312,177,853*l.*, dividends were paid exceeding 3 and not exceeding 4 per cent.; on 109,811,581*l.*, dividends were paid exceeding 4 and not exceeding 5 per cent.; on 67,515,251*l.*, dividends were paid exceeding 5 and not exceeding 6 per cent.; on 47,633,002*l.*, dividends were paid exceeding 6 and not exceeding 7 per cent.; on 43,235,833*l.*, dividends were paid exceeding 7 and not exceeding 8 per cent.; on 288,000*l.*, dividends were paid exceeding 8 and not exceeding 9 per cent.; on 800,112*l.*, dividends were paid exceeding 9 and not exceeding 10 per cent.; and on 504,351*l.* dividends were paid exceeding 10 per cent.

Of loan and debenture stock capital, 380,715*l.* was not entitled to interest; 777,766*l.* was entitled to interest not exceeding 1 per cent.; 1,666*l.* was entitled to interest exceeding 1 per cent. and not exceeding 2 per cent.; 160,384,825*l.* to interest exceeding 2 and not exceeding 3 per cent.; 77,754,177*l.* to interest exceeding 3 and not exceeding 4 per cent.; 50,939,577*l.* to interest exceeding 4 and not exceeding 5 per cent.; 1,584,672*l.* to interest exceeding 5 and not exceeding 6 per cent.; and 5,400*l.* to interest exceeding 7 and not exceeding 8 per cent.

## MISCELLANEOUS.

Traffic receipts per mile of line open were 4,123*l.* (against 4,009*l.* in 1896). Receipts from passenger traffic equalled 43.23 per cent. of total receipts; ditto from goods traffic, 51.05 per cent.; miscellaneous receipts equalled 5.72 of total. Total traffic receipts equalled 4*l.* 9*d.* per train mile (against 4*l.* 10*d.* in 1896). The

net receipts were equal to 87.3 per cent. on the total paid-up capital, against 88 per cent. for the previous year, and were within 0.13 per cent. of the lowest on record for any previous year.

### THE GREAT NORTHERN RAILWAY AT MANCHESTER.

The *Times* says:—The new Deansgate goods depôt of the Great Northern Railway Company in Manchester, the first portion of which has been opened for the reception of traffic, is important not only as an imposing engineering work and as an addition to the transport facilities of a great city, but also as a symptom of great and far-reaching changes in the relationship of two of the railway companies which serve the north-west of England. When the Manchester Sheffield and Lincolnshire—now the Great Central—Railway Company obtained Parliamentary powers in 1892 for its extension from Nottinghamshire to London it was agreed, as the price of the Great Northern's withdrawal of its opposition to that measure—opposition which had been successful in throwing out the Bill in the previous year—that the agreement of partnership between the two companies for London-Lancashire and other traffic should be replaced by a new agreement which secured to the Great Northern powers of independent and competitive access to Lancashire, Cheshire, and the north-west of England generally. Just a year ago the Great Northern took advantage of this new arrangement to open independent agencies and to undertake its own cartage work in Liverpool, Stockport, Warrington, Rochdale, Blackburn, Huddersfield, and Sheffield, and also to open agencies in Dublin and Belfast, in all of which places it had hitherto been dependent on work done on its behalf by the Great Central's agents, and it will henceforward collect, deliver and warehouse goods by its own separate organisation and plant in the city of Manchester, to and from which place also it will run its own goods trains under the running powers above referred to, secured to it over the Great Central's lines north of Nottingham and west of Sheffield. The new Great Northern goods station at Manchester will, when completed, be one of the largest, best located, and most conveniently situated depôts of the kind in this country. It adjoins the Manchester central passenger station—the Cheshire Lines Joint Committee's station—of which the Great Northern is one-third owner, and it is bounded on the west by Deansgate, on the north by Peter-street, and on the south by Great Bridgewater-street, from all of which streets it has entrances. Starting from a junction with the four-track road which runs into the central passenger station, the rails communicating with the new goods station are carried by a girder bridge over Deansgate, and they enter the site of the depot at a considerable height above the ground level. The approach road, which is about 300 yards in length, immediately spreads out into six tracks carried on an upper floor supported upon steel stanchions, at the base of which stands a very large shed for use in loading and unloading trucks. Above this shed a warehouse of three more floors, 80ft. in total height, is in course of construction; and upon each side of the shed branch lines run down at a moderate gradient to the ground floor of the depôt, which, like the upper floor, is laid out with tracks and banks for the shunting, marshalling, loading, and unloading of trucks. Thus the area of the site, which is nearly seven acres, is utilised twice over for the purposes of a goods terminus, whilst it also provides the foundation for very extensive warehouse accommodation. Arrangements have been made to light the depôt throughout with the electric light, which is a very great assistance to the working of city goods traffic, so much of it having to be done at night. A full equipment of hydraulic cranes and capstans is also provided. The whole work, which has many admirable engineering features, has been carried out by Messrs. Robert Niell and Sons, of Manchester, under the supervision of Mr. A. Ross, the Great Northern Company's engineer-in-chief.

### THE RAILWAYS OF RUSSIA.

According to a report furnished by the British Consul-General at St. Petersburg, the length of the Russian railway lines opened for traffic on January 1st, 1898, extended to 27,616 miles, of which 5,199 miles were provided with a double track. In regard to the ownership and working of these lines, the Ministry of Public Works was responsible for 16,474 miles; the Finnish lines

were 1,574 miles long; the company and private lines totalled 8,624 miles, and the Trans-Caspian system equalled 944 miles in length. There were 1,423 miles of Government line opened along their whole extent for passenger and goods traffic, and 1,809 miles of company and private lines. Feeding branches, with a mileage of 304, were opened during the year. As regards railways in course of construction at the end of 1897, the Government lines were the Central Siberian, with a length of 533 miles; the Trans-Baikal, about 700 miles; the Perm-Kotlas, about 533 miles; and in the Trans-Caspian region some 433 miles were under construction. Among the new railways for which permission was given to private constructors, the Rybinsk Railway Company obtained sanction for 710 miles, the Raizan-Ural company were granted a new mileage of 567, the Moscow-Yaroslav-Archangel line was allowed to build 133 miles further, the South Eastern Company obtained permission for 100 miles, and the Vladikavkay Railway obtained permission to extend their system to Baku *via* Petrovsk. The Government acquired by purchase about 360 miles during the year, mostly in Poland. Turning to the revenue of the railways, we note that, apart from the Transcaspian, the Finnish, and a few small private lines, the revenue was 47,566,016*l.*, against 44,210,019*l.* in 1896. The net yield of revenue is not given in the official returns, and it must not be lost sight of that some 832 miles more were worked in 1897 than in the preceding year. There was an increase in the quantity of goods carried by slow trains, the figures being 89,619 tons as compared with 81,327 tons. Passenger traffic considerably augmented, as 62,957,830 persons were carried, against 58,595,634 in the preceding year. Only a few lines report diminished revenue, but of these the Vladikavkay system lost 21 per cent. The Moscow-Windau-Rybinsk (the old Rybinsk Railway Company) 26.1 per cent., and the Moscow Yaroslav-Voloyda 27.1 per cent. The main feature of the gross results of the working of the Russian railways may be gathered from the following tables, contained in the report of our Consul-General at St. Petersburg:—Government Lines.—Length exploited: 1897, 15,937 miles; 1896, 15,795 miles; increase, 142 miles; gross revenue, 1897, 33,825,253*l.*; 1896, 30,560,208*l.*; increase, 3,265,045*l.* Gross revenue per verst: 1897, 1,965*l.*; 1896, 1,366*l.*; increase, 599*l.* per verst. Company Lines.—Length exploited: 1897, 8,273 miles; 1896, 7,583 miles, increase, 690 miles. Gross revenue: 1897, 13,740,763*l.*; 1896, 13,649,811*l.*, increase 90,952*l.* Gross revenue per verst, 1897, 1,178*l.*; 1896, 1,228*l.*; decrease, 50*l.* per verst. The western section of the Siberian Trunk Railway, starting from Tcheliabinsk, and 886 miles in length, was supplied with all necessary rolling stock last year. On the Mid-Siberian section regular traffic was opened over a distance of 471 miles during the year, and a further 220 miles was temporarily opened. Rails were laid for a further section, to within 241 miles of the Irkutsk. The branch to Tomsk was opened to traffic. Work on the Trans-Baikal section is being rapidly pushed forward, and a portion of it from Metrofanova to Stretensk was opened for working trains during last summer, but the serious inundation to which the line was exposed in the course of the summer very much impeded the progress of the work. The Ussuri section was completed, and the first train from Khabarovsk to Vladivostock ran through on September 13th last. During the past five years it is estimated that the sum expended on the Siberian trunk line and its branches has amounted to 371,009,947 roubles, and a further 11,000,000 roubles on surveys and geographical work connected therewith.

The circular railway round Moscow, which has been talked of for many years past, will shortly, it is expected, receive official sanction, as the War Department has taken up the question. In the case of any European war involving Russia, Moscow would be the first reserve depôt, and it has long been pointed out that the existing single lines connecting the seven railroads centring in Moscow would prove wholly inadequate to deal with the carriage of troops and commissariat.

The Moscow correspondent of the *Standard* writes:—"The first instalment of the large Russian Government order for locomotives for the new railways between Vladivostock and Iman and Vladivostock, Port Arthur, will reach these ports about the end of August, to the number of seventy-seven. Of these, fifty are heavy engines of the American rapid traffic pattern, and have been built by the Baldwin Iron Works, of Philadelphia. Both these and the remaining twenty-seven freight engines will be used at first in the work of construction. Of the above total, twenty-five speedy locomotives and a few freight ones will be shipped direct to Port Arthur, twenty-five to Vladivostock, and the remainder to Niu-Chwang. An order for 550 locomotives of the American pattern has been recently placed with the Putilov Works at St. Petersburg. Fifty of these will be express engines, and the rest for heavy goods traffic. The long distances and the slow speeds run on Russian roads generally of course

demand an exceptionally large number of engines to work the traffic; in the case of the Russo-Chinese Railway, also, an extra number are required to allow for replacing damaged locomotives, as there are not yet any means of repairing even minor damages in that country. Still, these orders are very large indeed, and to those who know Russia, it seems a little unlikely that orders of this magnitude are entirely peaceful in intention."

#### LIGHT RAILWAYS.

The Board of Trade has, after modification, confirmed an order made by the Light Railway Commissioners, authorising the construction of light railways at West Hartlepool.

A scheme is on foot to construct a railway from Portmadoc to Beddgelert and on to Rhyddhu, joining the present railway from Carnarvon to Rhyddhu. It will enter the Pass of Aberglaslyn at a point crossing the river Glaslyn and the main road, and will run for some distance through the pass. The Cambrian Railways Company promise to contribute part of the cost of the line and to work it when constructed, and the promoters are asking for contributions from the several districts which are considered likely to benefit.

The construction of an electric light railway on the overhead system between Margate and Ramsgate, by way of Broadstairs, has finally been sanctioned by the Board of Trade. It is hoped that the railway will be completed before next summer, and that visitors to Thanet will be able to travel by light and convenient trolley-cars from Margate jetty by Cliftonville, St. Peter's, and Broadstairs, to the front at Ramsgate. Mr. W. M. Murphy applied for powers so far back as November, 1896, but at the inquiry held before the Light Railway Commissioners in May, 1897, opposition was offered by all the local authorities. The Commissioners adjourned the inquiry indefinitely in order to see whether terms could be arranged, and after negotiation Mr. Murphy was able to enter into agreements with all the authorities. The Commissioners then sent the order on to the Board of Trade for confirmation, but further delay was caused by the opposition of a landowner, with whom, however, Mr. Murphy at length came to terms after prolonged negotiations. Messrs. William Webb and Co. are Mr. Murphy's Parliamentary agents, and Messrs. Kincaid, Waller, and Manville his engineers.

The Light Railway Commissioners last week held an inquiry respecting the rival schemes for the construction of light railways from Penzance to the Land's-end district. The CHAIRMAN stated that the Commissioners had arrived at the conclusion that the desirability of a line connecting St. Just and the intervening district with the Great Western Railway at Penzance was proved. The desirability of a line between Sennen or some other place in the vicinity of the Land's-end and Penzance was also proved, while a case was made out for a line affording communication between St. Just and other portions of West Cornwall and Newlyn Harbour. The Commissioners were, however, of opinion that the schemes before them did not satisfactorily meet the requirements of the case. The mileage did not justify the existence of two separate companies, while the lines as laid out did not promise the best possible service. They, therefore, were unable to grant either of the applications, and were satisfied that the interests of the district would be served by giving an opportunity for the promotion of a revised and matured scheme.

The Board of Trade have recently confirmed six orders authorising light railways—viz. (1), Dornoch, for a line between The Mound station on the Highland Railway and the village of Embo and the town of Dornoch; (2) Goole and Marshland, for a line from a junction with the North Eastern Railway near Goole, to Swinefleet and Adlingfleet; (3) Isle of Thanet, for lines from Ramsgate through Broadstairs to Margate; (4) North Sunderland, for an extension of an existing line in the parishes of North Sunderland and Shoreston and the working of the original line as a light railway; (5) Vale of Rheidol, for an extension from Aberystwyth to Aberayron of an authorised railway; (6) West Hartlepool, for an extension line to Seaton Carew.

#### A BELATED BLUE-BOOK ON RAILWAY ACCIDENTS.

A Blue-book has been issued containing returns of accidents and casualties as reported to the Board of Trade by the several railway companies in the United Kingdom during the three months ended March 31st, 1898, together with reports of the inspecting officers of the Railway Department to the Board of Trade on certain accidents which were inquired into. Accidents to trains, rolling stock, and permanent way caused the death of 8 passengers and 3 railway servants, while 65 passengers and 22 railway servants were injured. The totals for the corresponding period in 1897 were 8 killed and 144 injured. There were reported during the three months 5 collisions between passenger trains or parts of passenger trains, 9 collisions between passenger

trains and goods or mineral trains and light engines, 9 collisions between goods trains, part of goods trains and light engines, 6 collisions between trains and buffer stops, of which 3 were caused by trains running into stations or sidings at too high a speed. One hundred and forty persons were killed and 365 were injured by accidents other than accidents to trains, rolling stock, permanent way, including accidents from their own want of caution or misconduct. Sixty-five persons were killed and 36 injured when trespassing on railways; 20 persons committed suicide, and 6 persons were injured while apparently attempting to commit suicide. During the three months 119 servants of companies or contractors were reported as having been killed, and 954 injured. Altogether the number of persons killed and injured on railways in the course of public traffic during the three months was 270 killed and 1,406 injured, as compared with 292 killed and 1,543 injured in the corresponding period last year.

#### METROPOLITAN RAILWAY.

##### HAPHAZARD WORK AND ANTIQUATED RULES.

The report of Colonel Sir F. A. Marindin respecting the fatal accident which occurred on June 26th, between Harrow and Wembley-park Station on the Metropolitan Railway, has been issued by the Board of Trade. In this case, while the work of laying in a new junction at Preston-road, 2 miles south of Harrow Station, was being carried out during the night of June 25-6, a special up coal train ran into the gap caused by the removal of two 24ft. rails on the up line. The engine fire-box was pierced by a rail, and the driver and fireman were both badly scalded by the escape of steam. The driver, William Collett, succumbed to his injuries three days after the accident, and the fireman was dangerously injured. After reviewing the evidence, Sir F. A. Marindin says it appears the permanent way department were not aware of the running of the special coal train, and it was assumed that after the last booked train had passed the line would be in the possession of the department. He regrets "that it is impossible to acquit the permanent way foreman in charge of want of due care and foresight in omitting to ascertain, at Neasden or elsewhere, whether traffic had absolutely ceased before commencing such a piece of work as that of putting in a new junction, but I attribute the accident far more to the existence of a most unsatisfactory system of working than to the conduct of the foreman." And then the inspector points out that the superintendent of the line "was not even informed that the work of laying in this junction was to be carried out that night, and that it has not been the practice to communicate with him in such cases, to which omission he has taken no objection, and, on the other hand, that, although it must have been well known to the goods agent that the permanent way department were supposed to be in possession of the line after the passing of the last train, and that the special coal train would be due to arrive before that time, no one seems to have thought it necessary to warn the permanent way department either that the special coal train was running or that, owing to a breakdown, the train would be late. It is almost inconceivable that, on an important line, work of the character of that in question has habitually been allowed to be undertaken in this haphazard fashion, or without proper printed notices being issued in the usual manner to all concerned; and the whole of the evidence shows that a complete change of practice is necessary to ensure the safety of the line." This change would follow, he was informed, as a matter of course on the opening of the Quanton-road Junction. As to the two men on the engine, they did all in their power to pull up, courageously remaining at their posts to the last. In conclusion, the inspector says:—"In the book of rules and regulations drawn up by the Clearing-house Committee, and adopted by nearly all the associated companies, although not by the Metropolitan Company, it is laid down that when there is any obstruction on the line, such as a ballast train at work, a flagman is to be sent out for a distance of three-quarters of a mile, that distance, in the case of any operation requiring the removal of a rail, being increased to 1 mile; and this accident shows how necessary it is that, in this respect at any rate, the somewhat antiquated rules of the Metropolitan Railway Company require revision."

#### CAMBRIAN RAILWAYS COMPANY.

A correspondent writes:—"The half-yearly meeting of this company was of a very satisfactory character. The chairman showed that, although very considerable improvements have been made in the maintenance of way, works, &c., nearly 90 miles of the main line having been lifted with ballast some 6in., there was an actual decrease in the expenditure in this department. Although it was explained that this decrease was chiefly due to the difficulty in obtaining materials owing to the South Wales coal strike, it shows that with the ordinary staff the

engineer has made considerable improvement, which must go a long way towards popularising the railway, particularly for tourist and seaside traffic. The expenditure in the locomotive Department is not quite so satisfactory, and there is, no doubt, room for economies, which the directors will do well to take in hand, in order that a more favourable comparison may be made with the locomotive expenses of other railways. The way in which this line, under the remarkable enterprise of its management during the past few years, has developed gives promise of considerable further improvement in the near future, and, in view of the purpose of the board to double a considerable portion of the line within the next year or two, I have no doubt that my prediction will be fulfilled, and that the Cambrian district will continue to attract larger numbers of holiday folk and seaside visitors, and that the shareholders will thus have ample remuneration for their enterprise and the up-to-date policy which the directors are so wisely following."

### RAILWAYS IN CHINA.

It is reported from Shanghai that the Chinese authorities have given an undertaking to the French Minister that they will only allow the French to build the railway line between Canton and Hankow.

The following is the text of the agreement concluded by the Peking Syndicate with the Russo-Chinese Bank:—

"Memorandum of agreement made between D. D. Pokotilow, manager of the Russo-Chinese Bank, and Angelo Luzzatti, general agent of the Peking Syndicate, on April 26th, 1898, at Peking (China).

"At our meeting this morning, in H.E. Li Hung-chang's office and in his presence and at his request, we mutually agreed to the following arrangements with regard to our respective sphere of railway and mining business in the province of Shan-si:—

"1. The Peking Syndicate will not construct any railway from Chêng-ting to Taiyuan, or any line within a distance of 100 li on each side, and the Peking Syndicate agrees that this statement shall be clearly stated in the contract it is about to sign with the Tsung-li-Yamen, it being understood that should the Russo-Chinese Bank not construct sufficient branch lines connecting with their main line from Chêng-ting to Taiyuan-fu to properly serve the mines conceded to the Peking Syndicate in the Ping-ting-chou and Yuh-sien districts, the Peking Syndicate shall have the right to construct such branch lines. This agreement to be null and void if said bank does not begin the construction of such line within two years from this date.

"2. The Russo-Chinese Bank agrees that the rates charged the Peking Syndicate for transporting their products from the Ping-ting-chou and Yu-hsien districts eastward by the railway which they propose to build shall in no case exceed the rates charged for the transportation of similar products from stations west of Ping-ting-chou.

"3. The Peking Syndicate renounces all rights to work mines in the districts of Tai-kou, Taiyuan, Yang-tsui, Ping-yao, Ling-shi, Hsiao-yi, Tsie-hsien.

"4. The Russo-Chinese Bank will not ask any mining concession in Shan-si of the Chinese Government until the Peking Syndicate has finally floated the company for working the concessions obtained within two years from date. The Peking Syndicate will not oppose any demands made by the Russo-Chinese Bank concerning the working of mines in districts mentioned in Article 3 after that date. The Peking Syndicate and the Russo-Chinese Bank mutually agree to work together in harmony in their respective sphere in Shan-si, and to aid each other whenever possible.

"The above arrangements received the approval of H.E. Li Hung-chang, and we now attach our signatures.

"A. LUZZATTI.  
D. D. POKOTILOV."

Seal of the Russo-Chinese Bank.

Seal of the Peking Syndicate, Limited.

A Ruter's telegram dated Peking, August 17th, says:—"Baron Von Heyking, the German Minister, in a visit to the Tsung-li-Yamen, urged the necessity of settling, as quickly as possible, the question of the Tientsin-Chinkiang Railway concession, which was granted to Dr. Yung Wing, declaring that if the railway was not in German hands it would have to be carried west of the Shantung Peninsula, the German sphere of influence. He further declared that opposition would probably be offered by the supporters of the Peking-Hankow line, if the sphere defined in the contract were infringed. There is every reason to believe that Baron Von Heyking is willing to support the granting of an Anglo-German Commission, which would, if accorded, solve present difficulties and appease jealousies. Everything is quiet here. The general impression is that the

negotiations on all main points have been transferred to St. Petersburg and London."

### FOREIGN AND COLONIAL ITEMS.

The Natal Zululand Railway was opened for traffic to Stanger (33 miles) on the 10th inst.

Mr. W. B. Harding Green, general manager of the Bahia Blanca and North Western Railway Company, has just arrived in England.

The directors of the Salar del Carmen Nitrate Syndicate, Limited, have resolved to pay an interim dividend of 2s. 6d. per share, payable on September 10th.

The death is announced of Mr. Richard Pearce, carriage and wagon superintendent, East Indian Railway, who was at home on sick leave. He had been in the service of the company for thirty-seven years.

The *Review of the River Plate* says:—"There is a rumour afloat to the effect that a gentleman holding a high Government post will shortly be appointed local representative of one of the English railway companies.

The death is announced of Mr. Noblett St. Leger Carter, retired traffic manager, East Indian Railway, which took place at Chester last week. Mr. Carter, who joined the service in 1859, has been in indifferent health for some months.

The Agent-General for Victoria has received a despatch from the Government of the colony enclosing a comparative return of the railway traffic for the month of May, 1896, 7, and 8, as follows:—1896, 173,244l.; 1897, 202,669l.; 1898, 204,223l.

The Korean Government, replying to a request of the German Consul on behalf of a German firm for a concession to construct a railway from Seoul to Gensan, has notified the Consul that it proposes to establish a railway bureau, and also to lay railways, consequently no further concessions will be granted."

The net receipts of the Royal Portuguese Railway Company last year were 572,650l.; interest on obligations absorbed 328,000l., and losses on exchange were so heavy that the balance remaining was reduced to 67,660l., which was devoted to certain supplementary works now in progress.

At the commencement of the debate upon the financial statement in the New Zealand House of Representatives on Wednesday, Mr. Russell, Leader of the Opposition, moved an amendment condemnatory of the present railway administration, which the Government regarded as a vote of want of confidence. After a short discussion, the motion was rejected by a majority of 12 votes.

Advices from St. Petersburg state that the construction of a railway between the towns of Lodz and Kalisch, with an extension as far as the German frontier, will shortly be commenced. This line, which will be 113 kilometres in length, will afford, in addition to its strategic value, the advantage of placing the south and south-west of Russia in direct communication with the markets of Central Germany.

Referring to the proposal to turn over the Western of Santa Fé Railway to an English joint-stock company—a proposal which was criticised in these columns on July 2nd—the *Review of the River Plate* says:—"If the company should be formed, it will be a very good one for the investor to keep out of until such time as its relations with the Argentine Company are properly defined and its hold on substantial revenues more assured."

The amount which the French Treasury had to advance last year to the Orleans Railway Company to make good its guarantee of interest on new network obligation capital was 1,910l.; the corresponding advance for 1896 was 26,990l. The corresponding advance to the Eastern Railway Company last year was 224,520l., against 291,920l. in 1896; to the Western, 560,000l., against 640,000l.; and to the Southern, 109,440l., against 249,200l. No advances were made to the Northern Railway Company or to the Paris Lyons and Mediterranean.

Anything which can be done to improve the position of the Paraguay Central Railway is deserving of notice, and the latest news is to the effect that, in addition to bettering the working of the line, the board has now secured permission to raise the fares gradually to a level at which they represent gold, they having hitherto remained unaltered, although the currency in which

they are expressed has been enormously depreciated. A Government decree has been issued granting this permission, which should prove of substantial benefit to the line if it can be carried out without putting an unwelcome check on the traffic.—*Financial News.*

The Stock Exchange Committee have ordered the under-mentioned securities to be quoted in the Official List:—Argentine North Eastern Railway Company (Limited)—further issue of 308,215*l.* 5 per cent. debenture stock; Chesapeake and Ohio Railway Company—\$879,000 additional first consolidated mortgage fifty-year 5 per cent. gold coupon bonds, Nos. 24,980 to 25,858.

Messrs. Thackeray and Co., of Cardiff, under date August 18th, report as follows:—Barry undivided, 257½*xn* (unchanged); ditto preferred, 122 (a fall of 3); ditto deferred, 142½*xn* (unchanged); Cardiff preferred, 112½*xd* (unchanged); Port Talbot ordinary, 9 (a fall of ½); Rhondda and Swansea Bay, 4 (a fall of ½); Rhymney undivided, 262½ (unchanged); ditto preferred, 122 (unchanged); ditto deferred, 141 (unchanged); Taff Vale, 78½ (a fall of 1); Vale of Glamorgan, 126 (unchanged). Beyond the allotment of Barry new stock there has been but little to interest, business being still very quiet. Barry undivided and deferred is now marked *ex new*.

Applications have been made to the Stock Exchange Committee to allow the following securities to be quoted in the Official List:—Jarrahdale Jarrah Forests and Railways (Limited)—100,000*l.* 5 per cent. first mortgage debentures of 100*l.* each, Nos. 1 to 1,000; Millar's Karri and Jarrah Forests (Limited)—66,666 vendors' ordinary shares of 1*l.* each, fully paid, Nos. 1 to 66,666; and 33,334 6 per cent cumulative preference shares of 1*l.* each, fully paid, Nos. 1 to 33,334; Nashville Chattanooga and St. Louis Railway Company—\$300,000 additional first consolidated mortgage 5 per cent. gold bonds of 1923, Nos. 15,699 to 15,998; and Northern Pacific Railway Company—\$753,000 additional prior lien railway and land grant 4 per cent. gold coupon bonds, Nos. M75,327 to M76,079 for \$1,000 each.

Dublin Wicklow and Wexford Railway.—Mr. Charles Cummins, Dalmore, Bray, writes:—"Will you kindly permit me through the medium of your columns to draw the attention of the shareholders in the above company to the state of affairs disclosed in the accounts rendered by the directors to June 30th last (copies of which I received on Saturday evening last). On the face of these accounts the company acknowledge the amount of their current cash liabilities to be 138,856*l.*, to meet which they show tangible assets amounting to 26,051*l.*; and yet, in the face of this statement, the directors propose to pay dividends! The report is unique in one respect—it does not recommend payment of these dividends, but in account No. 11 (of the Wicklow series) it is proposed to appropriate 13,500*l.* of the balance on net revenue in this direction, carrying forward 135*l.* Such an appropriation in the face of the accumulated loss on revenue account of the loop line—viz., 12,000*l.* is, to me, an anomaly."

North British Railway Insurance Society.—The report and statement of accounts for the half-year ending June 30th, 1898, show that the income for the half-year was 5,422*l.*, and the expenditure 5,755*l.*, leaving a deficiency of 332*l.* The balance from last half-year was 11,312*l.*, and the balance carried forward to next half-year is 10,979*l.* The excess of expenditure is largely due to an increase in the number of accidents. This is to be regretted, and the committee draw the members' attention to the matter, and impress upon them the necessity of exercising due care in the discharge of their duties, so as to reduce the number of accidents. Nineteen members were superannuated during the half-year, one of whom has been able to re-enter the service of the company, while eleven (previously superannuated) were removed by death, leaving 206 on the superannuation roll. The payments under this head amount to 37'45*l.* per cent. of the income, as against 33'33*l.* for the corresponding period last year.

OTHER CONSTRUCTIONAL IRON WORK.

# BLAENAVON COLD BLAST PIG IRON

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

- No. 1 Foundry.—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.
- No. 2 Foundry.—A more Open Quality, used for similar purposes, and largely by nail makers.
- No. 3 Foundry.—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.
- No. 4 Grey Forge.—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.
- No. 5 Common Forge.—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plates, and B.B. Merchant Bars.
- No. 6 Strong Forge.—A still harder and closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

**MOTTLED.**—Used for Chilled Rolls in tempering; and for other similar purpose  
\* These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4971, Session 1858.

**THE TORBAY and DART PAINT COMPANY, Ltd.****Meetings.****DUBLIN WICKLOW AND WEXFORD RAILWAY.**

The half-yearly general meeting was held at Dublin on Monday; Mr. F. W. PIM presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said the receipts of the past half-year compared favourably with those of the corresponding period in 1897. After reviewing the capital and revenue accounts, he went on to say that communications had passed between them and the Midland Great Western Company with a view to the running of the Midland Great Western passenger carriages to and from Kingstown Pier in connection with the night mail steamers. They made the Midland a proposition of a very moderate character, which he hoped would bring about an arrangement. While they should facilitate in every way in their power the extension of the benefits of the accelerated mail service to every company to whom it could be of advantage, still the companies who placed the maintenance of the Holyhead and Kingstown route for the mail service in imminent danger by withdrawing at the most critical time from their promised contribution to the cost of the connecting railway, could not fairly claim now to be allowed the benefit of it, at the cost of those who stood by their arrangements. The recent acceleration of the day mails could hardly fail to bring a great increase in the number of passengers. The acknowledgments of all who were interested in this great improvement in the means of intercourse between the two countries were due to Mr. Patrick O'Brien, M.P., who persevered in the face of great difficulties, in pressing the question to its final solution, and to Mr. Robertson, chairman of the Board of Works, who presided over the committee. Up to the present no gain had accrued to them from the improvement. The addition of third-class carriages to the mail trains meant the substitution of so many third-class fares for second and first, and whilst the number had greatly increased, their share of the receipts had been very little, if any, more than before. The Bill of the tramway company to repeal the statutory limitation of the speed of the Dalkey trams to a maximum of 8 miles an hour, and which they opposed, was referred to the Board of Trade without any limitation, but it was ordered that before any increase of speed was sanctioned a public inquiry should be held, of which notice should be given to the local authorities and the public. The Committee of the House of Lords recommended the attachment of speed indicators and governors to the motor cars. Considering the extreme minuteness and precision with which a complicated set of Board of Trade regulations were enforced on railways, there seemed no justice in allowing the tramway to exempt itself from all restrictions merely because it was worked by electricity, and had the good fortune to run on the public roads, maintained at the cost of the ratepayers, instead of having to construct and maintain a separate road on which to lay their rails, as was the case with railways. Referring to the Fishguard and Rosslare Company's Bill, he said the object of their opposition to it was to defend the rights of the company under the New Ross and Waterford Extension Act, 1897, and, secondly, to secure an open route between their system and the south of Ireland. The Bill of the Fishguard Company proposed to take the same land for which they had already obtained powers of purchase, and had entered into various engagements. Having related the provisions in the Bill which have been already published, he said the net result was that should the Great Southern and Western Railway Company still persevere in their intention to spend nearly 400,000l. of capital in the construction of a wholly unnecessary railway through South Wexford, where no traffic was to be had, and where the through traffic between the Fishguard steamers and the Waterford and the West could be just as well carried by our line *via* Wexford and New Ross, they could only do so by distributing two-thirds of the cost of the portion of our authorised line, extending from the point of contact of the two to the junction with the Dungarvan Railway. Should the expectations of traffic by the new steam route between the South and West of England and the South of Ireland, *via* Rosslare, entertained by the witnesses for the Great Western Company be even partially realised, considerable benefit could not fail to accrue to the southern end of our line. The directors would endeavour by every means within their power to obtain all the advantages that could be got from their connection with the port of Rosslare. Nothing that occurred in the recent contest would prevent them from entering into such friendly arrangements with the Fishguard Company as may seem calculated to promote this object. In order that the present opportunity to obtain a working connection with the railway system of the south and west of Ireland should not be lost, they were now prepared to raise the moderate amount of capital necessary, and to proceed with the construction of the line. That the traffic on the line when completed to Waterford would be sufficient to justify its construction he had no doubt. It was of vital importance to their future interests that the Waterford extension should be carried into effect, and he trusted they would heartily support the directors in their determination to set about its construction as soon as possible.

Mr. J. L. SCALLAN seconded the motion.

A discussion followed, in which the following took part—Rev. Mr. Fawcett, Rev. Canon Staveley, Messrs. Samuel Butler, Howth; Wm. Ireland, Menton, Gordon, and Clifford. The chief points of the discussion were that compared with 1895 there was a large falling off in receipts and an increase in working expenses. It was also complained that the directors' fees were as great as on the Great Northern line. The method of collecting and checking tickets on the loop line was described by Mr. Butler as antediluvian, the result of which was that many passengers were carried free, and others paid but inadequate fares. He had tested the method, and without resorting to any skilful device he had travelled fully half a dozen times free. He maintained that there was a loss of 1,000l. a year on the loop line, and 600l. on the Wicklow line. As much had been paid for auditing for the half-year as had been paid by the three Great Northern companies. A

good firm of Dublin accountants should be appointed auditors. Objection was taken by Mr. Ireland to the running of six passenger trains in addition to a goods train from Woodenbridge to Shillelagh and back each day. The carriages kept on the line were dirty and filthy. Rev. Canon Staveley wanted some particulars about the amount raised for the New Ross and Waterford extension. Mr. Menton wished to know what were the relations of the company with the Great Northern Company and the Great Southern and Western. The defective arrangements at Amiens-street with the Great Northern in connection with the loop-line service were referred to by Mr. Gordon. Mr. Clifford, Bray, had a large scheme to press on the attention of the directors. His idea was that a branch line should be constructed connecting Dundrum with Enniskerry, the Scalp, and Bray.

The CHAIRMAN, in replying to the various points, said they lost 20,000*l.* a year on the Kingstown line owing to the tramways. It would take some time to recover that, if it would be recovered at all. However, there was no use in crying over spilt milk. The expenses of the auditors were heavy, because the shareholders last year insisted on getting auditors from London. With reference to the checking of the tickets between them and the Great Northern on the Howth line, they thought the Great Northern trains should leave Howth earlier, so as to give more time for checking. They had tried an experiment on the Shillelagh line this summer. In the winter some of the trains would be taken off. Whether the trains would be put on next summer was a matter that would receive consideration. He thought there were too many trains. He was sorry that the carriages deserved such a character as they had got. They had been overhauling all their trains as rapidly as they could. He thought it would be admitted that in the local and main lines the carriages had been considerably improved. ("Hear, hear.") He hoped that this time next year, if the Kingstown line was not complete, it would be nearly so. No capital had as yet been received for the New Ross line. The capital that had been spent was for Parliamentary expenses and for engineering plans. With regard to Mr. Menton's question he said they got an allowance from the Post-office and the fares.

The motion on being put to the meeting was adopted, and the dividends recommended in the report were declared.

Mr. IRELAND moved a vote of thanks to the chairman and officers for their energy in doing their very best in the interests of the company.

Rev. Mr. FAWCETT—I beg to move an amendment that we do not give them the vote of thanks. I am not satisfied.

The amendment was not seconded and the vote of thanks was passed.

#### CAR TRUST INVESTMENT.

The annual general meeting was held on the 19th inst. at Winchester House, E.C.; Mr. R. H. GLYN presiding.

The report stated:—"The directors have pleasure in submitting the accounts for the year which ended on 15th July last, which show a net profit, after providing for the expenses of management in London and New York, and interest on debenture stock, &c., of 37,883*l.*, to which has been added balance of profit from the previous year, after payment of the dividends, 1,084*l.*; total, 38,967*l.* An interim dividend at the rate of 5 per cent. per annum on the preference stock and of 7 per cent. per annum on the ordinary shares was paid for the half-year ending January 15th, 1898, 16,875*l.*; the directors recommend a dividend for the half-year ending July 15th, 1898, at the same rate on the preference stock, and at the rate of 9 per cent. per annum (making a total of 8 per cent. for the year) on the ordinary shares, 18,125*l.*; total, 35,000*l.* The directors have increased the reserve to 35,000*l.* by setting aside the sum of 3,000*l.*, and carry forward to next year 967*l.*; grand total, 38,967*l.*"

The CHAIRMAN, in moving the adoption of the report and accounts, said—I hope you will be pleased—as you always have been—with the balance-sheet. It is as satisfactory as it has been for many years past, and as I hope it will be for very many years to come. I would just like to point out to you the differences in the figures, although they really do not amount to very much. The capital account is unaltered. The reserve account was last year raised from 27,000*l.* to 32,000*l.* Then the current and other accounts this year are 17,867*l.*, against 17,595*l.*, which does not show much alteration. The interest and profit in suspense account is now 2,562*l.*, against 2,882*l.*, which shows a little reduction. I have explained before that we do not take this to the profit and loss until we get it. It has gone down rather slowly; but we still live in hopes that we shall get the whole of it eventually. On the assets side of the account you will find the investments stand at 1,153,373*l.*, against 1,148,453*l.* last year. The rolling stock, which stood last year at 32,001*l.*, now stands in our books at 30,017*l.* There is no question that that is a fair valuation of the property, and that it is earning good interest upon the money invested in it, although we would much rather have it in trusts. But we cannot always help ourselves, and must be prepared occasionally to take over rolling stock. The expenses for the past year do not call for any remark; they are pretty nearly the same as they were last year. The net result of the year's profits, after paying the expenses of management in London and New York and interest on debenture stock, amounts to 37,883*l.*, against 39,291*l.* last year, showing a small falling off. This is simply owing to the fact that during the past year we have received a somewhat lower rate of interest upon our investments. Of course, we all know that money in New York has been very cheap, and competition for such securities as we hold is very keen; but the amount of the falling off is so small that it is really not a question of any consequence to us. Now, the way we propose to distribute the profits is this: we have already paid a dividend at the rate of 5 per cent. upon the preference stock and of 7 per cent. on the ordinary shares, which absorbs 16,875*l.* We have put to reserve fund 3,000*l.*, raising that up to 35,000*l.*, and that, I am sure, is an appropriation which the shareholders will always approve. Then we recommend that we should pay a dividend for the last half of the year at the same rate on the preference stock and at the rate of 9 per cent. per annum on the ordinary stock, which will make a total of 8 per cent. on the

ordinary, absorbing altogether 35,000*l.*, and we carry forward 967*l.* I think that the chairman of this company is at a great disadvantage, because he finds it very difficult to have anything new to say to the shareholders. If he had anything to apologise for, or any bad account to make the best of, he would have something to say; but that is not the case with this company. We have no bad accounts and we have nothing new to tell you about the business of the company. There are only two things—One question is, are the securities we invest in good? And, in the second place, if they are good, are they properly taken care of by the depositaries in New York? The first question, I think, answers itself. We have been in business for eleven years, and the securities we hold are without doubt first-class. As regards the safety of the securities, they are deposited with the Atlantic Trust Company of New York—a concern of very high standing there. You have here the certificate of your auditors (Messrs. W. B. Peat and Co.), who have examined the securities once, and I may add that they have been twice examined by two of the resident directors in New York. I do not know that I have anything more to say to you except that I believe we are all agreed that the business during the past year has been conducted by our managers, Messrs. Dent, Palmer, and Co., in the same conservative and able way in which they have managed it before. From all I know of the partners here and those in New York, I do not think we are likely to see them deviate from that course in the future. Therefore, I think we shall still continue to be a prosperous company. I will now formally propose the resolution; but before I put it to the meeting I shall be very glad to answer any question with regard to the accounts. The resolution is:—

"That the report and accounts be received and adopted, and that the dividend recommended by the directors, at the rate of 5 per cent. per annum on the preference stock and 8 per cent. per annum on the ordinary shares, requiring a present payment for the half-year ended July 15th, 1898, at the rate of 5 per cent. per annum on the preference stock and of 9 per cent. per annum on the ordinary shares, be approved and paid forthwith."

Mr. E. H. PALMER seconded the motion, which was agreed to.

#### BRECON AND MERTHYR TYDFIL JUNCTION RAILWAY.

The half-yearly general meeting was held on the 19th inst. at the London offices of the company; Mr. H. F. SLATTERY presiding.

The accounts for the half-year ending June 30th, 1898, showed a gross revenue of 36,873*l.* (as against 41,069*l.*), and a total expenditure of 23,782*l.* (against 23,778*l.*). The net revenue amounted to 13,113*l.* After deducting debit balance of 4,694*l.* brought forward from previous account, the amount required for rent-charges, interest on sums due for land, the Rumney preference dividend, and full interest on the A debenture stock, there remained a deficiency of 59*l.* Length of line, 68½ miles. The capital account showed total expenditure 2,151,511*l.*, and receipts 2,151,511*l.*—viz., shares and stock, 1,117,833*l.*; debenture stock, 1,010,539*l.*; rent-charges, 14,075*l.*; sundries, 9,059*l.* Reserve funds, 1,060*l.*

The CHAIRMAN, in moving the adoption of the report and accounts, said he was sorry the accounts showed a decrease in the receipts of 4,196*l.*, while the expenditure stood at practically the same figure as last year, leaving a net loss of 4,179*l.* Doubtless the shareholders had been prepared for this, arising, as it did, from the loss of mineral traffic due to the strike of workmen at the associated collieries in South Wales and Monmouthshire. This disastrous state of things had now existed since April 1st, and, as practically there were no non-associated collieries on the company's system, they had been without any mineral traffic for three months of the half-year, except a small quantity which had come down from the Rhondda Valley from the Pontypridd and Caerphilly and Newport Company's line. In consequence of this they carried to net revenue a balance only of 13,091*l.*, against 17,292*l.* in the corresponding period of 1897. This was sufficient to provide for all the fixed charges down to and including the A debenture stock, and to clear off the debit balance of 4,694*l.* brought forward from the last half-year, the balance unliquidated being only 59*l.* The directors were, therefore, unable at present to make any distribution to the B debenture stockholders. The interest on this stock was, of course, accumulative, and in the event of an early arrangement being come to in South Wales it would be met, they hoped, before very long. However gloomy the present might be they had the greatest hopes of the near future. The recent Parliamentary session had been an important one for that company. As the shareholders were aware they promoted a Bill for the purpose of giving a direct and more convenient route to Cardiff, Penarth, and Barry Docks. The projected lines would have cost the company about 100,000*l.* The Barry Company were projecting lines similar to their own, and which, in fact, afforded them a direct route to Cardiff via the new connection with the Rhymney Railway. This effected their main object, and on investigation proved to be better laid out than their own for the working of traffic. As he expected, they were soon approached by their Barry friends, and after considerable negotiations they agreed to withdraw their own scheme and support that of the Barry, giving the Barry Company running powers up to Rhymney. In return for this the Barry Company would pay the cost of doubling the single portion of the Brecon and Merthyr Company's line between the points of junction with them and the Rhymney and of such other works as might be necessary for the full use of the Brecon and Merthyr line by them. An expenditure of some 20,000*l.* would be incurred, of which 9,500*l.* was to be free of all charge to that company, but on any excess over and above that sum, they were to pay 3 per cent. per annum with the option of repaying the sum should they desire to do so. The Barry Company would allow them to run over their line down to its junction with the Rhymney on very favourable terms, and had agreed to provide sufficient siding accommodation both at that point and at the junction with the Brecon and Merthyr line. Having regard to the new pits now being sunk in the Rhymney valley, and the consequent large increase in the output from that valley, this connection, placing the Brecon and Merthyr as it did in direct communication with the Barry line and docks, and providing an excellent new route to Cardiff via the connection with the Rhymney Railway, was of the utmost importance.

He was sure the shareholders would agree with him that they had good cause to congratulate themselves upon this arrangement. He felt confident that it would prove to be the best investment ever made by the Brecon and Merthyr Company. The Usk Valley Railway Bill had passed both Houses, and before it reached the second House that company came to terms with the promoters, who, upon being given access to Talylyn station, withdrew the running powers as between that place and Brecon.

Mr. W. BAILEY HAWKINS seconded the motion, which was adopted. The CHAIRMAN then reported the progress made with the new pits in the Rhymney Valley. He said that of the Powell Duffryn new pits one was sunk 200 yards and the other 100 yards, and there was no trouble now with water or any other unusual obstruction. The other necessary works were going on well. The McLaren Pit No. 1 had been sunk to a depth of 290 yards. The coal they intended to work out of this sinking was at 300 yards, it was steam coal, and the seam was called the "Ras Las." It was 3ft. thick on the way down. They had passed several small seams, but these would not be worked at present. This "Ras Las" seam was in addition to the coal which would be raised from the existing workings in this pit. The Tredegar Iron and Coal Company, in their twenty-fifth annual report, said:—"It has been decided, after careful consideration, to construct a tramway from Tredegar to the Brecon and Merthyr Railway capable of transporting about 1,200 tons per day." Every progress was, therefore, being made with these pits, and the Brecon and Merthyr line was getting into perfect order. He was convinced that the increase of traffic ready to be put down as soon as this unfortunate strike was over would amount to some million tons a year. It was a sad thing that the coalowners and workmen could not come to some arrangement and put an end to the strike which they all regretted.

Mr. GWYTHER JONES—Do you expect a million tons extra a year over the line?

The CHAIRMAN—Yes.

Mr. G. JONES—That will double our income nearly.

The CHAIRMAN—I hope so.

Mr. HAWKINS—We expect a great deal more than that.

The CHAIRMAN—We expect 1,200 tons a day as soon as our connection with the Barry Company is made and everything is right, but at the present moment there is a considerable increase of traffic ready to be carried.

Mr. G. JONES—Is there any clause by which you can make the Barry Company complete that line within a certain time?

The CHAIRMAN—Their own interest, I think, is quite sufficient.

A vote of thanks to the chairman terminated the proceedings.

### FURNESS RAILWAY.

The half-yearly general meeting was held on Wednesday at Barrow-in-Furness, Lord MUNCASTER (a director) presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an abstract of which has already appeared in THE RAILWAY TIMES), said—Not since the year 1891—that is, for seven years—have the directors been able to recommend to the shareholders the payment of a dividend at the rate of 2 per cent. for the June half-year. Seeing what the other companies have done in the matter of dividends, it will no doubt be a surprise and a subject of congratulation to the proprietors of the Furness Company to find that we are not only able to maintain our position compared with the corresponding period, but to declare a dividend of 1 per cent. more than our earnings enabled us to do twelve months ago. Three years ago we were unable to pay any dividend at all in the June half. In 1896 we paid only 1 per cent., and a year ago 1½ per cent. Now we can recommend 2 per cent. I have been looking at the accounts of the other companies, and find that in the case of twelve of the principal Trunk lines there was an increase in revenue of 842,818*l.* The additional expenditure, however, was 1,118,587*l.* Not only were all the additional receipts of these companies absorbed by increased expenses, but a sum of 275,769*l.* beyond the revenue advance has gone in working expenses. With regard to our traffic, the report deals specially with the continued progress in the passenger business, showing a total increase in three years of 264,878 passengers. I am sure you will all welcome an accession in revenue from this source, knowing that a few years ago it was considered the weak spot in the company's administration. With the enormous competition there now is all over the country for the tourist and excursion traffic, it is, I think, exceedingly gratifying to be in a position year after year to show these improvements. We have in every possible way legislated for the development of this branch of our business. In all the principal towns of Lancashire and Yorkshire, and many other places, the hoardings for the first time have had our circular tours (twenty in number) and other posters placed upon them, and so far as we have been able to arrange with the other companies these announcements are appearing at the railway stations throughout the country. The advertising of the beautiful district through which the Furness Railway runs must have beneficial results. I admit it means an immediate expenditure of money, but in the end it is an expense that repays itself tenfold. It must be borne in mind that we have had to contend with the retrospective payment of 2,251*l.*, the amount we received from her Majesty's Postmaster-General as a back payment for the conveyance of the mails, and was brought into the accounts in the corresponding period last year. In merchandise and minerals we have an increased tonnage of 125,233 tons during the half-year, and of 47,000 tons during the first seven weeks of the current half-year, which shows that the trade of the district has been exceedingly good. The Barrow Steel Works have been very busy, and the same may be said of all the other iron and steel industries of the district. The Lonsdale Iron Works, at Whitehaven, whose furnaces, after remaining idle for some little time, were reopened in the latter part of last year, have also added to our business. The jute works at Barrow, which I told you a year ago had been reconstructed, have also steadily improved their trade in face of the Dundee competition, and the Kellner Partington Paper Pulp Company have, I am glad to say, fully maintained their position. We must all be pleased that Messrs. Vickers, Sons, and

Maxim, who a short time back took over the naval construction works at Barrow, are in full work. H.M.S. *Niobe* was delivered to the Admiralty last month, and another first-class cruiser, the *Amphitrite*, was launched. The battleship *Vengeance* will before long also follow the *Amphitrite*. Within the last few weeks a contract for another first-class cruiser has been secured by this firm. Barrow probably at no period of its existence has found so much employment for its population. We must not forget the exertions of Messrs. Walsley and Smith, who are maintaining our grain and flour business at the docks in the face of the keen competition with which they have to contend, and I am sure we all hope that this firm may be able to increase their business at Barrow. The directors, at all events, are anxious that they should have every facility to do so. Messrs. Crossfield and Co., as you know, are our principal timber traders at the docks. I am glad to say that it is a progressive business, but wish they could have all their traffic through Barrow. The Manchester Ship Canal, as you are aware, is an adverse factor that has to be reckoned with. Turning to the expenditure side of the accounts, I think we may congratulate ourselves that we have been able to carry on your business and maintain probably the lowest per-centage of working expenses in relation to the gross receipts of any railway company in the country—viz., 50·56 per cent. In accomplishing this we have not been at all niggardly in our expenditure. We have previously told you that the permanent way has demanded exceptional attention. We have continued the policy of relaying the line with heavier materials, to enable the large engines and heavier carriages we are now providing to run in safety over the line. We have again charged against locomotive power 4,490*l.* (see Abstract B) for replacing two more engines. This department, whilst being efficiently maintained, has been worked in an economical manner, and the same applies in the carriage and wagon expenditure (see Abstract C). Traffic expenses show a small increase, due to the further concessions we have made to our men in respect of holidays and conditions of service. In saying this I may tell you that we have had to consider during the past half-year the questions that have been brought before us by the men in your service. Deputations from the drivers and firemen, guards, signalmen, ticket-collectors, carters, and porters, including the men in the harbour department, and also from the permanent-way staff, have waited upon or their memorials submitted to our general manager and chief officials, and the board have had before them the claims of the men. These have been met in a way which I sincerely hope has given satisfaction to those concerned. As the report tells you, about 10,000*l.* additional traffic receipts have been earned by running only 4,102 extra train miles. In this, of course, we had the advantage of saving the passenger train from Carnforth to Barrow, previously run under an arrangement with the Post-office, and in other respects our mileage has been kept down to a minimum. I am glad to tell you that, from July 1st, by a rearrangement of our engine working, a saving of two or three engines in steam has been effected. This has been brought about by running the passenger engines through between Carnforth and Whitehaven instead of disconnecting them at Barrow, and all this, I need scarcely tell you, will help the working expenses. This is all the more important as we have been compelled, in common with all other companies, to pay an increased price on the coal contracts for the current year. Law charges have an unfortunate increase, but this arises from the unsuccessful struggle we have had with the Bowness Urban District Council in respect of the Bowness Pier extension, to which reference was made at the last meeting. The dredging expenses in the harbour show an increase of 1,409*l.* This is due principally to the accumulation of sewage in the Walney channel. The directors have this matter under their serious consideration. There can be no question, if only in promoting the health of Barrow, that the town sewage should be diverted from the Channel to an outlet below Piel. With respect to the capital expenditure, you will, I am sure, be glad that we have spent some 7,000*l.* less than was authorised at the last half-yearly meeting. We are proposing to spend during the current half-year some 27,000*l.* Piel Bar dredging is included in these estimates, and I hope before the close of the year that we shall come to the end of this very important work. We have also some further work in regard to signalling, lengthening and making additional platforms, &c., in complying with the Board of Trade requirements. Important alterations must also be carried out at the Barrow central station to relieve the pressure and congestion that arises at this station in the summer months. For working stock we are proposing to spend a small sum. At these meetings a good deal has been said about the company's dock property. The directors are fully alive to the development of the docks, and it is useless probing the directorate unduly on this point. You may take it from me that no stone will be left unturned to induce the shipping industries of the west coast, as well as traders, to come to the port of Barrow. Vessels using the Port of Barrow are steadily growing in number. For the past half-year we have an increase of sixty-two ships compared with the corresponding period, with an increased tonnage of about 20,000 tons. The sale of land at Barrow is also having our best consideration. Negotiations for the sale of a large block of our property on Barrow Island are pending. Taking all things into consideration, we may congratulate ourselves on our position. The directors do not for a moment think that further progress will not be made. On the contrary, we have little doubt that the company will continue to make further headway.

The motion having been seconded some discussion followed.

Several SHAREHOLDERS expressed themselves as gratified with the management of the company.

Mr. LANCASHIRE urged that a traffic from the North Eastern district to the line should be developed.

Mr. TAYLOR protested against the abolition of second-class carriages, and

Mr. SETTLE urged the putting of a steamer between Fleetwood and Barrow to develop a tourist traffic from Blackpool and other places.

The CHAIRMAN could not see how they could develop traffic from the North Eastern, except by making a line to connect with it.

The report and accounts were adopted and the dividend declared.

**ISLE OF WIGHT CENTRAL RAILWAY.**

The half-yearly general meeting was held on Wednesday, at the chief office, 3, Lothbury, E.C.; Mr. T. DOLLING BOLTON, M.P., presiding.

The CHAIRMAN, in moving the adoption of the report and accounts, said there had been some increase in the receipts for the six months under review, but in the expenditure there had been a still larger increase, which had been caused chiefly by the working of the St. Lawrence line. That line had not yet been completed to Ventnor, and until it was they would not be able to ascertain what would be the result of its working on the Central line. The total traffic receipts for the half-year amounted to 15,024*l.*, and the working expenses to 10,019*l.*, leaving a net balance of 5,005*l.*, which had been sufficient to pay the interest on the three classes of debenture stocks and the rent-charges. In the passenger traffic there had been a decrease, but it had to be remembered that they were comparing with the Diamond Jubilee period, when the festivities at Cowes attracted a large number of people to the island. As to the merchandise traffic, there had been an increase of 6 per cent., in minerals an increase of 12 per cent., and in wharfage an improvement of about 9 per cent. These increases would, he thought, be regarded as satisfactory by the proprietors, and, when he met them next year, he hoped to be able to congratulate them on a growth in the passenger traffic, as well as in the items of merchandise, minerals, and wharfage. Referring to the heavier expenditure of the half-year, he said the increase under the head of maintenance of way and works had been mainly due to exceptional repairs to the bridges on the Sandown line, and by fresh ballasting. The augmentation in the locomotive expenditure was accounted for by the working of the Newport Godshell and St. Lawrence Railway, and the higher wages that they had had to pay, in common with other railway companies, to some of their employees. There had also been more to pay for coal owing to the trade disturbance in South Wales. The increase in the traffic expenses was principally due to the working of the Newport Godshell and St. Lawrence Railway. Of course, the staff for that line was a new source of expenditure, and he was afraid the tendency would be for the amount to become more rather than less. They trusted that the receipts from that line would improve, and that the additional expenses in connection with it in the future would not materially affect the half-year's working of the whole system. The board hoped that before long the line would be finished and opened throughout from St. Lawrence to the Ventnor side of Steephill Castle, and then, of course, they expected to have a large increase in the traffic from that railway, which would be equally to the advantage of the proprietors of the Central Railway as to the proprietors of the Newport Godshell and St. Lawrence line.

Mr. PERCY MORTIMER seconded the motion, which was carried without discussion.

**DIDCOT NEWBURY AND SOUTHAMPTON RAILWAY.**

The half-yearly general meeting was held on the 19th inst. at the Westminster Palace Hotel; Mr. J. S. FORBES presiding.

The accounts for the half-year ending June 30th, 1898, showed a gross revenue of 12,578*l.* (against 12,270*l.*), an expenditure of 10,471*l.* (against 8,590*l.*), and a net revenue (including 31*l.* sundry credits) of 2,138*l.*. The half-year's interest charges on loans and debenture stock amounted to 6,947*l.*, and there was now a balance of 48,555*l.* accumulated against net revenue account. Length of railway, 44½ miles. The capital account showed an expenditure of 1,241,713*l.*; whilst the receipts had been 1,242,980*l.*—viz., ordinary shares, 306,830*l.*; 5 per cent. preference shares, 638,240*l.*; debenture stock, 166,000*l.*; debentures, 131,910*l.*

Mr. GRIFFITHS (manager) read a report which he had prepared upon the half-year's traffic. The growth in the general traffic was still keeping up steadily, more so than would appear on the face of it; but the totally exceptional and abnormal traffic in June last year made the increase seem less than it otherwise would have done. Both the Great Western and South Western showed a decrease, while the Didcot Company, in between them, had been able to maintain their increase.

The CHAIRMAN, in moving the adoption of the directors' report and accounts, expressed his hope that when the traffic between Southampton and America, which had been partially suspended during the war, had been fully resumed, when the coal strike had ended, and things assumed their normal condition, this company would share in the general prosperity. The Didcot company had spent a good deal of money in getting settled by the Railway Commissioners the knotty point of allowing the working company—the Great Western—to carry goods and passengers between Paddington and Southampton over the Didcot Company's line; and there could be no doubt the Great Western Company might, if they chose, develop a very large traffic between Paddington and Southampton. He failed to see any difference of interest on the part of the Great Western and the Didcot Company in developing traffic over this route, but it was the duty of the Didcot company to endeavour to persuade their Southampton friends to consign their goods over this route, and it was fortunate that the majority of their directors were Southampton gentlemen capable of influencing traffic over this line. There could be no doubt that for traffic purposes the position of this company was more satisfactory at the present time than at any previous period.

Mr. MOUNT, M.P., seconded the motion, which was agreed to.

An extraordinary meeting was subsequently held for the purpose of authorising the further exercise of the borrowing powers of the company to the extent of 15,920*l.*

The CHAIRMAN moved a resolution to carry out this object, and explained that it was proposed to pay off a debt of 9,000*l.* due to the Great Western Company, and carry out various improvements which appeared necessary. The proposal would, if adopted, give the Didcot Company an amount of stability and credit which it did not at present possess.

Mr. HARPER seconded the motion, and it was carried *nem. con.*

The CHAIRMAN said Lord Wantage and the rest of the directors had decided to subscribe their portion of the new capital, and they hoped the other debenture-holders would do the same.

**MARYPORT AND CARLISLE RAILWAY.**

The half-yearly general meeting was held on Wednesday at Maryport; Mr. H. P. SENHOUSE presiding.

The accounts for the half-year ending June 30th, 1898, showed a gross revenue of 52,950*l.* (as compared with 50,521*l.*), and a total expenditure of 25,946*l.* (as compared with 24,684*l.*), leaving, with the balance of 1,528*l.* from the previous half-year, and interest 637*l.*, a total net revenue of 29,169*l.*. Of this interest on debentures, &c., would absorb 2,148*l.*; dividend on preference stock, 65*l.*; and dividend on the ordinary stock at the rate of 6½ (against 6) per cent. per annum, 25,213*l.*, leaving a balance of 1,743*l.* to be carried forward. Length of railway, 41½ miles. The capital expenditure had been 892,069*l.*, and the receipts 885,495*l.*—viz., ordinary stock, 775,800*l.*; minimum 4 per cent. preference stock, 2,000*l.*; debenture stock, 4 per cent. 107,695*l.*

The CHAIRMAN, in moving the adoption of the report and accounts said nothing had been expended on capital account, but during the current half-year they proposed expending 2,650*l.* on goods engines, all their engines being now in use. The gross revenue showed an increase of 2,429*l.*. There had been a decrease in the number of passengers carried of 8,963 and 112*l.* in the receipts under that head. The first and second class showed an increase in number and amount; the third-class a decrease of 580*l.* in amount and 15,372 in number. Owing to the cheaper fares, more people were travelling second-class. In merchandise there had been an increase of 503*l.*, the gross tonnage carried being 89,761 tons, or 1,890 tons less than in the corresponding half-year, the decrease in tonnage being only in short distance traffic. In mineral traffic there was an increase of 2,030*l.*. They had carried 374,305 tons of minerals, being an increase of 10,618 tons. The gross increase in the working expenses had been 1,262*l.*, and the increase in receipts 2,420*l.*, making a net increase in the receipts of 1,167*l.*. This, with 637*l.* received from Maryport Harbour Commissioners for arrears of interest on the loan and the increased balance of 450*l.* brought forward from last half-year, made 2,241*l.*, which enabled them to pay an extra ½ per cent. and carry over a balance of 1,742*l.*. He thought he might fairly congratulate them on paying the increased dividend and on the working of the railway; also that they could look forward for certainly half a year to further improvement in the traffic. There were five more furnaces in blast than there were at this time last year, and they all knew that the West Cumberland works, which had long been closed, were shortly to be opened, and this railway would get a share of the traffic the works brought to the district.

Mr. D. AINSWORTH seconded the motion, which was adopted.

Mr. WILLIAMSON, of Maryport, said he regretted the absence of Sir Alexander Wilson, chairman of Cammell's Company, who had recently been appointed a director of this railway, as he intended asking him if it was correct that he was one of the prime movers in a proposed railway from Workington to Weardale. The construction of such a railway would naturally take a great amount of traffic from the Maryport Railway, and if the report was correct in regard to Sir Alexander Wilson, he ought no longer to retain his position as a director of this company.

The CHAIRMAN assured Mr. Williamson that Messrs. Cammell and Co., of which Sir Alexander Wilson was chairman had nothing whatever to do with the proposed new railway.

**Directors' Reports.****WATERFORD LIMERICK AND WESTERN RAILWAY****CAPITAL.**

June 30th, 1898.—The total expenditure amounts to 2,851,781*l.*, and the receipts to 2,801,801*l.*, as follows:—Ordinary stock, 597,550*l.*; preference stocks, 985,184*l.*; debenture stock, 932,364*l.*; Government grant, 150,000*l.*; baronial shares, 120,000*l.*; sundries, 16,704*l.*. Balance at debit of capital account, 49,979*l.*. The expenditure in the half-year was 7,362*l.*, of which 2,465*l.* was on lines open for traffic, 3,177*l.* on working stock, and 1,720*l.* on Collooney and Claremorris line. Estimated further expenditure—In the current half-year, 6,174*l.*; in subsequent half-years, uncertain—together, 6,174*l.*. Capital powers and other available assets, nil.

**REVENUE.**

Subjoined is a summary of the revenue account for the half-year ending June 30th:—

	1897.	1898.
Passengers, parcels, &c. ....	£44,908	£45,844
Goods, minerals, and live stock.....	54,631	53,629
Sundries.....	2,167	2,336
Gross receipts .....	£101,706	£101,809
Total expenditure .....	59,712	61,078
Net receipts .....	£41,994	£40,731
Balance from last half-year .....	1,489	1,936
Sundry credits.....	2,196	2,223
Total .....	£45,679	£44,890
Prior charges .....	£23,400	£23,875
Preference dividends (in full) .....	19,677	19,816
Dividend on ordinary shares .....	nil	nil
Balance to next half-year .....	2,602	1,199
Total .....	£45,679	£44,890

The gross receipts for the past half-year show an increase of 108 $\frac{1}{2}$ l., the expenses an increase of 1,366 $\frac{1}{2}$ l., and the net earnings a decrease of 1,263 $\frac{1}{2}$ l. The ratio of expenses to receipts is 59.99 per cent., as against 58.71 per cent.

TRAFFIC, &c.			
Half-year ending June 30th.			
	1897.		1898.
Mileage—Lines owned .....	240 $\frac{1}{2}$	...	240 $\frac{1}{2}$
" Leased or rented .....	102	...	102
" Foreign lines worked over ...	8	...	8
" Total operated .....	350 $\frac{1}{2}$	...	350 $\frac{1}{2}$
Train mileage—Passengers .....	394,987	...	394,922
" Goods .....	185,523	...	180,468
" Total .....	580,510	...	565,420

\* Including train mileage of other lines worked.

The report states:—

"The traffic receipts, it will be observed, show a decrease of 65 $\frac{1}{2}$ l. The net working expenses show an increase of 1,365 $\frac{1}{2}$ l., arising chiefly from the increased cost of coals due to the strike in South Wales, and also increased cost of materials.

"The capital expenditure amounted to 5,641 $\frac{1}{2}$ l., exclusive of the expenditure on the Collooney lines. The principal outlay occurred in relation to additional working stock and making Longpavement a passing station on the line between Limerick and Ennis.

"Notice has been served on the postal authorities to terminate the contracts for the conveyance of mails except on the Kerry section.

"A special resolution to adopt the amalgamation of your company with the Great Southern and Western Railway Company will be proposed at the general meeting. The basis of amalgamation is the exchange of your debenture and preference stocks and shares for so much Great Southern and Western 4 per cent. debenture and preference stocks respectively as will yield the same amount of interest and dividend as the holders at present receive, save the 3 $\frac{1}{2}$  per cent. preference stock, which is to be exchanged for 75 per cent. of the Great Southern and Western 4 per cent. preference stock, or at the option of the holders, for 105 $\frac{1}{2}$ l. cash for each 100 $\frac{1}{2}$ l. of 3 $\frac{1}{2}$  per cent. stock. The ordinary shares of the company are to be exchanged for a guaranteed Great Southern and Western stock ranking after the loan capital of that company, and yielding for the first year 1 $\frac{1}{2}$  per cent., increasing  $\frac{1}{2}$  per cent. each year until 2 $\frac{1}{2}$  per cent. is reached, when the holders will have the option of converting into a proportionate amount of 4 per cent. Great Southern and Western cumulative preference stock as will yield the same amount of interest. Your board strongly recommend the adoption of the amalgamation on the terms proposed, and they request the shareholders to sign and return to the secretary the enclosed proxy, in order that it may be used at the general meeting, when the matter will be formally submitted for approval.

"The meeting of the shareholders held on the 15th ult., in compliance with the requisition lodged, was adjourned until Friday, the 26th inst."

### MIDLAND AND SOUTH WESTERN JUNCTION RAILWAY.

The accounts for the half-year ending June 30th, 1898, show a gross revenue of 21,735 $\frac{1}{2}$ l. (against 20,066 $\frac{1}{2}$ l.), an expenditure of 15,003 $\frac{1}{2}$ l. (against 15,700 $\frac{1}{2}$ l.), and a net revenue of 6,732 $\frac{1}{2}$ l. (against 4,366 $\frac{1}{2}$ l.). The debit balance from previous account absorbed 1,468 $\frac{1}{2}$ l., rents, charges and interest on outlay by other companies 993 $\frac{1}{2}$ l., interest on debenture stock 5,648 $\frac{1}{2}$ l., and general interest 82 $\frac{1}{2}$ l., leaving a debit balance of 1,459 $\frac{1}{2}$ l. to be carried forward. Length of line owned, 54 $\frac{1}{2}$  miles; lines partly owned, 1 $\frac{1}{2}$  miles. The capital account shows an expenditure of 1,713,801 $\frac{1}{2}$ l., whilst the receipts have been 1,709,217 $\frac{1}{2}$ l., as follows:—Ordinary and preference shares and stock, 631,731 $\frac{1}{2}$ l.; A debenture stock, 3 per cent. non-cumulative, 376,839 $\frac{1}{2}$ l.; A debenture stock, 3 per cent. non-cumulative until January 1st, 1900, 33,051 $\frac{1}{2}$ l.; B debenture stock, 3 per cent. non-cumulative, 476,789 $\frac{1}{2}$ l.; C debenture stock, 3 per cent. non-cumulative 191,117 $\frac{1}{2}$ l. The report states:—

"In accordance with the provisions of the Act of last year, interest upon A debenture stock (cumulative) will be paid on October 1st.

"Marlborough and Grafton Railway.—This line has been completed and was taken over by the company on July 1st.

"Military Camps on Salisbury Plain.—In order to protect the company's interests and to give railway communication to the Avon Valley district, an application was made for authority to construct a light railway from Ludgershall to Amesbury and Bulford, but in consequence of the opposition of local authorities and landowners the Commissioners refused to report in favour of the line. The development of the military camp traffic will be carefully watched and all necessary steps taken to safeguard the interests of the company.

"Parliamentary.—A Bill deposited by independent parties for a railway to connect with the company's line at Andoversford and thence through Winchcombe to Stratford-on-Avon, which would have given the company direct and independent access to Birmingham, was passed by the House of Commons but thrown out by a committee of the House of Lords."

### NORTHAMPTON AND BANBURY JUNCTION RAILWAY.

The result of the six months' working is an excess of receipts over expenditure of 1,117 $\frac{1}{2}$ l., which, added to the balance of 1,441 $\frac{1}{2}$ l. brought forward from last half-year, forms a total of 2,558 $\frac{1}{2}$ l. After providing for interest on rent-charges, 101 $\frac{1}{2}$ l., a balance is left of 2,456 $\frac{1}{2}$ l. to be carried forward. The existence of so considerable a balance is largely attributable to the prolonged coal strike in South Wales, inasmuch as the strike has prevented the makers of the rails required for renewal of permanent way from rolling the quantity which should have been delivered and paid for in the first six months of the year. That circumstance, and the fact that rather a larger quantity of rails and accessories will be wanted for complete renewal than was at one time

calculated, as well as the urgent need of more ballast—so essential to preservation of sleepers and rigidity of road—will somewhat postpone the date at which the relaying of the line will be quite finished. There is, however, no question that the company's true policy is to raise the condition of the line to such a standard as will put an end once for all to the extremely uneconomical and in every way unsatisfactory system formerly adopted over a long period of years of confining maintenance to limits wholly inadequate to really safe or efficient working.

### MILFORD DOCKS.

The gross receipts for the half-year ending June 30th, 1898, amounted to 5,341 $\frac{1}{2}$ l., and the net receipts to 1,720 $\frac{1}{2}$ l. The debenture stock interest for the half-year amounted to 15,244 $\frac{1}{2}$ l., leaving a deficiency of 13,524 $\frac{1}{2}$ l. The total arrears of interest now amount to 201,141 $\frac{1}{2}$ l. The report states:—

The profits from the fish and local trade continue to increase—the past half-year showing an excess of 290 $\frac{1}{2}$ l. beyond the net earnings for the same period of 1897. The company's Bill in Parliament (1898) received the Royal Assent on July 1st last—with the omission of all clauses connected with the proposed steamship line from the United States, which, for the present, is in abeyance. The directors have grounds for expecting the early conclusion of negotiations by which an important line of steamers for passengers and cargo will be established to run between a Canadian port and the Milford Docks, with through booking arrangements between the railway systems of Canada and America and the Great Western Railway of England. Arrangements for opening up the collieries at Johnstone and the shipment of coal at the docks are favourably progressing. The tonnage of vessels entering the docks during the half-year is 184,843, as against 167,947 in the corresponding period of 1897.

## General News.

### CHINESE RAILWAY QUESTIONS.

The Brussels journal, the *Moniteur des Intérêts Matériels*, gives some definite information concerning the loan in connection with the Peking-Hankow line. In the first place, it states, a loan of 112,500,000 $\frac{1}{2}$ l. is to be floated at an interest of 5 per cent. and redeemable within twenty years, beginning from 1909, by means of yearly drawings, to take place at the offices of the Société Générale. The loan is to be called the Chinese 5 per cent. 1898 Loan, and is to be divided into 225,000 debentures of 500 $\frac{1}{2}$ l. (gold) each. Capital and interest are payable at Paris and Brussels in gold francs, and are guaranteed by the general revenues of the Chinese Government, in preference, by the net profits of the Peking-Hankow line after deduction of the working expenses. The rest of the profits has to be sent directly to the Société Générale. No tax whatever can be imposed upon capital or interests. The admission to quotation at the Paris and Brussels Exchanges will be asked for. Further, the agreement concluded between the Chinese Government and the Compagnie des Chemins de Fer Chinois, the Société d'Etude de Chemins de Fer en Chine (with the help of the Société Générale) stipulates that the whole material and supplies for the construction and working of the line shall be entrusted to the Société d'Etude, excepting what the Chinese factory of Hanyang can supply.

The Hong Kong correspondent of the *Daily Mail* telegraphed on Thursday:—"The Yangtse Valley is again imperilled. The concession which the Tsung-li-Yamen recently granted to French interests gives to the Lung-Chau railway in Tonkin a terminus at Ting-Chau, in the Hong Kong hinterland, and another at Chung-King, on the Yangtse River. The western branch passes through Tali-Fu. The French have obtained exclusive mining and territorial rights throughout the areas. The French estimate for the construction of the system exceeds 3,000,000 $\frac{1}{2}$ l. sterling. The authorities are appalled at the outlay, and have already determined to abandon the projected lines. Negotiations have been opened with a prominent English firm to build the railway in exchange for the full rights which the concession carries. The papers have been sent to London, but nothing definite has yet been heard from Tonkin."

Referring to the Shan-si concession which the Peking Syndicate, Limited, is trying to palm off on the gullible British investor at a fabulous price, the Shanghai correspondent of the *Times*, writing under date July 11th, says:—"The best opinions in China as to the value of the Anglo-Italian syndicate's concessions are agreed that, if energetically exploited and supported, they must undoubtedly prove of great industrial importance and lead to a much-desired opening up of a large area of country hitherto untapped. There exists, however, at the same time a widely spread impression that the present enterprise is connected rather with the field of finance at home than with that of genuine enterprise in China, and it is generally felt that the promoters of the 'Peking Syndicate (Limited)' are more concerned with the successful floating of the company in London than with the future development of the resources of Shan-si. This impression may prove to be erroneous, but there is at present little evidence before the public to show that those who have been successful in obtaining these concessions have any definite intention of

working them themselves, and the earlier history of the agreement made by Signor Luzzatti is significant. . . . Turning now to the actual prospects of the Anglo-Italian syndicate's concessions, there can be no doubt as to the extent and richness of the enormous coal and iron deposits over which rights have thereby been obtained. The questions which remain to be answered are, by what means are the products of the mines to be distributed, and where shall they find their principal markets? The reply to the first question must largely depend, as I have already said, upon the nature of the 'financial control' exercised over the railways to the north and east of the mines by Russia and Germany respectively, as well as upon the final interpretation given to the 'Inland Navigation' rules. With regard to the second, the syndicate expects to find its three chief markets in (1) domestic consumption over a wide area; (2) native manufactures and railways; and (3) export for ocean steamer and factory use at the ports. Admitting, as seems reasonable, that the coal of Tse-chau-fu and Ping-yang can be produced *in loco* at a lower price than that of Hu-nan or Japan, there can be but little doubt that the present condition of the lower classes in Shan-si will need to be greatly improved before they can be brought to consider coal for domestic purposes as a necessity to any considerable extent. According to Von Richthofen, the inhabitants of this province are amongst the most enterprising and intelligent natives of China, and it may well be expected that with the introduction of factories and railways they will gradually attain to a higher level of domestic economies than that of millet-stalk fuel and the brick-oven, but until their education in this respect shall have been materially advanced the prospects of any large coal consumption for household use may be discounted. Then, too, the heavy cost of animal transport to points even in the immediate neighbourhood of the railways will continue to place coal beyond the reach of the labouring classes. At the present time villages only one or two miles distant from the mines have difficulty in buying coal, owing to the cost of donkey transport. The building of factories and branch lines of railway must eventually create a considerable demand for the products of the Shan-si mines, and if only in that the syndicate's operations will afford to the inhabitants of this remote province an opportunity for such industrial development their enterprise is worthy of support. But such growth is not of to-day, nor of to-morrow; it must involve the slow progress of many years. Much, too, depends upon the qualities of the coal lying in juxtaposition with the chief iron deposits; and it may be of interest in this connection to note that the coke used for Government purposes in Tien-tsin to-day is imported from Han-kau. As far as bituminous coal is concerned, the Russian railway will possess an enormous source of supply in the mines of the Tai-yuen-fu district. Finally, as regards the export of Shan-si fuel to the Yang-tze and coast ports, there can be but little reason to believe that the high prices now ruling in China for Cardiff and Japanese coal will be maintained in the face of the competition that must before long spring up in Shantung, in Hu-nan, and in the Leao-tong Peninsula. The future of Shan-si as an important source of supply will entirely depend, therefore, upon the adequacy and directness of the routes of communication established."

#### RAILWAY SUPPLIES FOR CHINA.

Mr. Goodnow, the United States Consul-General at Shanghai, writes, under date of June 18th, 1898:—"Eight 'Mogul' freight engines have just arrived, and are being erected at Tongku for the Northern Railways of China, and Chief Engineer Kinder has to-day ordered four lighter engines for switching purposes. All these are from the Rogers Locomotive Company of Paterson, N.J. I enclose herewith report of tenders just received for 7,000 tons steel rails and accessories, all to be delivered at Tongku. The clipping, which Mr. Goodnow sends with his report, gives the names of the bidders and their price per ton for rails, fish-plates, bolts, and spikes. On May 4th the Consul-General forwarded a report giving the names of bidders and the gross amount of their proposals. The inclosure gives the bids in detail, as follows:—

Name of bidder.	Rails.	Per ton.			
		Fish Plates.	Bolts.	Spikes.	
Jardine, Matheson and Co.....	\$31.37	\$39.10	\$78.89	\$75.03	
William Forbes and Co. ....	31.68	40.06	65.87	59.42	
George Turner.....	31.68	33.76	76.72	73.26	
Louis Spitzel and Co. ....	32.15	45.84	52.32	—	
Birch and Co. ....	32.26	40.00	76.13	72.91	
William Forbes and Co. ....	32.70	41.10	66.90	60.45	
Vander Stegan and Co.....	32.57	45.34	59.65	—	
Carlowitz and Co. ....	33.46	41.58	78.90	75.63	
William Forbes and Co. ....	33.54	41.93	81.30	77.42	
Buchheister and Co. ....	33.66	42.24	80.52	77.22	
Mitsui Bussan Kaisha.....	33.69	41.84	80.12	75.40	
Tientsin Trading Company ..	31.24	42.64	79.96	76.46	
Mandi and Co. ....	38.11	49.76	71.57	68.17	
A. S. Forbes and Co. ....	29.20	43.80	65.70	58.40	

Under date of May 14th, Consul-General Goodnow says that the bids of A. S. Forbes and Co. had been accepted.

#### BURMO-CHINESE RAILWAY SCHEMES.

The following is an extract from an elaborate memorandum on railways in Burma prepared for the information of the Rangoon Chamber of Commerce by Mr. F. B. Hebbert, agent, Burma Railways Company (Limited):—"Whether this branch (i.e., the Kunlon Ferry line) will ever be extended into China will rest with the British Government and not with the company, which has at present no connection with any proposals for an extension. . . . In the first place, it would be necessary to decide on the objective of the scheme. The public press in England seems to have settled that such objective must be the banks of the Yang-tze, at a point where it is navigable, with a view of reaching Szu-Chuan. The country between the Salween and the Yang-tze has been traversed by many intelligent and highly qualified explorers, though, unfortunately, not by any railway engineer of special experience. In the main the descriptions of the country by these travellers agree in representing it as unsuitable for ordinary railway construction, while they all concur in thinking that the idea of tapping the trade of Szu-chuan is chimerical, but that the richest and most populous portions—that is, the western and central districts of Yun-nan—can most easily be approached from Burma. Unfortunately, there is less agreement in regard to the number of the population and the kind and quantity of the produce of those districts. The most recent explorations show that, taking the Mandalay-Kunlon Railway as a standard, there should be no greater difficulties than those there being overcome, in running a line from the Kunlon Ferry over the Salween, up the Namting Valley, across the low watershed at its head, into the Mekong basin to Yen-chau, a distance of 160 miles. From this point, as Baber has shown, both Yung-chau-fu and Ta-li-fu could be reached by lines ascending the valleys. A line from Yen-chau to Ta-li-fu would probably not be more than 130 miles long. The nature of the plateaux lying between Ta-li-fu and Yun-nan-fu, 200 miles, has not been so well described; but they lie on the watershed between the Mekong and the Yang-tze rivers, and there seems no reason to anticipate insuperable difficulties to a railway being constructed over them. It is less certain that the traffic prospects of this latter section would be favourable, though the alignment would cut across one or two important trade routes. From Yun-nan-fu to the Yang-tze there are several alternative routes, but all are formidable. . . . Until these routes have been traversed by a competent railway engineer it cannot be said that none of them are feasible; but if a prolongation of a future railway to Yun-nan-fu were ever wanted down the Yang-tze Valley it would be for political and strategical purposes—its pretensions as a commercial project having been definitely disposed of by every traveller in Central China."

**New South Wales Railways.**—The gross revenue of the New South Wales Government Railways for the quarter ending June 30th, 1898, amounted to 714,867*l.* (against 675,964*l.*), the expenditure to 399,528*l.* (against 392,344*l.*), and the net revenue to 315,339*l.* (against 283,620*l.*). The length of line operated was 2,691½ miles (against 2,639½ miles); the number of passengers carried 5,913,045 (against 2,030,394); the quantity of freight carried 1,146,283 tons (against 1,086,538 tons); and the quantity of live stock 52,217 tons (against 55,780 tons). The earnings per train mile were 6*s.* 8½*d.* (against 6*s.* 7½*d.*); the expenses per train mile 3*s.* 9*d.* (against 3*s.* 10½*d.*); and the ratio of expenses to receipts 55·89 per cent. (against 58·04 per cent.). The earnings are the largest on record, and although the June quarter of last year gave an increase of 80,392*l.* over the corresponding period in 1896 the present quarter shows a further increase of 38,903*l.*; the expenditure, however, having only increased 7,184*l.*, the net result gives an increase of 31,719*l.*

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.	
Three Months.....	20 7 0
Six Months.....	0 13 0
Twelve Months.....	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

- Aug. 27—Cockermouth Keswick and Penrith Railway (Half-yearly), Keswick.
- Aug. 31—Alexandra—Newport and South Wales—Docks and Railway (Half-yearly), 54, Palmerston-buildings, E.C., at 3.
- Aug. 31—Colne Valley and Halstead Railway (Half-yearly), 3, Throgmorton-avenue, E.C., at 1.
- Aug. 31—South Yorkshire Junction Railway (Half-yearly), 23, Queen Victoria-street, E.C., at 12.
- Sep. 6—North Metropolitan Railway and Canal (Half-yearly), 138, Leadenhall-street, E.C., at 12.
- Sep. 13—Glasgow and South Western Railway (Half-yearly), Glasgow, at 12.
- Sep. 20—Caledonian Railway (Half-yearly and Special), Glasgow, at 1.
- Sep. 22—North British Railway (Half-yearly), Edinburgh, at 12.30.
- Sep. 27—Ottoman Railway from Smyrna to Aidin (Half-yearly), Winchester House, at 12.

A young man at Prague, named John Sacek, has (telegraphs the Vienna correspondent of the *Daily Chronicle*) invented an electrical apparatus for railways. "It is acknowledged by specialists to be a very important improvement. The invention causes the ringing of an automatic electric bell attached to the engine when danger is threatened by an approaching or preceding train. The discovery renders certain signal stations unnecessary, and notifies danger to the engine-driver without obliging him to attend to signals while driving. The cost of fixing and maintaining the invention is insignificant."

## The Railway Times.

Established 1887.

AUGUST 27, 1898.

## THE COMPANIES AND THEIR WORKMEN.

A leading feature in the speech of nearly every railway chairman during the series of half-yearly meetings now concluded has been the reference to the attitude to be adopted by their companies towards the Workmen's Compensation Act. It is satisfactory, and in accordance with anticipation, to find that, with no exception of importance, the companies, with the eager concurrence of their workmen, have decided to continue in one form or another the arrangements by which the employer has been able to show an active interest in the welfare of the employé. The schemes of the past, whether known as accident funds, friendly societies, or what not, in which the companies have practically assisted the efforts of their men, were well described by Lord Claud Hamilton at the Great Eastern meeting as a bright spot in railway history. Our opinion has often been expressed as to the desirability of such funds, both as an inducement to thrift and, as such, tending to the real elevation of the working classes and also as a buffer to the machinations of the self-interested agitator. All these, however, must now make a fresh start, and it is interesting to note the various ways in which the same end is sought to be achieved. There have been differences of opinion in the past as to the machinery to be used; but as to the broad result aimed at, that of giving effect to an accepted moral obligation outside of pure business relations, the differences have been but skin deep. Thus the Midland, the much quoted champion of the non-contracting out system, has for many years contributed to its men's friendly society a capitation grant of 12s. per annum per member, making in 1897 a total of 16,700*l.* towards the allowances made from that society for sickness and superannuation. It is a common error to believe that the system of benefits hitherto in operation on the Midland involved no compulsory contribution from the men. So far from this being the case the compulsory subscriptions ranged from 7d. per week for men joining under the age of twenty-five to 10d. for those entering the company's service between the ages of thirty-one and thirty-five. The point of distinction, however, between this scheme and that in force on the London and North Western lies in the inclusion in the scope of the latter of injury pay and compensation in addition to the other benefits enjoyed by Midland men, while the Midland fund was in no way drawn upon for the accidents contemplated in the Liability Act. The effect of that Act has been to induce these two companies to modify their systems in such a manner as practically to adopt the same lines. Compulsory membership is specifically debarred, since both companies accept the Act in its entirety. But the advantages derivable by members, in addition to those presented gratis under the Act, have been already sufficiently recognised as to secure the active support of over 90 per cent. of the employes of these companies to their respective funds. The aims of the new schemes are briefly as follows: Firstly—to give to the members the injury pay to which they are not entitled by the statute for the first fortnight. Secondly—to add something to the legal minimum of half-pay issued under the Act after the period referred to. And thirdly—to continue the benefits of sick pay and superannuation or compassionate grants on "natural death," which are entirely outside the provisions of the Act. To

carry out so laudable an object while accepting the full liability under the Act is therefore a matter of considerable financial import; and while it is not surprising to find that it was necessary for the Midland men to increase their contributions by 1d. weekly—a proposal to which they gladly assented—it certainly redounds to the credit of the proprietors that they should have decided to deduct only 2s. from the 12s. capitation hitherto subscribed. It is an interesting deduction to note the implied estimate of 2s. per annum as an insurance premium towards the increased liability under the Act. As regards the North Western, the contributions of which company to its men's funds were, of course, on a heavier scale in consideration of a freedom from a liability now assumed in an enhanced form, the funds will, it appears, be continued by the men themselves without official aid, and, of course, on a voluntary basis. Much of the accumulated capital was subscribed by the company to meet liability for accident, now otherwise provided for by statute, and upon this the men have, of course, no claim. At the same time, the change from a compulsory to a voluntary basis renders the initial stages perhaps a little critical financially, and the gift of the capital sum as a nucleus of the new fund is an act of generosity. Lord Stalbridge is evidently prepared to go further, for he publicly expressed his confident belief that should any further measure of assistance be necessary he was sure that the circumstances would be favourably considered by the proprietors. Space precludes an examination of the schemes of other companies, but it is sufficient to add that all are actuated by a healthy rivalry in this matter of care for the welfare of their servants. No wonder the railway service—strikes and agitators notwithstanding—is the most sought after of all employments.

### THE BANK OF TARAPACA AND ITS CLIENTELE.

The Bank of Tarapacá and London, Limited, commonly known as the "Nitrate Bank," although it modestly disclaims the title, has of late attained some notoriety as a participant in the Chilean financial crisis, itself heralded by the bank's issue of Treasury bills on behalf of the Government. The latter, finding itself short of funds wherewith to pay the coupons on the foreign debt due on July 1st, and being either unable or unwilling to obtain the necessary accommodation through the usual channel, applied to the Bank of Tarapacá, which institution at the beginning of June placed 500,000*l.* of Treasury bills on the London market. This issue, engineered by a well-known Stock Exchange firm partial to such operations, has to this day remained shrouded in mystery—thanks to the contradictory versions of the transaction published piecemeal in the *Times*. Whatever the precise *modus operandi* may have been, the fact remains that the Bank of Tarapacá can boast of having rendered an important service to the Chilean Government. At the same time there is in some quarters a shrewd suspicion of the existence of a certain amount of moral suasion on the part of the recipient of the favour, not altogether unconnected with the "bribery and corruption" episode in the Nitrate Railways investigation. Five out of the seven directors of the Tarapacá Bank are, so to say, Nitrate men pure and simple, and two of the number—Messrs. Robert Harvey and R. R. Lockett—played a particularly prominent part as witnesses before the committee whose proceedings were exclusively reported last January in THE RAILWAY TIMES. Those gentlemen, it will be remembered, driven into a corner over their administration of the Nitrate Railways Company's monstrous "secret-service fund," levelled wholesale accusations of venality and corruption against the Chilean nation, its legislators, and Judges. Whilst the unpardonable offence has

been treasured up in Chili against the offenders, the latter must have been only too anxious to make the "amende honorable." What more natural, then, than the construction of a golden bridge equally convenient to both sides! If this explanation of the recondite Treasury Bill deal be not true, it has at least the merit of being "ben trovato." The rod remains in pickle, and will no doubt be used as occasion requires on the trailers of that fatal red-herring, intended to draw the Nitrate Railways Committee off the scent of "Woolpack" misdeeds. By the way, how the Chileans must be chuckling over recent revelations in the London Bankruptcy Court! Talk of secret bribery and corruption at Santiago after the public performance given in the metropolis of finance! Admitting the presence of black sheep in the Chilean, as in all other flocks, could they hold a candle to the aristocrats, industrial knights, and other men of mark foundering in the Hooley swim? The methods of the cycle and concentrated-beef promoter may not have been quite the same as those connected with the products of the Nitrate boom, but the distinction is almost without a difference—secret commissions in the one case taking the place of private payments in the other. One thing, however, is sure: the exhibition would have been even more racy had fate ordained that the past-master of collapsible nitrates should stand in the shoes of the punctured financier, whose creations, although water-logged, are still afloat. To return, however, to Tarapacá, after mentioning, en passant, that Messrs. Alec Robertson, George Inglis, and Gamble North, minor stars in the nitrate firmament, appear to be playing the familiar sub rosa contract game in the Great Boulder Proprietary Mine, of which they are directors. If, as has been shown, the Bank's official relations with the Government possess the defects of their qualities, the same is unfortunately the case with many of its less exalted accounts, which must be causing the board considerable anxiety, as "maquinas" and bare "calicheras" are not ideal security for advances. The Arauco Company and the Paccha-Jaz Pampa—two of the numerous addled eggs in the nitrate basket (one in the receiver's hands, the other in process of reconstruction)—are in debt to the Bank of Tarapacá to the extent of 15,000*l.* and 5,000*l.* respectively; whilst the item of \$9,693,158—"advances, pending operations, interest and discount" at November 30th, 1897, probably includes a goodly proportion of fossilised loans, considering the hard times in Tarapacá. Curiously enough, the institution under notice is classed among the "Chilean banks" in the very interesting pamphlet on the financial position of Chili, just issued by the Legation. Out of 300,000*l.* in cash to the bank's credit at the above date, no less than 184,000*l.* was lodged with other banks, which precarious tenancy, it is to be hoped, ceased before the advent of the existing crisis. The Bank of Tarapacá naturally availed itself of the "moratorium," and it now remains to be seen how it will fare at the hands of its numerous depositors. In the last balance-sheet (June 30th, 1897) the current and deposit accounts amounted to 596,230*l.* in London and Chili. For several years past the bank has been laboriously writing down towards 18d. per dollar the 400,000*l.* originally remitted to Chili at 26d., and fourteen months ago 19½d. was reached by this process at a cost of 85,000*l.* The collapse of the gold standard has at one fell swoop undone the work, and further reduced the value of the working capital 20 per cent. on the present basis of exchange! With the financial position of the concern we are not concerned, leaving that matter to the Stock Exchange, which values the 10*l.* shares (5*l.* paid) at 2½-3. At the annual meeting in October the intention to make a call will probably be disclaimed, although the measure cannot well be long deferred. Altogether the prospect is not a pleasant one for share-

holders, and such transfers as may be effected should repay scrutiny, as it would be an insult to the directors' acumen to suppose that they will continue to hold more than their qualification.

### SOUTH WALES RAILWAY RIVALRY.

We pointed out at the time the notices of Bills for the 1898 session of Parliament were given in November last that there were all the indications of another keen struggle between the leading railways serving South Wales. This has certainly been the case, and, in spite of the loss of traffic and the recent passing of their ordinary dividends by these companies, the expenses to be met in connection with the Parliamentary fight are very heavy. The *South Wales Daily News*, in commenting on the extent of the demands made in the Bills of 1898, said that "South Wales asked Parliament to sanction 53 miles of railway and 40 acres of docks, necessitating a total expenditure of 3½ millions. Parliament has declined to add an acre to the docks accommodation, and, of the 53 miles of railway proposed, has seen fit to sanction 11 miles. The figure of 80,000*l.* is by no means an excessive estimate of the amount spent in promoting the Bills of the session." We may add that the paring down by Parliament of the demands made is probably worth to the shareholders of the companies concerned many times the amount of their outlay in Parliamentary charges. At the same time it becomes increasingly evident year by year that the competition between these companies in so limited an area involves great loss of energy and money as well, and, until some plan of harmonious working is settled upon, this state of affairs must continue. The great productivity of the South Wales coalfields and the constant and rapid advance in the shipments of coal from the ports in that district have been the means of counteracting the effects of competition. Now that by reason of the protracted coal strike these companies are placed in the position of being unable to pay any dividends to their ordinary stockholders they will, perhaps, be in a more suitable frame of mind to entertain amalgamation proposals to attain the important ends in view. As for the local opposition to fusion, which would be inevitable, it should not be impossible to devise some means whereby not only the railways but their customers should benefit from the economies to be effected by a wholesale amalgamation scheme. To return to the fruits of the Parliamentary struggle of the session recently concluded, we may sum up the position by stating that the Barry comes out first, the Cardiff Railways a poor second, and the others nowhere. As usual Barry luck has again enabled it to secure the plums of the session. It has been equally fortunate in what it has secured and in what it has been instrumental in inducing Parliament to reject. The Barry secured in 1896, and now has in course of construction, a line from its own main line near St. Fagan's Junction, across the Taff Vale, to the Aber Valley branch of the Rhymney. It has now secured powers to connect this line with the Brecon and Merthyr system near Caerphilly, which will give it access to the whole of the eastern side of the Rhymney Valley and put the Barry in a position to handle a large and growing traffic by a much less circuitous route than at present. This result has been attained with the assistance of the Brecon and Merthyr Company, which has agreed to give the Barry running powers right up the Rhymney Valley. The former company at the same time withdrew a Bill which was designed to confer powers upon it to construct a line direct from the Brecon and Merthyr main line to the Rhymney main line, thus affording access to Cardiff by an even shorter route than the new one opened up by the powers now conferred on

the Barry. The Barry proposal was, of course, keenly but unsuccessfully contested by the Rhymney, which already had an agreement with the Brecon and Merthyr that each should avoid competing with the other in the Rhymney Valley. The Rhymney Company had no Bill this year, but it will be surprising if next session it does not come forward to seek powers to construct a line connecting it with the Brecon and Merthyr system similar to those which the latter company dropped in deference to the wishes of its latest ally, the Barry Company. That part of the Barry Bill seeking power to construct a line from Cogan to Cardiff was dropped by arrangement with the Taff Vale Company. As for the negative benefits secured by the Barry, they consist mainly in the rejection of the Taff Vale Company's proposal to amend the historic clause 23 of the Barry Act of 1889, and the ultimate rejection of the Windsor Dock scheme of that company. Like the Barry, the Taff Vale Company is certainly persistent; but, unlike those of its rival, its causes are nearly always lost. The amendment of clause 23 has been refused for the fourth time, and the Windsor Dock scheme, though sanctioned by the Commons, was rejected for the third time by the Lords. The Cardiff Railways (formerly the Bute Docks Company), after the success of last year, came forward with a very large scheme for constructing new lines and for very extensive running powers; but the powers granted are modest in comparison with those sought for, having been strongly opposed by the Taff Vale Company. That bold scheme for the construction of the "Canal" lines, though sanctioned by the Commons Committee, was rejected by the Lords. We commented at the time on the wholesale running powers sought in the Cardiff Railways Bill of this session, and it is not surprising to find them wholly rejected. In fact, the Bute interest has to be satisfied with an extension of its powers of 1897 for the construction of independent lines as the outcome of the 1898 session. By this means it will acquire access over its own lines to its existing docks, and will not be dependent upon the Rhymney or Taff Vale. One thing is evident from the proceedings during the 1898 session, and it is that there still exist the makings of another sharp contest among the railways of South Wales in the 1899 session of Parliament.

### PASSING NOTES.

The traffic receipts for the week ending August 21st, on thirty-three of the principal lines of the United Kingdom, amounted to 1,898,815*l.*, which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,856,708*l.*, with 19,034½ miles open. There was thus an increase of 42,107*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for eight weeks to date amounted on the same thirty-three lines to 15,052,724*l.*, in comparison with 14,762,885*l.* for the corresponding period last year; increase, 289,839*l.*

Mr. F. Maddison, M.P., has received the following communication from the Board of Trade:—"Board of Trade, August 19.—Sir—I am directed by the Board of Trade to refer to the question which you addressed to the President in the House of Commons on the 25th ult., with regard to a fatal accident which occurred to a watchman named Freeman in Welwyu Tunnel, on the Great Northern Railway, and I am to state that the railway company have now informed the Board that in future no watchman or flagman is to be allowed to remain on duty inside a tunnel for a longer period than eight hours.—Yours, &c.,

"FRANCIS J. S. HOPWOOD."

Lieut.-Colonel Addison, reporting to the Board of Trade on the railway accident at Larne Station, on the Belfast and Northern Counties Railway, on July 13th, by which fourteen passengers were injured, says the collision was quite inexcusable. A number of trains were running between Belfast and Larne.

The signalman, Crawford, had evidently lost count of them. The driver's failure to see the home signals in sufficient time to pull up admits of no excuse. After seeing the distant signal at danger it was his duty to proceed with the greatest caution. The inquiry brings to light a mode of working the section between the town station and the harbour which should be put a stop to.

The Plynlimon and Hafan narrow gauge railway, which was opened experimentally for passenger traffic in March last, has just been closed. The line, which is of 2ft. gauge, runs from Llanfihangel station on the Cambrian Railway to the stone quarries of Plynlimon Mountain, and was primarily constructed with the object of developing the stone industry of Mid-Wales.

Mr. Robert Boath, of the Engineers' Department, North British Railway, Edinburgh, has been appointed engineer of the central district, including the Union Canal, and Mr. John Gray, of the District Engineer's Office, Glasgow, has been appointed engineer of the western district in succession to Mr. T. P. Carswell, who has resigned.

The shareholders of the Waterford and Limerick and Western Railway Company, at the general meeting yesterday, unanimously resolved to sell the line to the Great Western Company of England and the Great Southern and Western Company of Ireland. A report of the meeting will appear in our next issue.

The East Fife Central line, which connects with the Leven branch of the North British Railway between Cameron bridge and Leven stations, was opened for goods and mineral traffic on Sunday last. The names of the stations on the new line are Kennoway, Montrave, Largoward, and Lochty.

The North Sunderland Railway Company's line from Chathill to North Sunderland Harbour has been opened for goods traffic. The Board of Trade has authorised its working as a light railway.

The subject of the "illustrated interview" in the September issue of the *Railway Magazine* is Mr. G. Bolland Newton, general manager of the North London Railway.

The Dover Town Council has asked the South Eastern and London Chatham and Dover railway companies to negotiate for improvements at and around the pier.

## Money and Stock Markets.

The monthly settlement in Consols takes place on the 1st prox.; the fortnightly settlement in other Securities commences on the 29th inst.

### CITY, FRIDAY EVENING.

With an increasing supply of money, and a diminishing demand, rates in the MONEY MARKET continue to decline, and no difficulty is experienced in obtaining day to day accommodation at  $\frac{1}{4}$  to  $\frac{1}{2}$  per cent., loans for a week commanding only about the latter figure. There are still very few bills about, and the rate for three months' paper is easier at  $1\frac{3}{8}$  to 1-16 per cent., whilst six months' drafts are quoted  $2\frac{3}{8}$  per cent. The Bank Return, issued yesterday, shows a further contraction in the circulation of notes and coin, and the reserve is 342,000*l.* higher at 24,115,000*l.*; its proportion to the current liabilities has risen  $1\frac{1}{2}$  to  $48\frac{3}{4}$  per cent. The public deposits are 394,000*l.* higher owing to revenue collections, and there has been a further decline of 876,000*l.* in the "other securities," the continued decrease in which is arousing some attention in Lombard-street. The private deposits are 882,000*l.* lower on balance, and have been reduced by more than  $4\frac{1}{2}$  millions during the current month. During the same period the "other securities" have declined by nearly  $3\frac{1}{2}$  millions. The only bullion movement since the issue of the Return has been the sale of 25,000*l.* in French gold coin.

Silver bars are now quoted at 27 13-16*d.* per oz., being 7-16*d.* higher on the week. A year ago the price was 23*d.*

Eastern exchanges are telegraphed as follows:—Bombay, 1*s.* 3*d.*; Calcutta, 1*s.* 3*d.*; Hong Kong, 1*s.* 11*d.*; Shanghai, 2*s.* 8*d.*; Singapore, 1*s.* 11*d.*

The premium on gold at Buenos Ayres has fallen during the week from 164.80 to 162.00 per cent., making the paper dollar (nominally worth 4*s.* 2*d.*) now actually worth 1*s.* 6-17*d.* A year ago the premium was 186 per cent., and the value of the paper dollar 1*s.* 5-60*d.*

The Valparaiso 90-day exchange comes over to-day at 14*d.*, a rise of  $\frac{1}{4}$ *d.* on the week. A year ago it was 17*d.*

The Rio de Janeiro exchange on London is 7 13-32*d.*, being 3-32*d.* higher on the week. A year ago it was 8*d.*

The Bankers' Clearing-house return for the week ending August 24th, 1898, shows a total of 121,718,000*l.*, as compared with 123,784,000*l.* for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£35,065,342	£36,224,839
Total Reserve .....	£24,114,502	£25,390,609
Proportion of Reserve to Liabilities...	48 <i>½</i> per cent.	54 <i>½</i> per cent.
Notes in Circulation .....	£27,750,840	£27,634,230
Bank Rate of Discount .....	2 <i>½</i> per cent.	2 per cent.
Open Market ditto .....	1 <i>½</i> per cent.	1 <i>½</i> per cent.
Consols (account) .....	110 <i>½</i>	112 <i>½</i>
French Rentes (account) .....	103 <i>f.</i> 75 <i>c.</i>	104 <i>f.</i> 65 <i>c.</i>
Paris Cheque Exchange .....	25 <i>f.</i> 23 <i>c.</i>	25 <i>f.</i> 17 <i>c.</i>
New York 60 days ditto .....	\$483 <i>½</i>	\$483 <i>½</i>

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>			Denver & Rio Grande Com.	$\frac{1}{4}$	—

The STOCK MARKETS still present a listless appearance, but are moderately firm in tone. British Railway stocks have been dealt in to a very small extent, being quite out of fashion for the moment. They were somewhat irregular to-day, and the same may be said of their movements on the week. The fall in Barry stocks (14 in the ordinary and 12 in the deferred) is not really so heavy as it looks, these stocks being now quoted "ex-new," the rights to which are worth about 10 points. Yankee Rails have experienced some irregularity during the week, but closed firm to-day at a general rise. The run has been principally on Northern and Union Pacifics. Generally speaking, American Rails are now far beyond their intrinsic value; nevertheless, if history

repeats itself, they will be put much higher during the next year or so, in order that the great reorganisation houses may get rid of their immense load of assessment securities. When they have done this, money supplies will be stopped, the divisions of the leading companies curtailed, those of the weaker lot suspended, loans will be called in, pressure put on the companies, and once more the great reconstruction game will be played. In the meantime the public is forgetting the past, hoping for better things in the future, and buying at fancy prices rotten shares, on which it will later on be called upon to pay heavy assessments. But, as we have already said, there is a big rise in these stocks yet for those who wish to gamble in them. Canadian Rails are rather better, bears having closed big lines of stock in anticipation of the approaching settlement. The traffic returns issued this week were better than most people expected, and another favourable influence has been the rumour that the Canadian differential rate question was to be submitted to arbitration—a rather improbable contingency, it is to be feared. Amongst Foreign Railway stocks to-day a feature was the continued rise in Argentines, Central Argentines putting on  $2\frac{1}{2}$ , Buenos Ayres and Rosario  $1\frac{1}{2}$ , and several others a point or so. On the other hand, the fall in Antofagasta and Bolivia made further progress, and the drop on the week is now 3 points. Nor is the fall likely to stop here. Manila debentures, to which we have recently directed attention, show a further substantial improvement, the old sixes being up 2, the A prior liens 3, and the B's 2. We still recommend their purchase. The 10% preference shares have also been marked up from  $\frac{7}{8}$  to 1, but whether in ignorance or by design we cannot say. The point, is, however, immaterial, as the books have been closed for two or three years, and no transfers are passed by the company. Costa Rica shares are firm, and the second debentures are up a further point to-day. Mexican issues, after being very active, relapsed into quietude to-day, but a further early rise is not improbable. Nitrate Railway debentures have shed a couple of points, but the shares are held up by rumours of a coming financial operation on the lines set forth in this journal many months ago. The further fall of 6 points in Royal Trans-African bonds looks ominous, but it is only fair to say that the coupons have been paid with scrupulous regularity ever since their issue, now some years ago. Amongst other movements of the week may be mentioned a rise of 2 in Buenos Ayres and Pacific debenture stocks, 2 in Central Argentine debenture stock,  $3\frac{1}{2}$  in Conde D'Eu debentures, 2 in Interoceanic of Mexico first debenture stock, 2 in Rio Claro Sao Paulo debenture stock, 2 in Southern Brazilian debenture stock, 2 in United of Havana debenture stock, 3 in ditto A, 2 in ditto 5 per cent. bonds, and 2 in Western of Havana bonds, and a fall of 4 in Buenos Ayres and Valparaiso B debenture stock, 2 in Arauco second debentures, and 2 in Western of Santa Fé bonds.

The Stock Exchange Committee has ordered the undermentioned securities to be quoted in the Official List:—Dominion Atlantic Railway Company—further issue of 150,000*l.* 4 per cent. second debenture stock; Leopoldina Railway Company (Limited)—1,146,850*l.* 4 per cent. debenture stock.

Application has been made to the Stock Exchange Committee to allow the following securities to be quoted in the Official List:—Cardiff Railway Company—500,000*l.* preferred ordinary stock of 1896, in lieu of the scrip now quoted.

The death is announced of Mr. F. C. Wildman, of the Stock Exchange, sole partner in the firm of Messrs. Chappell and Wildman, jobbers in the Grand Trunk market. The death is also announced of Mr. Charles Augustus Murton, head of the firm of Messrs. C. A. Murton and Sons, the well-known stockbrokers.

Mr. A. S. J. Hurrell, formerly a member of a well known firm of brokers, but lately a jobber in the South African mining market, committed suicide on Wednesday.

Messrs. Thackeray and Co., of Cardiff, under date August 25th, report as follows:—Barry undivided, 250*xn* (a fall of  $7\frac{1}{2}$ ); ditto

preferred, 121 (a fall of 1); ditto deferred, 134*xn* (a fall of  $8\frac{1}{2}$ ); Cardiff preferred, 113 (a rise of  $\frac{1}{2}$ ); Port Talbot ordinary, 9 (unchanged); Rhondda and Swansea Bay, 4 (unchanged); Rhymney undivided, 262 $\frac{1}{2}$  (unchanged); ditto preferred, 122 (unchanged); ditto deferred, 141 (unchanged); Taff Vale, 79 (a rise of  $\frac{1}{2}$ ); Vale of Glamorgan, 126 (unchanged). The unexpectedly low price at which Barry allotments opened had a depressing effect upon the quotations for undivided and deferred. A fair business has, however, taken place in the latter and also in the allotments, which close strong about 33 to 35 additional premium. A fair business has taken place in Taffs at 78 $\frac{1}{2}$  and 79.

### EARNINGS OF RAILWAY SERVANTS.

A number of the more important railway companies have furnished returns to the Board of Trade showing the total number employed in the coaching, goods, locomotive, and engineers' departments, and the total amount of wages paid to those workpeople in the first week of December, 1896 and 1897 respectively, the intention being to indicate the total effect of all changes in the wages of railway servants, whether arising out of (1) real changes in the scale of pay, (2) ordinary advances under existing scales, (3) overtime or short time. The seventeen companies making returns employ nearly 90 per cent. of all the railway servants in the United Kingdom, and the results may be regarded as fairly representative. The returns for 1897 have been grouped together in the following table, the figures being those applicable to the first week in December:—

District.	No. of Workmen employed.	Amount of Wages. <i>£</i>	Average. <i>s. d.</i>
England and Wales (12 companies)	327,269	407,338	24 10 $\frac{1}{2}$
Scotland (3 companies)	39,676	44,593	22 5 $\frac{1}{2}$
Ireland (2 companies)	7,202	8,074	23 5
Total for 17 companies	374,147	460,005	24 7

The changes brought out by this method are changes in earnings rather than in rates of wages, and in this respect the changes shown differ from those collected by the department with regard to other occupations. Taking, however, the figures as they are, it appears that the general average wage for all the seventeen railways has risen in the year from 24*s.* 2 $\frac{1}{2}$ *d.* to 24*s.* 7*d.*—a rise of  $4\frac{1}{2}$ *d.* per head, or about 6,328*l.* a week, computed on the basis of the number employed in December, 1896. It may be observed that the numbers employed have gone up from 357,359 to 374,147, and this increase of 16,788 in the numbers employed probably to some extent disguises the real advance in rates of wages that has taken place, the large influx at the minimum rate tending to counteract the effect of the increases in rates of pay, on the average earnings of the whole number employed. The average wage for Scottish railway servants is less than that for English by about 2*s.* per week, and also shows some decline between 1896 and 1897. The returns from two Irish companies yield an average of 22*s.* 1 $\frac{1}{2}$ *d.* a week in 1896 and 22*s.* 5*d.* in 1897, amounts which correspond very closely with those paid by the three Scottish companies.

### NEW COMPANIES AND NEW ISSUES.

[Applications for shares in limited liability companies may be withdrawn by letter—or by telegram, if confirmed by letter—provided the notice of withdrawal reaches the secretary before the shares are allotted.]

SIR JOHN JACKSON, LIMITED.

Sir John Jackson, contractor, of Westminster, has transferred his business to a company registered under the title of "Sir John Jackson, Limited," with a capital of 1,000,000*l.* sterling. No part has been offered to the public, as the change has been made purely as a matter of convenience, and for family reasons, the management remaining with Sir John Jackson as before, who personally retains over 90 per cent. of the capital.

EASTERN RAILWAY CONSTRUCTION SYNDICATE, LIMITED.

This is the title of a company which has just been formed, with a capital of 3,600*l.* in 1*l.* shares, to construct and maintain rail and tram roads, wharves, docks, piers, warehouses, canals, gas, electric light, and irrigation works, &c., and telegraph and telephone systems, and to lay out land for building purposes. Registered by Renshaw and Co., 2, Suffolk-lane, E.C.

NOTTINGHAM WAGON COMPANY, LIMITED.

This is the title of a company which has just been formed with a capital of 20,000*l.* in 10*l.* shares, to purchase, provide, make, and repair, lend or lease, and otherwise profitably put to use, sell, or dispose of carriages or wagons to be employed on rail or tram ways. Table A mainly applies. Registered by Ward and Co., 85, Gracechurch-street, E.C.

A Reuter's telegram from Pretoria says that a further list has been published of members of the Volksraad and others who accepted gifts in connection with the Selati Railway concession.

# American & Canadian Railways.

## THE CHESAPEAKE AND OHIO.

The accounts of this company for the year ending June 30th have been issued, and show the following principal features:—

	1896-7.	1897-8.
Passenger earnings.....	\$1,857,898 ..	\$1,954,864
Freight earnings.....	8,389,374 ..	9,262,998
Miscellaneous .....	466,911 ..	580,695
<b>Total gross earnings .....</b>	<b>\$10,708,183</b>	<b>\$11,798,557</b>
Expenses and taxes .....	7,286,769 ..	7,982,307
<b>Net earnings .....</b>	<b>\$3,421,414</b>	<b>\$3,806,250</b>
Sundry credits .....	79,326 ..	83,628
<b>Total net income .....</b>	<b>\$3,500,740</b>	<b>\$3,889,878</b>
Rentals, discount, interest, &c. ....	3,362,834 ..	3,271,368
<b>Balance—surplus .....</b>	<b>\$137,906</b>	<b>\$618,510</b>

The number of passengers carried in 1897-8 was 1,925,502 (against 1,798,122 in 1896-7); average rate per passenger per mile, 1·94 cents (against 1·98 cents); quantity of freight carried, 7,806,914 tons (against 6,491,297 tons); average rate per ton per mile, 0·370 cent (against 0·419 cent); ratio of expenses to receipts, 80 per cent. (against 68 per cent.); length of line operated, 1,360 miles (against 1,360 miles).

The balance-sheet shows a share capital of \$60,547,400, and a funded debt of \$65,564,554. Of the share capital \$60,498,100 is common stock, \$26,000 second preferred stock, and \$23,300 first preferred stock.

Mr. M. E. Ingalls, the president, in his report, dated July 29th, 1893, remarks:—"The company earned from its line between Lexington and Louisville, operated under trackage contract, \$304,244, at an expense, including rents, interest, &c., of \$292,433, leaving a net profit from this line of \$11,810. The operations of the last year on this line have demonstrated the judgment of your directors that it would be a profitable contract for the company. Hereafter these earnings and expenses will be included in the general statements of the company. The gross earnings of the company for the year just ended are the greatest in its history, exceeding by more than a million dollars the largest previous earnings. All classes of traffic show an increase, but that of freight is the most. The passenger earnings show a slight increase received from each passenger per mile; but there is an increase in the number of passengers, and the passenger trains show a gratifying gain in the earnings per mile, being for the year just ended 92·5 cents, as against 87·7 cents the previous year. The tons of freight carried one mile show the very large increase of 25 per cent.; the rate per ton per mile, however, decreased from 4·19 mills to 3·70 mills, a remarkably low average, due to the increase in the lower class of freights and to the excessive competition in the coal traffic; the seaboard rate per ton per mile on the latter traffic dropping to 2·59 mills, from 2·97 mills last year. It is also gratifying to state that all expenditures made during the past year, including those for additions and betterments, have been charged to operating expenses, and no additions have been made to construction account during this period. It is very gratifying to be able to show that, after entering up every charge against the company, charging off loss on the grain elevator of \$20,352 and \$44,420 of bad debts, there is still a net profit to carry to profit and loss of \$618,509; this, too, in a year of probably the greatest demoralisation of rates that has ever been known. Since June 1st various meetings have been held to devise measures to secure the maintenance of tariffs, and the outlook for the coming year appears to be that, while there will be no great advance, there will be a more steady adherence to tariffs than for the year just closed. A very slight increase upon the immense tonnage carried by your company will produce marvellous net results. Your directors have continued the system inaugurated last year of having the accounts of the company examined and verified by Messrs. Patterson and Corwin, certified public accountants, of New York City, who are especially familiar with such work."

## LATEST EARNINGS.

Third week of August.—Denver and Rio Grande, \$168,000—  
increase, \$17,000; Texas and Pacific, \$120,000—decrease, \$3,000;  
Wabash, \$290,000—increase, \$5,000; Baltimore and Ohio South  
Western, \$143,000—increase, \$10,000; Chesapeake and Ohio,  
\$259,000—increase, \$34,000; Chicago Great Western, \$125,000—  
increase, \$7,000; Mexican Central, \$226,000—increase, \$9,000;  
Missouri Kansas and Texas, \$210,000—decrease, \$13,000; Missouri  
Pacific, \$493,000—decrease, \$41,000; New York Ontario and  
Western, \$82,000—decrease \$7,000; Chicago Milwaukee and St.

Paul, \$653,000—increase, \$33,000; Kansas City Pittsburgh and  
Gulf, \$72,000, same as last year.

Second week of August.—Cleveland Cincinnati Chicago and  
St. Louis, \$279,000—increase, \$2,000; Norfolk and Western,  
\$227,000—decrease, \$34,000; Northern Pacific, \$421,000—  
increase, \$17,000; Oregon Railroad and Navigation, \$128,000—  
increase, \$8,000; St. Louis and San Francisco, \$127,000—  
decrease, \$3,000; Louisville and Nashville, \$384,000—decrease,  
\$17,000; St. Louis South Western, \$86,000—increase, \$4,000;  
Southern Railway, \$443,000—increase, \$47,000. The gross  
earnings of 52 roads in the second week of August show an  
increase of 1·84 per cent.

Month of July.—Chicago and North Western, gross,  
\$2,819,000—decrease, \$125,000. Southern Railway, gross,  
\$1,971,000—increase, \$363,000; net, \$539,000—increase, \$143,000.  
Tennessee Coal, Iron, and Railroad, net, \$50,000—increase,  
\$13,000. Baltimore and Ohio, gross, \$2,306,000—increase,  
\$126,000. Chicago Milwaukee and St. Paul, gross, \$2,535,000—  
decrease, \$178,000; net, \$883,000—decrease, \$67,000. Northern  
Central, gross, \$531,000—decrease, \$17,000; net, \$183,000—  
increase, \$17,000.

Month of June.—Qu'Appelle Long Lake and Saskatchewan  
Railway, net loss, \$6,700, as against \$700 for the corresponding  
period.

## RAILROAD NOTES.

The reorganisation managers of the Baltimore and Ohio Rail-  
road Company notify holders of Mercantile Trust Company's  
certificates of deposit or receipts for first preferred stock, second  
preferred stock, and common stock of the Baltimore and Ohio  
Railroad Company that they now call for payment of the second  
instalment, being 50 per cent. of the cash payment of \$2 per  
share of the first preferred stock deposited, and for 50 per cent.  
of the cash payment of \$20 per share of the second preferred and  
common stock deposited, which must be made at the Mercantile  
Trust Company, New York, or at the rate of 49 7-16d. per dollar,  
at the London and Westminster Bank, Limited, London, on or  
before September 9th next.

At a meeting held at Denver on Wednesday the representa-  
tives of the transcontinental lines of the United States dis-  
cussed Canadian differentials, and the general traffic manager of  
the Canadian Pacific admitted it was agreed to submit the  
transcontinental freight rates to a board of arbitration composed  
of three members, the Canadian Pacific to select one. It was the  
unanimous opinion of those engaged at the conference that the  
freight rates would soon be placed on a lasting basis, and that  
the passenger rates would also be made uniform.

The report of the Southern Railway for the year ended June  
30th shows:—Gross earnings, \$21,095,000—increase, \$2,016,000;  
net earnings, \$6,594,000—increase, \$748,000; net income from all  
sources, \$6,942,000—increase, \$809,000; surplus over charges,  
\$1,007,000—increase, \$561,000. The balance at the credit of the  
income account, after paying the dividend, is \$1,455,000, against  
\$1,139,000 last year. The company has no floating debt, and a  
substantial surplus of current assets over current liabilities.

It is reported that the Pennsylvania and the New York  
Central have decided to withdraw their limited express trains  
between New York and Chicago, so as to give the other roads no  
basis for claiming differentials. An official of the Atchison says  
that no date has yet been fixed for opening the new trans-Pacific  
steamship lines. The Atchison's vice-president of the treasury is  
in England for the purpose of purchasing two fast freight  
passenger steamers for the service.

The report of the Denver and Rio Grande for the year ended  
June 30th shows:—Gross earnings, \$8,343,000—increase,  
\$1,398,000; net earnings, \$3,325,000—increase, \$455,000; surplus  
to profit and loss account, after payment of the dividend, charges,  
and the renewal fund, \$257,000. This compares with a surplus  
of \$31,198 in 1896-7 and \$218,390 in 1895-6. In 1894-5 the surplus  
was \$528,690, but no distribution took place.

The Great Northern Railway Company has issued a circular  
informing the stockholders that the annual meeting will consider  
the question of an increase of capital stock to acquire the St.  
Paul Minneapolis and Manitoba, with a view to consolidating  
the properties of the two companies. The exchange, it is under-  
stood, is to be effected on the basis of 5 Great Northern preferred  
for 4 Manitoba.

It is understood that the contemplated deal of the Cleveland  
Cincinnati Chicago and St. Louis Railway is to be abandoned for

the present, owing to the refusal of Mr. Samuel Thomas to extend Mr. J. P. Morgan's options on the Chicago Indianapolis and Louisville and the Cincinnati Hamilton and Dayton railways.

According to the *Chicago Railway Age*, the Canadian Pacific Railway proposes to build a line from Brantford to Woodstock, Ontario. Surveys have been made and construction is to begin the end of this month. The branch will be known as the Brantford and Woodstock Railway.

For the quarter ended June 30th the Lake Shore and Michigan Southern shows:—Gross, \$4,909,000—increase, \$30,000; net, \$1,619,000—decrease, \$139,000; total net income, \$1,716,000—decrease, \$60,000; net surplus, \$735,000—increase, \$12,000.

Last week's east-bound all-rail freight tonnage from Chicago amounted to 55,000 tons, the Lake Shore Road leading with 9,000 tons. For the corresponding week last year the total was 57,000 tons.

The Baltimore and Ohio South Western will probably be reorganised when the Baltimore and Ohio plan has been successfully engineered through. The physical condition of the line is very bad.

It is rumoured that an important house having a considerable holding in Union Pacific is pressing for the payment of the full dividend of 4 per cent. on the preferred stock in October.

The Rio Grande Western has declared a dividend of 2 per cent. on its common stock, payable in preferred stock.

## General News.

### DRY ROT ON THE EAST INDIAN RAILWAY.

A correspondent of *Indian Engineering* writes:—The present dry rot which has set in with regard to the way the East Indian Railway Company is working its coal traffic is a pitiful sight, and humiliating to a railway that prides itself as the best worked line in India. Of late things have come to such a pass that unless the officers responsible for the working of the line rise to the occasion, the coal trade, which has already suffered through their fault, will still further have to bear losses greater and more far-reaching than the public imagine. The present excuse put forward by the East Indian Railway is that an unprecedented traffic has been flowing in from the collieries which has exhausted their limited rolling stock. *Hinc illae lachrymae*. The Mining Association and the Bengal Chamber of Commerce have also had their shot at the East Indian Railway by urging them to expedite the arrival of the new rolling stock that has been so long promised. Now to those who know more about the working of this railway, the cry for new rolling stock, and granting the new rolling stock to be available, will not improve the situation; but, on the contrary, make matters worse; for if this railway cannot cope with their present rolling stock and get the full amount of work out of each wagon, it is not likely they will do any better when the number of trains is increased by the advent of new wagons. Before the present lamentable state of affairs can be rectified, the whole system of working the heavy coal traffic from Asansol to Howrah and the Kidderpore Docks must be revised, and no one knows this better than the railway officials themselves. The present system in vogue on this line in dealing with the mineral traffic is antiquated in the extreme, and might have done in years gone by, but things have altered since then. If the whole system of mineral traffic was revised the East Indian Railway would find that their present rolling stock was quite sufficient to cope with the traffic given them by the collieries. The number of hours it takes for a coal train to reach either Howrah or Kidderpore is a disgrace, and we know of cases where coal trains have taken as many as twenty to thirty hours doing the journey of a little over 130 miles! The old saying that time is money is very appropriate here. Allowing for smart working a coal train should not take more than nine to ten hours the most in reaching its destination. If the East Indian Railway saw their way to do this they would find that not only would there be no block, but that there would be sufficient wagons in hand to supply all the colliery wants. The blame lies with those who still persist in the present antiquated system, and if a radical change was made at some of the small stations between Asansol and Howrah that are run solely by a native staff, and the natives replaced by a European element, a decided improvement would be shown. The way some of the native stationmasters dawdle away the time, detain trains in sidings

for hours, to allow other more important trains to pass through, which would not have been the case if the gentle baboo knew how to count and use judgment, is patent to all railway men. I could give instances where a whole set of coal trains have been blocked for hours just because the native stationmaster was devoid of judgment. This biped thinks he has done his duty when a train gets clear out of his station. He is not particular if trains are kept outside signals for an hour or so, while he smokes his hookah or lazily looks after the shunting of some other train, which with him takes about twice the time it would take if there had been an efficient man at the head of affairs in the station. If the East Indian Railway would look after the minutes the hours would take care of themselves, and I feel sure if a radical change was made at some of the little stations managed solely by natives, not only would the traffic be passed through quicker, but we would not hear of the scarcity of wagons so much as we do at present. It is the subordinate executive of the East Indian Railway that is causing all the present trouble, and I am surprised the superior officers have not seen this long ago. The old saying of "penny wise and pound foolish" is very applicable in this case, as the East Indian Railway at present are losing thousands of tons of traffic and not getting the same amount of work out of their rolling stock which they could get if they had superior and better-paid men at some of the small stations—men who would pay for their entire salaries over and over again by more expeditious work. The niggardliness of this railway is proverbial, and to-day they are reaping the fruits of their niggardliness.

### THE CONGO RAILWAY.

The *Chicago Railway Age* has some interesting references to the Congo Railway, which was opened for traffic on May 1st, and is understood to be now earning about 500,000f. per month. The length of the line is 898 kilometres, and it has cost with equipment about 155,000f. per kilometre. The *Railway Age* says:—"The fare over the whole length of the line is about \$95 for whites and one-tenth as much for blacks. As there are very few whites there, and many of these entitled to passes, and as the blacks very rarely have a dollar, the passenger earnings may not be great, in spite of the high fares. The freight rate up the road is \$18.90 per 100 kilos—\$8.60 per 100lbs., 71 cents per ton per mile. Down stream these rates vary with the kinds of freight, ivory taking the above rate on up freight, while India rubber will be taken for \$3.64 per 100lbs. There are three trains carrying passengers weekly; they take two days to make the 241 miles, but do not run at night, the passengers staying over night at the half-way station. The equipment consists of fifty-six locomotives, fifteen passenger cars, and 208 freight cars—an extraordinary proportion of locomotives. It will be remembered that this railroad was built to pass the rapids of the Congo, and that above it there is a vast extent of navigable river, so that a very small amount of shipments in proportion to area may easily make a large amount for the railroad to carry. How long it will take to develop a traffic remains to be seen. When the company was formed in 1889 it received its charter from the 'Congo Free State,' which had neither money nor credit, but it reserved authority to acquire the railroad from the corporation. Belgian, German, and English capitalists (and, we believe, at least one American) subscribed 15,000,000f. to the enterprise on condition that the Belgian Government subscribed 10,000,000f. for 3½ per cent. shares. The individual stockholders received for their 15,000,000f. 7 per cent. shares for that amount and besides 4,800 'founders' shares.' The 7 per cent. shares were entitled to one-half of the surplus profits and the founders' shares to the other half. It was not long before the 25,000,000f. so raised was all spent and the railroad only fairly begun. Then the Belgian Government, to save the enterprise, subscribed 5,000,000f. more and guaranteed an issue of 20,000,000f. of bonds, on condition that it should have the right to acquire the railroad. Now the 'founders' shares,' which, if Belgium should exercise its right, would be worth nothing, have been selling for as much as 2,000 francs. The road has just been completed, and the company now asks the two Governments to agree not to exercise their right of purchase before 1909. The Congo Free State, which has not invested a franc in the enterprise, agrees to do this on consideration of receiving 20 per cent. of the surplus profits. Belgium, by whose money and credit the road has been built, is said to be likely to agree without any consideration. Besides its advances to the railroad Belgium has advanced 25,000,000 francs to the Congo Free State itself, and it must decide in 1900 whether it will require the repayment of these advances or take the Congo State as a colony, which latter is not likely to be permitted by the Belgian people, who, strange to say, are not eager to acquire a colony to sink money in. But the Congo Free State has no means to pay the advances, and it is thought that

an 'extension' will be granted, and probably some further advances to keep the State going. Altogether the Congo Railroad seems to be about as effective as an interoceanic canal, and the Congo Free State almost equal to an island 'dependency' as an absorber of money from taxpayers and its distribution among 'promoters' and patriotic extenders of 'spheres of influence.'

### THE ANTOFAGASTA RAILWAY OUTLOOK.

In the early part of the year the shareholders of the Antofagasta (Chili) and Bolivia Railway Company were warned in the *Pall-Mall Gazette* of the dangers involved by the precarious position of their lessee, the Huanchaca Company. The accounts of the latter for 1897, recently to hand from Valparaiso, show a loss of \$1,300,000, and an empty till; the company is heavily in debt to Messrs. Schroder, and as further borrowing is altogether out of the question in the present state of affairs in Chili, a climax must soon be reached. The Antofagasta Railway, 43 per cent. of whose receipts were derived from Huanchaca last year, is suffering severely from the inability of the mine to produce silver ore of sufficient richness to bear cost of carriage to Playa Blanca, and under existing circumstances there is unfortunately little prospect of a resumption of that traffic. The total receipts, which in the first four months of 1898 were only \$164,000 less than in 1897, now show a decrease of \$420,000; the aggregate to July 31st being \$2,790,000, against \$3,210,000, and at last month's rate the shortage will by the end of the year reach \$1,200,000. When to this is added a heavy loss through the fall in exchange (now 13½d., against 17½d. in last year's accounts) it will be seen that the dividend prospects for holders of Antofagasta ordinary stock are anything but cheerful.—*Pall-Mall Gazette*.

### THE SIMPLON TUNNEL.

The work of constructing the tunnel through the Simplon was inaugurated last week both on the Italian and Swiss sides. It will be the longest in the world, and one of the most important, as it will put the Mediterranean (through the port of Genoa) in direct communication with West and Central Switzerland and with Central Europe. It is likely to be a great rival of the Mont Cenis and St. Gothard routes. The Simplon tunnel will be 12½ miles long, while the Mont Cenis is only about 8 miles, and the St. Gothard a little over 9. The opening of the tunnel on the Swiss side will be near Brigue, at 680 metres above the level of the sea, and on the Italian side, near Iselle at 750 metres above datum. This great engineering feat will, in reality, consist of tunnels, one for the railway and one for ventilation, connected by galleries. The work is being conducted at the expense of the Italian and Swiss Governments, and will cost about 3,000,000*l*. It will take nearly five years and a half to complete. The hydraulic power for this gigantic undertaking will be obtained on the Swiss side from the Rhone, which will supply from 1,180 to 2,360 horsepower, and on the Italian side from the Cairasca river, which will give 2,260 horse-power. The hygienic precautions for the benefit of the great number of working men to be employed are practically perfect. Each man, before being engaged, will be required to "pass the doctor," and there will be periodical examinations to ensure that no one is suffering from contagious disease. The huts of the employés will also be carefully inspected with a view to their proper sanitation. Each workman will wear a special dress in working hours, after which he will be obliged to take a bath. Thus it is hoped that the perfect health of the operating staff will be secured. The North Italian Press strongly favours the scheme of uniting the Simplon and the St. Gothard systems by a junction line between Locarno and Pallanza.

### MR. RHODES' AFRICAN RAILWAY PROJECTS.

With reference to an interview which is reported to have taken place between Sir Michael H. Beach and Dr. Rutherford Harris, the latter, seen by the Kimberley representative of the *Daily Telegraph*, said he presumed the statement referred to a conversation between Sir Michael, Mr. Rhodes, and the Duke of Abercorn, and not with himself, but he took the opportunity of making a fresh point in reference to the Lake Tanganyika scheme. The Mafeking-Bulawayo Railway's existing capital is 2,000,000*l*., with 5 per cent. debentures which involve an annual charge of 100,000*l*. Not only do the company's profits exceed this charge, but they give a handsome profit to the ordinary shareholders beside. Hence it is beyond question that the Central African traffic is capable of supporting such a debt as 100,000*l*. annually. To complete the line to Lake Tanganyika requires a further 2,000,000*l*. at least. If Imperial credit were given for a conversion of the existing 2,000,000*l*. 5 per cent. debentures into 2½ per cents., and Imperial credit were also given for the raising of the second 2,000,000*l*. aforesaid, the total annual charges on the

4,000,000*l*. would only amount to 100,000*l*. The existing line not only pays this sum, but earns dividends besides. Thus the Imperial credit would not only risk nothing, but would secure to British trade 4,000 miles of the African continent, in more than half of which there is provision by statutory enactment for preference to British goods, and against a high tariff. The Treasury has already agreed to give an annual subsidy of 20,000*l*. for ten years, and the company would thus free the Imperial Government from this obligation. The result would be a net gain to the Treasury of 200,000*l*., and, in addition, the Imperial Government would receive 12½ per cent. upon all profits.

### CIVIL SERVANTS AND THE CHEAP TRAINS ACT.

A combined effort is being made on the part of the London Post-office employés and other Civil servants whose hours of duty require their attendance at their respective offices very early in the morning to induce the several railway companies to run a more convenient and cheaper service of trains. Mr. Robert W. Farrell, a member of the Sorting Department, who is taking a leading part in the agitation, has been in communication with the Board of Trade and the railway companies, and, from his report to the men, it appears that the greatest difficulty has been experienced with the London Brighton and South Coast Railway Company. It is alleged in the report in question that with one notable exception (Great Eastern Railway) the provisions of the Cheap Trains Act, 1883, have not been complied with, although the companies have had full advantage of the remission of the passenger duty without giving in return that ample service of cheap trains which Parliament intended. After several interviews and much correspondence on the question with the Government authorities and the railway companies, Mr. Farrell has received the following communication:—"Board of Trade (Railway Department), 7, Whitehall-gardens, London, S.W. Sir—Referring to previous correspondence on the subject of an earlier train service on the London Brighton and South Coast Railway, I am directed by the Board of Trade to state that the company have informed this Department that they elect that an inquiry shall be held before the Railway Commissioners, as provided for by sub-section 4 of clause 3 of the Cheap Trains Act, 1883.—I am, Sir, your obedient servant, T. H. W. PELHAM." According to present arrangement the inquiry will take place early in the autumn in the Railway Commission Court at the Royal Courts of Justice, but efforts are being made by the work-people concerned to have it held in one of the localities principally affected in order to get a full force of witnesses to come forward and give evidence.

### COMRIE AND LOCHEARNHEAD RAILWAY.

The Bill for the extension of the railway from Comrie to Lochearnhead received the approval of Parliament over a year ago, after, it may be remembered, a remarkable course of procedure in the House of Commons, where the Bill, having passed the preliminary stages, was recommitted, in order to hear evidence with regard to the likelihood of its destroying the scenery of the district through which the line is to pass. After various negotiations—financial and otherwise—it has now been definitely resolved to proceed with the construction of the railway early next spring, and the first sod will likely be cut about the month of February. The line will be a little over 15 miles in length, and will start from the present terminus of the Crieff and Comrie Railway at Comrie. It will then cross the main thoroughfare of the village by a high-level bridge, and afterwards cross the river Earn four times ere it reaches the beautifully situated village of St. Fillans, where there will be a station. The line is continued onwards by the back or north side of the village and along the north side of Loch Earn to Lochearnhead, where another station will be placed. The line will then run southwards for 2 miles or so almost parallel with the Callender and Oban Railway to near Lochearnhead Station on that railway, with which it will connect, and thus a complete and direct railway system will be established between Dundee on the east and Oban on the west—from the German Ocean to the Atlantic.

### RAILWAYS IN THE BALKANS.

Reuter's correspondent at Constantinople, writing under date 17th inst., says:—"M. Novakovitch, the Serbian Minister, presented to the Porte on Saturday last a scheme for the construction of a railway from Scutari, in Albania, to a point on the Serbian frontier to be subsequently agreed upon. The proposed line will meet an extension of the railway which is being built conjointly by the Serbian and Roumanian Governments, and with which considerable progress has been made. Starting from Nish, it crosses the frontier at Gladova, and after traversing the whole of Roumania joins the South Russian system. The

Servian Government will assist the Turkish Government in the construction of the proposed line from Scutari, and, should the project be carried into effect, the Black Sea will be united by rail to the Adriatic. The Servians suggest that the most favourable route for the Scutari line would be from San Giovanni di Medua along the valley of the Drin. The application for the construction of this line is, no doubt, intended as a set-off for the Bulgarian Railway, which is to enter the Sandjak of Uskub from Kustendil, joining the Salonika line at Kumanovo, thus establishing direct communication between Sofia and Salonika independent of the Servian line *via* Nish."

### FALSE ECONOMIES IN WOOD-PAVING.

The relaying of the Strand with Baltic deal blocks, which is now taking place, naturally suggests the question, Why is not jarrah used instead? Our local authorities are extremely slow to realise the superiority of this wood for the purpose in question, but no doubt they will in time awake to a realisation of its merits. The price of hardwood blocks in London, per thousand, ranges from 9*l.* 5*s.* to 10*l.* 15*s.* for 4in. blocks, and from 12*l.* to 13*l.* for 5in. blocks. Taking the first cost and expense of renewals, hardwood pavement, including excavations and foundations, costs from 13*s.* 7*d.* to 16*s.* 6*d.* per yard. Without foundations the cost is from 10*s.* 6*d.* to 12*s.* 9*d.* per yard. Undoubtedly, the first cost of hardwood is greater than that of creosoted Baltic deal, the expense of which, without foundations, is 6*s.* 9*d.* per superficial yard. The point is, however, that jarrah lasts so much longer than deal, and is therefore cheaper, as the renewals are less frequent. Tests made in St. Pancras show that, under like conditions, jarrah wore one-eighth of an inch and yellow deal three-quarters of an inch, in a given time; or, in other words, the deal wore away six times as fast as the Westralian wood just named. In the Strand, where the traffic is so much heavier, the soft wood was found to wear away five times as fast as jarrah. Now, taking the middle figure of the cost of relaying the Australian wood without foundations at 11*s.* 6*d.* per yard, and comparing it with the similar work with creosoted Baltic deal at 6*s.* 9*d.*, it will be seen that the expense of laying down the former is considerably more than that of putting down the latter, but that the former lasts at least five times as long. Therefore the cost of deal is really between two and three times as much as that of jarrah. In all these calculations, however, an important factor is omitted, and that is the inconvenience to which the public are put when a street is "up," and the loss of trade sustained by the shopkeepers through vehicular traffic being suspended. This consideration may not influence the members of a vestry or board of works, who are popularly supposed to enjoy inconveniencing people in such a way, but it will appeal to the public. What will appeal to the latter even more is the greater cheapness of jarrah when the relative lengths of life of the two woods are compared. Jarrah is not now the unknown material, so far as street paving is concerned, which it was some years ago, and, although it is said that it has not been in use sufficiently long to enable an accurate judgment to be formed as to its durability under varying conditions, that very fact is proof it lasts a great while. If it wore out sooner more would be known of its lasting, or non-lasting, powers. It has, at any rate, been employed in London for several years. Lambeth, which is a larger user, has 120,000 yards laid down, and altogether there was said, a few months ago, to be 312,700 square yards of it in use in the principal London parishes. As the popularity of jarrah for wood-paving is fast growing, the area is now probably considerably larger.—*Colonial Goldfields Gazette*.

### RAILWAY HORSE-BOXES.

The risk which horses, especially nervous or vicious animals, incur travelling by rail is sufficiently great to impart considerable interest to the results of the trials in tethering which have now been in progress for a period of twelve months on the Midland Railway. The chief merit of the new system is that it makes it impossible for a restive animal to get its feet over the tie rope, an occurrence which is known to be the most frequent source of injury. In the new tethering apparatus, devised by Mr. Bartrum, there is a ring in front of the noseband of the head-stall, from which a rope passes through a slot cut in the partition over an adjustable pulley-wheel and attaches to a movable weight with spiral spring enclosed in a box. By this arrangement the horse, whilst perfectly secured, is to all intents and purposes "free," whilst the groom has complete control without the risk attending the entering of the horse-box proper in the case of a plunging and kicking animal. By raising or lowering the pulley-wheel the appliance can be adapted to horses of different heights. The simplicity of construction and the impossibility of getting out of order are other points in favour of the apparatus, which, moreover, is adaptable at small cost to horse-

boxes as at present designed. The Midland Railway Company, having tested the system in three of their horse-boxes, are now having twenty-five additional boxes fitted with the appliance. It is believed that a more extended use of the method will not only save endless trouble in tethering, but will add greatly to the safety of horses when travelling by rail.

### THE SUEZ CANAL.

Consul Cameron's annual report to the Foreign-office states that under the management of M. Tillier, C.M.G., Chef du Service de Transit, and of M. Quellenec, C.M.G., chief engineer, the work of widening the Suez Canal has been rapidly completed, and in May some hundreds of workmen were paid off. The average duration of the transit of the canal is now 15 hours 36 minutes, or 17 minutes less than in 1896. The average net tonnage of vessels using the canal and their average draught are steadily increasing. Last year, however, showed a decrease in their number, the total being 2,986 with a net tonnage of 7,899,373, as compared with 3,409 with a tonnage of 8,560,283 in 1896. The vessels last year included 2,103 merchant ships, 727 mail steamers, 112 war vessels and transports. By nationality 1,905 vessels were British, 325 German, 206 Dutch, 202 French, 78 Austrian, 71 Italian, 44 Russian, and 36 Japanese. A table of per-centages shows that of the total traffic (tons gross) through the canal there was under the British flag 70.8 in 1895, 66.9 in 1896, and 66.4 in 1897. The next largest per-centage of tonnage is under the German flag—viz., 8.3 in 1895, 9.3 in 1896, and 10.7 in 1897. In the third place are the vessels of France, whose gross tonnage was in 1895 as much as 8.5 per cent. of the whole, but fell to 6.8 in 1896, and 7.3 in 1897. The Dutch figures are—1895, 4.2 per cent.; 1896, 4.3; and 1897, 4.8. Last year the next two were—Austrian, 2.4, and Russian, 2.0 per cent.; all other nationalities are below 2 per cent. of the traffic. The Anglo-Indian trade now represents about half the traffic, but plague and famine have reduced the exports of wheat and rice, so that in two years the trade with India has fallen from 4,432,000 to 3,687,800 tons. The Australian drought also lessened the traffic. On the other hand, trade with the Far East *via* the canal rose from 2,403,100 tons in 1895 to 2,738,000 tons in 1897. The Australian shipping (to and fro) was last year 254 vessels, 844,734 net tonnage, against 276 and 871,490 tons in the previous year. The passengers through the canal numbered but 191,223 last year, against 308,243 the year before.

### TWENTY-FOUR O'CLOCK.

The news that the Great Eastern Railway proposed introducing into their time-tables the sensible system of treating the day as a whole and reckoning the hours consecutively from one to twenty-four has proved too good to be true. On the Belgian railways (also on the Italian railways) the system is in vogue; the Great Eastern handbook in which the twenty-four o'clock figures is only printed and published in Belgium for the use of Belgian travellers. The introduction of twenty-four o'clock into English time-tables, if not into English life generally, must come in time. The present custom of dividing the civil day into two periods of twelve hours each, with the troublesome and confusing addition of the letters a.m. and p.m. to distinguish the difference between the hours, is clumsy in the extreme. *Bradshaw* is the book where the absurdity is best illustrated. The columns are headed "morn." and "aft." If a man is going a long journey it will take him all his time to discover whether he arrives at his destination by day or by night. In India twenty-four o'clock has been introduced by Englishmen on all the railways. They who have travelled by this reckoning of time, or who have had to work out long journeys, fully appreciate its extreme simplicity. To talk of seventeen o'clock or twenty-four o'clock sounds ludicrous in the ears of people accustomed to a limit of twelve. But it is purely conventional habit. The same people who laugh at twenty-four o'clock are amazed when they go aboard ship for the first time at what they call the silly system of chopping up the twenty-four hours into watches.—*Daily Mail*.

**Bahia Blanca and North Western Railway.**—For some time past the price of this company's preference shares has been steadily falling, in fact, to such a degree as to make the reduction positively serious. The cause is the shrinkage in the traffic receipts, which were exceptionally swollen at this time last year by the carrying by the company of its own construction materials. The comparison with that period, however, is about ending, and we understand, on the best authority, that the company *per se* is doing even better in reality than it was last year. Holders should bear this fact in mind and not throw away their shares, for we believe that a turn for the better cannot be much longer delayed. As a matter of fact, the company is in a sounder condition, both physically and financially.—*Financier*.

## THE RAILWAYS OF INDIA.

The administration report on Indian railways for 1897-98 states that the total mileage opened during the year ending March 31st, 1898, was 743½, and the total open on that date was 21,156½, composed as follows:—

	Standard gauge.	Metre gauge.	Special gauges.	Total.
State lines worked by companies .....	3,791½	6,630½	—	10,422
State lines worked by the State .....	4,489	644	28½	5,161½
Lines worked by guaranteed companies .....	2,588	—	—	2,588
Assisted companies .....	584½	237½	72½	894½
Lines owned by native states and worked by companies .....	633	1,884	98	919½
Lines owned by native states and worked by state railway agency .....	124	—	22	146
Lines owned and worked by native states .....	—	858½	94½	952½
Foreign lines .....	—	73½	—	73½
<b>Total</b> .....	<b>12,210</b>	<b>8,631½</b>	<b>315½</b>	<b>21,156½</b>

The mean length of railway worked during the calendar year 1897 was 20,531 miles, as compared with 19,783 miles during 1896.

The mileage remaining under construction, or sanctioned, on March 31st, 1898, was as follows:—Standard gauge, 1,967½; metre gauge, 2,104; special gauges, 226½; total, 4,298 miles.

## CAPITAL.

The total capital expenditure up to December 31st, 1897, including lines under construction and survey, &c., amounted to Rs.2,85,21,17,840, allocated as follows:—

State railways .....	Rs.1,70,42,17,465	—
State lines leased to companies .....	38,22,46,617	£28,762,001
Guaranteed railways .....	50,70,97,639	46,482,455
Assisted companies .....	10,92,14,135	—
Native State lines .....	12,38,52,523	—
Foreign lines .....	1,75,01,793	—

Surveys .....	Rs.2,84,41,30,172	—
Collieries .....	49,11,958	—
	30,75,712	—

Rs.2,85,21,17,840

The figures for State railways do not include indirect charges—i.e., leave and pension allowances and capitalised value of abatement of land revenue. In the case of the lines which have been acquired by the State from guaranteed railway companies, the figures are based on the purchase money (including *premia*) converted at the rate of 1l. = Rs.10 *plus* outlay incurred by the State since the date of purchase. For the State lines leased to companies and the guaranteed railways, the conversion of rupee outlay into sterling is made at the rates of exchange applicable in each case under the respective contracts. For statistical purposes, however—i.e., all statements, &c., except those referred to above, it is necessary to base results on the actual expenditure incurred in the construction of railways. The outlay on open lines, including steamboat service and suspense accounts, on this basis, to December 31st, 1897, viz., Rs.2,59,57,39,009 represents, in the case of lines which have been acquired by the State from guaranteed railway companies, the capital expenditure by companies in rupees up to the date of purchase *plus* subsequent outlay by the State.

## PRINCIPAL EVENTS OF THE YEAR.

A severe earthquake occurred on June 12th, and resulted in considerable damage to the Eastern Bengal, Assam-Bengal, Bengal Doocars, Cooch Behar, and Cherra-Companyganj railways. During June to November, the North Western State Railway was fully occupied in the movement and concentration of troops, animals, and stores in connection with the military operations on the north-western frontier. The maintenance of the Bezwada extension railway was taken over by the East Coast State Railway from the Nizam's Guaranteed State Railway, from January 1st, 1898. On January 1st, 1897, the working of the colliery line to the Makum coalfields of the Assam Railway and Trading Company, Limited (Ledo and Tikak-Margherita colliery) was taken over by the Dibru-Sadiya Railway and opened for goods traffic. The conference of 1897 referred to in the last report, also discussed the general question of the merits of light commercial feeder railways and the gauge which should be adopted for them, and also for military light lines. The conclusions of the conference and their recommendations have been forwarded for the consideration of her Majesty's Secretary of State for India. No new railways were sanctioned during the year under the "branch line terms" resolution of 1896, but negotiations in regard to the following branches have been in progress:—Gogri (Mansi) Bháptáhi, 80 miles; Bhágulpur-Bausi-Baidyanáth, 69 miles; Ahmadpur-Bailyanáth, 63 miles; Láksám-Noakhali-

Ichakhali, 38 miles; Amritsar-Tarn Taran-Sarháli, 30 miles; Jullundur-Hoshiárpur, 24 miles; Mutupet-Avadayárkóvil, 45 miles; Kalka-Simla 68 miles; Coonoor-Ootacamund extension, Nilgiri Railway, 12 miles; Madura-Pamban, 100 miles; Kurnool Road branch, 36 miles; Bezwada-Mosulipatam, 44 miles; Sábar-mati Dholka, 33 miles; Nariad-Kapadvanj, 28 miles; Chandipur Taki, 39. Total difference between the two methods of stating the capital outlay of the acquired railways amounts to Rs.8,09,36,979. Up to December 31st, 1897, the total amount of sterling capital raised by the various guaranteed railway companies was 46,512,239l., and for State lines leased to companies, 28,741,207l., or in all 75,253,446l. The capital outlay on the open lines of various gauges (amounting, as already stated, to over 259'57 crores) was as follows:—

	Standard Gauge.	Metre Gauge.	Special Gauges.	Total.
Crores .....	195'48	63'06	1'03	259'57

## GROSS EARNINGS, EXPENSES, AND NET EARNINGS.

The gross earnings from all sources in the calendar year were Rs.25,59,51,692 (against Rs.25,36,60,425), an increase of 0'90 per cent. The earnings from coaching traffic were Rs.8,85,88,748 (against Rs.9,20,22,892); from goods traffic, Rs.15,87,58,826 (against Rs.15,41,51,505); from steamboats and miscellaneous sources, Rs.86,04,118 (against Rs.74,86,028). The gross earnings per mean mile worked per week, excluding steamboat, were Rs.237'97 against Rs.244'67 in 1896. Of the total gross earnings during 1897, 73'87 per cent. was earned by the standard-gauge lines, 25'52 per cent. by the metre-gauge, and the balance, 0'61 per cent., by the special-gauge lines. The average gross earnings per total train-mile were Rs.4'01 on the standard-gauge and Rs.3'01 on the metre-gauge, the highest on the standard-gauge being Rs.5'86 on the Bombay Baroda and Central India Railway, and the lowest, Rs.2'80, on the Bengal Central and East Coast State railways. The highest on the metre-gauge was Rs.3'68 on the Rajputana-Malwa Railway, and the lowest, Rs.2'28, on the Southern Mahratta Railway.

The total working expenses amounted to Rs.12,51,11,631 (against Rs.12,19,76,875 in 1896), the per-centage on gross earnings being 46'88, as compared with 48'09 in 1896. The increase was chiefly due to the increased open mileage, and to extensive repairs and renewals of permanent way and rolling stock during the year. On the standard-gauge lines the ratio was 47'92, on the metre-gauge 51'41, and on the special-gauge lines 59'05 per cent. The per-centage of expenses on gross earnings under the several departmental heads was as follows:—

	Standard gauge.	Metre gauge.	Special gauges.	Average of all lines.
Maintenance .....	12'73	12'40	13'35	12'65
Locomotive .....	15'67	16'21	18'50	15'83
Carriage and wagon .....	4'59	4'16	6'05	4'49
Traffic .....	7'95	9'00	10'30	8'23
General .....	4'43	7'29	8'93	5'19
Steamboat, special and miscellaneous, and rent of leased lines .....	2'09	1'94	1'46	2'05
Contribution to provident fund .....	0'46	0'41	0'46	0'44
<b>Total</b> .....	<b>47'92</b>	<b>51'41</b>	<b>59'05</b>	<b>48'88</b>

The per-centage of working expenses on gross earnings ranged on the standard gauge from 29'47 on the East Indian Railway to 69'59 on the East Coast State Railway, and on the metre gauge from 33'66 on the Jodhpore section of the Jodhpore-Bikaner Railway to 92'71 on the Assam-Bengal Railway, the average of the standard gauge lines being 47'80, and of the metre gauge 50'76. The average working expenses per total train mile were Rs.1'92 on the standard gauge and Rs.1'53 on the metre gauge, the highest being Rs.3'20 on the Bombay Baroda and Central India Railway, standard gauge, and Rs.2'30 on the Assam-Bengal Railway, metre gauge.

The net earnings derived from all railways amounted to Rs.13,08,40,061, as compared with Rs.13,16,83,550 in 1896, giving a per-centage per annum on the total capital outlay on open lines of 5'04, as compared with 5'20. On the standard-gauge lines the return was 5'03 per cent., on the metre-gauge 5'05 per cent., and on the special-gauges 6'21 per cent.

## COACHING TRAFFIC.

The number of passengers carried in the calendar year of 1897 was 151,263,816 (against 160,817,267 in 1896, a decrease of 5'94 per cent.). The passenger earnings decreased by 7'31 per cent., with a decrease in the passenger unit-mileage of 7'73 per cent. The number of passengers carried 1 mile per mean mile worked was 288,879, as compared with 325,370 in 1896. Of the total number carried, the lower classes contributed 97'27 per cent., the second-class 2'33 per cent., and the first-class 0'40 per cent. only. The average distance travelled by each first-class passenger was 75'59 miles, against 74'65 miles in the previous year, and the average fare was 12'29 pies against 12'33 pies per mile. In the second-class the average distance travelled was 50'25 miles against

47.46 miles, and the average fare 4.87 pies, against 4.95 pies per mile; while in the lower classes the average distance travelled was 38.87 miles against 39.67 miles, and the average fare 2.35 pies against 2.29 pies per mile. Under other coaching traffic, there was an increase of Rs.25,53,843 or 26.01 per cent. The decrease under coaching traffic in 1897 was chiefly due to the prevalence of the plague and the famine; while the increase under other coaching traffic was mainly due to the abnormal receipts on account of the North West frontier expedition. The average coaching earnings per passenger train-mile were Rs.2.96 on the standard gauge and Rs.2.85 on the metre gauge, the highest on the standard gauge being Rs.3.85 on the Nizam's Guaranteed State Railway, and the lowest, Rs.1.85 on the Great Indian Peninsula Railway. The highest on the metre gauge was Rs.3.73 on the Burma Railways, and the lowest Rs.2.32 on the Southern Mahratta Railways. The average number of passengers carried in a passenger train was 189.19 on the standard gauge and 215.05 on the metre gauge, the highest on the standard gauge being 277.00 on the Nizam's Guaranteed State Railway, and the lowest, 125.11, on the Great Indian Peninsula Railway. The highest on the metre gauge was 260.49 on the Jodhpore section of the Jodhpore-Bikaner Railway, and the lowest, 176.25, on the Dacca section of the Eastern Bengal State Railway. The lowest average cost on the standard gauge of hauling one passenger unit 1 mile was 0.73 pie on the East Indian Railway, on which line the average sum received for this work was 2.71 pies. On the metre gauge, the lowest average cost of hauling a passenger 1 mile was 0.71 pie on the Jodhpore section of the Jodhpore-Bikaner Railway, the average receipts per passenger on this line being 2.08 pies. The average distance travelled by passengers was on the standard gauge 41.96 miles, and on the metre gauge 36.71 miles.

#### FREIGHT TRAFFIC.

The quantity of freight carried in the calendar year was 33,698,617 tons (against 32,471,335 tons in 1896), an increase of 3.78 per cent. The total ton-mileage increased 4.91 per cent., and the earnings 2.99 per cent. The number of tons of goods carried 1 mile per mean mile worked was 234,468, as compared with 231,970 in 1896. The increase in the earnings from goods traffic was chiefly due to a larger traffic in "merchandise, general," mainly in the grain and seeds traffic to famine-stricken districts, and in "military stores" and "military live stock," principally due to a heavier traffic on account of the North-West Frontier expedition. Excluding the traffic of the special gauge lines, the total quantity of general merchandise carried was 20,029,281 tons, or 1.83 per cent. more than in 1896, and the freight received aggregated Rs.13,07,94,408, being 1.42 per cent. more. Including materials and stores carried for home lines, military stores, and coal and live-stock for the public, the gross weight lifted showed an increase of 1,214,517 tons, or 3.76 per cent., and the earnings of Rs.46,25,722, or 3.02 per cent. The average goods earnings per goods train mile were Rs.4.64 on the standard gauge and Rs.2.90 on the metre gauge, the highest on the standard gauge being Rs.8.93 on the Bombay Baroda and Central India Railway, and the lowest Rs.2.14 on the Bengal Central Railway. The highest on the metre gauge was Rs.4.08 on the Rajputana-Malwa Railway, and the lowest Rs.1.73 on the Assam Bengal Railway. The lowest average cost of hauling 1 ton of goods 1 mile was 1.42 pies on the East Indian Railway (standard gauge), and 2.51 pies on the Bengal and North Western Railway (metre gauge), the average sums received on these lines for doing this work being 4.83 pies and 5.32 pies, respectively. The average distance over which a ton of goods was hauled was on the standard gauge 160.18 miles, and on the metre gauge 123.89 miles.

#### NET EARNINGS ON CAPITAL.

On "State lines worked by companies," the net earnings amounted on the standard gauge to Rs.4,84,97,604, giving a return of 7.49 per cent. on a total capital outlay\* of Rs.64,72,13,390; and on the metre gauge to Rs.2,56,98,095, giving a return of 5.07 per cent. on a total capital outlay\* of Rs.50,69,77,767. The net earnings of the lines classed as "State lines worked by the State" were on the standard gauge Rs.2,45,78,051† or 3.45† per cent. on a total capital outlay\* of Rs.71,20,00,159,† and on the metre gauge Rs.32,84,874, or 6.89 per cent. on a total capital outlay\* of Rs.4,76,56,136.‡ The net earnings of the "Guaranteed lines," all of which are on the standard gauge, amounted to Rs.2,19,80,572, giving a return of 4.32 per cent. on a total capital outlay\* of Rs.50,92,38,758. The net earnings of the lines in the hands of "assisted companies" were on the standard gauge Rs.10,30,436, being at the rate of 2.78 per cent. on a total capital outlay\* of Rs.3,70,35,349, and on the metre gauge Rs.9,47,950, being at the rate of 4.01 per cent. on a total capital outlay\* of Rs.2,36,46,852. The net earnings

\* The capital expenditure here referred to is that excluding branches and extensions of the open system still under construction. † Including the Jammu and Kashmir Railway (native state section). ‡ Excluding the Cawnpore-Burhwal Railway (metre gauge link).

derived by the "Native State lines" amounted on the standard gauge to Rs.23,77,950, giving a return of 4.61 per cent. on a total capital outlay\* of Rs.5,16,07,678, and on the metre gauge to Rs.19,67,097, giving a return of 5.83 per cent. on a total capital outlay\* of Rs.3,37,50,744.

#### RESULTS OF WORKING THE GUARANTEED RAILWAYS.

Converting from Indian currency at the contract rates of exchange, the guaranteed lines are shown to have returned a net revenue of 2,009,462L. The guaranteed interest is 2,163,464L, and is shown to be in excess of the net earnings by 154,002L. This does not, however, represent the true results, as the figures do not take into account the heavy loss by exchange in connection with the guaranteed interest paid in England.

#### GENERAL RESULTS.

Including steamboat service, and the capital\* expenditure on suspense accounts, the total general results of working of all railways during 1897 were as follows:—

	Standard gauge.†	Metre gauge.	Special gauges.	Total.
Mileage open at end of year ...	Miles, 12,162.14	Miles, 8,527.25	Miles, 293.56	Miles, 20,982.95
Mileage of single track, including sidings .....	15,787.78	9,632.91	311.57	25,732.26
Mean mileage worked during the year .....	11,918.52	8,333.37	278.97	20,530.86
Total capital outlay on open lines* .....	Rs. 1,26,48,17,787	Rs. 63,06,49,234	Rs. 1,02,72,008	Rs. 2,59,57,39,009
Average cost per mile open† .....	1,56,625	71,529	33,984	1,20,347
Average cost per mile of single track, including sidings† .....	1,20,657	63,346	32,019	98,147
Gross earnings .....	18,90,77,909	6,53,14,984	15,58,799	25,59,51,692
Working expenses .....	9,06,13,396	3,35,77,753	9,20,482	12,51,11,631
Per-centage of working expenses on gross earnings .....	47.92	51.41	59.05	48.88
Net earnings .....	9,84,64,513	3,17,37,231	6,38,317	13,08,40,061
Per-centage of net earnings on total capital cost of open line .....	5.03	5.05	6.21	5.04

\* The capital expenditure here referred to excludes branches and extensions of the open system still under construction. † Including the Cawnpore-Burhwal railway (metre-gauge link). ‡ Excluding steamboat and suspense.

The financial results to the State of working the Indian railways for the financial year 1897-98 are not yet accurately known, but the following statement gives the figures of the revised estimate for 1897-98 as compared with the actual figures for the preceding year:—

	1896-97.	1897-98.
Guaranteed railways .....	Rs.1,41,03,700	Rs.1,32,75,000
State railways, military, open...	58,38,030	52,26,000
State railways, military, unopen	5,67,030	6,96,300
State railways, commercial, open	63,07,900	13,45,000
State railways, commercial, unopen .....	7,98,890	15,26,700
Total losses .....	Rs.2,76,15,550	Rs.2,20,69,000
Gain—		
State lines leased to companies	Rs.89,83,320	Rs.89,29,000
State lines worked by companies	1,17,69,100	1,62,88,000
Gain .....	Rs.27,85,780	Rs.73,59,000
Apparent net loss .....	Rs.2,48,29,770	Rs.1,47,10,000
Add—Charges debited to—		
39 — Guaranteed companies —		
Land and supervision .....	Rs.2,80,830	Rs.2,86,000
40 — Subsidised companies —		
Land, interest, and subsidies	8,50,200	11,08,000
41 — Miscellaneous railway expenditure .....	6,39,010	2,36,300
Total apparent charge .....	Rs.2,65,99,810	Rs.1,63,40,000

The interest charges for the East Indian, Eastern Bengal, and North Western railways for 1896-97 include annuities paid in England, which comprise a contribution of about 38½ lakhs of rupees for sinking funds, which will redeem the capital at the expiry of the periods during which the annuities are to run. Deducting this sum from the charges incurred during the year on the railway account, the charge to the State during 1896-97 in connection with the entire Indian railway system will stand at about 227½ lakhs of rupees. The contribution on account of sinking funds in 1897-98 amounted to about 37½ lakhs, and, deducting this amount in the same way, the net charge to the State will amount to about 125½ lakhs of rupees. If interest on lines under construction were also excluded from the above figures, the charges to the State on account of the whole of the railways in India open to traffic in 1896-97 would be about 209½ lakhs, and in 1897-98 about 93 lakhs of rupees. The charges on account of guaranteed railways are attributable to the high rate of the interest guaranteed; to loss by exchange in paying in sterling in England the interest on the capital cost of the lines; and to the fact that the companies' share of surplus profits is, under the contracts, calculated on the supposition that earnings could be remitted in payment of interest at a rate of

\* The capital here referred to is that expended on lines open for traffic.

ls. 10d. the rupee. The State has to continue to pay interest at the guaranteed rates until the contracts terminate, and it is consequently unable to obtain any advantage from cheaper money and the improved credit of the country: that is to say, where the State could now raise money at a little over 2½ per cent. to pay off loans raised at higher rates of interest, it has to continue paying interest at a high average rate of about 4½ per cent. on the capital raised by the guaranteed companies; and, owing to the fall in exchange, the sterling interest charges if converted into rupees at the average rate for 1896-97 gives a percentage of about 7 on the total capital raised converted at the contract rate of exchange. Had it been possible to remit the earnings at the contract rate of exchange, the result to the State of the working of the guaranteed railways would have been a charge of Rs.17,87,810 in the year 1896-97 instead of a charge of Rs.1,41,03,700 as shown above. The direct annual loss or gain to the State from railway outlay from 1858-59 up to 1876-77, and during each financial year from 1877-78 to 1897-98 will be found stated below:—

YEAR.	Guaranteed Railways.*	State Lines worked by the State.	State Lines leased to and worked by Companies.†	East Indian Railway ‡	Total Loss to the State on Working the Railways	Total Loss in- cluding "Other Charges."
	Rs. Loss to the State.	Rs. Loss to the State.	Rs. Loss to the State.	Rs. Gain to the State.	Rs.	Rs.
1858-9 to 1876-77 .....	21,562,303	3,864,189	1,085,981	1,052,031	25,459,792	28,401,178
1877-78 .....	3,811	607,860	190,282	740,379	61,604	150,150

\* Including East India, Eastern Bengal, Scinde Punjab and Delhi, Oude and Rohilkund and South Indian Railways from 1872-3. † Excluding the East Indian Railway. ‡ From 1872-3.

### RAILWAY CONSTRUCTION IN BURMA.

Mr. F. B. Hebbert, who until recently was in charge of the existing system of the Burma Railways Company, Limited, has published a pamphlet specially addressed to the Rangoon Chamber of Commerce in which he sets forth the views of the directors of the company on the subject of railway extension in that country. The schemes under consideration consist of—(a) small branch lines, which may be classed merely as feeders to the existing system; (b) new lines, forming quasi-independent systems and intended rather to open out parts of the province than to bring fresh traffic on to existing lines; and (c) important extensions of the main system, projected to serve and open out the surrounding provinces and to facilitate an exchange of trade between them and the home province. So far as Lower Burma is concerned, it may be said that, owing to its geographical conformation, it will be adequately supplied with railways by means of four long, roughly parallel, north and south lines, on the west and east banks of the Irrawaddy and the west and east banks of the Sittang respectively. Feeder lines will not be necessary beyond the proposed Tharrawaddy-Henzada branch bridging the river Hleing in the densely populated and rich district half-way between Rangoon and Prome. Two of these four "backbone" railways already exist—the Rangoon-Prome-Thayetmyo line, to the east of the Irrawaddy, and the Rangoon-Mandalay line, west of the Sittang. In Upper Burma the geographical conditions suggest a different system. There, east and west lines, chiefly connecting the valley of the Irrawaddy with the valley of the Sittang, are needed. A branch from a point on the Mandalay main line south of Pyinmana, probably Aylah, and running to a point on the Irrawaddy opposite Minbu, would open out great land-locked forests of teak, and, after passing through irrigated fields, would reach the Irrawaddy at a point where considerable traffic comes on to it, and where a further considerable traffic in wheat, pulses, sessamum,

cotton, and cattle is carried past in boats and rafts. The project is brought into greater prominence by the fact that from Minbu will almost inevitably start the railway communication of the future between Burma and Bengal. Following up the existing main line to Mandalay northwards, the next project is an extension of the Meiktila branch, east and west between Meiktila and Myingyan, on the Irrawaddy. This would pass through some of the best cotton-growing districts in Burma. The whole of the earthwork has already been executed as a famine relief work. Next in the programme is a branch line between Sagaing, on the Irrawaddy, and Alon, on the Chindwin river, intended to tap the Chindwin at a point above its unnavigable reaches. In order to serve the ruby mines and the Kabwet coal mines a line from Shwebo, on the Mu river, to Thabeikkyin, on the Irrawaddy river, has been projected. An extension from Katha, on the Irrawaddy, in the Shan States, to Bhamo is projected also, with a view to the China trade; but it is suggested that this scheme should stand over until the effects of the extension of the main line to Myitkyina and of the construction of Mr. Sherriff's Mandalay-Kunlon Railway in developing trade with China have been observed. The last of the Upper Burma feeders mentioned is a branch from Mogoung to Kamaing, which would form part of the scheme for connecting the railway systems of Assam and Burma by way of the Hukong Valley, and would help to develop the jade industry of the Upper Chindwin, the amber mines of the Hukong, and the ruby mines at Nanyansek. Of more ambitious projects for connecting Upper Burma with Eastern Bengal, so as to promote the movement of population from parts of India where it is redundant to Upper Burma, where it is needed, is that for a line from Chittagong, by way of Akyab and Minbu, to Meiktila and Prome. There is also the scheme for a line from Moulmein to Bangkok, to connect the Burma railways with the future Siam system. At present the Burma Railway Company is busy on the extension northward from Mandalay to Myitkyina, which is approaching completion, and on the line north-east from Mandalay to Kunlon Ferry, which is already partly open and is being pushed forward as rapidly as possible.

### RUSSIA AND THE EUPHRATES VALLEY RAILWAY.

The *Kolnische Zeitung* states that Count Vladimir Ivanowitsch Kapnist has asked the Turkish Government for a concession to construct and manage a railway in Asia Minor with a Government guarantee of 6 per cent. The railway will run from Tripoli to Elkuweit, in the Persian Gulf, with a branch line from Neschef, *viâ* Kerbela, Musejib, and Bagdad, to Chanikin, on the Persian frontier. Count Kapnist also asks for the preference for the following railways:—(1) From Hoems to Aleppo; (2) Meijordin, *viâ* Eldeir, to the north; (3) Alexandrette, Odes, and Swedich, to Aleppo or Biredschnk; (4) from Bagdad, *viâ* Mosul, to Diarbekr; (5) Kutelamara to the Tigris, along the Schatilha to the Euphrates.

The Vienna correspondent of the *Standard*, telegraphing on Sunday last, says:—"It is reported here that Count Vladimir Ivanovitch Kapnist has not only asked the Porte for a concession for constructing a railway from Tripoli, in Syria, to the Persian Gulf, and for other lines, but also for a number of other concessions, such as the right of exploiting all the mines within a distance of 5 kilometres on either side of his railway lines, of draining all the swamps between the Euphrates and Tigris, of making roads between the Mediterranean and the Persian Gulf, of building quays, &c., in all harbours on the Syrian Coast. The *Fremdenblatt* considers that the Russian demand for concessions for constructing the Euphrates Railway distinctly shows the change that has taken place in England's relations with Turkey since the time when it seemed a matter of course that the English would construct a railway, which appeared an important means of assuring British rule in India. It goes on to say—

Since then the situation has been greatly altered by the English occupation of Egypt. The day when England assumed a protectorate over that country may be designated the beginning of a new tendency in English policy. Since then English statesmen have more and more neglected what once they considered a British interest in the East, and importance was no longer attached to the maintenance of friendly relations with Turkey. Years ago it would have appeared incredible that not England, but Russia, should construct the Euphrates Railway. If this railway is actually built, the opinion will more than ever prevail in Persia that Russia is the Power of the future, the more so as the line would run through districts on the southern frontier of that country where hitherto England morally had the upper hand.

A report from Constantinople published in a Vienna paper suggests a very singular reason for the many concessions sought by Russian subjects. Before long, it is said, Turkey will have paid off the whole of the Russian War indemnity. Russia will then no longer have Turkey in her power, but must find some other means of persuasion. These concessions would be exceed-

ingly useful. When any one obtains a concession from Turkey he is obliged to deposit a considerable sum in the Turkish Treasury. Thus Count Kapnist would have to hand to the Porte a large sum for his many concessions as security. Russian statesmen calculate that Turkey, being always in want of money, will make use of this deposit, and some fine day the Russian Ambassador would want to know where the money was. Should the answer be unsatisfactory, Russia would once more have a hold over Turkey, and be able to irritate and plague her into granting some fresh Russian demand. If this view of Russian designs is correct, the whole transaction merely represents a loan forced upon Turkey in order that at some time Russia may be able to require of her principal and interest. Should the Porte be unwilling to grant these particular concessions, then Russia will again demand the repatriation of the emigrants who fled to the Caucasus."

#### COSTA RICA RAILWAY SHARES.

In reproducing the following interesting remarks from the leader columns of the *Financial Times*, we would point out that our contemporary's estimate must necessarily be based on surmise only, as no official figures for the first half of the year have yet been published, and what the second half will bring forth obviously nobody can yet say. Judging, however, from the remarks of the chairman at the last general meeting, there should be a further considerable saving in working expenses, and the net results for the whole year should be satisfactory:—

(From the "*Financial Times*.")

"Attention is once more being directed to Costa Rica Railway securities, and a good advance seems quite on the cards in view of the coming half-yearly statement to the end of June, when net earnings of 90,000*l.* will be shown, or 5,000*l.* more than for the corresponding period of last year. On the assumption that the current half-year will work out as well as the second half of 1897, the dividend available for the ordinary shares has been estimated as follows in the circular of a well-known firm of north country brokers:—

Net earnings .....	£90,000
Fixed charges .....	42,500
Net profits to be carried forward to second half-year...	£47,500
Estimated net earnings for second half-year, say .....	51,000
	£98,500
Fixed charges, say .....	42,500
	£56,000
Add amount brought forward from 1897 .....	7,000
	£63,000
Amount required to pay 3 per cent. on ordinary shares .....	54,000
Leaving to carry forward to 1899 .....	£9,000

A dividend of 3 per cent., with 9,000*l.* forward, is an attractive possibility with the shares at their present price of 3½, while the first and second mortgage debentures seem also worth looking after in view of the increasing margin of security."

#### STOCK EXCHANGE VALUES.

According to the *Bankers' Magazine* the Stock Exchange value of 325 representative securities on August 20th was 3,224,778,000*l.*, an increase of 9,364,000*l.* since June 18th. Our contemporary remarks:—"Business during the whole of the period covered by the present statistics has been on a very small scale, and the net movements in quotations are comparatively slight, our list of 325 representative securities merely showing an increase of about nine millions. Investment stocks have been steady, and the small decline marked in British funds and Colonial securities is mainly due to the deduction of interest paid since our last valuation. Foreign Government securities have been fairly active, and movements in prices have been considerable in either direction. The most prominent feature has been the marked recovery in Spanish on the conclusion of the war, and this mainly accounts for the material rise in foreign stocks. Home railway stocks have been somewhat dull, the half-yearly results offering no great inducement to purchasers for the rise. Deduction of the half-yearly dividends, however, has had much to do with the decline in prices. In speculative markets, interest during the last two months has mainly centred in Canadian and American railroad securities. In the former group a considerable decline has taken place, owing to the "break" in Grand Trunk stocks, on diminished traffic receipts. American railroad shares and bonds, on the other hand, have been about the firmest market on the Exchange, and show a very striking advance. The movement has been initiated from New York, but a certain amount of speculative interest has been aroused in professional dealers on this side."

#### DIVIDEND ANNOUNCEMENTS.

[The date given in parentheses is that on which the announcement was made.]

Great North of Scotland Railway (August 23rd).—At the rate of 3 per cent. per annum on the preferred converted ordinary stock, and ½ per cent. per annum on the deferred converted ordinary stock. Also ½ per cent. for the whole year on the deferred ordinary stock, No. 1. The balance carried forward is 1,314*l.* For the corresponding half of last year the dividend on the ordinary stock (which at that time was undivided) was at the rate of 3½ per cent. per annum. The dividend for the year on the deferred ordinary stock, No. 1, was ½ per cent. for the whole year. A balance of 1,291*l.* was carried forward. During a period of twelve years the July dividends on the ordinary stock have been as follows:—

1898...3½ p. cent.	1895...3½ p. cent.	1892...3½ p. cent.	1889...1½ p. cent.
1897...3½ "	1894...3½ "	1891...3 "	1888...1 "
1896...3½ "	1893...3 "	1890...1½ "	1887...1½ "

Alexandra (Newport and South Wales) Docks and Railway.—No dividends will be paid on the preference capital for the past half-year.

#### FOREIGN AND COLONIAL ITEMS.

Mr. George Pauling, head of the firm of Pauling and Co., railway builders, sailed for the Cape on Saturday last.

The superintendent of the Manila Railway Company, Limited, telegraphs that passenger trains are running from Caloccan to Bayambang.

The Porto Alegre and New Hamburg (Brazilian) Railway Company, Limited, has received from the State Government of the Rio Grande do Sul the guaranteed interest for the half-year ended June 30th last.

A French Colonial-office agent sailed from Marseilles on Wednesday for the French Congo, charged to report upon the best route for the construction of a railway between the coast and Waso, on the river Sanga.

Sir John Forrest, Premier and Colonial Treasurer of Western Australia, delivered his Budget statement on the 18th inst. He said that the general receipts were estimated at 1,685,000*l.*, and railway receipts at 1,220,000*l.* None of the railways mentioned in the Governor's speech were to be proceeded with.

According to the annual Budget just presented to the Argentine Congress various economies are to be introduced, one of these being the suppression of the National Railway Board. The question of the new Central Station of Buenos Ayres, a source of much contention and discord, is to be postponed for the present.

As we lately pointed out, the Bank of Tarapaca and London will be hard hit by the depreciation of the Chilean dollar, the difference between to-day's value of the capital (400,000*l.*) employed in Chili and that at which it stood in the books at June 30th, 1897, being over 100,000*l.* And notwithstanding the appointment of the Conservative Deputy for Santiago as Chilean Boundary Commissioner, who shall say that the Valparaíso exchange has touched bottom?—*Pull-Mall Gazette*.

After prolonged negotiations, the Companhia Carris de Ferro de Lisbon has obtained a concession from the Government and the local authorities for the introduction of electric traction on the Lisbon tramways. The concession is for ninety-nine years, and the local authorities have reserved the right of requiring alterations in the system of working at the expiration of twenty years. The plans have already been prepared by the General Electricity Company of Berlin, and that company, in common with Messrs. Wernher, Beit, and Co., of London, are interested in the bringing of the project to a practical issue.

The Netherlands South African Railway Company make the following announcement through their London agents, Messrs. Bucknall Brothers:—"The Portuguese Government has decided that the rail carriage for the transport of goods from Delagoa Bay to the Transvaal will henceforth have to be paid in gold, at the rate of 4,500 reis=1*l.* This does not make any difference for the through shipments, freight for those always having been paid in gold, but, on the other hand, the benefit resulting from the difference in the exchange, when paying Portuguese money for consignments forwarded *via* Delagoa Bay, not in through traffic, is altogether nullified. At the same time, one of the reasons which induced many shippers not to prefer the forwarding of the goods in through traffic is taken away by this measure."

# BLAENAVON COLD BLAST PIG IRON

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

- No. 1 Foundry.—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.
- No. 2 Foundry.—A more Open Quality, used for similar purposes, and largely by nail makers.
- No. 3 Foundry.—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.
- No. 4 Grey Forge.—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.
- No. 5 Common Forge.—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plate, and B.B. Merchant Bars.
- No. 6 Strong Forge.—A still harder and Closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

MOTTLED.—Used for Chilled Rolls in tempering; and for other similar purpose. These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4971, Session 1888.

	Specific Gravity.	Tensile Strength.	Transverse Strength.	Crushing.
Average of 57 sample including Blaenavon	850 Specimens 7.140	850 Specimens 23,257	546 Specimens 7,102	273 Specimens 91,061
Average of 5 samples of Blaenavon only	63 Specimens 7.175	63 Specimens 25,588	46 Specimens 7,488	21 Specimens 108,381

Prices and any further information as to quality suitable for special purposes may be obtained from

**Meetings.****ISLE OF WIGHT RAILWAY COMPANY.**

A special general meeting was held on Thursday at Westminster Palace Hotel for the purpose of authorising the exercise of the powers of raising capital conferred by the Isle of Wight Railway (Brading Harbour and Railway) Act, 1898; Mr. H. F. TAHOUDIN in the chair.

The CHAIRMAN said the proprietors would be well acquainted with the object of the meeting, as a circular, dated August 16th, had been sent to them stating the manner in which it was proposed to raise the capital for the purchase of the Brading Harbour and Railway, and also the mode in which it was proposed to allot the new stock. Accompanying that circular was a form of proxy for the proprietors to sign, and return showing whether they approved the proposal or otherwise. The response to that circular had been that they had received proxies for about two-thirds of the whole of the capital entitled to vote, and, as there were no proxies the other way, they might take it that it was the unanimous opinion of the shareholders that this stock should be issued in the way indicated by the directors in their circular. He had, therefore, to move a resolution to the effect that the meeting authorised the issue of 30,000l. of ordinary stock to be converted, as and when issued, into preferred and deferred converted ordinary stock, and that 28,100l. of the said stock be issued forthwith at par to the present holders of deferred stock, and that the directors should have power to issue the balance of such stock as and when required, upon such terms as they might think fit. The 23,100l. proposed now to be issued would give an allotment of 15 per cent. to the deferred shareholders on the amount of their present holdings. Of course the new stock was worth a considerable premium, but as the deferred shareholders bore the brunt of the purchase which had been made of the Brading Harbour and Railway, and which, probably, at first might not give an adequate return on the money they had given for it, although they hoped that it would do so, it was only fair that they should have the advantage in the allotment of this stock. The board only proposed to issue 23,100l., because the remainder of the 30,000l. of the issue, was in regard to the Ventnor Tramway and the extension of the pier at Ryde, both of which undertakings this company had power to contribute to, but so far no arrangement had been made which would necessitate the issue of the remainder of that capital.

Mr. J. M. STOBART seconded the resolution, and it was carried.

The CHAIRMAN announced that the allotment letters to the deferred stockholders would be sent out during the next few days.

**SOUTHPORT AND CHESHIRE LINES EXTENSION RAILWAY.**

The half-yearly meeting was held at Southport on Saturday; Mr. GEORGE CHAMBERLAIN in the chair.

The CHAIRMAN said the report had but one note—the non-development of the line, and that no one could deny. During the fourteen years the line had been opened everything had progressed but their business. The population of Southport and Birkdale had increased by at least 10,000, and the population at the Liverpool end had increased enormously. The Lancashire and Yorkshire company had increased the number of their trains and accelerated the speed, and almost every line in the country showed an increase in receipts but theirs. The average receipts per mile per week of the 20,000 miles of railway open in the country was between 80l. and 100l., but their average was only 22l. 5s. 4d. The reason of that was the non-development of their property. They had no more trains now than they had fourteen years ago; there was no improvement in the rolling stock, nor in the connections with other towns. They were doing all they could in a friendly way to induce the working companies to give them a better service, but so far without effect. Compared with the corresponding half of last year, there had been a decrease in their passenger receipts of 464l. He did not suppose he should live to see it, but he believed that eventually they would see that line connected with the Liverpool Overhead Electrical Railway, which had now been carried as far as Seaforth.

Mr. RAYNER said that their difficulty was that they were tied by agreement with the Cheshire Lines Committee, and they could not break it unless they could prove that they had not endeavoured to develop the line. The idea of approaching the Liverpool Overhead Railway Company was an excellent one, and something might come of it in the future, but at present they could not move without the concurrence of the working companies. When he asked if they were willing to waive the agreement, he did not meet with a favourable reception. He hoped, however, they would be able to put the line on a better footing than at present.

The report was adopted.

**ALEXANDRA (NEWPORT AND SOUTH WALES) DOCKS AND RAILWAY.**

The half-yearly general meeting was held on Wednesday at the offices of the company, 54, Palmerston-buildings, E.C.; Lord TREDEGAR presiding.

The accounts for the half-year ending June 30th, 1898, showed a gross revenue from the docks of 58,262l., an expenditure of 43,068l., and a profit of 15,194l. From the Pontypridd Caerphilly and Newport Railway the gross receipts were 2,709l., the expenses were 4,738l., and the net loss 2,029l. The net revenue of the entire undertaking was thus

13,165*l.*, to which had to be added the balance of 7,997*l.* brought forward, making a total of 21,162*l.*, which was disposed of as follows:—Rent charges, 2,448*l.*; interest on loans, &c., 1,215*l.*; interest on debenture stock, 8,029*l.*; interest on Lloyd's bonds, 1,194*l.*; balance carried forward, 8,276*l.* The length of railways owned and worked over was 65½ miles for mineral and goods traffic, and 19½ miles for passenger traffic. The lines owned only were 10½ miles for goods and mineral traffic, and 5½ miles for passenger traffic. The capital account showed an expenditure of 1,520,631*l.*, whilst the receipts had been 1,458,189*l.*, as follows:—1882 consolidated first preference A stock, 322,795*l.*; 1882-83 consolidated second preference B stock, 315,824*l.*; 1897 preferred ordinary stock, 151,000*l.*; 1897 deferred ordinary stock, 267,350*l.*; 4 per cent. debenture stock, 401,220*l.* The report stated:—"During the half-year the sum of 151,000*l.* has been received in respect of preferred ordinary stock issued and 7,007*l.* in respect of debenture stock, making a total of 158,007*l.* The Lloyd's bonds (amounting to 64,599*l.*) have been paid off, and a considerable saving in the annual charge for interest has thereby been effected. The liabilities of the late Newport (Alexandra) Dock Company, Limited, and nearly the whole of the liabilities of the late Pontypridd Caerphilly and Newport Railway Company, taken over by this company under its Act of 1897, have been paid off. The net revenue account shows the result of working for the half-year to have been a profit of 13,165*l.*, after providing for the loss on working passenger traffic of the Pontypridd Railway. This sum, together with the balance of 7,997*l.* brought forward from last half-year, provides for rents, debenture, and other interest, leaving a balance of 8,276*l.*, which the directors propose to carry forward to the credit of the present half-year. The reduced income is due entirely to the unfortunate stoppage of most of the collieries and works in South Wales. Inasmuch as the first three months' working gave promise of a most successful year, the result as shown by the accounts is most disappointing. Under these circumstances, the directors much regret that they are unable to recommend the (interim) payment of dividend on the preference capital which has hitherto been made at this period of the financial year. These dividends being contingent on the profit of the whole year, any payment must be deferred until the result of the whole year's working can be ascertained. Advantage has been taken of the leisure afforded by the slackness of work to overhaul the plant, machinery, &c., in order to place it in a very satisfactory condition."

The CHAIRMAN, in moving the adoption of the report and accounts, said it was very disagreeable for the directors to have to meet the proprietors and not be able to declare an interim dividend. They would not, however, be surprised at the result of the past six months' working, and the company was certainly not alone in the position it occupied, inasmuch as four or five of the largest railway companies of the district had been unable to declare an interim dividend for the half-year on account of the disastrous coal-strike in South Wales. The Brecon and Merthyr Railway worked no mineral traffic at all for three months out of the six, and were now in circumstances similar to those in which this company found themselves. As they had not had any coal traffic to deal with, the management had seized the opportunity to overhaul the whole of the company's plant, and do everything that was required to place the docks in a thoroughly efficient condition to cope with an increased future traffic. The Lloyd's bonds, amounting to 64,599*l.*, had been paid off, and a considerable saving in the annual charge for interest had thereby been effected; and the liabilities of the late Newport (Alexandra) Dock Company, and nearly the whole of the liabilities of the late Pontypridd, Caerphilly, and Newport Railway Company, taken over by this company under their Act of 1897, had been paid off. The net revenue account showed the result of working for the half-year to have been a profit of 13,164*l.*, after providing for the loss on working passenger traffic of the Pontypridd Railway. That sum, together with the balance of 7,997*l.* brought forward, provided for rents, debenture and other interest, leaving a balance of 8,275*l.*, which the directors proposed to carry forward to the credit of the present half-year. He trusted that they would soon see the end of the coal dispute and be again doing a large trade, so that at the end of the year they might be able to pay interest on their stocks at the same rate as previously.

Colonel CHARLES LYNE said, just before the strike began the business of the docks was in a more flourishing condition than ever before. They had lost about 10,000*l.* a month by the dispute.

#### WATERFORD LIMERICK AND WESTERN RAILWAY.

The half-yearly general meeting was held at Waterford on the 26th ult.; the Hon. PERCY BERNARD presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said—Gentlemen, I regard the present occasion as one of vital importance in the history of our company, and did I not so regard it I should have claimed your indulgence and asked someone else to occupy the chair to-day. The past half-year has been perhaps the most disappointing that I have experienced since my connection with this company. We started well. Week after week showed increases in traffic, and this continued till about six weeks from its close, and then the whole of the advantage we had gained was wiped out; while at the same time, owing to the unfortunate strike in the South Wales collieries, we lost the benefit which we hoped to derive from the very favourable coal contract into which we had entered. We are at present paying 15*s.* 6*d.* per ton for Scotch coal, and as the calculation is that the consumption of this coal is 25 per cent. more, we estimate that it represents 19*s.* 4*d.* per ton, as against 12*s.* 11*d.*, which was our South Wales contract. The traffic receipts for the entire system show a decrease of 173*l.*, while those for

the Waterford Limerick and Western proper, including the Collooney lines, are less by 65*l.* There was a very substantial increase in passenger traffic. We carried 2,227 more passengers than in the corresponding period, and earned an increase of 869*l.* As is the usual experience, the larger amount of this is attributable to the third-class. I regard the increase in passenger traffic as very satisfactory. It is a class of traffic easily dealt with, and we hope the increase indicates that the people are learning to appreciate the travelling facilities placed in their way. The excursions which have been run have been largely availed of, and have proved a fruitful source of revenue, and so far go towards showing the population how easy it is to move about. Mackerel traffic is specially accountable for the increase of 267*l.* in parcels and miscellaneous traffic. The mail subsidy was reduced by 200*l.* owing to the Post-office not having utilised specials from the junction. Goods traffic shows an increase in tonnage of 6,166, but a decrease in money amounting to 814*l.* There was an increase in coal traffic from Waterford in anticipation of the strike in South Wales. There was a diminution in the live stock carried of 3,823 head, bringing the receipts down by 411*l.* This is attributable almost entirely to the falling off in pigs, of which we carried the enormous number of 11,357 less than in the corresponding period. The falling off in pig traffic is the most serious blow we can sustain, as out of a great deal of it we get the double turn—we bring in the pig alive, we take him on in the shape of bacon or ham. In expenditure permanent way shows a decrease of 6*l.* There was an increase in the items of superintendence, materials and repairs, and stations and buildings, but there were large reductions in general works, and we had an increased revenue from old materials. In the locomotive department there is an increase in expenditure of 609*l.*, and of 354*l.* in the carriage and wagon department. The larger price and the inferior quality of the coal, to which I have already referred, account to a great extent for the increased expenditure in this department. There appears at present no prospect of a termination of the strike; and when we consider that our mileage has considerably increased, this coal question becomes a very serious one. The repairs in the locomotive department have been well maintained. One engine is being rebuilt into a bogie tank engine. Electric lighting has been extended to nine carriages, eighteen coaches being now fitted. A new coal stage has been erected at Waterford, with a crane and buckets, and has already effected a great saving in coaling operations. There is an increase of 233*l.* in the traffic department. General charges show an increase of 544*l.*, chiefly under the heading of telegraph and Clearing-house expenses. Law, Parliamentary, compensation for loss of goods, and personal injury call for no comment, being practically the same as last year. Rates and taxes are down by 778*l.* Capital expenditure amounted to 7,362*l.*, 1,730*l.* being on the Collooney line. Of the balance 1,350*l.* was expended making Long Pavement a passing station, and 3,177*l.* is attributable to providing additional wagons and horse-boxes, and fitting electric light in carriages. And now, gentlemen, I come to the important portion of my statement. You will be asked to adopt a resolution in favour of the amalgamation of your company with the Great Southern and Western. This is the first opportunity that appeared to me as suitable for expressing my own views and those of the board on the subject. The basis of that amalgamation has been brought under your notice in a circular which I addressed to you last April, and is summarised in our present report. It has been urged that these terms should have been better; and I am prepared to admit that the bargain will turn out a satisfactory one for the Great Southern. Nor could we have expected that it would have been concluded, as far as they are concerned, if it had been otherwise. But what concerns us is—could we have obtained better terms? We could not, and we therefore recommend these for adoption. By this agreement your debentures will be worth about 145*l.*, your 4 per cent. preference about 142*l.*, and for your 3½ per cent., which were issued at about 91, you will be able to get 105*l.*, if you are not content with the rate of interest, while your ordinary shares, upon which, I regret to say, dividends are but rarely paid, will rank as guaranteed stock of the Great Southern and Western Railway. Exception has been taken to the offer to the holders of the 3½ per cent. preference on the ground that the stock was taken as an investment, being a perpetual stock; but it should be remembered that the dividends could only be paid when earned, that the stock is not cumulative, and that, therefore, under the altered conditions which we could not anticipate when issuing it, it is possible that the payment of the dividends on this stock might not be made in full. I agree substantially with the views which have been put forward in the circular lately issued by shareholders, and which has been endorsed by a very exhaustive poll of the constituency who gave proxies. The prices which these gentlemen put down for the increased value of your stocks, based on the present value of the Great Southern and Western Railway stocks, are very attractive, and it will be found that the appreciation of your capital on the amalgamation will be over three-quarters of a million above the prices realised last January. This, I consider, very satisfactory. The Bill that became law in the session of Parliament that is just over gives the Great Western and the Great Southern and Western Railways control over the new South Wexford line, the Dunganman line, with which the South Wexford line will be connected by a bridge over the Suir, and the Lismore line, so that a direct competing route from Waterford and beyond with Limerick will be in possession of those companies. They are under obligations created by the Act of Parliament to develop this route, but even without such obligations the large capital sunk in them would make it their interest to do so. The subsidy derived from the Great Western and the other facilities from a connection with that company are terminable in 1900, and with the other route open, their interests in that direction will probably not be continued. By this new route our very important traffic between

Limerick and Waterford could be seriously interfered with, and the same would apply to a great extent to our Tralee, Tipperary, and Thurles traffic. During the passage of the Rosslare and Fishguard Bill through committee these points were repeatedly alluded to, and were not, to the best of my belief, contradicted; and the argument, with which I concur, was frequently used that the amalgamation of our line with the Great Southern in the event of the Bill becoming law was a simple act of justice to our shareholders. Allusions have been made from time to time to other schemes which we might have favoured, and there were those which commended themselves to us. But they, of course, depended for their success upon their being adopted by other companies as well as by ourselves, and as they were not so adopted they were impracticable. I considered, and I still consider, some of these schemes had merits, but as regards the financial position for the shareholders of the Waterford Limerick and Western Railway, they did not show the immediate and secured advantages of this amalgamation. It has been asserted that the Great Western Railway in these transactions have not behaved well by their old allies. I wish to record it distinctly as my opinion that while considering their own company, as they were bound to do, they did not forget their long connections with us, and behaved honourably towards us. This proposal for amalgamation is the outcome of a series of events which fluctuated and changed almost from day to day for a year and a half or two years. I need not trouble you with the history of the negotiations and the interviews of last year, and early this year, which led to the offer made by the Great Southern and Western Company. Suffice it to say we had various interviews with the Great Western Company, at which different schemes were propounded, the result of which was this scheme of amalgamation which is now before us. That scheme, of which this amalgamation is a part, embraces a great system of railways in the South of Ireland similar to the North—a system which would shorten the means of communication between the South of England and Ireland, increase the facilities for the export of Irish produce and the exchange of passenger traffic, which latter appears a source of traffic in Ireland capable of great development, one for which the country is particularly suitable, and from which great advantages may be expected to all classes. I am of opinion that the advantages of this to the country will be enormous. During the sittings of the Hybrid Committee, though we were debarred from taking an active part in the proceedings, your interests were constantly and closely watched. So much for the question of amalgamation as to its great advantages, and also as to the idea that other courses equally good or even better were open to us, of which I have endeavoured to dispose. I would now venture to touch on the bugbear of monopoly; but before doing so, I would venture to remark that, though it is, of course, gratifying to those who are responsible for its working a company upon which unlimited abuse has been poured, should, when it is supposed to be expiring, be found to be the best managed and the most necessary for the prosperity of the country. I confess I should have been more gratified had this discovery been made earlier, and had some of those who now appear to appreciate our merits, helped by their patronage to place us in such a position as to make amalgamation entirely unnecessary. The cry with regard to monopoly is, of course, only raised at competitive points, and, having made inquiries, I find that even in such places opinion is much divided, and that the longer it is considered the larger are the numbers who come to the conclusion that the advantages preponderate, while in the case of non-competitive places, and we have many important centres on our system, the opinion is unanimously in its favour. It has always appeared to me that these non-competitive places have been left far too much out of consideration. We are not able even now to give a service to and from these places such as I should like to see, nor, in many cases, to provide the accommodation to which they are entitled. What would be their condition were we to become still more crippled? But to return to the competitive places. It is a great mistake on the part of the anti-amalgamation party to imagine that by defeating amalgamation as passed by Parliament, they would escape a practical monopoly. Not only would they not have escaped it, but they would bring about what would be worse. Supposing that the opposing party succeeded to the utmost of its wishes; that the Bill were thrown out; and suppose the Great Western subsidy withdrawn, and a fierce competition imminent over the two lines. What must follow? Would not both parties be obliged to enter into an agreement as regards rates at Limerick and elsewhere? This would be forced on us, and the result would be that the train service and other facilities would probably be cut down to the minimum by both parties, and rates and fares put up to the highest legal maximum. It would become a matter of the most perfect indifference to both companies what route was selected for traffic. Such an arrangement is capable of inflicting all the evils that are attributed to amalgamation without any counteracting advantages. There would be no inducement to a strong company to develop to the utmost the resources of the district, and by suitable connections in various directions cater for the public convenience. I speak from experience. With the best possible intentions, a company financially weak cannot try experiments, and without experiments it is impossible to ascertain what is really required in the public interest. I do not know that we fully understand the views of Waterford. Some years ago, when we opposed the South Wexford line, it was locally supported. I always thought that line would divert traffic from Waterford. I think so still; but the mischief is done, and I fail to see now what difference it makes to Waterford whether we are amalgamated or not. There is a clause in the Fishguard Bill for the protection of the port which will apply to our line as amalgamated; but the fact of our being amalgamated in no way prevents us from taking every possible advantage out of the Rosslare route. But further, I understand there is an idea that traffic with such places as Clonmel and Carrick

would be taken by the Great Southern to Dublin instead of to Waterford. It is hardly possible to follow an idea so far fetched. From Clonmel to Dublin is 110 miles as against 28 to Waterford, while from Carrick it is 124 miles as against 14. This discrepancy of distance would be sufficient to prevent such a course of action, but besides this the river Suir affords a competitive route which would effectually prevent the raising of rates with Waterford, and if there are any other dangers of which they are apprehensive clauses could, I have no doubt, be introduced for their protection. The coal trade is an important one in the city. It has been as frequent cause of complaint that owing to our short supply of wagon the Great Southern from Cork and Dublin were cutting out the local merchants. After amalgamation this grievance would entirely disappear. To make this class of traffic pay at all it must be worked economically by the shortest route. With the whole system in their hands the Great Southern would have no object in carrying it over a far longer mileage, at rates that cannot be remunerative. I have detained you a long time; but the subject is an important one and you are entitled to know my views, and I have endeavoured to lay them distinctly before you. It is the interest of both companies concerned; and in my opinion it is the interest of the country that this amalgamation should pass as part of a great scheme—a great scheme of competition, not a competition between two companies in Ireland, impoverishing each other to the detriment of the districts they serve, but between two of the most powerful corporations in the world, striving with their unlimited resources to develop and obtain a share of the traffic of Ireland.

Mr. ROURKE, Carrick-on-Suir, said he thought the directors were to be congratulated on the result of the negotiations for amalgamation. He was glad to find that the directors were now unanimous in recommending the adoption of the scheme of amalgamation; and although some of the directors at first opposed it, he understood that it was not the amalgamation itself they opposed—not the principle, but the price which was offered. That was quite within their right; but he thought that on the whole the price was a fair one, and on the whole satisfactory to the shareholders. Of course he would have preferred that the Great Southern and Western should pay the 3½ preference as well as the 4 per cent.; but considering that they gave the option of 105l. cash for each 100l. of this stock, or 75l. of their own 4 per cent. stock, he thought it fair enough, and having no alternative offer from any other company, it ought to be accepted. Some appeared to think that as they had made some little way of late they might ultimately be able themselves to pay a dividend of 2½ per cent. He did not agree with that. He was convinced that, considering that their expenses were gradually increasing—but which by the amalgamation could be largely decreased—they would never themselves be able to pay a 2½ per cent. dividend on their ordinary shares. He had held these shares for a good many years, and he must say he had always looked forward to a scheme of amalgamation as their only hope. From a trader's point of view also he highly approved of it, as did all the traders of his town. It was also approved of by Clonmel, Ennis, and other towns on the system. Limerick, he believed, was the only city agitating against it. In one sense he could understand that, for Limerick was getting special low rates in consequence of the existing competition. He thought it somewhat unfair for the directors of both companies to be handicapping the traders of other towns, and injuring their shareholders by giving special low rates to Limerick or anywhere else for any reason whatever. There was a great cry got up about monopoly, but people were too much inclined to listen to any cry, often got up by self-interested individuals, who frequently did not care a brass farthing for the traders or their interests. The fact was that every railway was, and must in its nature be, more or less a monopoly, either by itself or combined with others. But was it the interest of any railway or monopoly to grind down their customers, or take an unfair advantage of them by charging exorbitant rates? He took leave to differ from that, as he held that the more prosperous a town was the better for the railway running into it, and it would be against their own interests to handicap that city or town by unfair rates or charges. He referred to the City of Cork, which had been always monopolised by the Great Southern Company, and said that everybody would admit that Cork had during the reign of monopoly made much greater commercial progress than Limerick with all its low competitive rates. Again, they might take Belfast, monopolised by the Great Northern Railway, and how did it compare with Limerick? All could answer that question, and they also knew how Thurles, solely served by the Great Southern, had flourished as no other inland town in the south had done. Consequently, they must conclude that railway monopoly was not after all so terrible a misfortune as some interested people would paint it or have them to believe, and which the hybrid committee looked upon with such alarm. He advised the Limerick people to cease agitating and approach the Great Southern Company with the view of the retention of the present railway works at Limerick, as supplemental to the Inchicore works, and, if successful, as he hoped they would be, they would be doing the best work for the people of Limerick and saving hundreds of grateful tradesmen and labourers from want and poverty. In conclusion, he expressed the belief that every solid shareholder would approve of the amalgamation scheme, which he hoped was only the beginning of a greater amalgamation, that was the purchase and taking over of all the railways by the Government, an event which was bound to come sooner or later. ("Hear, hear.")

Mr. NICHOLAS SYNNOTT said that he entirely agreed with the observations of the last speaker, except as regards what he had stated about State control of railways. He endorsed the view that the officers of the company should be properly treated. As regards the works at Limerick, it was the obvious policy of the Great Southern Com-

pany that they should be continued, as Limerick would be then to a great extent the centre of the system. ("Hear, hear.") It was the policy of the great English company to have their works in two different parts of their system. He was not there for the first time to advocate amalgamation, for eight or nine years ago he came forward there and advocated amalgamation with the Great Southern and Western Company. The longer he knew the company the more he was convinced of the necessity for amalgamation. In fact the original Act contemplated such a proposal, for it gave power to lease the line to the Great Southern. It contained also another curious provision as to how the profits of the company should be disposed of after it paid 8 per cent. on the ordinary shares. (Laughter.) It was suggested on the last occasion that this was a stockbroking transaction. Now he could say that every single gentleman associated with him in promoting the last meeting was an old shareholder of the company, and he might say he got proxies from Limerick. As regards the Hybrid Committee, they took no evidence regarding their present proposed amalgamation, though they expressed an opinion regarding it. The committee appeared to forget that the policy of Parliament was in favour of an amalgamation. What was the Great Eastern and the London and North Western but a combination of small local lines. Thirty years ago a Joint Committee of the Lords and Commons, of which the present Lord Salisbury was a member, reported—"It is generally easy to show that the public will gain largely by harmonious arrangements, and considering how doubtful is the extent of competition or of the facilities it produces, the balance of advantage to the public as well as the shareholders may often well be thought to be on the side of amalgamation." The Committee on Railway Rates in 1881 and 1882—and several Irish officials were examined before it, stated:—"We recommend the amalgamation of Irish railways if necessary by direct Parliamentary action," and Sir James Alport's Commission reported practically in the same direction. Talking about competitive points, surely their experience was that they resulted in great inconvenience. Had they never heard of mail trains missing connection at the Limerick Junction, or of the Waterford and Limerick train at Tralee starting five minutes before the arrival of the Great Southern train from Killarney, leaving a person from Limerick or Dublin to spend a pleasant night in Tralee. In conclusion, he urged that the directors were wise in adopting the present scheme in the interest of the shareholders. ("Hear, hear.")

The report and statement of accounts were adopted unanimously.

On the motion of the CHAIRMAN, seconded by Sir FRANCIS BRADY, the usual dividends on the preference stocks were declared.

On the motion of the CHAIRMAN, seconded by Sir FRANCIS BRADY, it was unanimously resolved that the company be amalgamated with the Great Southern Company on terms to be arranged between the respective boards of the companies, and the directors were authorised to carry the amalgamation into effect.

This finished the business of the ordinary meeting.

#### SPECIAL MEETING.

The CHAIRMAN announced that the extraordinary meeting of the shareholders, which had been held some time since and adjourned to that day, would then be resumed. He had received from Lord Castletown an announcement that if the shareholders approved of the amalgamation with the Great Southern he would support the proposal. ("Hear, hear.") He (the chairman) regretted to say that Mr. Shaw had not been able to see his way to adopt the same course, and he had resigned his position on the board. He could not make that announcement without expressing his regret that Mr. Shaw found it necessary to adopt that course. The Waterford and Limerick never possessed a more efficient, earnest, and useful director.

Mr. SYNNOTT said that if the shareholders approved of the scheme of amalgamation, it was for them to decide, as they were the best judges of their own interests. With regard to Mr. Shaw, he regretted that the company had lost his services, and that he did not agree with them on the vital question of amalgamation.

The CHAIRMAN then announced that the business was concluded.

#### LIMERICK AND KERRY RAILWAY.

The half-yearly meeting was held in Westminster on Wednesday; Mr. E. W. O'BRIEN in the chair.

The CHAIRMAN, in moving the adoption of the report and accounts, said the receipts of the line for the six months ended June 30th last showed an improvement over the corresponding period of last year, there having been a net increase of 155*l*. The figures were the largest they had ever had in the first half of the year, and he believed their undertaking had done better than any other portion of the Waterford and Limerick system. The passenger traffic showed an increase of 146*i*, this being partly due, he thought, to the increased facilities for traffic which had been provided. A small falling off had taken place in the live stock traffic, principally in pigs. In parcels and miscellaneous traffic there had been an advance, which was accounted for in part by the increase in the mackerel traffic, this having been the largest they had ever known. To give them some idea of its quantity, he might say that nearly 300 tons of mackerel were carried over their line in the six months. In point of fact, the take of mackerel was so enormous that it quite surpassed the powers of the local merchants to deal with it, and he regretted to say that one day 250,000 mackerel had to be thrown into the sea because no ice or boxes were available for packing the fish, and on another day he was informed some 80,000 mackerel had to be thrown away for the same reason. The question of the mail contract was still pending, the directors not having decided what steps they would take in the matter.

#### TRALEE AND FENIT RAILWAY.

The half-yearly meeting was held in Westminster on Wednesday; Mr. E. W. O'BRIEN in the chair.

The CHAIRMAN, in moving the adoption of the report and accounts, congratulated the shareholders on the improvement in the receipts, the net earnings being larger by 161*l*. than in the corresponding half of 1897. This result was due in part to the heavier mackerel traffic; but there had been a considerable augmentation in the general tonnage of the port of Fenit, from which the line had, no doubt, benefited. He had frequently alluded to the difficulties which this railway had to contend against, and he would not on that occasion say more on the subject than that they had not yet been able to adequately meet the competition of the canal between Fenit and Tralee. If the competition of the canal could be met in what he believed was the only possible way—namely, by lowering the rates on the line as much as possible and giving an efficient service—he believed the receipts of this undertaking would increase to a very large extent. The amount of goods arriving in the port of Fenit which had to be conveyed to Tralee was very considerable. A year or two ago it came to 60,000 tons, but it was now 75,000 tons, of which only 18,000 to 20,000 tons were carried over their line.

#### RATHKEALE AND NEWCASTLE JUNCTION RAILWAY.

The half-yearly meeting was held in Westminster on Wednesday last; Mr. E. W. O'BRIEN presiding.

The CHAIRMAN, moving the adoption of the report and statement of accounts for the half-year, said that there was an improvement in the receipts over those of the corresponding half of 1897, the increase being 288*l*. 5*s*. gross and 158*l*. 10*s*. net. They had during the six months taken the largest amount ever received for the corresponding period. As had been the case with regard to the Limerick and Kerry and Tralee and Fenit railways, the growth was to a considerable extent due to larger receipts for terminal allowances on perishable goods and live stock conveyed. This was a matter which had been under discussion with the working company for a considerable period, and the directors were glad to say that their relations with the working company were amicable, and that the arrangement which had been come to was satisfactory to them. There was an increase of 77*l*. 11*s*. in parcels and miscellaneous traffic owing to the carriage of butter by passenger instead of by goods train.

The motion was carried unanimously.

#### COCKERMOUTH KESWICK AND PENRITH RAILWAY.

The half-yearly general meeting was held at Keswick on Saturday; Mr. J. J. SPEDDING presiding.

The accounts showed a gross revenue for the half-year ending June 30th, 1898, of 25,539*l*. (as against 22,459*l*.), and an expenditure of 15,274*l*. (as against 13,780*l*.), leaving a profit of 10,265*l*. Adding the balance of 178*l*. from previous account and 131*l*. sundry credits, the total net revenue was 10,574*l*. Prior charges (including 638*l*. transferred to the reserve fund) would absorb 3,028*l*., preference dividend 625*l*., and a dividend on ordinary stock at 4½ (against 4) per cent. per annum 6,789*l*., leaving to be carried forward a balance of 152*l*. Length of railway, 31½ miles. The capital account showed an expenditure of 429,742*l*., whilst 403,000*l*. had been received—viz., ordinary stock, 285,000*l*.; preference stock, 5 per cent., 25,000*l*.; debenture stock, 90,132*l*.; premiums, 2,868*l*. Reserve fund, 17,371*l*. The report stated:—"The directors have determined upon adopting a heavier section of steel rails, and in other respects adding considerably to the strength of the permanent way. A supply of the heavier rails has already been obtained, and they will be used in future renewals of the line. The new liabilities cast upon the company by the Workmen's Compensation Act have suggested the expediency of some regular provision for meeting these obligations, but your directors consider that the reserve fund will be properly available for this purpose. The usual transfer of 2½ per cent. of the gross receipts has been made to the reserve fund."

The CHAIRMAN, in moving the adoption of the report and accounts, said he did not approve of the Workmen's Compensation Act, but they must grin and bear it. They had made no special arrangements to meet the liabilities of the Act, which would be met out of the reserve fund. This was an additional reason why they should continue to place 2½ per cent. to the reserve fund. Mr. L. GLASSON (Penrith) said some matters which had been mentioned raised the old question of leasing the line to the London and North Western Company. From 1887 to 1897 inclusive their average dividend had been 4*l*. 15*s*. 3*d*. Then, of course, they had the reserve fund, and the company was really a 5 per cent. company. In 1865 the number of passengers carried was 112,630, and in 1897 the number was 262,425. These figures ought to be a strong inducement to the London and North Western Company to favourably consider the leasing of the line. He hoped the directors would keep this matter in mind.

The report and accounts were unanimously adopted.

#### SOUTH YORKSHIRE JUNCTION RAILWAY.

The half-yearly meeting was held on Wednesday; Mr. J. BUCKINGHAM POPE presiding.

The CHAIRMAN, in moving the adoption of the report, pointed out that the revenue account for the past six months had not yet been supplied by the Hull Barnsley and West Riding Railway

Company, and that therefore no accounts for that period were submitted to the meeting. He could lay before them the auditors' certificate to the effect that they contained when read with the notes on the net revenue account and balance-sheet of the company a full and true statement of the position of this company. The guaranteed dividend at the rate of 3½ per cent. for the past half-year, being the minimum dividend to be paid to the stockholders, had been paid in accordance with the agreement scheduled to the Act and trust-deeds, irrespective of the company's share of the earnings of the railway.

### MILFORD DOCKS.

The half-yearly general meeting was held on Wednesday at Winchester-house, E.C.; Mr. C. E. NEWBORN presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an abstract of which has already appeared in THE RAILWAY TIMES), drew attention to the circular which had been sent out by a section of the A shareholders, and the trouble to which the board would be put in replying thereto. The circulars had been issued, he urged, under a misapprehension of the intentions of the board, and the replies, he hoped, would be such that they would have heard the last of the controversy. By the replies he hoped the malcontents had been enlightened, and that the board would now receive full support in the propositions which they had to lay before the shareholders. They were perfectly certain these propositions would stand the test of examination, and show that there was a great future before the Milford Docks Company. It had, however, been necessary to drop the clauses from the Bill which they promoted in Parliament relating to the proposed American steamship company. The circulars to which he had referred threw some doubt on the advisability of going on with that part of the scheme; and unfortunately at that very moment the Spanish-American war broke out, and the agreement which had been entered into could not possibly have been carried through at the time. The necessity was therefore forced upon them of withdrawing the clauses referred to. Although the proposed line might be said to be in abeyance, it was far from being abandoned. The party with whom he had made the agreement was at present in America, and before he went away he said, "I shall not come back until our American steamship company is formed." Should he come back, he had no doubt the board would have the cordial co-operation of all the stockholders in carrying through the proposed arrangements and passing the Bill with all its clauses. After a severe fight they had got their Bill through both Houses, although they had to regret the opposition of the National Provident Institution, who through their counsel expressed the opinion that "it is time the Milford Docks Company was swept away"—a sentiment which was urged with all the force which counsel could use; but he was happy to say, after hearing his (the chairman's) evidence, their lordships were unanimous in giving the further time asked for, and he hoped the future would show that the lukewarmness shown by the National Provident Institution in supporting them would prove that that institution was inclined to work with them in furthering the future prosperity of Milford Docks. This result he attributed to the severe fight which they had had in the committees of the two Houses. He mentioned that he had been in consultation with Mr. Peterson (of Messrs. Peterson, Tate, and Co.), and his opinion was that Milford Haven was a port which no sailor would hesitate to use in preference to any other port that was capable of accommodating the large transatlantic liners. Mr. Peterson was astonished that the Great Western Railway should allow the Milford Docks to be dormant; and Mr. Wilkinson, manager of the Great Western Railway, said, when the matter was put to him, that Milford, sooner or latter—probably sooner—would become the port for dealing with the extensive overseas traffic which the Great Western would have to accommodate. The paragraph in the report, to the effect that the company had grounds for expecting the early conclusion of negotiations by which an important line of steamers for passengers and cargo would be established to run between a Canadian port and Milford Docks, with through booking arrangements between the railway systems of Canada and America and the Great Western Railway of England, had been inserted, with the approval of the Great Western Railway board. It was expected that when the anthracite coal-mines of Johnstone were opened they would send 1,000 tons of coal through the docks per day. All they could do at present was to wait. However, even if they did secure the trans-Atlantic traffic, they would be able to find accommodation for their fish traffic, which was increasing daily, showing an excess for this half-year of 290½ 14s. over the corresponding period of last year.

Mr. RADFORD, of the Milford Haven Railway and Estate Company, Limited, said the chairman seemed to think that his company was antagonistic to the Docks Company. That was not so, and he assured the chairman that whatever he could do to further the welfare of this company he would do his utmost to carry through.

**Waterloo and City Railway.**—During the week following the date of the opening nearly 100,000 passengers were carried. A large number of these made the journey out of curiosity, and owing to this fact, and also to the holiday season, which greatly affects the suburbs the line mainly serves, the returns for the last fortnight show a falling off. Still, the traffic is equal to the most sanguine expectations, and those best competent to give an opinion express confidence that the early record will be beaten before long. Some difference of opinion exists as to the system of having only one class of carriage, but the general impression is in favour of this.

## General News.

### THE SIMPLON TUNNEL.

All visitors to Italy, passing through Switzerland, have seen with wonder and delight the St. Gothard Railway, which extends from Lucerne to Chiasso. Traversing, as it does, the Alps in its passage, and embracing nearly one hundred tunnels, of which that at its summit is 9½ miles in length, it has justly been considered one of the greatest engineering feats in the world. As it forms the direct line of communication between Italy and Germany, its traffic has not only grown to very large proportions, but the return to the shareholders is equally large and satisfactory. But the day is fast approaching when the traffic-carrying capacity of the tunnel will present itself for serious consideration and solution, and the company may be compelled to construct a second tunnel parallel to the one already existing. The natural inclination of the valley up which the railway runs is greater than the maximum gradient that was considered admissible, but the Swiss engineers overcame this difficulty by the adoption of the very ingenious system of the circular tunnels. The highest point of the railway is 3,789ft. above the sea, and to this altitude all the traffic, both of passengers and merchandise, has to be carried. It is a question for consideration whether the railway, if it had to be constructed a second time, would not, from later experience, be kept at a lower level, even at the expense of a longer tunnel, for it must be remembered that were the length of these circular tunnels added to that at the summit it would justify the adoption of a greater length in one place. The height of the mountains above the tunnel is 5,505ft., and from this resulted the high temperature encountered in the rock—viz., 87 deg. Fahrenheit. During the construction of this great tunnel most valuable experience was obtained, all of which will be turned to good account in the future. No less than 600 deaths occurred among the employés engaged in the construction, and included both the engineer and contractor. This great mortality was due to various causes—inefficient ventilation, the great heat of the rock in the interior of the mountain, the poor quality of the food upon which the Italian workmen fed themselves, but chiefly the exposure of the men to an Alpine climate, whilst returning to their homes heated and wet to the skin. The clothes were seldom dried, and next day they would go back to their work in damp or even wet garments.

The other great tunnel through the Alps, which was constructed at an earlier date, is the Mont Cenis. This tunnel, at an altitude of 4,247ft. above the sea, is nearly 8 miles in length, and was also, in its day, considered a marvellous undertaking; but, unfortunately, although most solidly constructed and capable of carrying a large traffic, it is, owing to the war of tariffs existing between France and Italy, but little used. It is provided with a double line of rails, and is lined throughout with either masonry or brickwork, except for two lengths of 100 yards and 80 yards respectively. In these places solid white quartz was encountered, which delayed the work considerably. The gradients are severe—that on the Italian side being 1 in 33, whilst on the French it is 1 in 40. Extensive, but almost obsolete, arrangements are made for ventilation, but the benefit is chiefly and rightly devoted to the welfare of the men employed on the permanent way in the tunnel. Rooms are provided at intervals into which the workmen can retire, and which are supplied with fresh air, drinking water, and telephone. The cost of the tunnel was about 4,000,000*l.*, and occupied ten years in construction.

But now a third tunnel—that under the Simplon—is not only proposed but its construction has already commenced. This railway forms the most direct communication between Berne, Lausanne, and Geneva to Domo d'Assola, Milan, and the north of Italy, and it has the great advantage of being on a low level. Whilst the altitude of the St. Gothard is 3,789ft. above the sea and that of the Mont Cenis is 4,247ft., the Simplon is only 2,312ft. In other words the heavy traffic will pass through the Alps at a lower level, by some 1,477ft., than in the case of the St. Gothard. Another great advantage it will possess is that the approach on the Swiss side will be of the simplest character. The Jura-Simplon Railway has its terminus at Brieg, in the Rhone valley, and the tunnel mouth will be on the present level of, and at a short distance from, the end of the existing sidings of Brieg Station. The length of the tunnel will be 12½ miles, the Italian end being at Iselle. The maximum gradient will be 1 in 140, and the work will consist of two parallel tunnels—each for one pair of rails—at a distance apart of about 50ft.

This tunnel has been proposed for some years, but it was for a long time considered impracticable. The great advance, within the last few years, of engineering science has, however, convinced thinking men not only that it is feasible, but that it will possess very considerable advantages over the other tunnels. The profitable results of the St. Gothard, no doubt, stimulated its

promoters to proceed, and the great railway company of Switzerland—the Jura-Simplon Company—has taken the matter in hand. Many and great were the objections raised by its opponents, and the Swiss Government wisely decided that, before committing themselves in any way to its execution, they would obtain the opinions of a commission of experts on tunnel construction and ventilation. They had already the reports of their own able and experienced engineers, but they decided to seek advice from sources which would be absolutely disinterested and impartial. They applied to the Governments of England, Italy, and Austria to nominate an engineer, one from each country. The Hon. Giuseppe Colombo, member of the Italian Parliament, for some time Minister of the Treasury of Italy, and a leading engineer of Milan, was chosen by that country. Mr. Francis Fox, member of the Institute of Civil Engineers, was nominated by the Board of Trade, whilst Herr Wagner, one of the Government inspectors, and also engineer of the Grät Arlberg Tunnel, was the Austrian representative. These three gentlemen sat in Berne for two or three weeks, and, having visited the site and route of the proposed tunnel and railway, presented a report unanimously endorsing the views of the Jura-Simplon Railway Company and their able advisers.

Excellent arrangements have been made for carrying out the work, and a good example will be set to other employers of labour. The ventilation will be fifty times greater than in the former case—100 cubic metres being thrown in in the place of two cubic metres—an admirable method for cooling the air will be adopted, but most remarkable will be the care which will be devoted to looking after the welfare of the men and their health. On coming out of the tunnel a covered passage will connect with a large building or “restaurateur.” Every man will hand his wet clothes to a custodian, whose business will be to dry and clean them for the morrow’s work. He will be compelled to rest for half-an-hour, and he will be furnished by the contractors with a good substantial meal before he will be allowed to go into the open air. Every man will have his own bed. The “Box and Cox” arrangement, so often practised in years gone by, will not be allowed. The day-shift men will be forbidden to use the beds just vacated by the night shift. Very special precautions will be taken for the safety of the men from blasting and falls of rock, and it is anticipated that these arrangements, together with improved drills, machinery, &c., will result in the saving of nearly 50 per cent. of the time which would otherwise be occupied in penetrating the mountain.

Rotatory drills driven by hydraulic power at a pressure of 1,000lb. to the inch, invented by Herr Brandt, will be employed for perforation—and they have drilled holes 3in. in diameter and 40in. in depth into the hardest granite in ten minutes. The question of ventilation has received much consideration, and it is not improbable that the “Saccardo” system may be adopted. This consists of throwing in large volumes of air from one end by means of a fan, thus producing an effect analogous to that of the injector. If, however, electricity be adopted for tractive purposes, as is not improbable, for moving both passenger and freight trains, thus excluding the steam locomotive, the ventilation will be of the simplest character.

The contract for the construction of the tunnel—exclusive of land and certain other items—is about 2,800,000*l.*, and the time in which it has to be completed is five and a half years. The contractors are Messrs. Brandt, Brandau, and Co., of Hamburg, with whom is associated Colonel Locher, of Zurich.—*The Times.*

As the financial difficulties in connection with the tunnelling of the Simplon have been settled, attention is now being drawn, says the *Financial Times*, to the scheme for the construction of the Lotsch Mountain Railway, which is intended to act as a feeder to the Simplon Railway. The length of the projected railway, which would commence at Thun and terminate at Brieg, with a branch to Visp, would be no less than 118 kilometres, or about 73 miles. It appears that a concession for the construction of the railway was granted to Herr Desgouttes, of Berne, some time ago, with a view to a limited company being formed to proceed with the enterprise, the Canton of Berne agreeing to grant a subsidy in aid of the project. The concession will shortly expire, and the Cantonal authorities, with a view to bringing the scheme to a practical issue, propose to expend 40,000 francs in preliminary investigations, and to approach the Federal Council for the purpose of a subvention.

#### NORTH BRITISH RAILWAY INSURANCE SOCIETY.

The half-yearly general meeting of the North British Railway Insurance Society was held in Edinburgh last week, Mr. S. Scott, inspector, Edinburgh, in the chair. The Chairman, in moving the adoption of the report, referred to the proposed amendment of the Truck Acts, and said that the committee had an eye as to what was going on, and would continue to watch very

keenly any alteration or anything that might be brought forward in the future so as to safeguard the interests and the constitution of the society. The motion for the adoption of the report having been seconded, a long discussion ensued on a question raised by Mr. M'Alpine, Balloch, on the ground that a workman on the Dumbarton and Balloch joint line, who had met with an accident, had not received justice from the committee. Mr. M'Alpine moved that the meeting overthrow the decision of the committee, but after a long discussion their action in the matter was approved of. Another question was raised in regard to the disallowance of a claim by George Weston, fireman, Dunfermline, who had had his leg strained in climbing an embankment at Dunfermline in order to help at the extinction of a fire. In this case also the committee's action was sustained. The report was thereafter passed. A recommendation by the committee that that part of rule 15 with reference to accident cases submitted for treatment in the men's own homes, &c., be cancelled was defeated by a large majority. A motion by the Portobello representative that sub-sections 1 and 2 of Rule 1. be deleted, and suggesting instead that any member of five years' standing who might be desirous of retaining his connection with the society might lodge application for such retention within one month after leaving was lost. There was also submitted by Cowlaers a recommendation that sub-section 3 of Rule I. of amended rules adopted February 26th, 1894, be altered to read as follows:—“Any member leaving or being dismissed the company's service, who has been six months in the service, shall be allowed to retain his connection with the society.” This was also lost, so that the period of retention of membership in such circumstances remains applicable to members of ten years' standing. Cowlaers also put forward a recommendation that Rule II. of the superannuation scheme be altered to read as follows:—“The amount to be paid to each superannuated member who has been permanently incapacitated shall be 10*s.* per week.” This recommendation was also defeated after some discussion, so that the present rule stands. A further motion was submitted by Cowlaers to the effect that the four members of committee who retired by rotation every half-year should not be (as they at present are) eligible for re-election till the expiration of two years, but this suggestion was also defeated. This was all the business.

#### NEW ZEALAND RAILWAYS.

The annual returns of the New Zealand railways for the year ending June 30th shows that the mileage open was 2,055 miles, against 2,018 last year. The revenue was 1,376,008*l.*, an increase of 89,850*l.* The expenditure amounted to 857,191*l.*, an increase of 68,137*l.*, and the net profit for the year was 518,817*l.*, an increase of 21,713*l.* The rate of interest earned on the capital cost of the open railways (15,993,903*l.*) has been 3*l.* 4*s.* 10*d.* per cent., or 3·24 per cent., as against 3*l.* 3*s.* 10*d.* last year. Results in other Australasian colonies have been as under: Victoria, 2·74 per cent.; Queensland, 2·86 per cent.; South Australia, 2·98 per cent.; Tasmania, 1·15 per cent.; and New South Wales 3·79 per cent. on the respective invested capital. The report refers to constant demands for increased facilities and better services, but adds: “Except on the main lines of the colony, and in cases where the business fully warrants it, such demands are steadily resisted in the interests both of economy and safety. The plans upon which the New Zealand railways were originally constructed never contemplated providing for the kind of train services procurable in Europe, America, Victoria, and New South Wales. To do so would call for the entire reconstruction of our railway system at an expenditure of several millions sterling.” Additions to rolling stock and improvements to the lines at a cost of 169,227*l.* have been made during the year, charged as follows—156,731*l.* to capital account, and 12,496*l.* to working expenses.

A railway conference meets at Capetown on Monday to draw up a Carriers' Act to be in force throughout the whole of South Africa. All the Governments will be represented.

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months .....	20 7 0
Six Months .....	0 13 0
Twelve Months .....	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

- Sep. 6—North Metropolitan Railway and Canal (Half-yearly), 138, Leadenhall-street, E.C., at 12.
- Sep. 13—Glasgow and South Western Railway (Half-yearly), Glasgow, at 12.
- Sep. 13—North Cornwall Railway (Half-yearly), Launceston, at 1.
- Sep. 20—Caledonian Railway (Half-yearly and Special), Glasgow, at 1.
- Sep. 22—North British Railway (Half-yearly), Edinburgh, at 12.30.
- Sep. 27—Ottoman Railway from Smyrna to Aidin (Half-yearly), Winchester House, at 12.

**Vale of Glamorgan Railway.**—With reference to a statement that has been made as to the Vale of Glamorgan Railway Company proposing to make a branch line to Southerndown and Ogmore, this is by no means a new idea, it having been intended in the last session of Parliament to deposit a Bill. The scheme, however, was abandoned in consequence of the threatened opposition of the Earl of Dunraven, the principal landowner. Since then there has been a sale of a great deal of property in Southerndown, and the High Sheriff (Mr. Thompson), who has evinced considerable interest in the project, became the purchaser of a large portion of this. As the result it will be possible to acquire the necessary land without scarcely touching the Dunraven estate. Under these circumstances there is every probability of the proposed scheme being successfully carried through in the next Parliamentary session."—*South Wales Daily News*.

SEPTEMBER 3, 1898.

## THE SOUTH WALES SETTLEMENT.

At last the disastrous dispute in the South Wales coal industry has been settled. Since the beginning of April last the trade of the district has been completely dislocated by the almost entire stoppage of the coal supply, and widespread disaster has resulted, from the effects of which it will certainly take years to recover. Had the havoc and distress been confined to those directly responsible for the disturbance to trade it would not have mattered so very much; but the complete cessation of the coal supply has been by no means restricted in its effects to the workmen directly associated with the South Wales coal trade. Other important branches of trade have suffered very serious losses from causes over which those interested had not the slightest control. The direct loss of dividends suffered by railway shareholders for the period to June 30th last was certainly well over a quarter of a million, and further heavy losses will have to be faced this half-year even if the existing promises of a speedy resumption of work are fulfilled. In addition to this direct loss of dividend the shareholders of the South Wales railways, and also of the Great Western Company, have had to endure considerable depreciation in the market values of their holdings, due to the same causes. The South Wales districts are so largely dependent upon their enormous and growing mineral industry that it is obvious nothing but disaster could be expected to follow upon the almost complete suspension of so vital a trade, and what the total loss in wages, railway receipts, and general disturbance of trade to the district during the protracted struggle has been it is impossible to say, but it certainly cannot be less than several millions of pounds. Obviously the men concerned in the dispute have lost by the stoppage of their wages for five months many times the sum of the additional weekly wage for which they were fighting, and, after all, they have had to accept practically their employers' terms. It will take many years for them to recover the amounts lost by them in wages during the twenty-three weeks' struggle, even with the aid of the small advantage they have apparently gained as conceded by the masters. Besides the direct loss to the district other influences of an indirect character may be referred to. The suspension of the usual autumn manoeuvres of the Navy was virtually due to the stoppage of the supply of South Wales coal. Another result has been the particularly foul atmosphere on the "unde ground" railways, due to the use of inferior coal because of the difficulty of obtaining "steam" coal as supplied by the South Wales coalfields. One of the most striking features of the dispute has been the lack of any definite demand by the men. Among both the men and their leaders much difference of opinion has existed throughout the struggle as to what was being aimed at in the dispute. A general feeling of discontent, and a desire to extort as much as possible from the employers, seem to have been the only controlling influences. The men's case has also been so badly represented, and their organisation so bad, that the employers have had to refuse to discuss the matter with their employés' ostensible representatives. No doubt this absence of any coherent demand, combined with their poor organisation, has been mainly responsible for the unusual length of the struggle, for it has existed longer than the previous disputes in Durham, the Midlands, and in Scotland, which took place in the years 1892, 1893, and 1894 respectively. Another remarkable outcome of the

struggle was the utter inability of the Board of Trade conciliator to hasten the settlement. Sir Edward Fry, the conciliator appointed by the Board of Trade, found himself confronted by confusion among the men and their representatives, and very soon had to give up the task set before him as hopeless. Another remarkable idea thrown out by the men at the beginning of the dispute was that as they could not regulate the sliding-scale of wages agreed on, based upon the 1879 standard of wages, they should be allowed to have a voice in regulating the selling price of coal upon which the sliding scale depended. Such a suggestion was, of course, absurd, and was not for a moment entertained by the employers. The obvious result of such an experiment in economics would be to raise the price of South Wales coal to such an extent that the trade of the district would be speedily driven to other channels. The very fact that such a proposal was made was an indication of the pooriness of their case. The settlement arrived at is based upon a minimum wage of  $12\frac{1}{2}$  per cent. above the 1879 standard, and the fact that the masters intimated that their proposal, now accepted, was in the nature of an ultimatum by the employers, seems to have facilitated the acceptance of their offer. It is a pity that no machinery exists to prevent such a state of affairs, whereby the unconsidered action of a body of men may, as in this case, play widespread havoc with the trade of a whole district. The South Wales dispute has shown that Governmental conciliation of a voluntary character is practically of no use. Compulsory arbitration might provide a remedy for this unfortunate state of affairs, but the country is hardly prepared to consider legislation of so drastic a character.

## THE "AYRSHIRE" DIVIDEND.

After the very disappointing dividend record of the English railways for last half-year the very favourable result shown by the Glasgow and South Western for the period to July 31st last was particularly welcome. Its distribution announced on Tuesday last was at the rate of  $5\frac{1}{4}$  per cent., against 5 for the first half of 1897, the balance carried forward being almost the same figure as that of a year ago. On the strength of this increase in the dividend the quotation for the new deferred ordinary stock rose to 66, in fact 67 was touched in Glasgow. Though the line was favoured with comparatively good traffics last half-year, it was expected, in the light of recent exhibits of English companies, that expenses would also show a very large growth, and the best outcome that could have been anticipated was that the dividend last half-year would be maintained at 5 per cent. The published increase in gross receipts was 29,42*kl.*, and as the addition of  $\frac{1}{4}$  per cent. to the dividend represents only about 6,000*l.*, that sum left a considerable margin for additional expenses. But in the second half of 1897 there was an increase of about 16,000*l.* in receipts, and it was accompanied by a decline of  $\frac{1}{4}$  per cent. in the dividend for that period, owing to the still larger addition to working expenses. For the year ended July 31st last the dividend on the original ordinary stock of the Glasgow and South Western Company works out at  $5\frac{1}{2}$  per cent. Deducting from this the  $2\frac{1}{2}$  per cent., being the fixed rate of dividend attached to the preferred ordinary, leaves the current annual dividend on the deferred at  $2\frac{5}{8}$  per cent., and on this basis the present yield on the latter is nearly 4 per cent. It is curious to note that, whilst the preferred ordinary stock carries  $\frac{1}{8}$  per cent. less dividend than the deferred at the present time, its price is 17 points higher. This difference is, of course, the price which has to be paid for the additional security enjoyed by the preferred ordinary stock. At the same time, it would appear to

point to the relative cheapness of the deferred stock ; for whilst that stock as already stated yields nearly 4 per cent. the preferred yields only about 3 per cent. We may recall the fact that on November 13th last, in estimating the values of the new stocks of the "Ayrshire" Company, we said that the "preferred ordinary will probably command 85," and, further, that "Ayrshire deferred ordinary would get "2½ per cent., and should therefore fetch 70." Both these prices have been since exceeded for the new preferred, and deferred stocks have this year touched 86½ and 71½ respectively. Together the values of these stocks thus represented 157¾ for the old ordinary stock compared with 148 at the date of our article. In company with all fixed dividend stocks the preferred ordinary has declined slightly. The deferred ordinary also has not maintained its highest figure, but it looks cheap, particularly in comparison with the corresponding securities of the Caledonian and North British companies.

## ARGENTINE RAILS.

On the 6th ultimo we devoted an article to Argentine Railway stocks, and drew particular attention to the fact that whilst their intrinsic merits were improving, prices were steadily falling. Such a condition of affairs was obviously one that could not be expected to last long; indeed, as we pointed out at the time, it was solely due to the neglected condition of the market. Our advice to the effect that a favourable opportunity for making purchases was thus presented has certainly proved to be correct, for already a general advance in the securities singled out by us has been recorded. The immediate cause of the recovery has been the decline in the gold premium, whilst the old story about war between Chili and the Argentine Republic now gained but little credence, the precarious financial position of Chili being very reasonably pointed to as an indication to the contrary. Argentine Government issues have consequently advanced, and the leading railway issues have recovered in sympathy. Of course the decline in the gold premium means a substantial benefit to all the railways in which British investors are interested, for it means that the currency earnings will go further in providing for fixed charges and dividends, and, in fact, all payments will have to be made in sterling. On August 6th we pointed out that the gold premium was then 11 points below the figure a year previously. Since that date there has been a further decline in the premium on gold at Buenos Ayres from 174 per cent. to 159 per cent., and it is now about 30 per cent. lower than it was twelve months ago, though latterly there has been a rising tendency. The advance in the prices of the leading stocks will be seen from the following comparison of prices on August 6th, the date of our article, and at the present time:—

Stock.	Prices.		Advance.
	Aug. 6.	At present.	
Argentine Great Western second debenture	88	89	+1
Buenos Ayres Great Southern preferred ...	136	139	+3
"    "    ordinary ...	137	144	+7
"    "    new shares..	4½	4½	...
Buenos Ayres and Ensenada ordinary .....	65	69	+4
Buenos Ayres and Pacific preferred .....	89	87½	-1½
Buenos Ayres and Pacific second debenture	89	92	+3
Buenos Ayres and Rosario ordinary .....	69½	76	+6½
Buenos Ayres Western ordinary .....	10	11½	+1½
"    "    deferred .....	6	6½	+½
Central Argentine ordinary .....	78	84½	+6½
Cordoba Central (C. N. section) 4 per cent. debenture stock .....	87	88	+1
Cordoba Central income debenture stock ...	45½	49½	+4
North West Argentine 6 per cent. debenture stock .....	106	110	+4
Santa Fé and Cordoba Great Southern 6 per cent. debenture stock .....	114	116	+2

All the above stocks with one exception show advances, but it will be noted that in Buenos Ayres Great Southern ordinary stock and new shares, and in Rosario ordinary stock, which we particularly drew attention to, the proportionate advances have been large. Business in this market, in sympathy with that in the Argentine Government issues, has been much more active at the higher prices, and in view of the improved conditions to which we have drawn attention the advances seem to be fully justified. It will be noted that Buenos Ayres Great Southern new shares have advanced to  $4\frac{3}{4}$  per share of 10*l*, with 2*l*. 10*s*. paid, and 1*l*. 10*s*. premium also paid. At this figure, allowing for the fact that they only carry 4 per cent. until 1902, the present value of these shares is equal to 129 for the old stock. In other words, a buyer of the new shares at  $4\frac{3}{4}$  will have in 1902 a stock equal in all respects to the present stock at a price 14 points below the existing quotation for the latter. Those who do not mind the restricted market in the new shares in the intervening period would thus do well to exchange from the old stock into the new shares, and thus save the 14 per cent. of difference shown between the market values of the two securities. There are signs of increasing activity in this market, from which the various railway issues should benefit. Among the leading stocks Rosario, we think, still look cheap.

### LESSONS OF RAILWAY STRIKES.

The general manager of the Cork Bandon and South Coast Railway, Mr. E. J. O'B. Croker, has prepared a little work entitled *Retrospective Lessons on Railway Strikes* (Simpkin Marshall and Co.), which should be studied by every one interested in the railway labour question. Mr. Croker is specially qualified to speak on the subject, for he had to deal with a strike of the employes of his company which extended from January to May last, and was of a peculiarly bitter character. In fact the Amalgamated Society of Railway Servants, foiled in their attempt to bully the larger companies in Ireland and on this side of the Channel, hoped to restore themselves in the eyes of their weak following by securing a victory over this small company, and deliberately went out of their way to pick a quarrel with the general manager and the directors in order to carry out this brilliant design. But Mr. Croker and the board of the Cork and Bandon Company stuck to their guns, and in the end came out victorious. It was obvious that they had grave difficulties to surmount, for the line is comparatively poor, is made up almost entirely of single line, and the great bulk of their men left at two days' notice, doing everything in their power by picketing and violence to prevent others from taking their places. In fact, the struggle was characterised by bitter feeling and violence, such as very rarely accompany a labour dispute. Many of the former employes were sentenced to terms of imprisonment for violence, and various attempts of a very cowardly kind were made to wreck trains. Actions taken against such offenders were defended by the Amalgamated Society of Railway Servants, whose funds were thus being utilised to foster lawlessness and gross insubordination. Another feature of the dispute was that the company proceeded against the men who left their posts without due notice in spite of a warning that this course would be taken, and in the result many were fined for this breach of contract. For the most part the book is made up of a historical summary of the various strikes and threatened strikes in Great Britain and Ireland in recent years; and Mr. Croker, from his position, has been able to amplify the records by copies of various official documents. The "lesson" as regards the Cork and Bandon was that various men found their

places filled up and were presumably thrown on the funds of the society for their support. For the most part Mr. Croker wisely leaves it to his readers to draw their own conclusions from the facts recited. They are sufficiently obvious and certainly do not encourage railway employes to assist in further crusades undertaken by the labour agitator.

### PASSING NOTES.

The traffic receipts for the week ending August 28th, on thirty-three of the principal lines of the United Kingdom, amounted to 1,860,230*l*., which was earned on 19,253*½* miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,833,672*l*., with 19,034*½* miles open. There was thus an increase of 26,558*l*. in the receipts, and an increase of 219 in the mileage. The aggregate receipts for nine weeks to date amounted on the same thirty-three lines to 16,912,954*l*., in comparison with 16,596,557*l*. for the corresponding period last year; increase, 316,397*l*.

It is understood that the Great North of Scotland Railway has in hand a scheme for amalgamating the deferred ordinary stock No. 1 with the deferred converted ordinary stock. The shareholders will have an opportunity of expressing their views upon the proposals on September 21st. The present holders of the deferred ordinary No. 1 stock will be entitled to an equal amount of Great North of Scotland deferred ordinary. This will bring the capital into a more readily marketable condition. The management of this line is in a most satisfactory state, and there is not any doubt that the proposals set forward will be accepted. The dividends declared are probably not as satisfactory as they might be, but there are evident signs of progress. The scheme above mentioned has been authorised by the Act of last session.

The Trades Union Congress have been much exercised during the week on the subject of federation of unions, national and international—a subject as complicated as the universal peace proposals (if any) that may emanate from the Czar's great conference (if it should meet). On lesser lines, the Amalgamated Society of Railway Servants and the General Railway Workers' Union are said to have agreed upon a basis for amalgamation. It is possible that shortly the whole of the railwaymen's societies will be merged into one organisation.

The Great Eastern Railway Company, which provides direct communication to Doncaster, both from London and Newmarket, has made special arrangements for the St. Leger and Cup Days. Express trains will leave Liverpool-street for Doncaster each day at 8.40, 11.0 a.m., and 4.30 p.m., returning from Doncaster to Liverpool-street at 8.10, 11.5 a.m., 1.42, and 5.25 p.m. On the St. Leger Day a special excursion train will be run from Liverpool-street and Newmarket to Doncaster.

The North Eastern and North British railway companies have now settled their dispute with reference to the haulage of the fast through London expresses from Newcastle to Edinburgh. It has been decided that each company shall take a half-share of the traffic, and that all trains running from Newcastle to Edinburgh without stopping shall be hauled and worked by the North Eastern. The North Eastern will put on an improved corridor train.

Mr. O. C. Waterfield, a prominent City company director, died suddenly last week of cerebral hæmorrhage. Mr. Waterfield was chairman of the Buenos Ayres and Valparaiso Transandine Railway Company, a director of the Argentine Great Western Railway Company, and his Highness the Nizam's Guaranteed State Railways Company.

In consequence of the success which has attended certain experiments with regard to electric lighting in several of their trains, the Metropolitan Railway Company have had several carriages built fitted with electric light. The new carriages will be running by the end of this month.

The Scotch railway traffic returns for the past week are very satisfactory. The leading lines report heavy totals and increases, though comparison was with unusually large amounts.

## Money and Stock Markets.

The monthly settlement in Consols takes place on the 29th inst.; the fortnightly settlement in other Securities commences on the 13th inst.

CITY, FRIDAY EVENING.

In the MONEY MARKET discount rates are slightly better, day to day accommodation being obtainable at  $\frac{3}{4}$  to 1 per cent., loans for a week commanding about the latter figure. The rate for three months' paper is easier at  $1\frac{1}{4}$  to  $1\frac{1}{2}$  per cent. The Bank Return, issued yesterday, shows a decrease in the reserve of 246,000*l.*, the circulation of notes and coin being 23,867,000*l.*; and the proportion to the current liabilities has risen  $\frac{1}{5}$  to  $48\frac{1}{2}$  per cent. The public deposits are 1,110,000*l.* higher owing to revenue collections, and there has been a further decline of 1,620,000*l.* in the "other securities," the continued decrease in which continues noteworthy. The private deposits are 1,620,000*l.* lower on balance.

Silver bars are now quoted at 27 $\frac{3}{4}$ d. per oz., being 1-16d. lower on the week. A year ago the price was 24d.

Eastern exchanges are telegraphed as follows:—Bombay, 1*s.* 3 $\frac{1}{2}$ d.; Calcutta, 1*s.* 3 $\frac{1}{2}$ d.; Hong Kong, 1*s.* 11 $\frac{1}{2}$ d.; Shanghai, 2*s.* 7 $\frac{1}{2}$ d.; Singapore, 1*s.* 11 $\frac{1}{2}$ d.

The premium on gold at Buenos Ayres has risen during the week from 160.50 to 161.56 per cent., making the paper dollar (nominally worth 4*s.* 2d.) now actually worth 1*s.* 6.20d. A year ago the premium was 187 per cent., and the value of the paper dollar 1*s.* 4.58d.

The Valparaiso 90-day exchange comes over to-day at 13 15-16d., a fall of 1-16d. on the week. A year ago it was 17 9-16d.

The Rio de Janeiro exchange on London is 7 13-32d., being 3-32d. higher on the week. A year ago it was 8d.

The Bankers' Clearing-house return for the week ending August 31st, 1898, shows a total of 144,641,000*l.*, as compared with 164,142,000*l.* for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£35,033,218	£35,772,737
Total Reserve .....	£23,867,823	£24,568,642
Proportion of Reserve to Liabilities...	48 $\frac{1}{2}$ per cent.	52 $\frac{1}{2}$ per cent.
Notes in Circulation .....	£27,935,395	£28,004,095
Bank Rate of Discount .....	2 $\frac{1}{2}$ per cent.	2 per cent.
Open Market ditto .....	1 $\frac{1}{8}$ per cent.	1 $\frac{1}{2}$ per cent.
Consols (account) .....	110	112
French Rentes (account) .....	103 <i>f.</i> 50 <i>c.</i>	104 <i>f.</i> 17 <i>c.</i>
Paris Cheque Exchange .....	25 <i>f.</i> 23 $\frac{1}{2}$ <i>c.</i>	25 <i>f.</i> 18 $\frac{1}{2}$ <i>c.</i>
New York 60 days ditto .....	\$4.80	\$4.83 $\frac{1}{2}$

The STOCK MARKETS during the week have been stronger in tone, although the amount of business done has not been very large. The manifesto of the Tsar and the end of the coal strike in South Wales have had a good influence; while to-day the persistent rumours of the acquisition of Delagoa Bay by Great Britain, with the active support of Germany—although persistently denied—has had a good tendency. In British railways the tendency has been upward, this being most marked in the case of the South Wales lines, on the week Barry being up 4 and Rhymney 6. American Rails have been firm, the principal advance having been 3 in Central Pacific and 4 $\frac{1}{2}$  in Wabash 6 per cent. B bonds. On the other hand, the Great Northern (United States America) preferred stock has fallen 3. In Grand Trunks there has been a substantial improvement, the monthly statement on Thursday being much better than had been anticipated. The first preferences are up 4 $\frac{1}{2}$ , the second 3 $\frac{1}{2}$ , and the third 1 $\frac{1}{2}$  on the week. Canadian Pacific have also risen 2 $\frac{1}{2}$ . The only relapse of the week in British Possessions has been a fall of 5 in Midland of Western Australia 6 per cent. mortgage. The Foreign Railway

market has been strong, Argentine Great Western having gained 4, Buenos Ayres and Southern 3, Cordoba and Rosario 6 per cent. preference 4, and Recife and Sao Francisco and Southern Brazilian 6 per cent. debentures 4 each. Noteworthy improvements have been the rise of 5 in United Railways of Havana and 9 in ditto 5 per cent. irredeemable debenture stock. Manila 6 per cent. debentures have risen 5, ditto prior lien bonds, series A, 4, and ditto B, 7. Among Miscellaneous securities, there has been on the week a drop of 5 in London General Omnibus Company.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>

			East and West India Dock 2 $\frac{1}{2}$ ...	—	—
			London and St. K. Dock ...	—	—

The Stock Exchange Committee has ordered the undermentioned securities to be quoted in the Official List:—Cardiff Railway Company—500,000*l.* preferred ordinary stock of 1896, in lieu of the scrip now quoted. Jarrahdale Jarrah Forests and Railways, Limited—100,000*l.* 5 per cent. first mortgage debentures of 100*l.* each, Nos. 1 to 1,000. Nashville Chattanooga and St. Louis Railway Company—\$300,000 additional first consolidated mortgage 5 per cent. gold bonds of 1928, Nos. 15,699 to 15,998. Northern Pacific Railway Company—\$753,000 additional prior lien Railway and Land Grant 4 per cent. gold coupon bonds, Nos. M75,327 to M76,079 for \$1,000 each.

Messrs. Thackeray and Co., of Cardiff, under date September 1st, report as follows:—Barry undivided, 260 $\frac{1}{2}$ xn (a rise of 11); ditto preferred, 123 (a rise of 2); ditto deferred, 140xn (a rise of 6); Cardiff preferred, 113 (unchanged); Port Talbot 9 (unchanged); Rhondda and Swansea Bay, 4 (unchanged); Rhymney undivided, 262 $\frac{1}{2}$  (unchanged); ditto preferred, 121 (a fall of 1); ditto deferred, 144 $\frac{1}{2}$  (a rise of 3 $\frac{1}{2}$ ); Taff Vale, 80 $\frac{1}{2}$  (a rise of 1 $\frac{1}{2}$ ); Vale of Glamorgan, 126 (unchanged). The final settlement of the protracted South Wales coal strike was made to-day, and prices show a still further improvement at the close. Barry deferred and allotments have been in great request, and with Rhymney deferred show a good rise on the week.

The death is announced of Mr. Deloitte, founder of the firm of Messrs. Deloitte, Dever, Griffiths, and Company, the well known firm of accountants.

The death is announced of Mr. W. H. Lidiard, a jobber in the foreign market of the Stock Exchange.

## American & Canadian Railways.

### NET EARNINGS FOR THE FIRST HALF-YEAR.

It is hardly necessary at this late date to point out that railway earnings for the first half of the present year were in a high degree satisfactory. It is true that toward the close of the six months' period the gains both in gross and net were not on as large a scale as previously, but it is to be remembered that the last half of the year, besides witnessing great demoralisation in railway rates, which latter feature finds reflection more often in reduced net than in lowered gross receipts, found the country engaged in a foreign war, which, while furnishing work for the railroads in the matter of moving troops, munitions, and supplies, was credited with arresting and delaying considerable business which would otherwise have been carried on. The fact that the last quarter of the fiscal year is usually a lean period in railway circles should also not be forgotten. In spite of all these circumstances, however, it is found that little ground was lost by the railway interests during the last quarter, and, indeed, one group of roads shows an actual gain in net, where the contrary was the case in the first three months of the present year. The close of the first half of the year, therefore, finds the heavy gains of the first quarter nearly, if not quite, maintained, and certainly this is true as regards gross earnings, though a fractional decline in net gains is observed. The total earnings of 111 systems, most of them for the full six-months' period, and including a number of systems which only return quarterly reports, aggregate \$426,988,920, while the net returns were \$124,015,975, gains respectively of 11.5 per cent. in gross and of 14.5 per cent. in net, the larger proportion of gain in net showing that economies in railway management have profited the roads to a great extent. Examples of this are found in the heavy increases reported by the Pacific and the south-western systems. For instance, the Pacific group shows a gain of 26 per cent. in gross earnings and of nearly 47 per cent. in net. The gain on the south-western group is 16.6 per cent. in gross and nearly double that per-centage in net. It is true that the gains in gross earnings on the granger systems exceeded the gains in net, and the same is true of the trunk lines, which show an increase of 7.5 per cent. in gross and of 6.4 per cent. in net. The increase on the Eastern roads proves to have been 3 per cent. in each case; but the coal roads, while gaining only 5 per cent. in gross, increased to 10 per cent. in net. The southern group, with 9.7 per cent. gain in gross, reported an increase of over 10 per cent. in net. Compared with the first quarter of the present year, it is found that the central western and the southern roads improved their position as regards gross receipts, but the relatively more favourable situation as regards net returns is shown by the fact that at the end of the six months' period the increases in net reported by the grangers, the central western, the southern, and south-western roads were all larger than they were at the end of the first quarter. One group, the eastern roads, which showed a decrease of 1.5 per cent. in net for the first quarter, shows a gain of 3 per cent. for the six months' period. The following large gains in gross earnings are reported:—

Chicago Burlington and Quincy.....	\$2,910,000
Chicago Milwaukee and St. Paul .....	2,011,000
Illinois Central .....	2,529,000
Wabash .....	992,000
*Erie .....	777,000
*Grand Trunk system .....	975,000
New York Central .....	831,000
Pennsylvania (E. of P.) .....	1,774,000
Pittsburg Cincinnati Chicago and St. Louis .....	817,000
Lake Shore and Michigan Southern.....	598,000
Baltimore and Ohio .....	1,361,000
Reading Railroad .....	561,000
*Reading Coal and Iron Company .....	745,000
Louisville and Nashville .....	1,143,000
Southern .....	907,000
Canadian Pacific .....	1,884,000
*Northern Pacific .....	2,485,000
Oregon Railroad and Navigation .....	1,277,000
*Pacific Coast Company .....	997,000
*Southern Pacific .....	4,362,000
Union Pacific System .....	934,000
Atchison .....	2,707,000
Denver and Rio Grande.....	692,000
Total .....	\$34,268,000

\* Five months.

The above twenty-three companies, it will be seen, furnish a total of over \$34,000,000 out of the total of about \$44,000,000 gain shown by all the roads. The Southern Pacific system, with a gain of \$4,362,000 for five months, easily leads in size of gain, but the gains of the Chicago Burlington and Quincy, the Illinois Central, and the Northern Pacific, the latter also being for five months, are also very heavy. Fully eleven systems, it will be seen, show gains in excess of \$1,000,000 each. The heaviest

decrease in gross earnings reported barely equals \$50,000, and there are only ten out of 102 systems reporting decreases of any kind, all but one of these being located in the eastern and coal-road groups. The heavier gains in net earnings follow:—

Chicago Burlington and Quincy.....	\$564,000
Chicago Milwaukee and St. Paul .....	331,000
Illinois Central .....	1,087,000
Grand Trunk system .....	626,000
*Baltimore and Ohio .....	1,198,000
Central of New Jersey .....	234,000
Lehigh Valley .....	445,000
*Minneapolis St. Paul and Sault St. Marie .....	214,000
Chesapeake and Ohio .....	224,000
Louisville and Nashville .....	273,000
Southern .....	438,000
Atchison .....	1,350,000
Denver and Rio Grande.....	205,000
Canadian Pacific .....	486,000
*Northern Pacific .....	1,995,000
Oregon Railway and Navigation .....	511,000
Oregon Short Line .....	200,000
*Pacific Coast Company .....	374,000
*Southern Pacific .....	2,355,000
Union Pacific .....	1,157,000

Total .....

\$14,267,000

\* Five months.

The Southern Pacific here, as in gross earnings, leads in amount of gain, followed by the Northern Pacific, Atchison, Baltimore and Ohio and Illinois Central. Decreases were more numerous in net than in gross returns, the eastern, coal and southern roads furnishing the majority of losses. The heaviest decrease was that of the New York Central, while the Boston and Maine and the Northern Central in the eastern group showed smaller decreases.

### THE CANADIAN RATE WAR.

A Montreal despatch says that the Canadian Pacific officials do not conceal their satisfaction with the result of the recent meeting of freight agents at Denver, at which it was decided to submit to arbitration the Canadian Pacific's demand for a 10 per cent. differential upon Pacific coast freight. They say this is precisely what the Canadian Pacific contended for; in other words, that the whole matter of freight and passenger rates be submitted to arbitration. This was the proposition made by McNicoll, who now thinks that the Interstate Commerce Commission will naturally come to the conclusion that as the freight differential is to be submitted to arbitration, the passenger differentials should be similarly treated. Mr. Joseph Price, vice-president of the Grand Trunk Railway Company, said on Monday:—"Sir Rivers Wilson and I had an interview with Sir William Van Horne in Montreal recently, with what results I do not care to say at present; but Sir Rivers and myself will again see him shortly. The rate war, of course, will be the question discussed, and I have high hopes as to the result of the conference. I wish it to be more generally understood that the war is chiefly between the Canadian Pacific and the transcontinental American lines. Unfortunately, our close connections from Chicago and the west made it impossible for us to avoid being drawn into it. We are most anxious that there should be peace with the Canadian Pacific, with whom we enjoyed such intimate relations for many years."

### SOUTHERN RAILWAY.

The accounts of this company for the year ending June 30th show:—

	1896-7.	1897-8.
Freight earnings.....	\$12,386,902	\$13,402,305
Passenger earnings.....	4,832,848	5,260,881
Miscellaneous .....	1,859,750	1,978,112
Total earnings .....	\$19,079,500	\$20,641,298
Total expenses.....	13,233,156	14,155,799
Net earnings.....	\$5,846,344	\$6,485,499
Other income .....	286,832	456,852
Total net income .....	\$6,133,176	\$6,942,351
Interest and rentals .....	\$5,612,234	\$5,862,768
Miscellaneous .....	75,022	72,571
Total disbursements .....	\$5,687,256	\$5,935,339
Balance .....	\$445,920	\$1,007,012

The balance-sheet at June 30th, 1898, shows the capital to be as follows:—Common stock, \$120,000,000; preferred stock, \$57,290,400; funded debt, \$101,236,000.

The average mileage operated was 4,827 (against 4,806 in the previous year); the number of passengers carried, 4,200,347 (against 4,057,327); the average rate per passenger per mile, 2.322 cents (against 2.372 cents); the quantity of freight moved

8,554,012 tons (against 7,904,706 tons); the average rate per ton per mile, 0.933 cent (against 0.936 cent); the ratio of operating expenses to receipts, 68.58 (against 69.35) per cent.

The balance at credit of "Profit and Loss" account on June 30th, 1897, was \$1,139,831; the credit balance of income account for the year ended June 30th, 1898, was \$315,120—a total of \$1,454,951.

President Samuel Spencer in his report dated August 18th, 1898, says:—

"Consolidated bonds reserved in the hands of the trustees for future improvements amounted, at the close of the year, to \$14,900,000, issuable only for expenditures for new and additional property, under the limitations specified in the mortgage, and at a rate not exceeding \$2,000,000 in any one calendar year. No bonds were withdrawn from the trustee, under this provision of the mortgage, during the calendar year 1897. \$1,000,000 have been withdrawn during the year 1898, as stated below. It is not proposed to make further withdrawals this year. The company has no floating debt, and has had none since its organisation. The liabilities of every character of all subordinate companies operated as a part of the system, whether leased or owned, are shown in the balance-sheet, and are treated as liabilities of this company. The increase during the year of \$2,990,400 par value in the amount of preferred stock outstanding was in part payment for the Memphis and Charleston Railroad. There has been no change during the year in the amount of common stock outstanding.

"During the year over two hundred new manufacturing establishments of various kinds were wholly or partially constructed at points upon the company's lines. The aggregate cost of these plants, together with the cost of additions to existing plants made or begun during the year, is estimated to be over \$4,000,000. These new plants include thirteen cotton mills, which, together with additions during the year to previously existing mills, will contain about 258,000 spindles and about 2,200 looms.

"There have been constructed during the year by the company over 12 miles of additional side-tracks to new industries whose business is, or will be, tributary to the company's lines.

"These improvements indicate a steady and substantial growth of manufacturing industries in the South. The traffic upon the company's lines was somewhat affected at all points, and was practically stopped on certain portions in Alabama and Mississippi by the presence of yellow fever in the autumn and early winter of 1897.

"Pursuant to the policy adopted in 1897, the accounts of the company have been examined by certified public accountants, and the certificate of Messrs. Patterson and Corwin, as the result of the examination, is attached to this report."

### MEMPHIS AND CHARLESTON.

The annual report of the Southern Railroad Company just issued states that the company purchased during the year, through the Reorganisation Committee, of which Mr. Adrian Iselin, jun., was chairman, the property and franchises of the Memphis and Charleston Railroad Company. The purchase was made under an agreement between the committee and the Southern Railway Company, dated February 18th, 1898, the company issuing, for account of the purchase, its obligations, secured by liens upon the Memphis and Charleston property, and preferred stock, as follows:—

Southern Railway Company, Memphis Division, first mortgage bonds, bearing interest at 4 per cent. per annum until July 1st, 1901, then at 4½ per cent. until July 1st, 1906, and at 5 per cent. thereafter .....	\$5,083,000
Southern Railway Company, Memphis Division, second mortgage bonds, bearing interest at 5 per cent. per annum .....	1,500,000
Southern Railway preferred stock .....	2,990,400

The total authorised issue of Memphis Division first mortgage bonds is \$8,000,000, \$1,417,000 of which are reserved for future improvements upon the Memphis Division, to be issued at a rate not exceeding \$100,000 per annum, and \$1,500,000 additional are reserved solely for the construction, if determined upon, of a line of railway between Stevenson and Chattanooga. If not used for this purpose the \$1,500,000 of bonds cannot be issued. The total authorised use of Memphis Division second mortgage bonds is \$2,500,000, \$1,000,000 being reserved for improvements or for the purchase of additional property. The \$1,500,000 of second mortgage bonds have not been sold, and, pending their sale, your company has issued \$1,200,000 of certificates of indebtedness. These certificates are payable in semi-annual instalments of \$200,000 during three years, and are secured by a pledge of the \$1,500,000 second mortgage bonds. \$200,000 of the certificates of indebtedness were paid on June 1st, 1898. When all of them are paid the \$1,500,000 second mortgage bonds will be an asset in the treasury of your company to be disposed of as circumstances may render it expedient. The Memphis and Charleston Railroad property was delivered

to the Southern Railway Company, under order of court on March 1st, 1898, and has since that date been operated as the Memphis division of this company, the four months' earnings and expenses and six months' interest on the bonds and the certificates of indebtedness issued for the purchase being included in the income account, as above stated. The interest on these securities accruing prior to March 1st was received in cash from the receivers of the Memphis and Charleston Railroad Company, and has been credited in income account accordingly. The earnings and expenses of the Memphis and Charleston Railroad for the year ended June 30th, 1898, including the results of operation by the receivers for eight months, and by the Southern Railway Company for four months, were:—Gross earnings, \$1,552,500; operating expenses (including taxes and trackage rental paid the N.C. and St. Louis Railway Company), \$1,149,853; net earnings, \$402,647. The annual interest charges (until July 1st, 1901) on account of this property will be—4 per cent. on \$5,083,000 first mortgage bonds, \$203,320; 5 per cent. on \$1,500,000 second mortgage bonds (now owned by the Southern Railway Company), \$75,000; total, \$278,320. These charges will increase in 1901 \$25,415 and in 1906 \$25,415 additional.

### NEW YORK ONTARIO AND WESTERN.

This company has issued the following preliminary statement of operations for the year ending June 30th, 1898:—

	1896-7.	1897-8.
Gross earnings .....	\$3,894,402	\$3,914,635
Operating expenses and taxes .....	2,780,495	2,801,643
Net earnings .....	\$1,113,907	\$1,112,992
Other income .....	82,800	82,950
Net income .....	\$1,196,707	\$1,195,942
Interest and rentals .....	796,797	795,542
Balance surplus .....	\$399,910	\$400,400

The balance-sheet to June 30th, 1898, shows a funded debt of \$13,975,000, common stock \$58,113,982, preferred stock \$5,000. The company owns stocks and bonds of other companies, which it values at \$3,450,300. The accumulated balances to credit of profit and loss account amount to \$2,611,173.

### SHIP CANAL FROM THE GREAT LAKES TO THE HUDSON RIVER.

A preliminary examination has been made for a ship canal from the great lakes to the navigable waters of the Hudson River of a sufficient capacity to transport the tonnage of the lakes to the sea. In his report on the subject the British Consul-General in New York says three routes are stated to be possible. First, from Lake Erie by the Upper Niagara River to the vicinity of Tonawanda or Lassalle, thence by canal with locks to the Lower Niagara River to some point on Lake Ontario, through Lake Ontario to Oswego, up the Oswego and Oneida Rivers to Oneida Lake, through the lake and across the divide to the Mohawk River and down that river to the Hudson at Troy. The second route would follow the line of the Erie Canal from Lake Erie and the Niagara River through to the Hudson, or this line so modified as to provide a continuously descending canal from Lake Erie to the Hudson. The third route coincides with the first from Lake Erie to Lake Ontario, running thence through Lake Ontario to the St. Lawrence River, and down that river to some point near Ogdensburg, crossing the State of New York to Lake Champlain, up the lake, and then following in general the route of the Champlain Canal to the Hudson at Troy. The relative merits of these routes are discussed in the report, and the first is considered the best; but the cost of construction is estimated at about 40,000,000*l.*, and the cost of maintenance at about 400,000*l.* a year. It is stated that such a canal would have no military value, and that it is not advisable that its construction should be undertaken by the Government. The opinion is expressed that if, beyond the improvements now being carried out under existing plans, the Erie Canal be further improved so as to be made navigable for 1,500-ton barges, necessary alterations being made in its alignment so as to give a continuously descending canal from Lake Erie to the Hudson, and the Mohawk River be canalised, this would enable cargo to be transported from east to west at a cheaper rate than by a ship canal, and that the cost would be approximately one-fourth that of a ship canal.

### THE RATE WAR.

The situation in regard to a section of American rails and the Canadian railway issues generally (says the *Pall-Mall Gazette*) may be said to turn on the rate war. The "House" has made up its mind that this time a settlement is to be effected, and any little favourable feature, such as a good Union Pacific statement

a "bull tip" from Mr. Pierpont Morgan in regard to Northern Pacifics, or other items that might be supposed to have been pretty well accounted for by the levelling up of prices, come as a further incentive to completely discount such settlement. Grand Trunks, as we intimated a day or two ago, might, from the nature of the account, have been expected to rally after yesterday's statement had it been as bad as was expected. The comparatively excellent result—how it was obtained has yet to be more fully explained—made the market quite cheerful, and here, too, the possibility of a settlement of the rate war is a sustaining feature. But should there be another disappointment, it may be the turning point in the downward movement for American rails. For, despite the firmness of the tone, the impartial observer must admit that they are quite high enough to be dangerous for all save the professional punter, although if we eliminate merits, there is no gainsaying the possibility of the market supporters completing their unloading at a yet higher level.

#### GRAND TRUNK OF CANADA.

The Grand Trunk Railway Company of Canada has issued the following statement of revenue receipts and expenditure for the month of July:—

##### Grand Trunk Railway Company of Canada.

	1898.	1897.	Inc. or Dec.
Gross receipts .....	£308,481	£340,681	— £32,200
Working expenses .....	207,573	223,961	— 16,388
Net profit .....	£100,908	£116,720	— £15,812
<i>Chicago and Grand Trunk Railway Company.</i>			
Gross receipts .....	£57,630	£52,604	+ £5,026
Working expenses .....	46,605	48,635	— 2,030
Net profit .....	£11,025	£3,969	+ £7,056
<i>Detroit Grand Haven and Milwaukee Railway Company.</i>			
Gross receipts .....	£16,261	£16,417	— £156
Working expenses .....	12,397	13,150	— 753
Net profit .....	£3,864	£3,267	+ £597

#### LATEST EARNINGS.

Third week of August.—St. Louis and San Francisco, \$127,000—increase, \$1,000; St. Louis South Western, \$94,000—increase, \$10,000; Southern Railway, \$440,000—increase, \$44,000; Louisville and Nashville, \$418,000—increase, \$15,000; Norfolk and Western, \$247,000, same as last year; Northern Pacific, \$454,000—increase, \$49,000.

Month of July.—Atchison Topeka and Santa Fé, gross, \$2,767,000—increase, \$173,000; net, \$480,000—increase, \$15,000; total net income, \$332,000—increase, \$4,000. Louisville and Nashville, gross, \$1,828,000—increase, \$32,000; net, \$514,000—decrease, \$114,000. Union Pacific, gross, \$1,486,000—increase, \$87,000; net, \$647,000—increase, \$268,000. Wabash, gross, \$1,079,000—increase, \$109,000; net, \$258,000—decrease, \$72,000. Erie Railroad, gross, \$2,851,000—decrease, \$281,000; net, \$798,000—decrease, \$101,000. Lehigh Valley Railroad, gross, \$1,703,000—increase, \$96,000; net, \$512,000—increase, \$63,000. Mexican Central, gross, \$1,019,000—increase, \$65,000; net, \$307,000—increase, \$54,000. Chicago Burlington and Quincy, gross, \$3,086,000—increase, \$46,000; net, \$912,000—decrease, \$196,000; surplus over charges, \$32,000—decrease, \$184,000. Chicago St. Paul Minneapolis and Omaha, gross, \$712,000—increase, \$55,000. Denver and Rio Grande, gross, \$721,000—increase, \$23,000; net, \$309,000—increase, \$3,000; surplus over charges, \$124,000—same as last year. Central of New Jersey, gross, \$1,034,000—decrease, \$205,000; net, \$426,000—decrease, \$133,000. St. Louis and San Francisco, gross, \$498,000—decrease, \$31,000; net, \$158,000—decrease, \$37,000.

Month of June.—Cleveland Cincinnati Chicago and St. Louis, gross, \$1,209,000—increase, \$91,000; net, \$278,000—increase, \$41,000. Baltimore and Ohio, gross, \$2,408,000—increase, \$200,000; net, \$603,000—increase, \$101,000.

The New York *Financial Chronicle* publishes the following particulars of railroad earnings:—During the six months ended June 30th the net earnings of 186 roads amounted to \$143,514,617, showing an increase over the same period of last year of \$17,820,328, or 14.18 per cent. Last year the increase over 1896 was 5.73 per cent. The gross earnings of seventy-seven roads in the second week of August show an increase of 1.89 per cent. The gross earnings of fifty-one roads in the third week of August show an increase of 2.68 per cent.

#### RAILROAD NOTES.

It is announced that over 97½ per cent. of the outstanding bonds and over 95½ per cent. of the stocks of the Baltimore and Ohio Railroad (not including Baltimore and Ohio Railroad Company first preferred stock and Akron and Chicago Junction

Railroad Company preferred stock) affected by the plan and agreement have been deposited. Deposits of bonds and stocks will be accepted upon a cash payment of 2 per cent. of the par value of bonds and an additional cash payment of \$2 per share of stock deposited until and including September 15th, 1898. Unpaid coupons and claims for interest on registered bonds matured prior to July 1st, 1898, may be deposited up to and including September 15th without additional charge. After that date no further deposits of such bonds, stocks, coupons, or claims for interest will be accepted, except in each instance in the discretion of the managers and upon such terms as they may impose.

It is announced that Mr. Pierpont Morgan has organised a syndicate to furnish the necessary working capital for a big iron and steel combination, to be named the Federal Steel Company, with a capital of \$200,000,000, including \$100,000,000 of preferred. The company has arranged to purchase steel plants at Loraine, Ohio, and Johnstown, Pennsylvania. A majority of the stockholders of the Minnesota Iron Company, the Illinois Steel Company, and the Elgin Joliet and Eastern Railroad have already signified their willingness to sell their properties to the Federal Company, which will be ready to begin business on October 1st.

President Fowler, of the New York Ontario and Western Railway, in an interview on Tuesday, said that the anthracite conditions were dull, and had been unsatisfactory; but the outlook had improved, as the companies had stopped piling up coal at the west, and the demand at tidewater and in New England was better than it had been at any time during the past three months. He was confident the actual prices would be advanced in September.

Referring to the coming annual report of the Northern Pacific Railway, a *Times* telegram from New York says:—"This document is expected to state the directors' plan for the establishment of a reserve dividend fund, and it is understood that this will be about the amount of a full year's dividend on the preferred stock, and that this is now held in cash."

For the year ended June 30th the Erie Railway Company shows:—Gross earnings, \$33,741,000—increase, \$2,244,000; net earnings, \$8,303,000—increase, \$138,000; net earnings of the coal companies, \$210,000; income from other sources, \$204,000; and a net surplus after deduction of all charges of \$634,000, against a surplus in the previous year of \$352,000.

It is reported that after the reorganisation of the Baltimore and Ohio Railroad Company, Receiver Cower will be made president and Receiver Murray vice-president of the company.

The board of the New York Central Railway Company have declared a quarterly dividend of 1 per cent., payable October 15th.

## General News.

#### THE HARD WOODS OF WESTRALIA.

The phrase "Australian hard woods" is now well known in commercial circles all over the world. Until quite recently, however, the efforts to introduce Australian timbers of all kinds, hard woods and others, were of a very desultory character. It is true that the woods were given some prominence through the instrumentality of exhibits at Paris, London, Edinburgh, and Chicago, but no great amount of business seems to have resulted. Since that date no less than seven concerns, with a total capital of 2,100,000*l.*, have made more or less successful appeals to the British investor. The flotation of these companies has been attended with very direct benefit to the timber industry of West Australia. There has existed a tendency during the past few years to neglect the forest resources of the colony, and the timber has accordingly been left to take its chance in face of the depredations of bush fires and destructive animal agents. The companies will now see that the trees are adequately protected. It is true, certainly, that considerable tracts of valuable forest country were, in the early days of the colony, granted under exceptionally favourable conditions to individuals and companies at merely nominal rents for the cutting of timber; but, as the leases of these concessions all expire within the next thirty years, and as their workings are amenable to all and any regulations for the conservation of the forests which may at the time have been, and afterwards may be, in force in the colony, no great danger from that source need be apprehended. However, in those cases in which the English companies have acquired leases granted under these circumstances, special attention, we

believe, is being devoted to afforesting the areas which are now being denuded by the mills, and if the leases had remained in the hands of the original concessionnaires it is doubtful whether the same amount of care in replenishing the supply of wood could have been relied upon. At one time it seemed as if the forests were merely looked on as hindrances to occupation, and but few regarded them as possessing any outside commercial value whatever. Hence their eradication was considered desirable. We find that in the Land Acts of the colony every inducement has been, and is still, given for settlers to take up land and to destroy the timber on it by the process known as "ringbarking." No doubt "ringbarking," under certain exceptional circumstances and in certain defined areas, was very necessary, but it does seem curious at this time of day that those who were responsible for the Land Acts should have failed to realise the valuable nature of the assets which the colony possessed in the form of its growing timber, and to anticipate the steady and increasing demand for the hard woods which has made itself felt in Europe in recent years. Mr. Ednie-Brown, the Conservator of Forests, in his latest report, gives a lengthy list of the forest trees of West Australia. This contains varieties like the wattle, sheoak, and the gums, all of which are known in most of the Australasian colonies, but it also makes mention of species such as the karri and jarrah, which, if they are known elsewhere, are nevertheless only found in a state of absolute perfection in West Australia. Although karri has been demonstrated to have certain properties which render its position from the industrial point of view a sound one, it seems clear that in many important respects it is inferior to jarrah. There are other timbers in West Australia which are equally, if not more, valuable for their own special purposes; but for general constructive works, necessitating contact with soil and water, the jarrah tree stands foremost. The jarrah area of West Australia appears to be circumscribed by the Darling Range, a line drawn about 30 miles to the eastward and running parallel, and by short lines drawn from Guildford to Mahogany Creek on the north, and from Busselton to Bridgetown on the south. Within this oblong area are to be found the forests of almost all the companies in which English money has been invested during the past twelve or eighteen months. Wherever jarrah is found it is almost invariably intermixed with red gum, and in places with the blackbutt as well, the latter always in the hollows and richer portions of the district. In some parts of the karri country the jarrah appears to mix with the former, although there are certain spots where the karri takes possession of the ground to the exclusion of all other timbers. Mr. Ednie-Brown has a very high opinion of jarrah, and considers it may be looked upon as one of the principal timbers of Australia for constructive purposes. Some of the chief uses to which it has so far been applied are as follow:—Wood-blocking, piles, jetties, bridges, boat-building, posts, furniture, and railway sleepers. Both karri and jarrah have long been employed in this country for the wood-blocking of streets. Now efforts are being made to induce the great railway companies to use it for sleepers. A sleeper of the ordinary type lasts from nine to ten years, and costs about 3s. 6d. A sleeper of jarrah would, it is true, cost about 6s. 6d., but then its life might be set down as three times as long as that of the sleeper now doing duty.—*Financial News*.

#### NATIONALISING THE SWISS RAILWAYS.

In a review of "Le Rachat des Chemins de Fer en Suisse" the *Morning* gives an interesting account of the experiment of nationalising the railways of Switzerland. Early this year the Swiss people decided by referendum that the State should buy the railways, and the process of transfer is now being carried out. Thus was ended a discussion which has lasted ever since the first Swiss railway was built. Other Continental States which own and operate their railways have taken up the enterprises chiefly from military considerations, and the people have little say in the management of the lines. In Switzerland, on the other hand, the nationalisation has been brought about for purely social and economic objects, and the people voted in its favour by the enormous majority of 386,634 against 182,714. That decision was arrived at in face of the certainty that the scheme will not be financially successful. Some of the men who have hitherto advocated the extension of State influence in Switzerland were alarmed at the present proposal, but their arguments seem to have had little or no influence on the people. The acquisition of the railways must be regarded entirely as a people's bargain, and no individual statesman can be blamed if he does not fulfil the hopes of the majority. A long campaign preceded the formal voting, and a great mass of literature was produced on the subject. It is in the first place of particular interest to English advocates of railway nationalisation to know that when the Swiss Federal Council sought the advice of Stephenson and Swinburne on the

proposal to introduce railways into the Republic in 1849 these engineers recommended that the State should itself construct the system. On the principle that the roads had always been the property of the public, perhaps it was thought that the iron highways should remain in the hands of the State, and if it had not been for the jealousies between the cantons and the Central Government in Switzerland the railway system would have been a State undertaking from the very first. As a matter of fact the Federal Council adopted the advice of Stephenson in favour of State construction, and in April, 1851, a Bill was introduced with that object, which the Commission of the National Council adopted by a majority of one. The National Council, however, did not follow its example, but rejected the proposals, and the plan was adopted of granting concessions to private companies. Ultimate ownership by the State was, however, always held in view, and purchase clauses introduced to enable the lines to be acquired at different periods. From time to time proposals were made for acquisition. In 1883 the Federal Council decided to buy the most prosperous line. In 1887 an attempt was made to acquire the North Eastern Company's system. Another plan adopted was for the State to buy shares and try to be the predominating shareholder in the companies—to nationalise them, as it were, by a system of permeation. Within the last ten years the State has been continually increasing its influence over the railways, and making their position as private enterprises more and more untenable. At last the Federal Council produced a scheme for acquiring the whole system, and issued an important message on the subject, in which it gave the reasons for its action. It was pointed out that under State management administration would be improved and would cost less. Unnecessary frictions and jealousies between the companies would disappear, and the lines which were unproductive would no longer be neglected. Companies were necessarily occupied, in the first place, with their dividends, while the State's first duty would be to consider public advantages and the country's interests. There would be uniformity of tariff. Another reason was that State ownership would end the difficulties with regard to enforcing the law of 1890, regulating the hours of railway workers. It would also give the State power to provide old-age pensions for their workmen and insurance against accidents. The Federal Council estimated that the railways would cost 964,000,000f., and it calculated that a profit of 2,000,000f. could be made, which would give scope for lowering the rates.

Many weighty objections were urged against the scheme. The chief critic was M. Numa Droz, one of the most prominent men in the Republic, and recently the President. He regarded the scheme as unwise politically, and unsound financially. There was a political danger in the State becoming the direct employer of such a large number of people, who might exercise a preponderating influence at some of the elections. But M. Droz was chiefly concerned with the financial weakness of the proposal. He showed that the Federal Council's scheme on the financial side had been very crudely worked out. It omitted to account for thirteen million francs which the railway companies find necessary to spend every year on new buildings and permanent repairs. This would at once show a deficit on the scheme. The Federal Council also omitted to make due provision for the repayment of the debt. It promised uniformity of rates on the basis of the lowest, which would mean a loss of nearly five million francs a year. M. Droz proved very clearly that what with the number of unprofitable lines which exist in Switzerland, and the high price the Government would have to pay for the profitable undertakings, State working will certainly result in a deficit. There are five principal lines in the country, with a total length of 2,578 kilometres.

The constitution of the body to be responsible for the administration of the State railways has been a subject of much discussion. One proposal was made to represent professional associations directly, but was defeated, and the Chambers stipulated that the Federal Council, in choosing its twenty-five members, should see that they were representative of agriculture, commerce, and industry. It is proposed to divide the systems into five *arrondissements*, whose headquarters will be respectively at Lausanne, Lucerne, Zurich, Bâle, and Saint-Gall. There will also be a general central administrative office. A director will be placed at the head of each of the five district offices appointed by the Federal Council, and attached to each office will be a local council, composed of from fifteen to twenty members, of whom four will be nominated by the Federal Council, and the others by the cantons. The creation of the local councils was a concession to the cantonal party. In all matters of Swiss administration there is always the difficulty of holding the balance between the Federal influence and the cantonal authorities.

Notice has been given to acquire part of the North Eastern lines, but it will take a number of years before the whole system can be nationalised. Concession will fall in for purchase in 1903,

but it will be 1909 before the Government can get possession of the Gothard line. In the acquisition of this line negotiations will have to take place with the Governments of Germany and Italy, which provided subsidies for the construction of the line.

#### SOUTHAMPTON AND BIRMINGHAM.

The *Southampton Times* is, naturally, grieved at the recent action of the House of Lords in rejecting the Andoversford Railway Bill. Direct independent railway accommodation between Southampton and Birmingham, it says, is bound to come in course of time. That time has been somewhat set back by the inexplicable action of the House of Lords in throwing out the Bill for the promotion of the Andoversford Railway. The Bill was deposited by independent parties for a railway to connect with the Midland and South Western Junction Railway at Andoversford, and thence through Winchcombe to Stratford-on-Avon, which would have given the company direct access to Birmingham. At the half-yearly meeting of the Midland and South Western Junction Railway on Wednesday, Mr. Cripps, the chairman, pointed out that they must not lose sight of the important fact that Birmingham and Southampton would have to be connected by a direct line sooner or later. He could not see that there was the slightest justification for the action of the House of Lords, and we consider he was only echoing the sentiments of many commercial men in Birmingham and Southampton in saying that he did not believe that great and important centres like Birmingham and Southampton were long going to be content to be left out in the cold, and to have their wants and wishes overlooked. We anticipate that this Bill will be reintroduced into Parliament in the near future. In the meantime the Midland and South Western Junction Railway continues to make progress, as may be gleaned from the report which we give in another part of the paper. The opening for traffic of the Marlborough and Grafton Railway, which is worked by the South Western Junction Company, has been attended with very satisfactory results, and on every hand there are indications of increased prosperity in years to come. The interests of Southampton are well looked after, Mr. J. J. Burnett, J.P., being a director of both the Midland and South Western Junction Railway and the Marlborough and Grafton Railway Company, while on the board of the last-named company he is associated with a second local director in the person of Mr. T. Morgan, J.P. The question of direct railway communication with the North and Midlands is of great importance to Southampton; and we hope that nothing will be wanting on the part of our local commercial men to keep the subject well to the front until some permanent benefit to the port has been secured in this connection.

#### GENERAL RAILWAY SYNDICATE, LIMITED.

Meetings of the creditors and shareholders of the General Railway Syndicate, Limited, were held on Tuesday before Mr. G. S. Barnes, official receiver, at the Carey-street offices of the Board of Trade. The syndicate was formed in June, 1896, with a nominal capital of 50,000*l.*, for the purpose of paying off the debts of the Latimer-road and Acton Railway Company, and to acquire and complete the 2-mile line between Latimer-road and Acton, which the original contractors had been unable to accomplish. Shares to the number of 25,507 were applied for and allotted, and the uncalled capital has been pledged to Messrs. Brown, Janson, and Co., for advances to the extent of 14,000*l.*, of which 13,000*l.* was apparently handed over to the Anglo-French Gold Fields of Australia, Limited, with a view to the payment of the railway company's debts. Information, it was reported, will have to be obtained as to the disposal of that 13,000*l.*, since it appears that nothing has been done by the syndicate to complete the line of railway, which is in the same condition as when taken over. Five or six of the shareholders have commenced actions against the company to have their names removed from the share register on the ground of misrepresentation in the prospectus. Apart from the liability of 15,000*l.* or 16,000*l.* due to Messrs. Brown, Janson, and Co., the syndicate only owes some 200*l.* for law costs, and its assets are represented by the unpaid calls and uncalled capital. In the absence of a quorum a formal adjournment was taken of both meetings.

#### SPANISH FINANCES.

The Foreign-office has just published in its annual series of Diplomatic and Consular Reports a "Report on the Spanish Estimates for 1898-9 and on Spanish Finances by Mr. Harrison, Commercial Attaché to her Majesty's Embassy at Madrid." If the reader fails, says the *Times*, to obtain from it a clear and accurate conception of Spain's present financial condition, the fault does not lie with Mr. Harrison. He gives conscientiously the official figures at his disposal, and describes accurately the measures adopted by the Government to meet the

extraordinary war expenditure. From these imperfect materials the reader must draw his own conclusions, which cannot be other than rough and tentative. One or two facts, it is true, are definite and significant enough. For example, during the nine financial years which ended with 1896-7 Treasury bills were issued to the amount of 464,812,000 pesetas, the nominal value of which is 18,592,480*l.* For the expenses of the Cuban insurrection money was raised in the form of Cuban bonds, Customs bonds, and "delegations" to the amount of 1,900 million pesetas, or 76,000,000*l.* sterling. On the top of all this comes the war expenditure, which Mr. Harrison makes no attempt to estimate, confining himself to a description of the measures which the Government was authorised by the Cortes to adopt in order to meet the expenditure in question. How far the Government used the very elastic powers conferred upon it we shall learn later. All we can say for the present is that the prospect is not a very agreeable one for *bona fide* holders of Spanish securities. Mr. Harrison quotes a consolatory passage from a statement by the Minister of Finance, in which it is said that "in spite of the present critical circumstances there is no decrease in the national wealth or in the receipts of the national exchequer." But it must be remembered that this statement was made last April, and a good deal has happened since that time.

#### THE SOUTH WALES COAL STRIKE.

After lasting five months, the masters' ultimatum of Saturday last was provisionally accepted on Wednesday by the men, after appointing a committee to obtain, if possible, certain modifications. Thursday was the last day allowed by the masters for acceptance. The members of the workmen's provisional committee arrived at Cardiff early that day, and held a private consultation under the presidency of Mr. W. Abraham, M.P. The owners' Emergency Committee also held a separate conference, Sir W. T. Lewis presiding. Soon after eleven o'clock the two sides met, and the subject of the monthly holiday was first debated. The owners adhered to their refusal to sanction the continuance of the monthly holiday, and eventually "Mabon," on behalf of the workmen, offered to forego it conditionally upon a play week being granted once a year in summer. The owners declined to accept this. Sir W. T. Lewis was particularly emphatic, declaring that the holidays must be abolished, as they had entailed great loss and inconvenience to the employers in the past.

About four o'clock in the afternoon a decision was arrived at and an agreement was signed by eleven of the men's representatives to return to work on the master's terms. Messrs. J. Williams, J. Thomas, J. Davies, and P. D. Rees refused to sign the agreement, which provided for the resumption of work as and from September 1st.

Mr. P. D. Rees, one of the workmen's committee, who seceded, intimated that he had refused to sign the agreement, because, in his opinion, the terms offered by the owners were not a whit better than those against which the men came out five months ago. The 12½ per cent. was no minimum at all. Another circumstance which influenced the action he had taken was that he wished to protest against the imprisonment of his colleague, Mr. Davis Morgan. His advice to the workmen of South Wales was to organise as soon as possible, and then join in a strong body the Miners' Federation.

Late last night official reports of the proceedings were issued. The owners' version stated that it had been agreed that work should be resumed at the associated collieries on and from September 1st upon the following terms:—

1. The terms and conditions of the sliding-scale agreement (known as the "old scale"), which terminated upon March 31st last, shall, together with clause 3 of the agreement of February 17th, 1893, be embodied in an agreement, which shall continue in force until the first day of January, 1903, and may be determined by six months' notice on either side to be given on July 1st, 1902, January 1st, 1903, or any other following July 1st or January 1st.
2. The monthly holiday known as "Mabon's Day" shall be abolished, and no other holiday of a like nature will be permitted.
3. The wages payable up to November 30th, 1898, shall be 1½ per cent. above the standard of December, 1879.
4. An audit of the selling prices shall be taken for the two months ending October 31st, 1898, to regulate wages as from December 1st, 1898, in accordance with clause 12 of the 1892 agreement.
5. If after September 1st, 1898, the employers, by the very nature of this agreement, reduce the wages of the workmen below 12½ per cent. above the standard of December, 1879, the workmen shall have the right of giving six months' notice to terminate this agreement on the 1st day of any January or July next ensuing, notwithstanding the first clause of this agreement.

The workmen's official report states that the Employers' Emer-

agency Committee agreed that all the workmen should be reinstated in their former employment as far and as soon as practicable.

Telegraphing yesterday afternoon, a Cardiff correspondent of the *Standard* says:—Inquiries in the Rhondda and other parts of the coalfield show that active preparations are in progress for the resumption of work in the collieries. Large numbers of repairers have descended the pits, but it is improbable that work on any extensive scale will be resumed before Monday, or more likely Tuesday. The announcement that an agreement had been signed was received with great rejoicing throughout the valleys. Some of the miners are not satisfied, but no difficulty is anticipated, and it is expected they will return to work with their comrades. A large number of workmen are dissatisfied with yesterday's conference. They disapprove the adoption of the sliding scale, and are particularly incensed at the abolition of "Mabon's Day." After fighting firmly for five months, they consider they have been "sold." Other workmen, however, hail the possibility of a resumption of work with satisfaction. The adjourned conference fixed for to-morrow is looked forward to with much interest, and some very plain speaking is anticipated. There is great dissatisfaction at the Cardiff settlement by the men of the western district.

### THE CONGO RAILWAY.

The current issue of *Transport* gives an interesting account of the difficulties of the Congo Railway. After its initial financial troubles had been surmounted, the real difficulties had only then begun, for, save for some building-stone, the country contained absolutely nothing. Everything had to be brought from Europe; even the boards and timber and food for the men. There was no less difficulty to find navvies; 500 Chinamen were brought over from Makao; 360 of them died in less than three months. The Jamaica and Barbados negroes, who had done such good work at Panama, resisted the climate no better than the Chinamen. It was soon seen that it would be impossible to rely on any other labourers than the Senegalese and the blacks of Sierra Leone and Accra, but there were only a few of these available, and the cost was enormous. Finally, after three years, out of the 1,000,000*l.* subscribed, hardly anything was left; yet only 5 miles out of the 250 had been constructed. Still hope survived; another 600,000*l.* was advanced by the Government, and this was followed by the same sum, raised by private subscribers, with the result that the entire length of over 550 miles of line was completed in March of this year. That the monthly receipts so far have been over 20,000*l.* is a source of much gratification to the Belgians, and this was recognised by an inauguration ceremony on July 4th last, at Matadi, at which representatives of all the European powers were present, especially France. Six trains were provided for the accommodation of the company's guests. As an instance of the difficulties surmounted, the writer mentions that at the very outset the trains have to go 2½ miles round a ravine only to find themselves very little further on than the place of starting. After crossing the high Palaballa ridge and a series of plains, the trains stopped for the night at the half-way station of Tumba, this stop being rendered necessary by the slow maximum speed of 12½ miles an hour at present attained. The next day all the chiefs came to pay their respects to the Belgian governor, and the journey was then resumed to Leopoldville, the terminus of the line on Stanley Pool, the lake which is destined to be the terminus of the navigation of all the rivers furrowing the Congo basin. There the *Times* correspondent saw 100 steamers, all the segments of which had been carried on men's backs from Matadi, 250 miles across the mountains. As the town of Leopoldville is at present inconveniently situated with regard to the rapids, Kindolo, a place about 5 or 6 miles off, with a safe creek, will probably be adopted as the port on Stanley Pool. The writer goes on to say that the next difficulties of the Belgians will be political, and concludes with the remark that if their hopes of still being able to hold the country by exploiting the mutual animosities of the tribes are realised, they will, thanks to their railway, derive great profit from its natural wealth.

The experience of the Rev. W. Holman Bentley, which he gives in this month's *Chambers' Journal*, are those of an ordinary traveller in the early days of the railway, when it was only open as far as Tumber, and not as a special guest at an inauguration ceremony. They enable us to realise yet more vividly what the difficulties were that have been surmounted. To begin with, the company frankly disclaimed all responsibility for the lives of their passengers, and yet for the 114 miles from Tumba to the Port of Matadi they charged 9*l.* 6*s.* 4*d.*, or two francs a mile, for a single ticket, and 14*l.* for a return-ticket, available only for four days. Second-class tickets for the same distance, costing 19*s.*, were only

issued to natives, and they only afford a ride on the trucks on the top of the passengers' luggage and general stores, amidst a constant shower of hot cinders from the engine. The writer, who was accompanying his wife in order to see her off to England, started at 5.30 in the morning, in a comfortable enough carriage with pivoted cane-seated chairs, glass windows, and sunblinds. The conductor was a native of Sierra Leone, while the engine-driver and stoker were blacks from Senegal, with a limited knowledge of their profession. Says Mr. Bentley:—"They know little of the properties of steam save that it would burn you as it flies from the coals, and as for mechanics—well, if you twist a certain cock a whistle results; a certain lever causes the starting of the machine, or, returning it, the stoppage; and so on." The Congo State Government and the railway company apparently make no difference on account of the colour of their employés, paying and treating black or white according to their efficiency. Plenty of incidents occurred during the trip. At a temporary bridge over the Kwilu river a shunting engine had to be employed to push the train across, and it pushed so hard that the train was nearly wrecked. At the half-way station of Songololo, 30 miles from this bridge, all the passengers had to dismount for the night because there was no coal for the engine to go on with. A start was made again the next morning at half-past eight, and at another little station the train had to wait an hour for the director-in-chief's train to pass. After a run of 8 miles more there was another stop at 3 p.m., and as only 24 miles remained to Matadi it was expected to be reached that night. However, in the last climb over the Mpalabala Mountain, which is the greatest engineering feat of all, the engine, though in charge of a white driver, left the rails, and could not be got on to them again before three o'clock the following morning, and it was not until five that the train started. It wound its way up the long climb of 360*ft.*, and descended with great care the 830*ft.* on the other side. Here a terrace has been cut in the steep side of every ravine that scored the side of the mountain, in and out again, then round a spur into another ravine, and over a light iron bridge 80*ft.* above the torrent. The plan of the railway in these ravines is like a U, the curve of which is on the bridge, and in order to allow for that curve the bridge is three times the width necessary for the narrow gauge. Matadi was eventually reached at 6.30; and there ocean steamers and civilisation generally were met with. Before starting back the writer had to get his return ticket extended. On the journey there were more delays owing to derailments and insufficient engine power, and the last twenty-four miles into Tumba took six and a-half hours. But this is all changed. In October last Mr. Bentley took only thirteen hours for the journey between Matadi and Tumba, and with the completion of the line to Dolo, Stanley Pool, and round to Leopoldville, the entire railway run now occupies only twenty hours. Moreover, a fast service of steamers from Antwerp to the Congo in eighteen days, the railway, and a steamer from Stanley Pool to Stanley Falls, 1,000 miles further on, will then bring Stanley Falls within thirty-one days of Antwerp.

**The Smallest Locomotive for Passenger-cars.**—What is claimed to be the smallest locomotive ever made for drawing passenger-cars has been manufactured for the Miniature Railway Company by Thomas E. M'Garigle, of Niagara Falls. This steam railway is to be operated at the Trans-Mississippi exposition in Omaha, Nebraska, and in all six locomotives are to be built for the company under the present contract. The height of the locomotive from the top of the stack to the rail is 25in., and the gauge is 12½in. The weight of this little engine is about 600*lb.*, and it will run on a rail three-quarters of an inch square. Hard coal will be used as fuel. The capacity of the locomotive is ten cars, each containing two persons, or about 4,000*lb.* One man, whose position will be on a seat in the tender, operates the engine. The length of the locomotive from the point of pilot to end of tender is 7*ft.* 3in.—*Commerce.*

**A Railway Board for Siberia and Manchuria.**—Prince Khilkoff, the Russian Minister of Ways and Communications, has proposed to his colleagues in the Government the establishment of a railway board for Siberia and Manchuria, with headquarters at Vladivostok. The Prince proposes that the board shall consist of five members, three of whom shall be representatives of the engineering department and the other two finance. It is felt that by the creation of this board the department in St. Petersburg will be very considerably relieved, although, of course, the board will be subject to the control of Prince Khilkoff as the head of the Ministerial Department. The official decree nominating the members of the board is expected to be issued in about three weeks' time. It will probably also give the board very liberal powers as to the ordering of all requisite material for the construction of railways and other public works in Siberia and Manchuria.

## THE STOCK EXCHANGE SETTLEMENT.

The making-up prices for the principal railway stocks, and the extreme rates of continuation current at the Stock Exchange settlement on Monday, are shown hereunder:—

Making-up Price.			Stock.	Continuation rate.

## RAILWAY PATENTS.

[This list is specially compiled for THE RAILWAY TIMES by Messrs. Rayner and Co., registered patent agents, 37, Chancery-lane, London, W.C., from whom all information relating to patents may be had gratuitously.]

17,044. Abraham Taylor, 139, Jane-lane, Swinton, near Manchester—Improved apparatus for applying fog-signals on railways.

17,050. John Eator and Emmanuel Williams, Fern Lee, Stepping Hill, Stockport—Improvements in railway chairs and rails, and a safe method for securing rails.

17,170. James Alexander Griffiths, Norfolk House, Victoria-embankment, London—Improvements in scenic pleasure gravity and cable railways.

17,176. Thomas William Wilkes, 60, Queen Victoria-street, London—Improvements in means for securing handles to railway and other carriage doors.

17,191. Johann Christian Schäfer and John Lörentz, 18, Buckingham-street, Strand, London—An improved automatic contact breaker for electric railways and the like.

17,308. Thomas Frost, Imperial-chambers, Albert-street, Derby—An improved railway chair.

17,489. Illius Augustus Timmis, 2, Great George-street, Westminster, London—Improvements in couplings for railway and other vehicles.

17,639. Robert Hinchliffe, 62, St. Vincent-street, Glasgow—Improvements in railway rail joints.

17,665. Thomas Marsh Markham and Henry Herbert Markham, 110, Chillingham-road, Heaton, Newcastle-on-Tyne—A treble or three-way steel rail for permanent railways or tramways.

17,841. James Booth and Albert Ernest Woodhouse, Penny Bank-chambers, Halifax—Improvements in electricity railways or tramways.

17,984. Elizabeth Warwick, 45, Southampton-buildings, Chancery-lane, London—Improvements in and connected with electric railways and tramways.

18,718a. Short—Electric railways and tramways. (Date claimed under Patents Rule 19, August 12th 1897.)

21,341. Crowther—Brakes for railway trucks.

22,884. Von Sponar-Bhondorff, Adler and Merks—Apparatus for automatically signalling and applying the brakes on railway trains.

24,174. Dickinson and Kynoch, Limited—Fog signals for railways and the like.

24,270. Sharpe—Level crossing gates on railways and the like.

15,144. Flechtenmacher—Electric railways and tramways on a road contact system.

## DIVIDEND ANNOUNCEMENTS.

[The date given in parentheses is that on which the announcement was made.]

Glasgow and South Western Railway, (August 30th).—At the rate of 2½ per cent. per annum on the preferred converted ordinary stock, and 2½ per cent. per annum on the deferred converted ordinary stock. The balance carried forward is 5,696l. For the corresponding half of last year the dividend on the ordinary stock (which at that time was undivided) was at the rate of 5 per cent. per annum. A balance of 5,886l. was carried forward. The July dividends for a period of twelve years are shown hereunder:—

1898... 5½ p. cent.	1895... 4 p. cent.	1892... 4½ p. cent.	1889... 4 p. cent.
1897... 5	1894... 4	1891... 3½	1888... 4
1896... 5	1893... 4	1890... 4	1887... 4

Argentine Great Western Railway.—Dividend of 5 per cent. on the preferred and 5 per cent. on the ordinary stock.

## FOREIGN AND COLONIAL ITEMS.

Mr. Barrow, general manager of the Buenos Ayres Great Southern Railway, sailed for England on the 19th ult.

The gross earnings of the Paraguay Central Railway for the month of June amounted to \$88,705, and the expenditure to \$67,191, leaving a profit of \$21,514.

The traffic receipts of the Nitrate Railways Company from August 16th to 31st were 16,700l., showing a decrease of 4,773l. as compared with the same period last year.

The works on the Great Southern Santa Fé and Cordoba Railway branch line from Venado Tuerto to Rufino are being pushed rapidly ahead, and that the line is expected to be ready for working by November next.

The administration of the Italian Meridional Railway have resolved upon the construction of an electric railway between Mandela and Subiaco, in the province of Rome. It is proposed to utilise the water power of the River Anniere for the production of the motive power.

The Argentine National Railway Board have reported favourably on a project for a railway presented by Messrs. Bemberg, Esquivel, and Co. for a line from Venado Tuerto station, on the Santa Fé and Cordoba Great Southern Railway, to Junin, on the Buenos Ayres and Pacific Railway.

A scheme, promoted by a small English company, has been placed before the Italian Government for an electric railway, about 43½ miles long, over the Great St. Bernard, starting at Aosta, in Italy. It is proposed to overcome the heavy gradients by adopting a third rail, on the rack system, as used on the Mont Cenis line.

A concession has been granted to a company to build a railway between Alcobaca and Praia Da Rainha. The object of the railway is to establish communications on the Tocantins and Araguaya rivers over the distance which is obstructed by about

100 miles of rapids. A start has been made, but there is every indication that the line will not be built in present times.

It is stated that a syndicate has been formed for the purchase from the Egyptian Government of the railway which has been carried into the Soudan, and that negotiations have been going on privately for some weeks, but in existing circumstances the matter is naturally not one that can be settled off-hand. The gauge is the same as that of the railway which runs from Cape-town to Bulawayo.

It is reported from Belgrade that the Servian Government proposes to obtain a concession from Turkey for the construction of a railway from the Servian frontier, near Prokuplje, *viâ* Pristina and Prisrend, to Adria, in order that the enterprise may be handed over to a syndicate for financing and carrying out simultaneously with the Timok Railway. With this object in view, combined action will be taken by Servia and Bulgaria, who intend at the same time to establish a joint bridge over the Danube.

The Burma Railways Company, Limited, has applied to the Government of India for an engineer experienced in bridge building to superintend the erection of a steel viaduct over the Goteik Gorge on the Mandalay and Kunlon Railway, the new line which is being constructed through the Shan States, with a view to ultimate extension to the south-western frontier of China. The bridge will have an altitude of upwards 300ft. from the deepest part of the valley, and will be over 2,000ft. long; it will, in fact, be the biggest undertaking of the kind yet attempted in India.

The Uganda Railway has (says the Exchange Telegraph Company) now been opened for traffic as far as Tsavo, 129 miles from Mombasa, while the rail head has been pushed on to a distance of 51 miles further. It is expected that the line will be open as far as Kikuyu by Christmas. In that case some of the worst parts of the journey on foot will be avoided, though the engineering difficulties in making the line will by no means have been surmounted. The trains now run to and from Mombasa on alternate days, performing the distance in slightly under nine hours each way.

A Russian company, headed by Count Moritz Zamoiski, has obtained from the Government a concession for the construction and working of a standard gauge railway from Cholin *viâ* Zamostje and Thomaszow to Belshez on the Austrian frontier, with a branch line from Zamostje to Zublin. The concession is for eighty-five years, but at the expiration of twenty years from the inauguration of the line the Government has the right of purchase. The capital of the company, which will not receive any guarantee from the State, has been fixed at 5,000,000 roubles in ordinary shares and 5,000,000 roubles in debentures.

**Dewsbury and its Railway Service.**—It is rumoured in Dewsbury that the Midland Railway Company contemplate abandoning the scheme which has recently been before Parliament for shortening the distance between Royston and Bradford. It is now stated that fresh plans, which have been prepared by the company officials, will prevent the line going through the borough, and that the Midland Company have made a working arrangement with the Lancashire and Yorkshire Railway Company for utilising the line between Thornhill and Low Moor. It is also suggested that the present line between the places will be widened so as to cope with the extra traffic and avoid the least possible delay. If the latest information be correct, the Midland Company will effect a large saving by the new scheme; manufacturers and residents in Dewsbury will, however, be sorely disappointed if the scheme as placed before Parliament is not proceeded with.

**Irish Mail Service.**—A report of the committee to inquire into the acceleration of the Irish day mails has been published. The committee agreed with the London and North Western Railway Company for 6,500*l.* to run a mail train from Euston at 8.30 a.m. to connect with the mail packet at Holyhead. A train is to run at 7.15 a.m. available for carrying mails, but not under the control of the Post-office. The City of Dublin Steam Packet Company have agreed to accelerate the service fifteen minutes each way, so that there will be a total saving of forty-five minutes on the journey from London to Dublin. As regards a proposed alteration in the time of departure from Dublin, it is mentioned that the change would make the night mail from the provinces of Ireland which connects with the morning mail from Dublin absolutely useless to such important centres as Manchester and Liverpool, whereas the old arrangement permits of those places benefiting by the connection.

**German South West Africa.**—The report of the directors of the South West Africa Company states that the negotiations with the German Government have resulted in an arrangement which they consider highly advantageous, and which is embodied in a convention with the German Government. The chief feature is that in consideration of the surrender of some of its railway rights the company has obtained, in addition to certain facilities in connection with its Damaraland Concession, mining rights over territory in Ovamboland estimated at about 23,000 English square miles. The company retains all railway rights necessary for the exploitation of all the land and mineral grants owned or controlled by the company. The directors have acquired a substantial interest in the South African Territories, Limited, which owns the mining rights over a very large portion of the southern part of German South-West Africa, together with valuable railway, freehold, and other rights. A railway from Swakopmouth to the interior is now in course of construction by the German Government, and the first section has already been opened to traffic. The company has the right to connect any of its railways with the lines of the Government.

**The Heaviest Locomotive in the Kingdom.**—The Great Northern Railway are thoroughly testing the heaviest engine in the kingdom, weighing fifty-eight tons, or ninety-nine tons with tender. It has ten wheels, four coupled wheels being 6ft. 6in. in diameter, while the cylinders are 19in. by 24in. stroke. The boiler is 14ft. 8in. long in the barrel, and is 4ft. 8in. in diameter, giving 1,442 square feet of heating surface, and 26.75 square feet of grate area. The boiler pressure is 175lb., and the cylinder pressure is 131lb. This locomotive has made some runs between King's-cross and York, and the results obtained suggest that a number of that class will be built for next year. The performance of the Dunalastair, however, has not yet been equalled, the greatest speed got being a fraction over 73 miles per hour with a load of 214 tons. The whole run from King's-cross to Grantham—105 miles—occupied 1 hour 53 minutes 58 seconds, equal to a mile in 56 seconds; but the train slowed down twice. Between Grantham and York a run with a load of 264 tons was done in 94 minutes 5 seconds net time for the 82½ miles, rather over 68 seconds for each mile, notwithstanding that speed was slackened four times.

**Sierra Leone Railway.**—The annual colonial report on Sierra Leone was published yesterday. Judging by statistics set forth, the colony is in a fairly satisfactory condition. The estimated revenue for 1897 was 106,231*l.*, including protectorate, afterwards revised to 101,181*l.*; the sum actually realised was 106,009*l.* This is an increase of 8,899*l.* on the previous year's revenue. The estimated expenditure for 1897 was 116,073*l.*, whereas the amount expended was 111,678*l.*, a saving of 4,395*l.* having been effected. The work of constructing the Sierra Leone Railway commenced in January, 1896. The line at the time the report was penned was open for the transport of material for 11½ miles, and rails were down for 20 miles. Seven viaducts were expected to be finished by the end of March, 1898, when the line would be open for transport to Waterloo, 20 miles distance from Freetown, and by this time the last portion of the first section of the railway to Songo Town would be constructed. It was expected that the whole of the first section, from Freetown to Songo Town, would be complete and open for traffic about August, 1898. An extension of the line to Rotifunk, a further distance of 25 miles, would then be taken in hand, as well as, it was hoped, the proposed pier at Government Wharf, alongside of which ocean-going steamers would be able to take in and discharge cargo.

**German State Railways.**—The Berlin papers, writes a correspondent of the *Financial Times*, are much exercised concerning a statement published in the Berlin correspondence of the Munich *Allgemeine Zeitung*, suggesting that it is the wish of the German Government to encourage the construction of private railways in competition with the lines owned by the State. The statement is regarded in some quarters as being official and as representing the earnest desire of the Minister for Railways for the co-operation of private enterprise in order to overcome the obstacles now encountered in dealing with both goods and passenger traffic. It is notorious, adds our correspondent, that the State railways are unable to cope with the present traffic requirements, and, in order to overcome all difficulties in this respect, it is suggested as being desirable that facilities should be given for the construction of new railways by private companies, the lines to be built parallel with the existing State railways. It is considered that if this policy were adopted the existing congestion would be obviated, and a large accession traffic would be encouraged from districts not now provided with railway facilities.

**Proposed Mount St. Bernard Electric Railway.**—A scheme has just been submitted to the Italian Government asking for a concession to construct an electric railway of a total length of 70 kilometres, or 43½ miles, over the Great St. Bernard. The project, which is being promoted by an English company just constituted under the title of the Great St. Bernard Railway Concessionary Company, has been placed before the Italian Government by Mr. John B. Fell, engineer, of Turin, who intimates that he has informed the President of the Swiss Federal Council of the intention to seek, both in Berne and Rome, a concession for the building of the line from the Italian frontier to Martigny, in the Canton of Valais. It is proposed to overcome the heavy gradients by the adoption of a third rail on the rack system, as used on the Mont Cenis line. The promoters of the railway intend to ensure safety in working during the winter months by the adoption of precautions against the danger of snowfall and avalanches. The cost of construction and equipment of the railway, for which no subsidies are asked by the promoters, is estimated at 15,000,000f.

**Surrey Commercial Dock.**—The report of the Board of the Surrey Commercial Dock Company for the past half-year states that the tonnage received into dock during the period shows a decrease of 67,033 tons in wood, 48,038 tons in grain, and 6,060 tons in sundries as compared with the corresponding period, while firewood increased by 8,129 tons and coal by 1,401 tons, the total tonnage amounting to 461,794 tons, compared with 573,395 tons. The decrease in wood is attributed to the late opening of Baltic ports, and to a dispute between the wood importers and the shipowners as to the terms of a new form of charter policy, which had the effect of preventing the early chartering of vessels and delayed the importation of wood goods. The falling off in grain is due to reduced imports from Russia. The directors recommend an interim dividend of 2½ per cent. for the half-year ended September 30th on the ordinary and preference A stocks.

**German Inland Navigation.**—A Bill is in course of preparation for presentation to the Reichstag in furtherance of the definite policy of the German Government in the direction of connecting up the important industrial centres with the seaports by means of improved waterways, and the construction of canals in order to link these together. In the present case the scheme provides for the carrying out of the so-called Rhine-Weser-Elbe Canal and intermediate junction waterways, whereby it is proposed to establish a navigable outlet for the great industries of Westphalia, Saxony, Hanover, Hesse-Nassau, Brunswick and Schaumburg-Lippe. These provinces, with the exception of the Saxon Diet, have resolved to guarantee the annual expense of working and maintenance, estimated at 290,000l., whilst the deficiency due to the refusal of Saxony will be met by a financial guarantee on the part of Bremen and Berlin. It is now considered that the success of this important series of waterways is entirely assured.

**New Channel Islands Steamer.**—A powerful twin-screw steamer, the *Vera*, embodying several novelties in passenger accommodation, is about to be added to the London and South Western Railway Company's Channel Islands' fleet. Built entirely of steel, the vessel is 270ft. in length at the water line, 35ft. moulded breadth, and 15ft. 3in. moulded depth. She has two complete decks and two partial decks. The promenade deck, partially covered by a shade deck, contains three saloons—one amidships, a general saloon, for ladies and gentlemen, another forward for ladies alone, and a third aft for smoking. All three compartments have been arranged for dining and sleeping purposes alternately, the accommodation by day resembling that of a first-class restaurant, and by night that of the modern railway sleeping car. On the upper deck sleeping berths are provided for second-class passengers, as well as for the crew, and on the same level there is a promenading space for third class passengers. The main deck contains further second-class accommodation aft, first-class cabins amidships equal to the best berths in Atlantic liners, and third-class accom-

modation forward. Altogether there is sleeping room for 156 first-class and fifty second-class passengers; but the vessel is certified by the Board of Trade to carry 400 persons. She is divided by bulkheads into twelve watertight compartments, fulfilling the Board of Trade requirements for the highest class of bulkhead subdivision, which ensure that the steamer shall be navigable with any two compartments flooded. There is an electric light installation throughout similar to that in use on British warships; every compartment has an independent air inlet and outlet; and salt-water baths can be had on board. The engines are triple expansion, the guaranteed speed on service being 20 knots, which will be attained with a coal consumption on the journey to the Channel Islands and back of 45 tons, or 20 per cent. less than that in the existing steamers. The *Vera* has been built by Messrs. J. and G. Thomson, Limited, of Glasgow from the designs of Professor Biles, the consulting naval architect of the London and South Western Railway Company.

ESTABLISHED 1851.

**BIRKBECK BANK.**

Southampton-bldgs., Chancery-lane, London, W.C.

Invested Funds ... .. £10,000,000

Number of Accounts, 85,094.

TWO-AND-A-HALF per CENT. INTEREST allowed on DEPOSITS, repayable on demand.

TWO per CENT. on CURRENT ACCOUNTS, on the minimum monthly balances, when not drawn below £100.

STOCKS, SHARES, and ANNUITIES purchased and sold for customers.

**SAVINGS DEPARTMENT.**

Small deposits received, and interest allowed monthly on each completed £1.

The BIRKBECK ALMANACK, with particulars, post-free

FRANCIS RAVENSCROFT, Manager.

Established over 100 years.

**RILEY BROTHERS,**

55 and 57, Godwin-street, Bradford; 16, Beekman-street New York.

**RILEY'S MARVELLOUS KINEOPTOSCOPE FOR PROJECTING ANIMATED PHOTOGRAPHS.**

For both Single and Double Lanterns. Projectors (only) from £10 each. Projector and Lantern complete from £15 10s. The greatest success in the market. Can be seen in London, at our Agents.

The Marvellous "PRAESTANTIA" Lantern (£4 4s. and £2 17s. 6d.)

Still holds the field. Cannot be equalled, and has never been excelled. It has the largest sale of any lantern in the world.

**THE LAWSON SATURATORS**

For both Single and Double Lanterns. Have no equal in the market. SIMPLE, SAFE, and POWERFUL. Price £2 10s. and £6 10s.

**LANTERN OUTFITS. LANTERN SLIDES. CINEMATOGRAPH FILMS.**

And every Lantern requisite, of the very best quality and on the easiest terms. The world-wide Lantern Slide Circulating Library.

No equal. 50 Slides loaned for 3s. Send for Catalogue, 6d. Hire Lists free.

London Agent for Kineoptoscopes—

O. SICHEL and CO., 20, Berners-st., Oxford-st.

**METROPOLITAN RAILWAY CARRIAGE AND WAGON COMPANY, Limited.**

SALTLEY WORKS, BIRMINGHAM.

Successors to Messrs. Joseph Wright and Sons.

MANUFACTURERS of RAILWAY CARRIAGES, TEAMWAY CARS, WAGONS, and RAILWAY IRONWORK of every description. Rail way Carriages and Wagons built for cash, or upon deferred payment, extending over a period of from three to ten years. A large number of Coal, Ironstone, Ballast, and other wagons to be let on hire.

Manufactory and Chief Offices—Saltley Works, Birmingham.

ESTABLISHED 1774.

**BLAENAVON COLD BLAST PIG IRON****(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).****No. 1 Foundry.**—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.**No. 2 Foundry.**—A more Open Quality, used for similar purposes, and largely by nail makers.**No. 3 Foundry.**—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.**No. 4 Grey Forge.**—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.**No. 5 Common Forge.**—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plate, and BB. Merchant Bars.**No. 6 Strong Forge.**—A still harder and Closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.**MOTTLED.**—Used for Chilled Rolls in tempering; and for other similar purpose.

\* These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4971, Session 1888.

	Specific Gravity.	Tensile Strength.	Transverse Strength.	Crushing.
Average of 57 sample including Blaenavon	850 Specimens 7.140	850 Specimens 23,257	546 Specimens 7,102	273 Specimens 91,061
Average of 5 samples of Blaenavon only	63 Specimens 7.175	63 Specimens 25,448	46 Specimens 7,488	21 Specimens 109,921

## Meetings.

### NORTH METROPOLITAN RAILWAY AND CANAL.

The half-yearly general meeting was held on Tuesday at 138, Leadenhall-street, E.C.; Mr. J. S. FORBES presiding.

The gross receipts of the canal undertaking for the half-year ending June 30th, 1898, amounted to 40,558*l.*, as compared with 39,553*l.* for the corresponding six months of 1897. The working expenses for the same period amounted to 20,449*l.*, against 19,759*l.*. The amount at the credit of net revenue account, inclusive of 416*l.* interest received and 292*l.* brought from the previous half-year, was 20,817*l.*. This would admit, after the interest on the canal debenture stocks and other fixed charges had been met, of the payment of a dividend for the half-year at the rate of 1½ (against 2) per cent. per annum on the canal capital stock, leaving 937*l.* to be carried to the next account. The expenditure on capital account had been 1,752,856*l.*, whilst the receipts had been 1,778,895*l.*—viz., canal capital stock, 1,358,100*l.*; 3 per cent. debenture stock, 110,000*l.*; 4 per cent. debenture stock, 101,852*l.*; 4½ per cent. debenture stock, 200,000*l.*; premiums, 8,943*l.*

The CHAIRMAN, in moving the adoption of the report and accounts, said the shareholders should bear in mind that, during the stage of transition through which they were now passing, the traffic of the canal and docks would be subjected to interruptions which would, to some extent, tend to delay the proper development of the undertaking. A considerable portion of the surface of the dock had, from time to time, been occupied by the engineers, and this had naturally affected the business, but he was glad to say that the whole of the works were being proceeded with in a satisfactory manner, and that some portions had been completed. What was called the water famine had necessitated increased pumping operations by the company, and this had led to a serious addition in the working expenses in the six months under review. A certain proportion of the extra expenditure was the result of their having to defend the company's interests in Parliament. He referred to the action of a certain autocratic body which attempted to make them contributors to the supply of water to the Brent river. It was very rarely indeed that a successful litigant in Parliament got his costs, and the 500*l.* or 600*l.* which appeared in the accounts under the head of law and Parliamentary expenses, together with the sum of 1,300*l.*, or thereabouts, which had been expended on pumping, seriously affected the balance available for dividend, so that the board had to pay 2*s.* 6*d.* per cent. less than in the corresponding period of 1897. It was disagreeable to have a smaller dividend, but he thought that the shareholders would witness a different state of things so soon as the works now in progress were completed, and there was a resumption of the normal condition of affairs with regard to the traffic and the water question. Formerly they were dependent on their own reservoirs exclusively, but now they were able to pump water from the Thames, and that would be a great auxiliary force in the future, and make the canal capable of conveying more rapidly and more economically a larger bulk of traffic. Their friends, the Great Central Railway, had already reached London and had opened their line for the carriage of coal; and he had reason to believe that that company would make considerable use of the canal. The interest on the 3 per cent. debenture stock which had been raised by this company for carrying out the new works was a charge which fell on revenue. It was really a capital charge, but they had not the power to treat it as such in connection with the canal undertaking. The amount of the interest in question was 900*l.*, and as it had to be taken out of revenue it partly accounted for the decrease in the dividend. But for the exceptional circumstances he had pointed out, the company would have been able to pay the same, if not a larger, dividend than last year.

Sir GEORGE H. CHAMBERS seconded the resolution, which was unanimously carried, after the CHAIRMAN had stated, in reply to a question, that all the essential difficulties in connection with the canal works had now been overcome.

### HIGHLAND RAILWAY.

A special general meeting was held at Inverness on Wednesday for the purpose of authorising the creation and issue of a portion of the new capital which the company are empowered to raise under the Highland Railway (Additional Powers) Act of 1897. Sir G. MACPHERSON-GRANT presided.

The CHAIRMAN said the Highland Railway had a prosperous future before it, and as the traffic grew year by year they were bound to make suitable provision for the expansion—a thing which could not be done without spending money. The object of the expenditure, however, was to enable them to make more money, and that, in his opinion, was good business. The Kyle line was now completed, and the Aviemore line was approaching completion, but the Fort George branch was in hand, and there was also the doubling of the line between Blair Athol and the county march, a distance of 18 miles, which was going on. They intended to proceed gradually with further doubling, as it was quite impossible to carry the large traffic they had, for instance, last month with any sort of satisfaction on one line. To obviate lateness of the trains they were obliged to provide facilities in the way of doubled lines, improved signalling, more engines, and more wagons and carriages, and all these meant money. The Highland Railway (Additional Powers) Act authorised the company to raise 750,000*l.* new capital and 250,000*l.* debenture stock, and the same Act authorised the payment of 3 per cent. interest out of capital for a period fixed by the Act, so that the interest on the capital to the extent of 3 per cent., at any

rate, would not become a charge against revenue for some time. They proposed to ask the consent of the shareholders to the raising of 450,000*l.*, with proportionate borrowing powers and to the issue of this as a preference stock bearing interest at 3½ per cent. from September 1st current. They did not want the whole of that sum immediately, and they should limit the issue to what they required, but having their authority for the large amount they could take advantage of the money market to issue the stock at the most convenient time. This would have the careful consideration of the directors. Encouraged by the amount of stock taken up by their shareholders on the occasion of the last issue of preference stock, it was intended to offer the stock first of all to the shareholders. He would not detain them further at present, as he hoped to address them more fully at the half-yearly meeting next month. The resolutions were then put as follows:—

1. "That the sum of 450,000*l.* be raised under the provisions of the Highland Railway (Additional Powers) Act, 1897, by the creation and issue of preference stock bearing dividend at the rate of 3½ per cent. per annum, but the said stock shall be offered in the first instance to the ordinary shareholders of the company *pro rata* to their present holdings, and that the directors be empowered to issue the said stock at such times, in such manner, and on such terms as they may consider advantageous to the company." 2. "That so soon as the requisite amount of preference stock has been paid up, the directors be empowered to issue, at such times and on such terms as they may deem proper, debenture stock to the amount of 150,000*l.*, as authorised by the Highland Railway (Additional Powers) Act, 1897."

The Earl of MARCH seconded the resolutions, which were unanimously adopted.

### BRITISH AND CHINESE CORPORATION, LIMITED.

The first ordinary (statutory) general meeting of this company was held on Monday at Cannon-street Hotel, E.C., Mr. W. KESWICK presiding.

The CHAIRMAN stated that the meeting was held in compliance with the Companies' Act, which required that shareholders should be called together within four months of the registration of the company. This corporation was registered on May 24th. The shares were fully applied for, and had been allotted and issued. The corporation was now, therefore, legally constituted, and, he might say, possessed a body of shareholders of the highest character and influence. The sphere of its operations was a vast one, and gave promise of great possibilities. Events in China, as they all knew, had broken down the wall of exclusiveness, and that ancient empire was now a field in which there should be found abundant opportunities for the favourable employment of money for the construction of railways, the development of its vast mineral resources, and the introduction generally of Western appliances of machinery and steam power. They had secured the refusal of the concession of the Shanghai Su-chau Ching-Kiang and Nanking Railway, which would run through one of the richest and most densely populated districts in China, and they had engaged two English engineers, one of whom was sent from home, to make the detailed surveys of the road, and this work they had all but completed. The second engineer was Mr. Morrison, who originally went out to China in connection with the Wusung Railway, and whose local knowledge had been of special value in connection with the locating and surveying of the line. This corporation had for its representatives in China the Hong Kong and Shanghai Bank and Messrs. Jardine, Matheson, and Co. With the concession there would be rights of extension within the province and for the branch lines that might become necessary. A matter of supreme importance to which he might allude was that the sphere of their interest in the regions of the Yang-tze in regard to railway concessions had been lately defined in a clear and satisfactory manner, and they might consequently look with confidence for sound and legitimate expansion of great works in that populous valley. Through the good offices of the Hong Kong and Shanghai Bank, to whom the corporation was much indebted, a working arrangement had been come to with a group of leading German banks and others, forming what was known as the German Syndicate, and who, with the Hong Kong and Shanghai Bank, had been already engaged in large financial operations for the Chinese Government. This arrangement was one of mutual advantage, and they looked forward to the happiest results to be obtained from it. This corporation, then, had an outlook which could not but be regarded most favourably by the shareholders, and the board considered there was business before them which, though it would take time to mature, was calculated to prove satisfactory. The intention was to proceed carefully and prudently, for the board were aware there would be many wild schemes, uncertain, and perhaps valueless, concessions, and a fruitful crop of disasters and disappointments before the rush for Chinese enterprises ceased, and the fact was recognised that in China, as elsewhere, only what was sound, well controlled, and economically managed would prove profitable to shareholders and capitalists. In conclusion, he said he thought they had reason to congratulate themselves that they had before them the prospect of good business in connection with the development of the resources of China.

No resolution was submitted to the meeting other than a vote of thanks to the chairman, which was carried unanimously.

The Council of Foreign Bondholders notifies that it is prepared to pay the half-yearly dividend in arrear, due January 1st last, on the debentures of the Itana Railway Company, represented by the certificates issued by the council.

### GLASGOW AND SOUTH WESTERN RAILWAY.

#### CAPITAL.

July 31st, 1898.—The total expenditure on this account amounts to 15,638,645*l.*, and the receipts to 15,409,342*l.*, viz.:—

Ordinary stock .....	£4,994,920*
Preference stocks .....	6,220,080
Debenture stock .....	3,557,422
Premiums, &c. ....	636,920

Balance at debit of capital account, 229,303*l.* The expenditure during the half-year amounted to 128,403*l.*—viz., 99,704*l.* on lines open for traffic, 21,934*l.* on lines in course of construction, 4,261*l.* on working stock, 504*l.* on Portpatrick and Wigtownshire Railways. Estimated further expenditure—In the current half-year, 306,048*l.*; in subsequent half-years, 1,101,786*l.*; total, 1,407,834*l.* Capital powers and other available assets, 1,869,205*l.*

\* This is the amount actually received. The amount of stock on which dividends are payable is—Preferred ordinary, 4,994,920*l.*; deferred ordinary preference, 4,994,920*l.*; deferred, 442,250*l.*

#### REVENUE.

The revenue account for the half-year ending July 31st shows the receipts to have been as under:—

	1897.	1898.
Passengers—First-class .....	£21,633	£22,101
" Third-class .....	232,105	241,404
" Season-tickets .....	27,569	27,979
Parcels, horses, &c. ....	46,972	48,798
Mails .....	8,598	8,599
Merchandise (less cost of coll., &c.) .....	210,263	221,628
Live stock .....	11,714	11,287
Minerals .....	171,546	187,504
Rents .....	18,552	17,798
Transfer fees .....	173	217
Wayleave—telegraph lines .....	1,255	1,255
Mileage and demurrage .....	Dr.309	Dr.776

Total receipts .....

The expenditure on revenue account for the same period is detailed below:—

	1897.	1898.
Maintenance of way, works, &c. ....	£59,592	£66,513
Locomotive power .....	105,081	114,480
Carriage and wagon repairs .....	44,075	45,504
Traffic expenses .....	125,048	131,405
General charges .....	16,604	16,815
Law charges .....	1,079	1,186
Parliamentary expenses .....	7,741	1,227
Compensation—Passengers .....	1,746	6,574
" Goods .....	989	1,049
Rates and taxes .....	13,059	17,172
Government duty .....	1,350	1,378
Steamboats .....	29,063	30,794

Total expenditure .....

The net revenue account and the proposed appropriation of the balance available for dividend may be summarised as follows:—

	1897.	1898.
Balance from previous half-year .....	£5,562	£7,364
Net earnings .....	344,644	353,697
Total .....	£350,206	£361,061
Prior charges .....	£110,464	£111,364
Preference dividends .....	110,658	112,331
Dividend on ordinary stock .....	123,198a	—
Dividend on preferred ordinary stock .....	—	62,437b
Dividend on deferred ordinary stock .....	—	68,680c
Dividend on deferred stock .....	nil	5,52d
Balance to next half-year .....	5,886	5,697

Total .....

a At the rate of 5 per cent. per annum. b At the rate of 2½ per cent. per annum. c At the rate of 2½ per cent. per annum. d At the rate of ½ per cent. per annum.

The gross receipts for the past half-year show an increase of 37,723*l.*, the expenses an increase of 28,670*l.*, and the net receipts an increase of 9,053*l.* The ratio of expenditure to receipts is 55·10 per cent., as against 54·05 per cent.

#### TRAFFIC, &c.

	1897.	1898.
Half-year ended July 31st.		
Passengers—First-class .....	269,049	280,175
" Third-class .....	7,902,216	8,599,735
" Total .....	8,171,265	8,879,910
Season-tickets .....	9,002	8,917
Merchandise (tons) .....	719,605	767,423
Minerals (tons) .....	2,811,148	3,106,474
Mileage—Lines owned .....	363½	363½
" Partly owned .....	100½	100½
" Leased or rented .....	8½	8½
" Foreign lines run over .....	14½	14½
" Total operated .....	487½	487½
Train mileage*—Passenger .....	2,097,748	2,139,701
" Goods .....	1,411,656	1,485,649
" Total .....	3,509,404	3,625,350

\* Including mileage run for other companies.

The report states:—

"Satisfactory progress is being made with the works under construction,

which include the widening of the line between Bridgegate and Port-Eglinton, the new bridge across the River Clyde, the construction of the railway between Gatehead and Hurlford, and the extension of the Potterhill branch to the Glenfield Works.

"The Bill promoted by the company in the last session of Parliament, which was approved by the shareholders at the special meeting held on 22nd February last, has received the Royal Assent.

"Certificates relating to the permanent way, rolling stock, and steam vessels are appended. The renewals of rolling stock during the half-year have been as follows:—Six goods engines and tenders, ten third-class carriages, six passenger brake-vans, three horse-boxes, fifty goods wagons, twenty-four covered goods vans, thirty-one pig-iron and timber wagons, 170 mineral wagons and six goods and mineral brake-vans, and, in addition, nine engines have received boiler renewals and other extensive repairs."

#### NORTH CORNWALL RAILWAY.

The accounts for the half-year ending June 30th, 1898, showed for the Wadebridge line a gross revenue of 2,779*l.* and a profit of 2,140*l.*; for the Launceston and Halwill line a gross revenue of 4,232*l.* and a profit of 2,629*l.*; and for the Launceston and Delabole line the usual rental revenue of 4,375*l.* The capital expenditure on the Wadebridge line had been 200,000*l.* and the receipts 198,150*l.* (viz., ordinary stock, 40,150*l.*; guaranteed 3 per cent. stock, 108,000*l.*; 3½ per cent. debenture stock, 50,000*l.*); the capital expenditure on the Delabole line amounted to 249,000*l.* and the receipts to 249,000*l.* (viz., 3½ per cent. stock, 187,000*l.*; 3½ per cent. debenture stock, 62,000*l.*); the capital expenditure on the Halwill line amounted to 200,000*l.* and the receipts to 200,000*l.* (viz., 4 per cent. preferred ordinary stock, 75,000*l.*; deferred ordinary stock, 75,000*l.*; 4 per cent. debenture stock, 60,000*l.*). The report stated:—"In presenting the accounts for the past half-year, the directors have to report a continued improvement in the through coaching traffic of the Launceston and Halwill line, but some decrease in the local traffic and in goods. The net revenue account of this section shows a balance of 1,721*l.*, out of which the directors recommend the payment of the full dividend of 4 per cent. per annum on the preferred ordinary stock (as last year), carrying forward a balance of 222*l.* towards the dividend on the deferred ordinary stock to be distributed in March next. The usual dividend at the rate of 3½ per cent. per annum on the Launceston-Delabole line stocks will be distributed on September 30th, out of the fixed rental of 8,750*l.* per annum payable by the South Western Company in respect of this section. The interest at the rate of 3 per cent. per annum on the guaranteed stock of the Wadebridge line will similarly be distributed on August 31st, out of the fixed rebate paid by the South Western Company in respect of that line. The remaining section to Padstow will, it is anticipated, be opened for public traffic during the current half-year. The engineer's report on the progress made with the construction of this line is appended."

The engineers, in their report on the Padstow Extension, say:—

"With the exception of portions of four or five cuttings, and the approach to the station at Padstow, all the excavation is taken out, but in the tallest cutting a considerable quantity still remains—viz., some 20,000 cubic yards. Excepting No. 1 embankment, the embankments have been closed throughout the line, but some of them have to be widened and raised. Only two bridges remain to be built, one of them being about half done, and the other, a footbridge at Wadebridge, is a small matter. We expect the last cylinder of the Little Petherick viaduct will be bottomed up in a few days. The abutments are complete, and one of the piers. The girders are being delivered daily, and a considerable portion of the first span has been taken to the site. The station-house at Padstow is practically finished, except painting, &c.; the goods-shed is in hand, and the greater portion of the station-yard formed. Nearly the whole of the permanent way materials have been delivered, and about 2½ miles laid. The contractors have been considerably delayed with the progress of the work owing to the scarcity of labour."

### General News.

#### WATERFORD LIMERICK AND WESTERN RAILWAY.

The following statement, embodying an important suggestion for an alternative scheme, has been prepared by some of the leading representatives of those trading interests in the south who are opposed to the projected amalgamation scheme between the Waterford and Limerick Railway Company and the Great Southern and Western:—

The question of the amalgamation of the Waterford and Limerick Railway Company with the Great Southern Company's system is not receiving anything like the consideration which the importance of the subject demands. The proposed scheme, should it receive Parliamentary sanction, will affect injuriously or otherwise the interests of the trade and commerce of no less than eight counties, and, notwithstanding this, it is little short of amazing the indifference with which it is viewed by the very people whose interests are so intimately bound up with its success or failure. Many are doubtless under the impression that Parliament will withhold its sanction from the scheme, and others, anticipating that sanction, have resigned themselves to the inevitable. This alone accounts for the fatal resignation of the people under the

difficulties which confront them. They do not know what to do, and they are not often grateful for advice gratuitously tendered to them. Be this as it may, a word or two now may help to clear the air and stimulate inquiry and discussion regarding another aspect of this railway question which may turn out to be of permanent interest and benefit to the districts served by the Waterford and Limerick Railway. The public are by this time aware of the terms of purchase of the Waterford Railway by the Great Southern Company, but nevertheless it may be well to reproduce them here as set out in the half-yearly report of the former company. Here they are:—"The basis of amalgamation is the exchange of your debenture and preference stocks and shares for so much Great Southern and Western 4 per cent. debenture and preference stocks respectively as will yield the same amount of interest and dividend as the holders at present receive, save the 3½ per cent. preference stock, which is to be exchanged for 75 per cent. of the Great Southern and Western 4 per cent. preference stock, or at the option of the holders for 105*l.* cash for each 100*l.* of 3½ per cent. The ordinary shares of the company are to be exchanged for a guaranteed Great Southern and Western stock, ranking after the loan capital of that company, and yielding for the first year 1½ per cent., increasing ¼ per cent. each year until 2½ per cent. is reached, when the holders will have the option of converting into such a proportionate amount of 4 per cent. Great Southern and Western cumulative preference stock as will yield the same amount of interest." It will be seen that the ordinary shareholders of the Waterford Company under the foregoing basis of agreement are now about to reap unexpected advantages by the sale of their property. They have long enough been the victims of a policy which brought them nothing but disaster, and to the Great Southern Company they owe an eternal debt of gratitude for saving them once and for all time from the despair and helplessness which surrounded them, and from which there seemed no avenue of escape. There is no receding now from the prize offered and accepted for the railway, and the approval of Parliament is all that is required to make it binding upon the parties thereto. There are those, however—experts in the usages of Parliamentary committees—who contend that the sale will not be sanctioned because of the known dislike of these committees to "monopoly." In this event the ordinary shareholders would be the only sufferers, unless some other scheme, guaranteeing the same price and equal security, but free from the taint of "monopoly," be promoted and carried. There is only one scheme which may be regarded as fulfilling to the letter the conditions mentioned, and it is a scheme to which attention is now invited—viz., the purchase of the Waterford Railway by the counties through which it runs on the same terms as those offered by the Great Southern Company. It would then become the property of the county councils, be directed and managed by them in the interests solely of the trading and travelling public, and for the purpose, as far as possible, of developing the languishing industries of the south and west of Ireland, and promoting the cultivation and growth of the agricultural products of the country. A good service of trains and easy rates and fares would do all this, and establish a system of intercommunication between peoples and districts that must result in the general good of all. The price at which these advantages and reforms can be secured and effected will now be set forth. The Waterford Company have hitherto paid their full dividends on their preference and debenture stocks and shares. In a few instances only have they paid anything on their ordinary capital, amounting to 597,550*l.* If the counties take up the purchase of the line, this may be regarded as the only item on which they will have to provide interest. For the first year the sum required will be 8,963*l.*; for the second, 10,455*l.*; for the third, 11,947*l.*; for the fourth, 13,439*l.*; and for the fifth and every year thereafter, 14,931*l.* These figures represent precisely what the Great Southern Company are guaranteeing the ordinary shareholders of the Waterford Company, and they are what the counties will have to raise in the way of taxation annually if the present earnings of the railway are maintained. Distributed over the eight counties, the cesspayers will be insensible of their weight, as we shall presently see. The valuation of the rateable property of the counties and cities which it is proposed should guarantee the scheme is approximately as follows:—Kerry, 290,277; Limerick, 464,668*l.*; Limerick City, 66,071*l.*; Clare, 316,267*l.*; Galway, 474,481; Tipperary, 679,796*l.*; Waterford, 276,032*l.*; Waterford City, 40,880*l.*; Sligo, 212,472*l.*; Mayo, 311,818*l.*; total, 3,132,712*l.* The imposition of an all-round tax of 1*l.* in the pound upon this property would yield 13,053*l.* per annum, or very nearly sufficient to cover the maximum sum payable to the holders of ordinary shares in the Waterford Company on the basis of the terms of sale to the Great

Southern Company, and more than sufficient to meet the obligations of the counties for the first three years. Any sum earned over and above 14,931*l.* a year would go in reduction of the taxation of the taxable area at large. This would, moreover, encourage the support of the rail by merchants and traders without exception, with the result that in all likelihood the counties would possess in a few years' time a fine property free from all encumbrances. It is only fair to state here that the counties and cities reaping the greatest benefit from the proposed scheme should bear a larger share of taxation than districts less favourably situated, and the equitable adjustment of the tax as between the various districts could be determined by some tribunal appointed by the Board of Trade, who would have no further interest in the matter than doing justice to all concerned. Taxation should carry with it representation on the board of directors, which would probably not exceed ten members. This is, however, a matter for arrangement between the counties themselves. The scheme, as a whole, cannot fail to receive that attention which it deserves from the public at large, and is entitled to the serious consideration of those who are interested in the prosperity of the south and west of Ireland.

### INDIAN RAILWAY ITEMS.

The scheme for the construction and working of a light railway from Raichur to Wandalli goldfields has received the favourable consideration of the Nizam's Government and Sir Trevor Plowden. As the promoter, a Bohra merchant, does not want a guarantee, it is likely to be commenced soon.

The Ghazialbad-Moradabad Railway, 87 miles long on the 5½ ft. gauge, and costing 82.3 lakhs, is to be commenced this year. It will have a large bridge crossing the Ganges about the middle of its length. The contract with the Delhi-Umballa-Kalka Railway Company for the construction and working of the extension from Kalka to Simla was executed by the Secretary of State on June 29th. The line will be on the 2 ft. gauge (single track) and on a route independent of the existing cart road.

Advices from India refer to the railway traffic returns for the current financial year in terms that promise further satisfactory results. The losses all occur in the South, very good results having been attained in other parts of the country, thanks to the great traffic in wheat and seeds, in which the southern lines do not participate to any appreciable extent. *A propos*, it is stated that the railway budget for the next three years will not exceed six or seven acres per annum, which sum will include the money required for the improvements and maintenance of open lines. This will be far more reasonable than a ten or eleven crore annual budget, which was supposed to be worked up to in the current three-year period.

The Bengal Chamber of Commerce opposes the extension of the Assam-Bengal Railway on the ground that the resources of the State ought not to be employed in the development of a project "the object of which is avowedly to compete with a long-established private enterprise." The committee of the chamber observe, in a letter to the Bengal Government Railway Department, first, that the proposal for the construction of a line from about Hajiganj on the Chandpur branch of the Assam-Bengal railway to Shatnol, the first steamer station southwards from Narainganj, is apparently put forward in the belief that it "will result in the making of Chittagong, the port for all jute from Narainganj and the country north of that place." With reference to this, the committee say that a very large proportion of jute from Narainganj and the country north of that place will never find its way to Chittagong, as it is required in Calcutta for the use of the mills there, and also by the balers, who reassert it and press it for export to Europe. As regards the portion which at present goes to Chittagong for shipment from that port, this already has the advantage of the river route at a rate of freight with which, in the opinion of the committee, a railway could not hope to compete and still pay a return on the capital invested. The second proposal, for the construction of a line from a point opposite Goalundo to the ferry station to be established midway between Narainganj and Shatnol on the right bank of the Dullaseri river, is one which, the committee are informed, would prove most costly. It would also, as in the case of the first-mentioned scheme, have to compete with water carriage, which between Narainganj and Goalundo has everything in its favour as regards steamer services, a good waterway, and moderate rates of freight. These objections are supported by the committees of the Indian Jute Manufacturers' Association and the Calcutta Baled Jute Association.

### RAILWAYS IN CHINA.

A Dalziel telegram, dated Shanghai, September 5th, states that at Yunnan-fu eight French surveyors are making arrangements

for the building of a railway from Mengtse to Yunnan-fu, in spite of the opposition of the Viceroy and his officials.

Elsewhere we report the statutory general meeting of the British and Chinese Corporation, Limited, which is associated with Messrs. Jardine, Matheson, and Co., and the Hong Kong and Shanghai Banking Corporation in the concession for the Shanghai Szu-chan Ching-Kiang and Nanking Railway.

The *Pall-Mall Gazette* on Tuesday declared that it was in a position to give, on absolutely trustworthy authority, some important information in regard to an agreement between England and Germany. "The mainspring of the agreement is commercial—its principle the recognition of a common interest in promoting commerce. The point with which it more directly and principally deals is an understanding between the two Powers as to their spheres of railway influence in China. It is agreed that a joint line shall be made with English and German capital, subscribed by English and German banks, from Tientsin to Chin-Kiang. The administration of the line, so far as Shantung is concerned, is to be German; so far as the Yangtse Valley is concerned, English—the whole to be one joint enterprise. Germany agrees to support England in any claims she may prefer to the Tsung-li-Yamen for railway concessions in the Yangtse; England agrees to support Germany for any in the German sphere."

Mons. J. E. Devolder, manager of the Société de Etude de Chemins de Fer en Chine, writes from Brussels:—"Inaccurate information published by various newspapers give to our company a character which it does not possess. These reports represent it as an undertaking intended to specially further the interests of Russia, whose control appears to be effected through the medium of the Russo-Chinese Bank. We feel that we cannot allow the spreading of such an error. Our company is an exclusively industrial enterprise, entirely free from any political connection. As a proof of this it will be sufficient to peruse the deed of constitution and articles of association, all which were legally published in the official record annexed to the *Moniteur Belge* (the Belgian official paper). These documents clearly define the object of the company, and state the names of the founders, directors, and subscribers, not one of whom is of Russian nationality. The selection of the Russo-Chinese Bank as the company's financial agent is naturally accounted for by the fact of the latter's good relations with the Belgian banking institution 'Société Générale,' one of our principal shareholders, and for whom the former bank acts as correspondent."

The Pekin correspondent of the *Times* telegraphs under date of September 5th:—"I have returned from examining on the spot affairs at Niu-chwang. The Russians are building a branch line, guarded by armed Cossacks, 18 miles eastward, connecting the port with the main line. There is great activity, and 14,000 coolies have already been landed. The Russians insist on their right of obtaining land for the railway at an arbitrary price by compulsory sale. They act as if Niu-chwang were already under their domination. At the river terminus, disregarding rights of ownership, they have built a godown, dug trenches, and cut crops upon land owned by Englishmen, whose title-deeds are deposited at the British Consulate. The matter is under investigation. At the junction, which is of great strategic importance, the Russians will build an intrenched camp, ostensibly as a protection to the railway. They are founding on the right bank of the Sungari, south of Hulan, on the richest plain in East Manchuria, a strong Russian military camp as a protection to the railway junction, whence the Southern Railway will pass, through Kwang-chung-tzu, Mukden, and Niu-chwang, to Ta-lien-wan, with a branch to Kirin." In referring to this cablegram in its leader columns, the *Times* says:—"We need hardly say that this sudden development of Russian railway enterprise at this particular point cannot be regarded with indifference by this country. Niu-chwang is a free port with which England and America have a considerable trade, while Russia has no appreciable trade with it at all. After Russia had occupied Port Arthur and Talien-wan, she proposed to starve the trade of Niu-chwang by carrying the railway several miles to the east of the town. The scheme for the extension of the Peking-Shan-hai-kwan railway to Niu-chwang, which the Hong-kong and Shanghai Bank were ready to finance, would have given the trade of the port another outlet to the interior. Accordingly M. Pavloff, acting upon instructions from his Government, upset that scheme by putting pressure upon the Tsung-li-Yamen. Now, it seems, Russia has changed her plans and has resolved to supply Niu-chwang with a railway—and a camp to protect it—herself. If she succeeds she will, of course, have inflicted a fresh blow on British prestige in those regions. She will have prevented English capital from connecting the

inland markets with Niu-chwang, and she will have rendered that port dependent on her own railway system. On the very last night of the session Mr. Balfour declared that the success of M. Pavloff's efforts to invalidate the concession to the Hong Kong and Shanghai Bank was 'engaging the serious attention of her Majesty's Government.' Hints have been dropped since that the Government had learnt the lesson of Ta-lien-wan, and that notwithstanding Lord Salisbury's personal belief that the construction of Chinese railways would not prove remunerative and could not confer any political influence, we were about to take up a somewhat firmer attitude in that country. Is this the result of the attention of her Majesty's Government, and of their resolve to assert our interests in China?"

The *China Gazette* states that, despite the extraordinary precautions taken to preserve secrecy, it has ascertained that on August 26th, at the instance of M. Pavloff, the Russian representative, the Tsung-li-Yamen formally terminated the contract with the Hong Kong Bank for the raising of a loan on the Niu-chwang railway line. Sir Claude Macdonald, British Ambassador, and the Bank assented, the latter being instructed to assert that the security offered for the loan was insufficient. The representatives of the Bank in Shanghai have no knowledge of the matter, but the publication of the news has occasioned intense excitement, more especially in view of the strong position the British Government was understood to have assumed when the question was raised in Parliament. The only possible solution is that the matter is a case of a compromise against the Luhan Railway, which will not be proceeded with on the present contract. Dalziel's agent at Shanghai in reference to the same subject telegraphs:—"According to reports circulated from Russian sources, Sir Claude Macdonald, British Ambassador at Peking, has recognised the cogency of the Russian objection to British capital being employed on the Niu-chwang Railway. It is, therefore, surmised that a compromise is imminent, because of the fact that the Russo-Chinese Bank withholds the payment of the first instalment of the Belgian Luhan loan. This, it is believed, is doomed to failure if issued in Paris in the face of the altered relations among the Powers in China."

It is reported that the French Ambassador at Shanghai has protested against the Chinese authorities having signed a preliminary contract with an American syndicate last July for the construction of the Hankow-Canton Railway.

#### ARGENTINE RAILWAY ITEMS.

Mr. Albert Knight, who has held the post of accountant of the Central Argentine Railway Company for many years, has resigned his post, and Mr. T. D. Brooke, London Secretary of the Buenos Ayres and Ensenada Railway Company, has been appointed to the post.

Mail advices from Argentina announce the inauguration of an extensive section of the new line to Bolivar, reaching Guaminí, and passing by Saavedra, where it joins the Bahia Blanca and North Western Railway. This represents an increase of 125 kilometres in the open railways of the Province of Buenos Ayres.

The Argentine Finance Minister had decided against the demand of the Rentas Office that the Western Railway of Santa Fé should be subjected to the provisions of the decree of September, 1897, in reference to the importation of construction and other materials for railway use. The Minister bases his decision on the fact that the decree in question only referred to those companies which enjoy privileges under their contracts.

In an action brought by Messrs. Van Oppen and Becker against the Buenos Ayres Great Southern Railway Company, claiming compensation for the rescission of a contract for the provision of 55,000 to 100,000 sleepers, the Judge of Commerce, Dr. Amuchástegui, has decided that, according to the Stamp Law of 1897, the contract ought to have borne a stamp of \$445, being at the rate of 1 per 1,000 on the fixed price of \$445 each for 100,000 sleepers, and that as the stamp had not been affixed, the parties had incurred a penalty of \$8,900, which he ordered to be paid within three days.

According to Argentine papers just to hand Señor Isidro Quiroga has commenced an action against the Interprovincial Railway Company, Limited. He claims to have been the original concessionaire of a line from San Juan to Chumbicha, adding that he passed the same to Mr. J. S. Sanforth, who again transferred it to Messrs. Meiggs and Co., and that the latter in turn handed it over to the defendants, who are stated to have allowed the concession to lapse without having paid him (Señor Quiroga) the

price arranged upon, or the guarantee of 50,000*l.* made by him as concessionaire. The damages are laid at 111,793*l.*

Referring to the scheme for a Central Station in Buenos Ayres the *Review of the River Plate* says:—"We have received a copy of the proposal of the Rosario Railway for the construction of a terminal station at Retiro, and of a through station at the port, together with the reports of the Department of Public Works and the National Railway Board on the proposal. We intend to refer to it at greater length next week, and we shall content ourselves in the meantime with indicating that the Public Works Department reported unfavourably, on the grounds that sufficient particulars were not given regarding the proposed Central Station, that such a Central Station should not only meet the needs of the railways, but add to the embellishment of the city, and that sufficient provision should be made for the entry of the other railways from the North. The National Railway Board also reported unfavourably on the ground that the Central Argentine Railway would soon be required to take up its rails in Palermo, subject to compensation. It practically suggested that the proposal should be carried out, but that the terminal station at Retiro should belong to the Central Argentine Railway, and that the through line from Retiro to Casa Amarilla should be constructed by one or more of the companies interested, or by a new company to be formed. To these reports a very courteous but decided reply has been tendered by the representative of the Rosario Railway. One thing may be noticed here. We have spoken more than once of the delay caused to public business by the vacancy in the portfolio of the Interior, and the papers regarding this proposal offer an excellent illustration. On May 26th Mr. White, the Rosario Railway's representative, applied to Dr. Alcorta, the acting Minister, for permission to examine the reports with the object of replying to them. This simple application was not granted for more than a month, being actually conceded on June 28th. We also note as a curious circumstance that the Railway Board reported on May 17th, although it was not formally requested to do so until the 24th of the same month. Unless the latter date is a printer's error, such dispatch is very remarkable."

#### DIVIDEND ANNOUNCEMENTS.

[The date given in parentheses is that on which the announcement was made.]

Caledonian Railway (September 6th).—At the rate of 5 per cent. per annum, carrying forward 13,000*l.* The dividend on the deferred converted ordinary stock is at the rate of 2 per cent. per annum. For the corresponding half of last year the dividend was at the rate of 5½ per cent. per annum, and 15,350*l.* was carried forward. The dividend on the deferred ordinary was at the rate of 2½ per cent. per annum. The July dividends for a period of twelve years are shown below:—

1898 ... 5 p. cent.	1895 ... 4½ p. cent.	1892 ... 4 p. cent.	1889 ... 5 p. cent.
1897 ... 5½ "	1894 ... 4 "	1891 ... 4 "	1888 ... 4½ "
1896 ... 5 "	1893 ... 4 "	1890 ... 5 "	1887 ... 3½ "

North British Railway (September 8th).—At the rate of 3 per cent. per annum on the "ordinary preference" [so-called, but really preferred converted ordinary] stock, and at the rate of ½ per cent. per annum on the "ordinary" [so-called, but really deferred converted ordinary] stock, carrying forward about 3,000*l.* For the corresponding half of last year the dividend on the deferred ordinary was at the rate of 1 per cent. per annum, and the balance carried forward was about 4,000*l.* The July dividends on the basis of the old ordinary stock (now represented by the "ordinary preference" and "ordinary" stocks) for the past twelve years are appended:—

1898 ... 3½ p. cent.	1895 ... 3 p. cent.	1892 ... 2½ p. cent.	1889 ... 1½ p. cent.
1897 ... 4 "	1894 ... 3½ "	1891 ... 1 "	1888 ... 4 "
1896 ... 4 "	1893 ... 3½ "	1890 ... 1½ "	1887 ... 2½ "

Lanarkshire and Ayrshire Railway.—At the rate of 5½ (against 4) per cent. per annum.

Horncastle Railway.—At the rate of 9 (against 9) per cent. per annum.

Leeds and Liverpool Canal.—At the rate of 2½ per cent. per annum.

#### STRONGEST LIFE OFFICE IN THE WORLD.

#### THE EQUITABLE LIFE ASSURANCE SOCIETY OF THE UNITED STATES.

ASSETS .....	£40,340,231 Sterling.
SURPLUS .....	10,508,995 Sterling.

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months .....	£0 7 0
Six Months .....	0 13 0
Twelve Months .....	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

- Sep. 13—Glasgow and South Western Railway (Half-yearly), Glasgow, at 12.
- Sep. 13—North Cornwall Railway (Half-yearly), Launceston, at 1.
- Sep. 20—Caledonian Railway (Half-yearly and Special), Glasgow, at 1.
- Sep. 22—North British Railway (Half-yearly), Edinburgh, at 12.30.
- Sep. 27—Ottoman Railway from Smyrna to Aidin (Half-yearly), Winchester House, at 12.
- Oct. 13—Grand Trunk Railway of Canada (Half-yearly), City Terminus Hotel, at 2.

**Foreign Railway Contracts.**—The Society of German Railway Administration, whose annual meeting has just been held at Munich, has passed a resolution of considerable importance to those English and Scotch firms who make a practice of submitting tenders for railway contracts open on the Continent, and who frequently find it extremely difficult to ascertain definite information as to the results of the competitions. The resolution, which was unanimously adopted, requests each railway administration associated with the society to publish in the society's organ complete details of the contracts, and of the results of the tenders submitted. As the society comprises no less than seventy railway administrations, of which forty-four are German, twenty-one Austro-Hungarian, and five Dutch and Luxemburg, representing a total mileage of 53,178 miles, it will be obvious that the adoption of the form of the resolution by the different railway administrations would be of considerable benefit to those who are interested in the publicity of railway contracts in the countries above mentioned.

## THE CONTROL OF STATION PLATFORMS.

To attempt to apportion the blame for the recent disastrous accident at Wellingborough, in which a Midland express was wrecked by collision with a station platform trolley which had somehow fallen on to the permanent way, would be manifestly improper so long as the matter remains, as at present, the subject of official inquiry. It is, however, not in question that the presence of the trolley was in some way due to the action of two boys who were neither passengers nor servants of the company employed upon any specific duty in connection with the station working. Thus, and without further reference to the Wellingborough instance, is raised the whole and important question of the presence upon railway premises of persons having no legitimate business thereon. The inconvenience to passengers caused by the large crowds of those who come to "see off" a friend, or, perhaps, merely to pass the time, is the subject of almost daily complaint in the columns of the press. To the companies' servants it can prove no less; to both it must often be a positive danger. Year by year railway stations become more crowded, yet the companies, while admitting the prevalence of the evil, have taken no steps to abate it. It is true that in the recently revised standard code of railway by-laws, power is taken under clause 18 to eject unauthorised persons trading or soliciting employment on the premises of the companies. In criticising the new code, we expressed our regret that the companies had not seen their way to go further, and to exclude from arrival and departure platforms all members of the public who are not passengers or in attendance upon passengers for due reason. It is, we believe, advanced as a reason for the present tolerance that such a regulation would be both expensive and difficult to carry out, necessitating a certain addition to the station staff for what are practically police purposes, together with frequent and possibly violent disagreements with individual members of the public. We refuse to believe for a moment that the question of expense will deter our great companies from adopting any measure found desirable in the public safety. The difficulty, indeed, is more likely to occur on the side of the public itself, tenacious as the latter is of what it may consider, however illogically, its rights. A station is maintained for the specific purpose of dealing with the business of the railway, and the right of the owner to exclude those who do not require its accommodation for business purposes is as patent as the validity of the common private notice—"No admittance except on business." It is true that persons allowed upon railway premises other than for purposes connected directly with railway business must conform to the conditions and regulations which the owning company may choose to promulgate. But this is not sufficient, for the double reason that their presence is in itself inconvenient, while, as regards a certain class especially, regulations are of no avail unless rigidly enforced. Admitting, therefore, that the exclusion of all persons who may not have direct and personal business with the railway may be productive of hardship in certain cases, it is but logical that those who desire such accommodation should pay some toll for the use of it. In short, we would advocate the imposition of a nominal payment—say of one penny—for the use of platform and other station premises by those who are not holders of tickets as passengers, or who are not in some other capacity engaged

directly with the railway. Such a system is in operation in some large stations on the Continent with the best results. An ingenious suggestion is made by a correspondent of the *Scotsman* that platform tickets might be issued through the medium of a penny-in-the-slot machine. That, however, is a matter of detail. Such a payment would, at any rate, keep out the undesirable loafer and irresponsible child, while the receipts would represent no more than a fair contribution towards the maintenance of the station by those who now make use of the latter without payment of any kind. In this respect, indeed, the fee would be on all fours with the sixpenny contribution exacted from privileged cabmen in the London termini. We have no desire to pose as the instructors of our railway managers in an important branch of their own business. But it would be idle to deny that the congested state of some of our largest stations shows that one of the worst forms of public inconvenience and possible danger may exist under the very eyes of headquarters.

### THE SWISS RAILWAY LOAN.

Considerable interest has been aroused by the recently published details of the new Simplon tunnel, forming, as this will, the third railway link between Italy and Switzerland, and both from the stupendous nature of the engineering conception, and from the probable economic results, an undertaking worthy of the close of the nineteenth century. It is from neither of these standpoints, however, important as they are, that we are concerned with the subject to-day. The finance of the scheme, although a comparatively small matter in itself, is just now of special interest in the precedent which this will afford to the much larger matter of the general acquisition by the Swiss Federal Council of the railway system of the Republic. We referred in detail on March 5th of this year to the scheme whereby the existing proprietors of the various railways are to be paid out in Federation bonds on an approved scale, the operation involving an increase to the national indebtedness of 984 millions of francs, or nearly 40 millions sterling. We expressed at the same time our doubts as to the practicability of raising the milliard in question without recourse to sources outside the limited extent of the Republic, despite the patriotic utterances of many supporters of the Bill, whose avowed object it was to restore to Swiss ownership the property of the Swiss railways. The issue this week through Messrs. Coates, Son, and Co. of a  $3\frac{1}{2}$  per cent. loan of 60 millions francs, or 2,400,000*l.*, on account of the Jura-Simplon Railway, guaranteed as to capital and interest by the Swiss Federation, proves the correctness of our anticipations; and the reception with which this may meet will doubtless regulate the emission of the main portion of the railway loan. Small as is the sum now involved, it is still equivalent to a duplication of the National Debt, which has hitherto stood at the remarkably low figure of 1*l.* per head of the population. By 1909, the year in which the St. Gotthard concession determines, and the railway purchase scheme will be complete, the whole sum of 40 millions will have raised the debt to barely 16*l.* per head. It is a curious coincidence to note that this figure represents almost exactly the state of affairs obtaining in Belgium to-day, a country which has also arranged the State ownership of its railways, and which has had no fault to find with the security based on its railway receipts. Whether the Swiss railways in the hands of the Government will produce the 80,000*l.* surplus estimated by M. Numa Droz, the director-general; or whether they will show a net loss after the payment of the guaranteed interest, there can be little doubt as to the ability of Swiss credit to bear the

burden to be thrown upon it during the next ten years; and, of course, in a greater degree as to the comparatively small amount now to be raised. Whether the country is wise to burden itself and to interfere with the ordinary course of trade and business is another matter altogether, but that belongs to the *chose jugée*. It is of interest to note that the rate of the present loan is fixed at  $3\frac{1}{2}$  per cent., although the official credit of the Republic may be said to have been placed on a 3 per cent. basis last year by the attempted conversion of the 1887 loan. It is true that that operation was strictly internal, but the failure to effect conversion of more than one half of a bare million sterling has no doubt been responsible for the present return to the higher rate coupled with external subscription. The provision for redemption at par in ten years at any rate provides for a reconsideration of the rate of interest. Looking to the ruling quotations of the securities of foreign Governments enjoying a lesser measure of international solicitude and no greater promise of commercial prosperity, we see no reason why Swiss guaranteed railway bonds should not enjoy considerable favour in financial circles. As we have mentioned already, the present loan is only a small fraction of that which must ultimately come on the market; though it is more than likely that the conditions of future issues will not vary in the interests of subscribers. A free and inter-bourse market is assured, and to investors the bonds will present considerable advantages. As an international matter the financial operation of the general scheme is not one of much import, being carried out gradually and in a manner to affect the money markets little if at all. An obvious effect, however, of the compulsory change from a progressive industrial holding to a sober Governmental security will be to cause realisations for the purpose of reinvestment elsewhere. Such adjustments nearly always make available for new enterprise large sums of money representing at least a portion of the difference between the capitalised values on the old and new rates of interest respectively. The present instance apart, however, the inflation of public indebtedness is a matter which Europe will have to reckon with some day.

### SCOTCH RAILWAY RESULTS.

The Caledonian dividend announced on Tuesday last was not so favourable as that of the Glasgow and South Western, to which we referred in our last issue. Whilst the latter paid  $\frac{1}{2}$  per cent. more than for the first half of 1897, the Caledonian has to reduce its rate of distribution to the same extent, from  $5\frac{1}{4}$  to 5 per cent., whilst the sum carried forward is also rather lower. On the good announcement made by the "Ayrshire" Company, expectations became rather higher regarding the results of the other Scotch lines, and the actual declaration caused some disappointment. Caledonian deferred declined to 55, which is about 2 points below the quotation a short time ago. With the dividend just announced, the rate of distribution on Caledonian ordinary for the year is reduced to 5 per cent., equal to 2 per cent. on the deferred stock. The "Ayrshire" dividend for the year is equivalent to  $5\frac{1}{2}$  per cent. on the old ordinary stock, so that the smaller company has again come out first. In 1896 the "Ayrshire" Company managed for the first time over a very long period to pay  $\frac{1}{2}$  per cent. more than the Caledonian; but last year the latter paid  $\frac{1}{2}$  per cent. higher dividend than its rival. Now the smaller company has reverted to the position in which it stood in 1896. The Caledonian Company had an increase of 59,628*l.* in its receipts for last half-year, so it is clear that the decline of  $\frac{1}{4}$  per cent. in its dividend implies a large growth in expenses and capital charges. Regarding the future, it should also be borne in mind that from the begin-

ning of the current half-year the company has to meet the dividend in full on the recent issue of ordinary stock, and this, at the rate of 5 per cent., will add 61,000*l.* per annum to the capital charges of the company. The "Ayrshire" report shows also that even that company has at last resorted to the issue of ordinary capital. This company had not issued any ordinary stock since 1881 until a few months ago. At the last half-yearly meeting the authority of the shareholders was given to the issue of 460,000*l.* of ordinary stock, and of this 67,000*l.* was issued without delay. Hitherto the capital requirements of this company have been met very economically by the issue of preference stock. Apparently the board has come to the conclusion that it is time to issue ordinary stock again in order that the preference capital may not become "top-heavy;" and certainly the high price of the ordinary stock lately ruling affords a good opportunity for such an issue. The accounts of the Glasgow and South Western Company show that the actual increase in receipts last half-year was 37,700*l.* Against this the addition to expenses was 28,600*l.* A further amount of preference capital and the addition to the ordinary stock already referred to accounted for a good part of the surplus, the balance being utilised to raise the dividend from 5 to 5½ per cent. The North British dividend, announced on Thursday morning, was the most disappointing of all. It was at the rate of ¾ per cent. per annum on the deferred ordinary, with about 3,000*l.* forward, against 1 per cent. per annum, with 3,763*l.* forward. Bearing in mind that the traffics showed an increase of 83,030*l.*—the largest of any Scotch company—this outcome is a very disappointing one. The large addition to gross receipts had led to the belief that the dividend would be increased, especially as the amount required to do this is very small. Consequently, the deferred stock was very flat, and promptly fell on the announcement from 44½ to 42½, whilst a still further decline took place yesterday. The dividend declared is the poorest in any half-year since 1895.

### THE AMERICAN RATE WAR SETTLEMENT.

At last the rate war between the American western roads and the Canadian Pacific looks like being settled. It has been proceeding since the end of January last, and has involved both the Canadian Pacific and the Grand Trunk as well as the American Pacific lines in considerable loss of revenue. Various rumours that the fight had been settled have been trotted out at frequent intervals, but they have proved to be without foundation. Now that the matter is actually settled little advance has been reflected in prices, though it is quite probable that the early purchases made in anticipation by knowing insiders have to a large extent restricted the rise. In another column we publish a letter addressed by the vice-president of the Canadian Pacific to the "executive officers of competing and connecting lines," from which it appears that that road has decided to abide by the decision of the Interstate Commerce Commission and renounce its claim to "differentials" "restoring ante-bellum rates as far as practicable in existing conditions," to take effect from the 25th inst. The whole fight, as we pointed out in an article on this subject in our issue of March 12th last, turned upon the right of the Canadian Pacific to charge "differential" rates. This right the Interstate Commerce Commission denies, and the obstinate refusal by that road in the course of previous negotiations to give way on this point has accounted for the length of the struggle. For our part, we pointed out in the article referred to above that "it is not quite clear why the Canadian Pacific should ever have been 'conceded the large differentials referred to.'" At last,

however, the Canadian Pacific has had to climb down, and the American roads, with their ally in this business—the Grand Trunk—have won the day. Whether the more local rate struggle which arose between the Grand Trunk and the Canadian Pacific will also be settled now that the more important question is out of the way remains to be seen; but certainly the prospects of such an eventuality are much improved thereby. It must be some satisfaction to the stockholders that the through rates to Pacific points are on a fair way to be restored, though, now that the Klondike business is practically over, the satisfaction must be only of a limited character. There is another point. The Interstate Commerce Commission, on the application of the American roads, suspended the operation of the "Long and short haul clause," in order to enable them to compete for Canadian business without putting down their local rates. This privilege, which has been used very freely, should now be withdrawn, or a real and lasting settlement of this everlasting rate business will be as far off as ever.

### PASSING NOTES.

The traffic receipts for the week ending September 4th, on thirty-three of the principal lines of the United Kingdom, amounted to 1,880,398*l.*, which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,838,952*l.*, with 19,034½ miles open. There was thus an increase of 41,446*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for ten weeks to date amounted on the same thirty-three lines to 18,793,352*l.*, in comparison with 18,435,509*l.* for the corresponding period last year; increase, 357,843*l.*

The Swansea and Mumbles Railway Company, at a meeting of directors on Saturday, decided to carry out some important improvements in connection with their undertaking. Quite recently there have been a number of breakdowns on the line, and traffic has been seriously delayed and disarranged. The company have consequently decided to order two new locomotives of an improved type. In addition to this, the directors have thought it advisable to remodel the present Rutland-street Station, and at a later date improvements in the Oystermouth Station at the Mumbles will probably be carried out. The proposal to electrically equip the line has for the present been abandoned, as it is found that suitable locomotives cannot be obtained.

The Trade and Navigation Returns for August show exports amounting to 20,186,016*l.*, an increase of 1,412,019*l.*, or 7·5 per cent., on the corresponding month of 1897, the imports amounting to 37,216,427*l.*, an increase of 3,845,142*l.*, or 11·5 per cent. The value of the iron and steel exports was 1,832,382*l.*, against 1,853,705*l.*, a decrease of 1·1 per cent.; and of coal and coke exports 1,613,446*l.*, against 1,527,830*l.*, an increase of 5·6 per cent. Imports for eight months ended August 31st amounted to 309,076,495*l.*, an increase of 14,511,316*l.*, or 4·9 per cent.; exports to 152,784,073*l.*, a decrease of 4,901,828*l.*, or 3·1 per cent., and re-exports to 41,748,111*l.*, a decrease of 282,811*l.*, or 0·7 per cent.

On the application made by the Association of Head Masters to the authorities of the Railway Clearing-house, numbers of the principal railway companies in England have agreed to issue scholars' season-tickets from any date to any date, with a minimum of three months. The arrangement will not apply so far as regards the period for which the tickets are available on the Cheshire lines, Great Central, Great Northern, Lancashire and Yorkshire, Metropolitan, and North Eastern railways, nor will the existing practice be affected with regard to these tickets as issued in Scotland.

On Monday last a familiar figure in Salford and Pendleton passed away in the person of Mr. James Anderton, of Brentwood, Pendleton, who for a period of about forty years was in the service of the Lancashire and Yorkshire and Great Central railway companies. During the last twenty-six years he has

been in the employ of the Great Central Company, and for the greater portion of that time has held the position of chief clerk in the mineral department.

At the half-yearly meeting of the Barnoldswick Railway Company on Monday, it was reported that the directors had approached the Midland Railway Company with the view of selling to them the line, and as the result of those negotiations a verbal agreement had been arrived at for effecting the purchase. As soon as the agreement had been properly drawn up the conditions of purchase would be submitted to the shareholders at a special general meeting.

A Parliamentary paper dealing with the banking, railway, and shipping statistics of Ireland to the end of June, 1898, states that the aggregate railway receipts for the half-year were 1,636,632*l.*, an increase of 17,507*l.* as compared with a year ago, the average receipts per mile being 549*l.*, against 543*l.* In eight only of the twenty-six weeks was a decrease made. The progress has been steady and continuous since the year 1892, when there was a decrease of 55,969*l.*

The River Wear Commissioners at Sunderland have adopted a scheme for quay and dock extensions to cost 261,000*l.* This is in addition to the works in progress, which raise the total to 375,000*l.* The object is to provide accommodation for the large steamers which are now being generally ordered by shipowners. The chairman (Sir James Laing) opposed the scheme as being too large for probable requirement.

A "concert dinner" has been started at the newly opened Sefton restaurant, which is attached to the Midland Railway Company's Adelphi Hotel, Liverpool. A dinner to the accompaniment of music is a novelty as regards provincial hotels; but if the experiment proves successful at the Adelphi, music will become a feature of all the Midland hotels.

The Midland Railway Company is building ten more express engines of Mr. Johnson's 7ft. 9in. single-wheel class, also more of the 7ft. coupled class, with 19½in. cylinders, and 170lb. steam pressure. These are taking the place of some of the old engines of the 800 class, built about 1870, which have been put into the duplicate class, and marked "A."

On Saturday last the goods agents of the West Riding district Great Northern Railway, met at Leeds to present Mr. J. Proud who has been promoted from the position of goods manager, West Riding district, to a similar position in the London district, with an illuminated address as a mark of the esteem in which he is held by them.

A contemporary, in referring to the recent rise in Northern Pacific preferred stock, says:—"The stock, which Mr. J. Pierpont Morgan says will be worth 85 from this on, is already steadily drifting into the hands of investors." Quite so—in anticipation, no doubt, of the next reconstruction and assessment

Mr. Walter Hudson, of Darlington, president of the Amalgamated Society of Railway Servants, has consented to come forward as a labour candidate for the borough. At a meeting of the local branch of the society on Sunday night, he was unanimously recommended for adoption.

What was virtually the opening of the new dock at Barry took place on Monday, when the large caisson that has been building for the past three years was removed from the entrance for the first time and drawn by the hydraulic machinery into the chamber prepared for it.

A report from the Select Committee of the House of Lords on the Companies Bill has been published. The committee have not completed the inquiry, and should the Bill be again introduced into the House of Lords a fresh committee will be appointed.

Sir John Jackson, the contractor for the Dover Harbour and Devonport Dockyard extension schemes, has been seriously burned in a railway accident at Madrid. It is feared that the accident is of a very grave character.

## Money and Stock Markets.

*The monthly settlement in Consols takes place on the 3rd prox.; the fortnightly settlement in other Securities commences on the 13th inst.*

CITY, FRIDAY EVENING.

With abundant supplies of money the condition of the MONEY MARKET continues extremely easy. Loans at call and for a week command from  $\frac{1}{4}$  to  $\frac{1}{2}$  per cent., and the India Council to-day lent a considerable sum up to September 27th at  $\frac{3}{4}$  per cent. Discounts were inclined to be firmer on the fall in the New York exchange, and finally ruled at 1 11-16 to 1  $\frac{1}{4}$  for three months' bills. The Bank return, issued yesterday, shows a slight decrease in the note circulation, which is more than counterbalanced by the withdrawal of coin from active use, the net result being a decrease of 77,000*l.* in the reserve, which now stands at 23,791,000*l.*; its proportion to the current liabilities, however, is  $\frac{2}{3}$  higher at 40 per cent., owing to the decrease in the total deposits. There is a decline of 696,000*l.* in the "other securities," which is doubtless connected with yesterday's repayments by the market to the Bank, but Government disbursements have reduced the public deposits by 715,000*l.*, and on balance the reduction in the private deposits only amounts to 128,000*l.* Since the return was made up 21,000*l.* in French gold has been sold by the Bank.

Silver bars are now quoted at 27 15-16*d.* per oz., being 3-16*d.* lower on the week. A year ago the price was 2*d.*

Eastern exchanges are telegraphed as follows:—Bombay, 1*s.* 3 31-32*d.*; Calcutta, 1*s.* 3 31-32*d.*; Hong Kong, 1*s.* 11½*d.*; Shanghai, 2*s.* 8*d.*; Singapore, 1*s.* 11 13-16*d.*

The premium on gold at Buenos Ayres has risen during the week from 161-56 to 163-40 per cent., making the paper dollar (nominally worth 4*s.* 2*d.*) now actually worth 1*s.* 6-07*d.* A year ago the premium was 187 per cent., and the value of the paper dollar 1*s.* 4-58*d.*

The Valparaiso 90-day exchange comes over to-day at 13½*d.*, a fall of 5-16*d.* on the week. A year ago it was 17½*d.*

The Rio de Janeiro exchange on London is 7½*d.*, being 7-32*d.* higher on the week. A year ago it was 8*d.*

The Bankers' Clearing-house return for the week ending September 7th, 1898, shows a total of 141,274,000*l.*, as compared with 117,352,000*l.* for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£34,752,051	£35,363,878
Total Reserve .....	£23,791,011	£24,515,348
Proportion of Reserve to Liabilities...	49 per cent.	52 per cent.
Notes in Circulation .....	£27,761,040	£27,648,530
Bank Rate of Discount .....	2½ per cent.	2 per cent.
Open Market ditto .....	1½ per cent.	2 per cent.
Consols (account) .....	110½	111½ <i>xd</i>
French Rentes (account) .....	103f. 22c.	104f. 32c.
Paris Cheque Exchange .....	25f. 20½c.	25f. 20½c.
New York 60 days ditto .....	\$480	\$483½

The disturbances in Crete have failed to counteract the favourable influences of the British successes in the Soudan, and the conclusion of a friendly understanding between our own Government and that of Germany, and, on the whole, the STOCK MARKETS bear a cheerful aspect. Consols, notwithstanding the talk of dearer money, are firm at a rise of  $\frac{1}{2}$  on the week, and British railway stocks, but for the wretched dividend announcement of the North British, would have come out fairly well on balance. The only really weak spot at the movement is in the Yankee market, and it is about time that a halt was called in this department, where prices were getting distinctly top-heavy. The wet blanket has been St. Paul stock, which is down a couple of points on the dividend; and certainly 114, for a speculative stock which, in times of trade pro-

prosperity and bumper traffics, can only pay 5 per cent., is a pretty fancy price. Canadian Railway prospects are very difficult to diagnose just now, and the stocks extremely dangerous to touch either way. Nearly all the leading Indian Railway stocks are up two or three points on the improving traffics and the rise in silver. Foreign Rails are once more coming into favour, the leading Argentine and Uruguayan descriptions being most prominent in the rise. Manila Railway securities have again attracted a good deal of attention, and the B prior liens, which not long ago were 68, are now 93. The old 6 per cent. debentures, to which we have repeatedly called attention since they were about 20, were actively dealt in yesterday at round about 35, and this figure barely represents their value even with the Philippines under Spanish rule. What they might touch with the Islands under American, European, or Japanese control only the imagination can picture. They are 100% debentures with about 40% of overdue coupons attached. An interesting movement during the week has been the further rise of 4½ in Paraguay Central debenture stock, the price being now 19½, as against 10 early in the present year. Last month's working statement was about the best in the history of the company, and says much for the new management of what at the best is but a sorry undertaking. Amongst the other movements of the week may be mentioned a rise of 5 in Buenos Ayres and Pacific first preference stock, ½ in Buenos Ayres and Rosario preference shares, ¼ in Buenos Ayres Western deferred shares, 3 in Central Uruguay, 1 in Costa Rica second debentures, 1 in Costa Rica prior mortgage, ¼ in Lima shares, 1 in Minas and Rio shares, 2 in Manila debentures, 1 in ditto A prior lien, 3 in ditto B prior lien, ½ in North West Argentine preference shares, 2 in Natal and Nova Cruz debentures, 2 in Nitrate debentures, 3 in Piræus and Athens second debentures, 1 in Recife and Sao Francisco, ½ in San Paulo, ¼ in ditto new, ½ in Taltal shares, and 1½ in Villa Maria and Rufino second debenture stock. On the other hand, Argentine Great Western has fallen 2, and Central Argentine ½.

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>

## American & Canadian Railways.

### DENVER AND RIO GRANDE.

The annual report of this company gives the following statement of operations and fiscal results for the year ending June 30th:—

	1896-7.	1897-8.
Freight earnings	\$4,894,612	\$6,181,777
Passenger earnings	1,247,991	1,360,716
Miscellaneous	802,512	800,433
Total earnings	\$6,945,115	\$8,342,926
Total expenses	4,075,336	5,017,600
Net earnings	\$2,869,779	\$3,325,326
Other income	57,683	62,403
Total net income	\$2,921,462	\$3,387,729
Interest on bonds	\$1,997,950	\$1,997,950
Taxes and insurance	351,991	362,098
Dividend on preferred stock	473,000	501,250
Miscellaneous	67,323	129,179
Total disbursements	\$2,890,264	\$3,080,477
Balance	\$31,198	\$307,252

The average length of line worked was 1,666 miles (against 1,666 miles in the previous year); the number of passengers carried, 556,996 (against 534,239); the quantity of freight moved, 2,596,029 tons (against 1,731,694 tons); the ratio of operating expenses to receipts, 60·14 (against 58·68 per cent.).

The balance-sheet at June 30th, 1898, shows the capital to be as follows:—Common stock \$38,000,000; preferred stock, \$23,650,000; first mortgage bonds, \$6,382,500; first consolidated mortgage bonds, \$28,650,000; improvement mortgage bonds, \$8,103,500.

President E. T. Jeffery, in his report, dated August 12th states:—

"The income of your company from all sources, exclusive of accretions to the renewal fund, during the fiscal year ended June 30th, 1898, including \$62,402 interest on securities, &c., was \$8,405,328, an increase of \$1,408,531 compared with the previous year. The gross earnings from the operation of the railroad were \$8,342,926, being an increase of \$1,397,811. The operating expenses were \$5,017,599, an increase of \$942,262. The net earnings from traffic were \$3,325,326, being \$455,548 more than for the previous fiscal year. The increase in gross earnings was 20·13 per cent.; in expenses, 23·12 per cent.; and in net earnings, 15·87 per cent. The net income afforded a surplus of \$257,252 after providing for interest on funded debt, taxes, insurance, and all other charges against income; also two semi-annual dividends aggregating 2½ per cent. upon the preferred stock and contributions of \$30,000 to the renewal fund and \$20,000 to a special fund established for meeting the expenses of converting the outstanding 7 per cent. bonds, as hereinafter explained. For detailed information you are referred to the tables and statistics prepared by the controller and the auditor, and submitted herewith for your information.

"Current assets show an increase of \$451,672 and current liabilities an increase of only \$191,459, from \$1,749,910 in 1897 to \$1,941,369 in 1898. On June 30th, 1898, the current assets exceeded the current liabilities \$2,168,709, an increase of \$260,212 from June 30th, 1897, when the excess of current assets over current liabilities was \$1,908,496. The unpaid vouchers at the close of the fiscal year, payable in the usual course of business during the succeeding month, amounted to \$175,885, which is less than the amount that was audited for the month of June. There is no floating indebtedness of any kind whatever.

"Your company has in its treasury bonds and stocks aggregating at par \$5,955,870, appearing on the books at \$2,017,350, and in addition it has in its special renewal fund and special bond conversion fund cash and securities at par \$612,892, carried on the books at \$473,069, total of all being at par \$6,568,762.

"The gratifying increase in earnings was caused by a marked improvement in business conditions, not only in Colorado but throughout the country generally. Both the local and through traffic of your company show substantial gains over the previous year, but they were mainly in freight traffic, as will be observed by reference to figures hereinbefore given. Nearly all interests served by your lines—the mining, the manufacturing, the commercial and the agricultural—yielded larger volumes of traffic, and the outlook at present is encouraging. The agricultural valleys traversed by your lines give promise of greater crops than those of 1897, which were the largest harvested to that time on farming lands tributary to your railroad.

"In view of the fact that the 7 per cent. first mortgage bonds of the Denver and Rio Grande Railway Company, amounting to \$6,382,500, will mature on November 1st, 1900, your directors

believed it prudent to prepare for refunding them at a lower rate of interest, and they are pleased to be able to inform the shareholders that a satisfactory arrangement to that end has been made. Under the terms of the general mortgage no greater amount than that of the outstanding 7 per cent. bonds can be issued in exchange for them, so that it was necessary to fix such rate of interest for the new bonds as would assure refunding at reasonable cost to the company. After careful deliberation your directors decided upon  $4\frac{1}{2}$  per cent. per annum, and a contract has been entered into with responsible parties for refunding the 7 per cents. on this basis. As the maturing bonds are a first mortgage upon about 296 miles of the most valuable part of the railroad, their lien upon that mileage will be removed when they are retired, and the 4 per cent. general mortgage bonds, together with the new  $4\frac{1}{2}$  per cents. mentioned, will then become a first lien upon the entire property of your company. Satisfactory progress has already been made in the refunding, and when the transaction is completed the annual interest on the funded debt will be about \$160,000 less than heretofore.

"In their annual report for the fiscal year ended June 30th, 1895, your directors explained a contract entered into with the Rio Grande Southern Railroad Company, whose property, owing to adverse business conditions and consequent inability to meet obligations, had been placed in the hands of a receiver. It was stated that an arrangement had been made whereby your company advanced to the Rio Grande Southern \$169,839 in cash and endorsed that company's notes to the amount of \$573,498, the notes running for one, two, and three years, in equal amounts, with interest at the rate of 6 per cent. per annum to the secured and 4 per cent. to the unsecured creditors. As part consideration the Rio Grande Southern Company assigned to your company \$671,000 of its first mortgage bonds, which were held as collateral by the secured creditors. In addition to this and under the general plan of settlement the Rio Grande Southern stockholders were to transfer to your company, free of cost, one-half the capital stock of their company. The bondholders were to cancel all unpaid coupons up to and including January 1st, 1895, and the interest on the bonds was to be reduced from 5 per cent. per annum to 3 per cent. per annum for three years from January 1st, 1895, and 4 per cent. thereafter during the life of the bonds. In their annual report for the fiscal year ended June 30th, 1896, your directors stated that every bondholder, stockholder, and creditor had assented to the plan, and that a majority of the stock of the Southern Company had been assigned to your company. The last of the notes herein referred to, endorsed by your company, matured January 1st, 1898, and with its payment the entire transaction was closed. The bonds of the Southern Company now bear interest at the rate of 4 per cent. per annum, and those held by your company afford a satisfactory income upon the investment. As the arrangement required the Southern Company to pay over to your company its surplus, if any, standing to the credit of profit and loss on December 31st, 1897, the Southern Company on that date paid to your company the sum of \$83,238. The earnings of your company on traffic to and from the Rio Grande Southern Railroad during the fiscal year were \$351,783, against \$351,239, for the year ended June 30th, 1897. The gross income of the Rio Grande Southern from all sources during the year was \$429,905, an increase of \$25,678, compared with the previous year. The net revenue afforded a surplus of \$7,587, after providing for interest on funded debt, taxes, insurance, and other charges against income. For further information regarding the operations of the Rio Grande Southern you are respectfully referred to the annual report of that company for the fiscal year just closed."

#### CHICAGO GREAT WESTERN.

This company is successor to the Chicago St. Paul and Kansas City Railroad Company, whose securities were held to a large amount in this country. The report for the year ending June 30th shows:—

	1896-7.	1897-8.
Passenger earnings .....	\$938,592	\$1,075,846
Freight .....	3,549,010	4,102,517
Mail, express, &c. ....	193,257	207,681
<b>Total earnings.....</b>	<b>\$4,680,859</b>	<b>\$5,386,044</b>
Operating expenses and taxes .....	3,427,587	3,950,373
<b>Net earnings .....</b>	<b>\$1,253,272</b>	<b>\$1,435,671</b>
Interest .....	\$210,752	\$252,219
Rentals .....	424,207	448,613
<b>Total disbursements.....</b>	<b>\$644,959</b>	<b>\$700,832</b>
<b>Balance—surplus .....</b>	<b>\$455,313</b>	<b>\$734,839</b>

Out of the above surplus of \$734,839 in 1897-98 there have been paid two semi-annual dividends of 2 per cent. each on the 4 per cent. debenture stock which, under the arrangement

explained in the annual report of 1894, is entitled to dividends in cash amounting to \$396,524; in accordance with the arrangement of 1894, the dividends on the balance of the debenture stock have been paid with scrip, convertible into debenture stock at par, amounting to \$88,800; the dividends on the \$177,000 debenture stock, issuable under plan of reorganisation in exchange for first mortgage bonds, have been provided for, with scrip, convertible into debenture stock at par, \$7,080; leaving final surplus, \$242,435.

The balance-sheet shows the following capital issued:—Common stock, \$21,200,145; 4 per cent. preferred stock B, \$7,444,190; 4 per cent. preferred stock A, \$11,160,000; debenture stock, interest payable in debenture stock, \$2,220,000; scrip redeemable in stock, \$59,518; sterling loans, \$2,554,545; debenture stock, interest payable in cash, \$9,935,200; equipment lease warrants (Chicago St. Paul and Kansas City Railway), \$1,213,309; priority loan (Chicago St. Paul and Kansas City Railway), \$2,823,150. In addition to the amount of stocks shown as outstanding there was issuable July 1st, 1898, in exchange for securities of the Chicago St. Paul and Kansas City Railway Company which are still outstanding, the following, which as issued will be charged to cost of the property:—4 per cent. debenture stock, \$177,000; 5 per cent. preferred stock A, \$212,400; 4 per cent. preferred stock B, \$45,000; common stock, \$226,575.

#### CANADIAN PACIFIC DIFFERENTIALS.

##### INTERSTATE COMMERCE DECISION.

The Interstate Commerce Commission, in adjudicating on the north-western passenger rate war, has decided against the Canadian Pacific. The commission states that the Canadian Pacific is not entitled to the differential passenger rates contended for. The commission holds that the claim made on behalf of the American roads, that no Canadian road is entitled to differentials under any American line on any American business, is probably untenable even from the standpoint of the American roads, as some Canadian roads—notably the Grand Trunk—work in close connection with the American lines, and the public interest in reduced rates caused by the competition is not to be ignored. The commission adds that it has no power to allow or disallow the differential in dispute, but it would consider it extremely fortunate if the conclusions reached should be made the basis of an early adjustment. In conclusion it says:—"It must be distinctly understood that we do not recommend a settlement of this controversy by the making of any agreement involving arbitration or otherwise which is in violation of the Anti-Trust Law, as interpreted by the United States Supreme Court. Such features in the past or future history of the controversy as may, in our judgment, render appropriate any statement or recommendation to Congress will be presented in our annual report to that body. So far as our official action can affect the matter, we conclude that we ought not at present to rescind the suspension of the long and short haul clause heretofore made; but if the difficulty be adjusted in accordance with the views above expressed, it may become our duty to revoke the permission granted by those orders."

##### STATEMENT BY THE CANADIAN PACIFIC.

The following circular has been issued by the Canadian Pacific Railway, dated Montreal, September 6th:—"To the executive officers of competing and connecting lines.—The complete opinion of the Interstate Commerce Commission in the matter of certain differences about passenger rates between the Canadian Pacific and a number of railway companies in the United States has just come to hand. The Commissioners recite the circumstances under which the Canadian Pacific was, by agreement with the other lines, first accorded a differential, and in this connection they say:—

'There may be reasons why this particular differential ought never to have been granted, but if the differential principle is to be admitted at all, it can hardly be said that the claim to one, when originally made by the Canadian Pacific, was utterly without foundation. In insisting upon it that company was simply claiming what numerous American lines had claimed and what many of them were enjoying. We find nothing in the negotiations which led to the readjustment of that differential in 1895 which savours of undue constraint upon the part of the Canadian Pacific. Whatever motive may have influenced this road in openly reducing its rates, it is difficult to see what better course it could take in view of existing conditions. The Great Northern and Northern Pacific, its chief competitors, in wilful violation of the law which they are required to obey, had not only abolished the differential, but were taking, at least in some instances, a substantial differential for themselves. The Canadian Pacific claims that, as a result of these practices, business was unduly diverted from its route. Ought the Canadian Pacific to have indulged in similar practices? Obviously not. If the American lines deemed the differential unwarranted they should have published a rate which ignored it. Neither do we see anything radically unfair in the present attitude of the Canadian Pacific to this question. A recognised method of settling differences between competing lines is by arbitration, and the articles of many

railway associations provide for such arbitration; when, therefore, the Canadian road proposes to submit to the final determination of one or more disinterested persons the adjustment of these matters in difference with its American competitors its position is instinctively felt to be a fair one; it may be wrong in its contention, but it can hardly be said to use the methods of the highwayman in enforcing that contention.

It was not understood by this company that the Commissioners would express an opinion on the merits of the claim for a differential, and therefore the company had no opportunity to submit in full its evidence and argument, but the Commissioners have dealt with the subject in their report, and they give it as their opinion that the Canadian Pacific is not now entitled to a differential on Pacific Coast passenger business. In giving their reasons they say this is clearly apparent by comparing the conditions now with those when the differential was first allowed in 1886. The Canadian Pacific Railway was a newly completed route; its roadbed was imperfect, its name but little known, it had no communication with Seattle or Tacoma except by boat from Vancouver; under these circumstances it might very well happen that it could not at the same rate obtain a fair portion of the business. To-day all this is reversed; of all these competing lines the tracks of the Canadian Pacific alone extend from ocean to ocean. Its roadbed and equipment are equal to any; it has railroad connection with Seattle, Tacoma, and Portland; it runs through-cars on certain days each week from Boston to Seattle and from Boston to Vancouver, and through-cars every day from Montreal to Vancouver; it has steamship connection with Asia by its own steamers. It may be doubted if the name of any of its rivals, perhaps of any American railroad, is more generally known throughout the civilised world than is that of the Canadian Pacific. With reference to passenger traffic between New York and San Francisco, the Commissioners are of opinion that the Canadian Pacific has no right to that traffic because of the greater length of its route. In expressing this opinion the Commissioners evidently lost sight of the fact that, with nearly the same proportionate difference in distance between points in Eastern Canada and Manitoba, they had already suspended the operation of the fourth section of the Interstate Commerce Act, known as 'The Long and Short Haul Clause,' to enable the American lines *via* Chicago and St. Paul to compete with the Canadian Pacific for purely Canadian business to and from Manitoba without disturbing their intermediate rates; but no doubt this will receive the further consideration of the Commissioners. The findings of the Commissioners justify every step taken by the Canadian Pacific for the protection of its interests from the very beginning, and, while we regret that an opportunity was not given us to fully present our case as regards the specific question of a differential, we cannot help recognising the marked spirit of fairness with which the whole subject is handled, particularly in view of the fact that on the one side was the Canadian Pacific Railway Company, 'a foreign corporation,' while on the other was a combination of companies in the United States, representing 70,000 miles of railway, before an American tribunal. Throughout their very able analysis of the question the Commissioners seem to have entirely lost sight of the fact that, while this company is competing with the United States railways for Interstate traffic, several of the more important lines in the United States are active competitors of the Canadian Pacific for Canadian traffic, and it may not be out of place to say here that if such an arrangement were practicable and in the public interest the Canadian Pacific could very well afford and would be glad to forego all claims to Interstate traffic of every description, if its United States competitors made no inroads on the business tributary to its lines in Canada. However, in this case, as in all previous cases involving United States traffic, the company accepts without question and will be governed by the decision of the Commission, taking care, of course, that its rates will be on the basis of those which prevail by any other route, and tariffs covering traffic, affected by the decision to take effect on the 25th inst., restoring *ante bellum* rates as far as practicable in existing conditions, will be filed by this company in accordance with the Interstate Commerce Law.

"T. G. SHAUGHNESSY, Vice-President."

#### UNITED STATES RAILROAD STATISTICS.

The statistical report of the Interstate Commerce Commission for the year ending June 30th, 1897, shows that the year was a bad one for the railways, with gross earnings of \$198 a mile less than in 1895-96, a reduction of over 3 millions in the amount paid in wages and salaries, and over 70 per cent. of the railway stock of the country, producing no dividend. The figures in detail are as follows:—The number of men employed by the railways of the United States, June 30th, 1897, as reported, was 932,476. These figures, assigned on the mileage basis, show that 449 men were employed for 100 miles of line. The corresponding figures for the year 1896 were slightly larger. Regard-

ing the year ending June 30th, 1897, it appears that the amount of wages and salaries paid was \$465,601,581. This amount represents 61.87 per cent. of the total operating expenses of the railways, or \$2,540 per mile of line. The total compensation for 1896 was \$3,222,950 greater. June 30th, 1897, the amount of railway capital outstanding was \$10,635,008,074, which, assigned on a mileage basis, shows a capital of \$59,620 per mile of line. The amount of capital stock was \$5,364,642,255, of which \$4,367,056,657 was common stock and \$997,585,598 preferred stock. The amount of funded debt was \$5,270,365,819. The classification of funded debt shows that it consists of mortgage bonds, \$4,539,911,595; miscellaneous obligations, \$430,718,303; income bonds, \$259,847,154, and equipment trust obligations, \$39,888,767. The amount of capital stock paying no dividend was \$3,761,092,277, or 70.10 per cent. of the total amount outstanding. The amount of funded debt, excluding equipment trust obligations, which paid no interest, was \$867,950,840. The total amount of dividends was \$87,110,599, which would be produced by an average rate of 5.43 per cent. on the amount of stock on which some dividend was declared. The amount of mortgage bonds paying no interest was \$615,259,989, or 13.55 per cent. of miscellaneous obligations, \$37,345,789, or 8.67 per cent., and income bonds, \$215,344,972, or 82.87 per cent. The amount of current liabilities outstanding June 30th, 1897, was \$578,501,635, or \$3,156 per mile of line. The number of passengers carried during the year was 89,445,198, a decrease of 22,327,538. The number of tons of freight carried was 741,705,946, which is 24,185,439 less than for 1896. The gross earnings of the railways of the United States for the year ending June 30th, 1897, as reported for an operated mileage of 183,284, were \$1,222,089,773. In comparison with the preceding year this amount shows a decrease in gross earnings of \$28,079,603. The sources of income comprised in gross earnings from operation of the year were—Passenger revenue, \$251,135,927, decrease as compared with the previous year, \$15,426,606; mail, \$33,754,466; increase, \$1,374,647; express, \$24,901,066; increase \$20,683; other earnings—passenger service, \$6,629,980; freight revenue, \$772,849,314; decrease, \$13,766,523; other earnings—freight service, \$4,209,657; increase, \$323,767; other earnings from operation, &c., \$28,609,363. The expenses of the operation of railways for the fiscal year covered by the report were \$752,524,764. This amount is \$20,464,280 smaller than the corresponding amount for the year 1896, the operated mileage for the year being 181,982 miles. The operating expenses of 1897 were distributed as follows:—Maintenance of way and structures, \$750,434,403, decrease as compared with the preceding year \$910,547; maintenance of equipment, \$122,762,358, decrease \$10,619,640; conducting transportation, \$432,525,862, decrease \$9,691,720; general expenses, \$36,481,369, increase \$397,984. Gross earnings per mile of line operated averaged \$6,122; operating expenses, \$4,106. These amounts are respectively \$198 and \$142 less than the averages for 1896. The income from operation—that is, the amount of gross earnings remaining after the deduction of operating expenses, commonly termed net earnings—was \$369,565,000. This amount is \$7,615,323 less than the corresponding item for the previous year. The total amount of dividends declared, including \$267,390 other payments from net income, was \$87,377,989, the result being a deficit from the operations of the year of \$6,120,483. The total number of casualties to persons on account of railway accidents for the year ending June 30th, 1897, was 43,168. Of these casualties 6,437 resulted in death and 36,731 in injuries of varying character. Of railway employes 1,693 were killed and 27,667 were injured during the year.

#### NORTHERN PACIFIC.

The report of the directors of the Northern Pacific Railway for the year ended June 30th states that the gross earnings during that period amounted to \$23,679,717, while the operating expenses were \$11,095,370, leaving net earnings \$12,584,347. Deducting additions and improvements charged to income \$515,769, equipment reduced in value \$296,000, and taxes \$682,800, and adding dividends and interest received \$887,196, there remains an available revenue of \$11,977,034. Of this interest on bonds absorbs \$6,079,160, and 4 per cent. dividends on the preferred shares \$3,000,000, leaving a balance of \$2,897,874, to which has to be added the balance brought forward \$459,829, making a total of \$3,357,703. Of this \$3,000,000 is carried to reserve for the continuance of dividends upon preferred stock, leaving a surplus of \$357,703. The report adds:—"Property (roadway structures and equipment) has been improved during the year, and is well adapted for increased traffic which is expected from existing business conditions and abundant harvests in territory served by the company. Included in the operating expenses is cost of thirty-seven locomotives and 370 cars purchased during the year to provide for equipment put out of service. Reserve fund as

stated above. The directors have set aside \$3,000,000 out of surplus income as reserve to be available as may be found necessary until the end of 1901 towards maintaining regular 1 per cent. quarterly dividends on the preferred stock of the company if at any time prior to that date current net earnings should prove insufficient for that purpose. So far as not so used by that date the fund may then by vote of directors be returned to the general fund of the company. In view of the comparatively short time which has elapsed since the organisation of the company, and also of the fact that unexpectedly favourable results of fiscal year just closed cannot safely be treated otherwise than as exceptional, the board has been led to adopt this conservative policy, which will, no doubt, commend itself to all who are interested in the company. Of course, if current available earnings continue as at present this reserve need not be drawn upon. The directors add that the business prospects of the company were never better than at the present time. It is understood that at their meeting on the 2nd inst. the Northern Pacific directors took no action regarding any dividend on common stock from earnings of past year and that the annual report as adopted makes no mention of the subject. The president stated to the board that if business prospects continue as at present, of which there seems to be every likelihood, it would be proper for the board in the course of a few months to give consideration to the question of dividend on common stock from earnings of current year."

#### CENTRAL PACIFIC.

Washington advices state that the Central Pacific Railroad Company is preparing to submit to the commission, consisting of Attorney-General Griggs and Secretaries Gage and Bliss, a proposition for the refunding of the Government debt in accordance with the terms of the provision in the General Deficiency Law, authorising the commission to act. Law and fiscal officers of the company are, the advices add, now at work on the proposition, and as soon as it is completed it will be submitted to the Attorney-General and his colleagues. "In view of Attorney-General Griggs's statement that he is at work on the complaint to be filed by the Government for the foreclosure of its mortgage, and that as soon as it was finished he would begin proceedings, it will be interesting to note," says the New York correspondent of the *Financial News* "which gets its work in first—the railway company or the Government. It is understood that at the conference the other day between Attorney-General Griggs and the representatives of the English stockholders (Sir W. T. Marriott and Mr. Morshead) no proposition was received from them looking to the purchase of the road. They seemed to be more deeply interested in coming up with President Huntington for his alleged bad management and unfair treatment. They were told that the Government could not take cognisance of the differences among stockholders regarding the management of the property, and that if they had any grounds for complaint their recourse was to the courts, which were open always to aggrieved parties."

#### WABASH.

At the annual meeting of the stockholders and debenture bondholders of the Wabash Railroad Company, to be held at St. Louis on the 13th inst., the following special matters will be presented to the stockholders (and debenture bondholders) for their approval or disapproval:—First, the question of whether the Wabash Railroad Company will construct, or aid in the construction of, a railroad from East Hannibal to Quincy, in the state of Illinois, a distance of about 15 miles, or whether the Wabash Railroad Company will buy or lease a railroad wholly or partially constructed between said points. Second, the question of whether the Wabash Railroad Company will construct, or aid in the construction of, a railroad from Moulton to Albia, in the state of Iowa, a distance of about 27 miles, or whether the Wabash Railroad Company will buy or lease a railroad wholly or partially constructed between said points. The details with respect to the obligations to be assumed by the Wabash Railroad Company in the construction of said lines, or manner in which it will aid in their construction, or the terms on which it will purchase or lease the same, will be more fully set forth in resolutions to be presented at said meeting for the approval or disapproval of the stockholders.

A New York correspondent of a daily paper telegraphs:—"President Ashley, of the Wabash, in explaining the decrease in the net earnings for July in the face of the heavy increase in the gross, brings out a point that makes clear the decreases on other large systems, including the St. Paul, the Lake Shore, the Pennsylvania, the Burlington and Quincy, the Erie, and others. He says that last year the improvement in business had been so recent as to dispose the management of many railway properties

to extreme conservatism in the matter of expenditures for physical improvement; hence the ratio of operating expenses was pretty generally low, so that the net earnings boomed up considerably. This year, with few exceptions, the roads all over the country have been spending money liberally for repairs, equipment, ballasting, new rails, modern cars, and other improvements. This work can be done with great advantage in the summer months, and the expenditures can easily be made up for in the next few months. In addition, many of the companies have been busily employed in providing automatic couplers and air-brakes, in compliance with the law, which demands that all lines must be equipped with these appliances before next January. As there is money now in hand, no more favourable opportunity for doing this is likely to be presented. The Wabash last July reported unusually heavy net earnings, so that the comparisons are apt to be prejudiced."

#### LATEST EARNINGS.

Fourth week of August.—Kansas City Pittsburg and Gulf, \$114,000—increase, \$37,000; Baltimore and Ohio South Western, \$214,000—increase, \$28,000; Norfolk and Western, \$219,000—decrease, \$4,000; Southern Railway, \$693,000—increase, \$115,000; Chesapeake and Ohio, \$365,000—increase, \$31,000; Chicago Great Western, \$189,000—increase, \$12,000; Chicago Milwaukee and St. Paul, \$1,119,000—increase, \$146,000; Denver and Rio Grande, \$267,000—increase, \$44,000; Louisville and Nashville, \$642,000—increase, \$73,000; Mexican Central, \$353,000—increase, \$39,000; Missouri Kansas and Texas, \$341,000—decrease, \$28,000; Missouri Pacific, \$915,000—increase, \$45,000; New York Ontario and Western, \$131,000—increase, \$16,000; St. Louis and San Francisco, \$210,000—decrease, \$15,000; St. Louis South Western, \$144,000—increase, \$8,000; Texas and Pacific, \$194,000—decrease, \$18,000; Wabash, \$445,000—increase, \$38,000; Cleveland Cincinnati Chicago and St. Paul, \$475,000—increase, \$58,000; Northern Pacific, \$841,000—increase, \$211,000.

Month of August.—Oregon Railroad and Navigation, gross, \$583,000—increase, \$18,000.

Month of July.—Chicago Rock Island and Pacific, gross, \$1,672,000—increase, \$88,000; net, \$602,000—decrease, \$52,000; surplus over charges, \$279,000—decrease, \$32,000. Oregon Short Line, gross, \$566,000—increase, \$6,000; net, \$271,000—increase, \$16,000. Southern Pacific, gross, \$4,467,000—decrease, \$56,000; net, \$1,586,000—decrease, \$227,000. New York Ontario and Western, gross, \$350,000—decrease, \$58,000; net, \$103,000—decrease, \$44,000. Norfolk and Western, gross, \$865,000—decrease, \$27,000; net, \$268,000—increase, \$2,000. Northern Pacific, gross, \$1,916,000—increase, \$76,000; net, \$970,000—increase, \$180,000; net operating income, \$828,000—increase, \$78,000. Pacific Mail Steamship Company, gross, \$471,000—increase, \$141,000; net, \$20,000—increase, \$1,000. Cleveland Cincinnati Chicago and St. Louis, gross, \$1,146,000—increase, \$46,000; net, \$306,000—increase, \$53,000.

Pennsylvania Railroad, lines directly operating:—Gross earnings, \$318,100 decrease; expenses, \$207,800 decrease; net earnings, \$110,300 decrease. Lines west of Pittsburg and Erie, directly operated:—Gross earnings, \$193,700 increase; expenses, \$256,900 increase; net earnings, \$63,200 decrease. Profit on all lines west of Pittsburg and Erie for the seven months of 1898, including revenue from investments and other sources, and after deducting charges and rentals, \$121,400, as compared with a profit of \$171,700 for the same period of 1897.

#### WHEELING AND LAKE ERIE.

The English Association of American Bond and Share Holders, Limited, notifies that it is instructed by the New York Reorganisation Committee of the Wheeling and Lake Erie Railway Company to pay the overdue coupons, dated July 1st, 1897, and January 1st, 1898, of the Wheeling division bonds, with interest at the rate of 6 per cent. per annum, upon presentation of the association's deposit receipts.

Messrs. Brown, Shipley, and Co. have received information that the February, 1897, and August, 1897, coupons in default on the Wheeling and Lake Erie Railway Company extension and improvement mortgage 5 per cent. bonds are now being paid in New York, together with interest at the rate of 6 per cent. per annum from the respective due dates up to the 6th inst.—say, in the sum of \$27.39 for each February, 1897, coupon, and \$26.64 for each August, 1897, coupon, and they are accordingly prepared to purchase these coupons at current rates. Holders of Messrs. Brown, Shipley, and Co.'s certificates of deposit for the above bonds are requested to lodge the same without delay, in order that cheques for the interest may be prepared and payment thereof stamped upon them, after which they will be returned to the holders.

## RAILROAD NOTES.

The half-yearly general meeting of the Buffalo and Lake Huron Railroad Company was held, on Friday, at Liverpool, Mr. M. H. Maxwell presiding. The report stated that the balance of revenue, after providing for interest on the bonded debt, was 14.145%, which would allow a dividend of 5s. 3d. per share, carrying forward 360%. The Chairman remarked that, owing to the successful manner in which the Grand Trunk Railway was being managed they considered they had a first-class security, having practically a first charge on the Grand Trunk.

A Montreal despatch says that Mr. Joseph Price, vice-president of the Grand Trunk Railway of Canada, has returned from an inspection of the lines, and is delighted with the condition of the road and its organisation. He speaks in glowing terms of what has been accomplished since General Manager Hays took hold. Twenty-two new, powerful locomotives have been added to the rolling stock of the company, and these will be used to reduce the cost of handling the heavy freight.

Messrs. Speyer Brothers notify holders of Denver and Rio Grande Railway Company first mortgage 7 per cent. gold bonds maturing November 1st, 1900, with reference to the exchange of the above bonds against new 4½ per cent. first consolidated mortgage gold bonds, due 1936, of the same company, the price to be paid for the new bonds is now 104 per cent., New York terms, and that this offer may be modified or withdrawn at any time without further notice.

It is reported that a prominent financial group has purchased from the syndicate its entire holding of new Baltimore and Ohio preferred stock under an agreement to retain same for investment for a period of time. The company's earnings are now believed to show a surplus of over 4 per cent. on the preferred stock.

For the year ended June 30th the Chicago Milwaukee and St. Paul shows:—Gross, \$34,189,000—increase, \$3,702,000; net, \$12,988,000—increase, \$1,079,000; total net income, \$13,119,000—increase, \$1,047,000; surplus after providing for the dividends, \$1,293,000.

The New York *Evening Post* Chicago correspondent says the lines between Chicago and St. Paul have agreed to restore the passenger rates on the 20th inst., in line with the action taken by the Canadian Pacific Railway.

It is reported that the negotiations for the Cleveland Cincinnati Chicago and St. Louis deal have been reopened, at least as far as it concerns the acquisition by the system of the Lake Erie and Western road.

The board of the Atchison Topeka and Santa Fé has decided to pay the full 4 per cent. on the Adjustment Income bonds for the fiscal year ending June 30th. In 1897-8 3 per cent. was distributed.

Last week's east-bound all-rail freight tonnage from Chicago amounted to 53,000 tons, the Erie Road leading with 9,000. In the corresponding week last year 70,000 tons went forward.

For the year ended June 30th the Lake Shore and Michigan Southern shows:—Gross, \$20,582,000; net, \$7,231,000; net income, \$7,909,000; surplus over the dividend, \$834,000.

The directors of the Chicago Milwaukee and St. Paul have declared the usual half-yearly dividends of 2½ per cent. on the common stock and 3½ per cent. on the preferred stock.

The Pennsylvania Railroad Company has completed plans for establishing a large freight yard at Pittsburg. It is intended to have the best facilities to be found in the country.

A pier of the Ottawa and New York railway bridge over the St. Lawrence River fell on Tuesday, carrying down two spans. Thirty workmen were killed and twelve injured.

The rumour that the directors of the Illinois Central are contemplating the declaration of an extra dividend is denied.

There now seems to be some prospect of steps being taken in order to complete the Piræus-Larissa Railway. Proposals for the completion of the railway are understood to have been placed before the Greek Government by English financiers, and, after examination by the Minister of Finance, these will be embodied in a Bill for presentation to the Parliament.

## General News.

## NITRATE ITEMS.

Some remarks of extreme interest to Nitrate shareholders were made by Professor Sir William Crookes, President of the British Association, before that learned body on Wednesday. They are reported at some length by the *Times* and the Bristol daily papers of Thursday.

*A propos* of our recent article on the Bank of Tarapaca and that institution's participation in the recent "kite-flying" operations of the Chilean Government, the *Westminster Gazette* has the following:—"The murder is out with regard to the financial 'deal' referred to in these columns on the eve of the Chilean crisis. Senor Maximiliano Ibanez, in a speech before the House of Deputies, reported in the *Mercurio* of July 16th, taunted the Finance Minister (whom he called a distinguished lawyer, but no financier) with having borrowed 500,000*l.* at the equivalent of 12 per cent., the rate of interest being 10 per cent. and the advance payable in bills at ninety days. So, after all, the famous Treasury Bills were a mere blind, and the Bank of Tarapaca was going "on its own"! No wonder the London office did not publish the "explanation" stated to have been cabled for to its Santiago branch. The Government must have been even more hard up than was supposed, and the issue of 50 millions of "shin-plasters" can now be easily understood. Those who are buying Chilean bonds on a 6 per cent. basis on the strength of a prospective settlement of the boundary dispute are not hard to please.

Mr. C. Morgan Richardson, Noyadd Wilyn, Cardigan—one of the few large shareholders in the Nitrate Railways and the nitrate-producing companies, who takes an intelligent interest in the fortunes of the industry—writes to us under date September 7th:—"For more than one reason we poor Nitrate Railway shareholders owe a debt to THE RAILWAY TIMES. Not only did it throw its search-light upon a system which was financially rotten, not only did it expose the blunders and plunders of a board of directors formed apparently for the benefit of a clique and for the ruin of the gulls who followed them, but it is still the only paper in which we can expect to find reliable items of news as to the Nitrate companies and the boards who manage them. At the same time, I think you take too gloomy a view as to the future. In your article of a fortnight ago you point out that the total shipments from Chili, in the seven months to July 31st, 1898, amounted to 520,000 tons, or 50,000 tons more than the shipments in the corresponding six months in the previous year, with a deficiency in the railway traffic during the same interval of not less than 17,292*l.* This looks like a hopeless state of things, but I do not think it is really quite as bad as it looks. The shipments of 520,000 tons, assuming the figures to be correct, were chiefly in the months of January and February, and the explanation will probably be found in the fact that the Nitrate shipments in those months had been sent down the line in the previous November and December, and would not therefore be reckoned in the traffics for the present year. There is no evidence to my mind that the rivals of the Nitrate Railway are gaining ground at our expense. The shipments from Tocopilla and Taltal may be increasing, but these are no more competing lines than would be those of the Midland or Great Western railway companies. I have taken some pains to tabulate the arrivals for the last six months, and I find that they amount to a total of 506,450 tons. Of these 29,300 were carried over the Taltal line, 14,850 over the Antofagasta line, 65,250 over the Tocopilla line, 51,350 over the Junin line, 58,050 over the Agua Santa line, and 287,650 from the two ports served by the Nitrate Railway. And it is to be remarked that the rival lines of Agua Santa and Junin only total together a little more than a third of the Nitrate Railway traffic. Of the Nitrate Railway traffic, 20,600 tons only is sent from Pisagua, and the greater part of this tonnage came in the first three months, from which it may be inferred that the use of this port is gradually being discontinued by nitrate-producers, an arrangement which should make for economy in the working of the line. It is true that the traffics for the last eight months have been disappointing, but I look for great increases in the four still remaining. The nitrate is being made from month to month in excess of what is forwarded. For every 100,000 tons made not more than 50,000 have been sent down, and stocks are being accumulated. There is probably more than half-a-million tons, or 11,000,000 quintals, now waiting at the works to come down. And the world will require it all. The visible supply in Europe and afloat on the 1st of this month, according to the figures of the Permanent Nitrate Committee, was 256,670

tons, as against 390,190—though these figures were questioned at the time—a year ago—and 444,825 in 1896. The visible supply on September 1st is, in fact, lower than it has ever been in any previous year, although the consumption has vastly increased, and is increasing year by year. The gain in last year's consumption was 115,000 tons, and on June 30th all the stocks in Europe had been absorbed. It follows that we shall require from Chili, in the next three or four months, a quantity in excess of that shipped to us last year, by 150,000 tons. Last year's shipments, for September, October, and November, came to 335,000 tons. Add only 100,000 tons, and there should be traffic resulting sufficient to keep the Nitrate Railway engines busy for the rest of this year, and to swell the total receipts to 20,000*l.* or 30,000*l.*, at least, in excess of those for 1897. Everything points to a 4 or 5 per cent. dividend, if only in their practice of economy the directors are equal to their promises."

#### NEW COMPANIES AND NEW ISSUES.

[Applications for shares in limited liability companies may be withdrawn by letter—or by telegram, if confirmed by letter—provided the notice of withdrawal reaches the secretary before the shares are allotted.]

##### JURA-SIMPLON RAILWAY COMPANY.

Messrs. Coates, Son, and Co. are authorised to receive subscriptions for  $3\frac{1}{2}$  per cent. bonds (first series 20,000,000*fr.*, part of a total issue of 60,000,000*fr.*) of the Jura-Simplon Railway Company (Compagnie des Chemins de fer Jura-Simplon). The price of issue is par, and subscriptions will be received at the rate of exchange of 25.30*fr.*, or, say, 39*l.* 10*s.* 6*d.* per each 1,000*fr.* bond. With a view to obtaining the resources necessary for carrying into effect the Swiss and Italian concessions for the cutting of the Simplon Tunnel, and the construction of the line from Brigue to Iselle, the board of the Jura-Simplon Railway Company has contracted with a combination of banks, composed of the Banque Cantonale Vaudoise, at Lausanne; the Banque Cantonale de Berne, at Berne; the Banque Cantonale de Zurich, at Zurich; the Banque Cantonale de Soleure, at Soleure; the Banque Cantonale Neuchâteloise, at Neuchâtel, for a loan of 60,000,000*fr.*, to bear  $3\frac{1}{2}$  per cent. interest. In conformity with the decisions adopted by the Federal Assembly, under date of April, 19th, 1898, and by the Swiss Federal Council under date December 4th, 1897, and July 14th, 1898, the Swiss confederation guarantees to bondholders under this loan the payment of the interest and the redemption of the capital amount of their bonds. This loan is divided into 60,000 bonds to bearer of 1,000*fr.* each, payment as from October 1st, 1898. The bonds of this loan are redeemable at par after a period of ten years—that is to say, from October 1st, 1908—by fifty annual drawings, in accordance with a scheme of redemption printed on the bonds. The first drawing will take place three months before the first redemption, which will take place on October 1st, 1908. The Jura-Simplon Company reserves to itself, however, the power of effecting redemptions to a greater amount than the scheme of amortisation provides for, and of even giving notice of the redemption of the whole or any part of the balance of the loan, but it shall have no power to make use of this right except as from, and not before, October 1st, 1908. During the three months following the transfer of the Jura-Simplon network to the confederation the bonds of the present loan will be exchanged against bonds of the confederation bearing the same conditions as the bonds created by the company. The holders of the later bonds will be bound to accept such exchange. [The subject of Swiss railway loans is dealt with at some length in our leader columns.]

#### FOREIGN AND COLONIAL ITEMS.

The quantity of coal carried over the Northern Railway of France in 1897 was 12,101,223 tons, as compared with 10,865,200 tons in 1895.

The Mogyana Railway Company is calling up the unpaid balance of \$120 on its shares issued in 1893. These shares have at present only \$80 paid.

The report that the Servian Government is negotiating the lease of the State railways in connection with the contraction of a loan for 80,000,000*fr.* is authoritatively denied.

The Emperor of Russia has addressed a Ukase to the Russian Minister of Communications, providing for the construction of a line from Mlynów to Pliaszew, in the Province of Volhynia.

Regular trains recommenced running on the Manila Railway on Tuesday. Aguinaldo refused to permit repairs to the line and the re-establishment of the train service except upon the condition that no foreign troops were conveyed.

The total receipts of the Copiapo Railway for the month of June were \$37,908 (against \$60,893 for the same period last year), the working expenses, \$37,506 (against \$41,021), and the profits, \$402 (against \$19,872). For six months to date the net profit was \$84,115 (against \$104,005).

The Bills providing for the raising of a sum of 1,500,000*l.* for railways and public works have passed through Committee of the Victorian House of Assembly. We understand that the Victorian Government will shortly be coming on the English market for larger contracts for rails and fish plates.

A Reuter's telegram from Yokohama states that reports are again current that the Government intend raising a foreign loan of 16,000,000*l.* for the completion of public works. The agitation in favour of the purchase of the four Japanese trunk railways by the State is growing, and receives strong support from the Liberal party and in military circles.

The growing credit of the French railway companies is reflected in the terms on which the Northern has issued obligations during the last ten years. The charge for interest and sinking fund in 1888 was 4.48 per cent. per annum; in 1889, 4.39 per cent.; in 1890, 4.16 per cent.; in 1891, 4.12 per cent.; in 1892, 4.03 per cent.; in 1893, 4.01 per cent.; in 1894, 3.99 per cent.; in 1895, 3.91 per cent.; in 1896, 3.89 per cent.; and in 1897, 3.80 per cent. per annum.

Messrs. J. H. Schröder and Co. notify that the operation of the scheme of conversion of the United Railways of the Havana issue of 1,600,000*l.* 1890 into the 5 per cent. consolidated irredeemable debenture stock of the United Railways of the Havana and Regla Warehouses, Limited, will be closed after Thursday, the 15th inst., and holders desiring to avail themselves of this conversion must present their bonds not later than that date at 145, Leadenhall-street, E.C.

The Compagnie des Chemins de fer Economiques de l'Est Egyptian propose to construct a railway of 350 kilometres, or 217 miles in length, for the transport of the products of the provinces of Charkieh, Galoubieh, and Dakolieh, which are the richest in the Nile Delta. It is understood that the Egyptian Government has undertaken to guarantee the company's net receipts to the extent of 36*l.* per kilometre, or 12,600*l.* per annum, and the right of purchase rests with the Government at the expiration of twenty-five years.

An arrangement has been made by the representatives of seventy of the leading railway administrations in Holland, Luxemburg, Germany, and Austria-Hungary, with a view to overcoming all the difficulties incidental to interruptions in the forwarding of goods traffic due to any cause whatever. The arrangement, which has been made under the auspices of the Society of German Railway Administrations, provides for the mutual use of any of the 53,178 miles of railway represented by the society in case of accidents or delays, so that goods traffic through Holland to the east of Europe may be carried on without loss of time.

The Bechuanaland Railway Company, Limited, announces that debentures to bearer are now ready for delivery in exchange for provisional certificates or allotment letters and bankers' receipts. The debentures are in the denominations of 10*l.*, 50*l.*, and 100*l.* Holders of odd amounts of stock of less than 10*l.* must either sell such stock or purchase further amounts of stock to make up 10*l.*, 50*l.*, or 100*l.* Arrangements have been made by which stockholders can sell or purchase odd amounts of stock, particulars of which, and a form for listing provisional certificates, &c., can be obtained at the share-office of the company, 13, George-street, Mansion-house, London.

According to the *Kalgoorlie Miner*, the Railway Commissioners of South Australia have supplied the Government with a report on the proposed railway from Leigh Creek to Innamincka, on the Queensland border, the length of which will be 263 miles of 3ft. 6in. gauge. The report states that the Queensland country which the line will serve is 30,000 square miles, and pastures 800,000 sheep and 400,000 head of cattle. They estimate that the working expenses of a service of three trains a week will be 26,500*l.*, while the interest on the line will bring the total to 64,000*l.* a year. The report reckons that the capital cost will be a million and a quarter sterling, and the return for the first year 47,600*l.*, which, however, will steadily increase. They concur in the opinion of former Commissioners that there is every reasonable prospect of the traffic increasing within a few years to make the line self-supporting, while it will become a feeder to the existing northern system.

Messrs. Thackeray and Co., of Cardiff, under date September 8th, report as follows:—Barry undivided, 259½ (a rise of 1); ditto preferred, 123 (unchanged); ditto deferred, 136 (a fall of 4); Cardiff preferred, 113 (unchanged); Port Talbot 9 (unchanged); Rhondda and Swansea Bay, 4 (unchanged); Rhymney undivided, 266 (a rise of 3½); ditto preferred, 121 (unchanged); ditto deferred, 148 (a rise of 3½); Taff Vale, 78½ (a fall of 2) Vale of Glamorgan, 128½ (a rise of 2½). A slightly easier tone has been observable in the local rail market, and prices in some cases show a slight fall; Barry allotments being still the chief point of interest, business having taken place between 43 and 48.

**The Faucille Tunnel.**—The District Council of Gex has just adopted another resolution in favour of piercing La Faucille. The resolution points out that now that the work of tunnelling the Simplon has been commenced, there is no time to be lost if there is to be any hope of counteracting or, at least, of mitigating the disastrous effects for France which threaten to result from this successor of the St. Gothard Tunnel. If the tunnel of La Faucille were not to be constructed, the Simplon Tunnel would completely ruin the port of Marseilles, to the benefit of that of Genoa. The work at Faucille would only be 3 kilometres long, and could be easily constructed, and at comparatively small cost. The Eastern commerce of England would pass through it, as it would shorten by more than 100 kilometres the distance between Gex and Paris, and by nearly 200 kilometres that between Marseilles and Antwerp.

**The Wellingborough Accident.**—Referring to the recent lamentable accident at Wellingborough, Mr. G. H. Turner, the general manager of the Midland Railway, made the following statement in the course of an interview on Saturday night:—"The accident was one of the most remarkable calamities that I have ever heard of. There is not the slightest doubt what caused it. I cannot, of course, say now what I think about that; but I may say with the utmost confidence that absolutely no blame rests with the unfortunate driver Meadows, his mate Joyce, nor the other officials in charge of the train. The line itself could not have been in a better condition, and the rolling stock was as perfect as it could be. When I heard of the smash and its results I could not help marvelling at the comparatively small loss of life and injury, when I remembered that the express must have been travelling at about 60 miles an hour. Upon making a further examination of the debris, however, the explanation appears to me simple enough. Right in the front portion of the express was an empty saloon carriage belonging to the London and South Western Railway Company. When the smash occurred, the saloon, strongly and firmly built, acted as a kind of buffer, and so checked the force of the shock. If that saloon had not been there the disaster might have been much more awful."

ESTABLISHED 1774.

## Directors' Reports.

### GREAT NORTH OF SCOTLAND RAILWAY.

#### CAPITAL.

July 31st, 1898.—The total expenditure to date amounts to 6,513,012*l.*, whilst the receipts have been 6,165,854*l.*, viz.:—

Ordinary stock .....	£920,133
Deferred stock No. 1 .....	102,822
" " No. 2 .....	397,396
Preference and guaranteed stocks .....	3,234,896
Debenture stock .....	1,271,492
Loans .....	21,185
Sundries .....	217,980

Balance at debit of capital account, 347,158*l.* The expenditure in the past half-year was 94,909*l.* of which 47,438*l.* was on lines open for traffic, 32,414*l.* on working stock, 2,533*l.* on lines in course of construction, and 12,524*l.* on the Cruden Railway and Hotel. Estimated further expenditure—In the current half-year, 50,000*l.*; in subsequent half-years, 30,000*l.*; total, 80,000*l.* Capital powers and other available assets, 80,728*l.*

#### REVENUE.

Subjoined is an abstract of the revenue account for the half-year ending July 31st:—

	1897.	1898.
Passengers, parcels, &c. ....	£111,297	£112,376
Goods, minerals, and live stock .....	106,197	107,632
Miscellaneous receipts .....	6,224	11,885
Gross receipts .....	£223,718	£231,893
Total expenditure .....	116,423	121,762
Net receipts .....	£107,295	£110,131
Balance from last half-year .....	2,791	3,003
Total net revenue .....	£110,086	£113,134
Prior charges .....	£231,369	£234,138
Preference dividends .....	60,808	60,808
Dividend on ordinary stock .....	*16,103	—
Dividend on pref'd. convtd. ordy. stock .....	—	†13,802
Dividend on defd. convtd. ordy. stock .....	—	‡2,300
Dividend on deferred ordinary, No. 1 .....	514	£771
Balance to next half-year .....	1,292	1,315
Total .....	£110,086	£113,134

\* At 3½ per cent. per annum. † At 3 per cent. per annum. ‡ At ¼ per cent. per annum. § At 1 per cent. per annum. ¶ At 1½ per cent. per annum.

The receipts for the past half-year show an increase of 8,175*l.*, the expenditure an increase of 5,339*l.*, and the net receipts an increase of 2,836*l.* The ratio of expenses to receipts is 52·50 per cent. (as against 52·04 per cent.).

#### TRAFFIC, &c.

Half-year ending July 31st.	1897.	1898.
Passengers carried—total number .....	1,633,745	1,672,498
Season-tickets .....	1,472	1,545
Mileage—Lines owned .....	312½	327½
" Foreign lines worked over .....	4	4
" Total .....	316½	331½
Train mileage—Passengers .....	777,996	810,504
" Goods .....	401,722	434,312
" Total .....	1,179,718	1,244,816

The report states:—

"The working expenses per train mile are 21·11*d.*, as against 21·37*d.* The directors regret that, owing to unforeseen causes, it has been found impossible to open the hotel at Cruden Bay this season. The numerous applications for accommodation make it evident that the hotel will be largely patronised. It will be opened early next year. The construction of the new locomotive and carriage and wagon shops at Inverurie is making progress."

### CALEDONIAN RAILWAY.

#### CAPITAL.

July 31st, 1898.—The total expenditure on this account amounts to 49,340,121*l.*, and the receipts to 48,223,820*l.*, viz.:—

Ordinary stock .....	£15,685,326*
Deferred ordinary stock, No. 1 .....	2,608,026†
" " No. 2 .....	276,666‡
Preference and guaranteed stocks .....	18,741,589
Debenture stock .....	8,870,291
Premiums .....	2,141,922

Balance at debit of capital account 1,116,301*l.* The expenditure during the half-year amounted to 411,667*l.*, of which 229,616*l.* was on lines open for traffic, 95,211*l.* on lines in course of construction, 54,142*l.* on working stock, 32,362*l.* on Forth and Clyde Navigation, and 335*l.* on special items. Estimated further expenditure—In the current half-year, 496,591*l.*; in subsequent half-years, 3,037,789*l.*; total, 3,534,380*l.* Capital powers and other available assets, 4,200,405*l.*

\* Of this amount 9,900,550*l.* has been duplicated into 9,900,550*l.* preferred converted ordinary stock (5 per cent.) and 9,900,550*l.* deferred converted ordinary stock. † Entitled to participate, *pari passu*, in all ordinary dividends above 7 per cent. ‡ Entitled to participate, *pari passu*, in all ordinary dividends above 9 per cent.

## REVENUE.

The revenue account shows the receipts for the half-year ending July 31st to have been as under:—

	1897.	1898.
Passengers—First-class .....	£59,119	£60,676
"    Third-class .....	464,114	486,054
"    Season-tickets .....	47,717	49,345
Parcels, horses, carriages, &c. ....	94,097	95,726
Mails .....	34,146	34,146
Merchandise (less cost of coll., &c.) ..	517,916	516,731
Live stock .....	30,946	30,238
Minerals .....	558,253	588,687
Rents from depôts and stores .....	2,848	2,704
Mileage and demurrage .....	8,625	7,617
Rents of property and harbour receipts	29,135	29,506
Transfer fees .....	962	780
Forth and Clyde Navigation .....	52,645	54,457

Total receipts ..... £1,900,523 ... £1,956,667

The expenditure on revenue account for the same period was as follows:—

Maintenance of way, works, &c. ....	£156,834	£163,949
Locomotive power .....	263,282	287,945
Carriage and wagon repairs .....	97,138	107,987
Traffic expenses .....	317,290	335,717
General charges .....	37,004	38,202
Premiums to servants for avoidance of accidents	9,391	9,890
Law and arbitration charges .....	2,727	4,369
Compensation—Passengers .....	3,027	2,528
"    Goods .....	4,847	6,134
Working other lines .....	Cr.30,947	Cr.36,765
Parliamentary expenses .....	6,117	5,571
Rates and taxes .....	41,257	46,644
Government duty .....	3,711	3,733
Forth and Clyde Navigation .....	16,235	16,767

Total expenditure ..... £927,913 ... £992,671

The net revenue account and the proposed appropriation of balance available for dividend may be summarised as follows:—

Balance from previous account .....	£17,419	£9,545
Net earnings .....	972,610	963,996
Sundry credits .....	19,798	23,676
Total .....	£1,009,827	£997,217
Prior charges .....	£306,305	312,405
Preference dividends .....	280,932	279,478
Dividend on ordinary stock .....	*407,240	†392,133
Balance to next account .....	15,350	13,201

Total ..... £1,009,827 ... £997,217

\* At the rate of 5½ per cent. per annum. † At the rate of 5 per cent. per annum.

The gross receipts for the past half-year show an increase of 56,144l., the expenditure an increase of 64,758l., and the net receipts an increase of 8,614l. The ratio of expenses to receipts is 50·73 per cent., as against 51·17 per cent.

## TRAFFIC, &amp;c.

	1897.	1898.
Half-year ended July 31st.		
Passengers—First-class .....	862,927	926,583
"    Third-class .....	18,585,279	19,302,666
"    Total .....	19,448,206	20,229,249
Season-tickets .....	20,409	22,761
Mileage—Lines owned .....	776	776½
"    Partly owned .....	152½	152½
"    Lines worked .....	137½	137½
"    Foreign lines run over .....	49½	49½
"    Total mileage operated on .....	1,115½	1,115½
"    Forth and Clyde Canal .....	52½	52½
Train mileage*—Passenger .....	4,583,662	4,701,054
"    Goods .....	3,548,423	3,656,332
"    Total .....	8,132,085	8,357,386

\* Including mileage run for other companies.

The report states:—

"Excluding the trains run for other companies, the earnings per train mile of the passenger traffic are now 40·15d., compared with 39·65d. for the corresponding period of last year; and the merchandise and mineral traffic receipts per mile are 77·25d., compared with 77·36d. The cost of maintenance and renewal of the permanent way and works is 163·918l., being at the rate of 381l. 14s. 5d. per mile per annum. The amount charged for the repair and renewal of the rolling stock is 186·497l., being at the rate of 5·36d. per train mile run.

"A contract has been entered into for the construction of a new dock at Grangemouth, as authorised by the Caledonian Railway Act, 1897, and the contract for the making of about 4½ miles of railway to connect the company's Lesmahagow line with its Stonehouse branch has also been let. Arrangements have been made for the erection of an hotel at the company's Princes Station in Edinburgh."

## NORTH BRITISH RAILWAY.

## CAPITAL.

July 31st, 1898.—The total expenditure on this account amounts to 56,957,701l., and the receipts to 57,359,865l., viz:—

Ordinary stock .....	£9,163,856
Ordinary preference stocks .....	6,741,371
Preference and guaranteed stocks .....	20,748,127

Debt stock .....	18,286,491
Loans .....	85,422
Premiums .....	1,364,598

Balance at credit of capital account, 426,074l. The expenditure in the half-year was 487,938l.—viz., 261,744l. on lines open for traffic, 41,023l. on lines in course of construction, 143,152l. on working stock, 42,018l. on subscriptions to other railways. Estimated further expenditure—in the current half-year, 475,294l.; in subsequent half-years, 1,351,840l.; total, 1,827,134l. Capital powers and other available assets, 1,839,504l.

## REVENUE.

The revenue account shows the receipts for the half-year ending July 31st to have been as follows:—

	1897.	1898.
Passengers—First-class .....	£53,357	£53,494
"    Third-class .....	486,568	506,143
"    Season-tickets .....	52,330	55,142
Parcels, horses, carriages, &c. ....	103,526	101,729
Mails .....	16,001	16,177
Merchandise (less cost of coll. &c.) ..	538,558	553,418
Minerals .....	522,535	556,705
Live stock .....	37,128	36,663
Union Canal .....	1,806	1,572
Rents of property .....	33,968	36,834
Transfer fees .....	577	568
Mileage and carriage of wagons .....	8,383	7,401

Total receipts ..... £1,854,737 ... £1,925,836

The expenditure on revenue account for the same period was as under:—

Maintenance of way, works, &c. ....	£156,173	£161,766
Locomotive power .....	247,984	257,690
Carriage and wagon repairs .....	94,862	98,439
Traffic expenses .....	303,664	321,332
General charges .....	35,283	37,806
Law charges .....	2,454	3,863
Compensation—Passengers .....	2,374	1,463
"    Goods .....	4,098	4,783
Glasgow incline .....	2,655	2,528
Forth and Tay ferries .....	4,426	4,418
Working other lines .....	Cr.9,632	Cr.1,861
Parliamentary expenses .....	16,120	2,639
Rates and taxes .....	30,545	39,946
Government duty .....	3,944	4,038
Union Canal expenses .....	1,047	2,557

Total expenditure ..... £895,997 ... £941,406

The net revenue account and the proposed appropriation of the balance available for dividend may be summarised as follows:—

Balance from previous account .....	£1,484	£819
Net earnings .....	958,740	984,430
Sundry credits .....	12,146	16,600
Total .....	£972,370	£1,001,849
Prior charges .....	£250,192	£252,469
Preference dividends .....	471,475	510,724
Dividend on ordinary 3 p.c. pref. stock	101,121a	101,121b
"    ordinary stock .....	45,819c	34,364d
Balance to next half-year .....	3,763	3,171

Total ..... £972,370 ... £1,001,849

a At the rate of 3 per cent. per annum. b At the rate of 3 per cent. per annum.

c At the rate of 1 per cent. per annum. d At the rate of 1 per cent. per annum.

The gross receipts for the past half-year show an increase of 71,099l., the expenditure an increase of 45,409l., and the net receipts an increase of 25,690l. The ratio of expenses to receipts is 48·89 per cent., as against 48·20 per cent.

## TRAFFIC, &amp;c.

	1897.	1898.
Half-year ending July 31st.		
Passengers—First-class .....	701,218	706,863
"    Third-class .....	16,367,576	16,926,712
"    Total .....	17,068,794	17,633,575
Season-tickets .....	17,159	18,018
Merchandise (tons) .....	2,117,432	2,159,477
Minerals (tons) .....	7,550,111	8,092,888
Mileage—Lines owned .....	1,025½	1,047½
"    Partly owned .....	28½	29½
"    Leased or rented .....	48½	48½

"    Foreign lines worked over .....	122½	122½
"    Total operated .....	1,354½	1,362½
"    Union Canal .....	32	32
Train mileage*—Passenger .....	4,432,964	4,474,861
"    Goods .....	4,155,478	4,184,933
"    Total .....	8,633,442	8,659,794

\* Including train mileage of lines worked d.

The report states:—

"The receipts per railway mile have yielded 1,526·78l., as against 1,498·04l. for the corresponding half-year. The receipts per train mile for passenger trains are 39·39d., as against 38·80d., and for goods and mineral trains they are 65·85d., as against 63·60d. The East Fife central branch, from its junction with the Leven and East of Fife line to Lochty, a distance of 14½ miles, was opened for goods and mineral traffic on August 21st. The Bill promoted by the company in last session of Parliament received the Royal Assent on August 12th."

## WORKS IN PROGRESS.

Messrs. Blyth and Westland, consulting engineers, report under date August 10th:—"Methil Dock.—The quay walls in connection with the eastern portion of the new dock are now completed, and the large cofferdam separating the two portions is being removed. Some dredging has still to be carried out in the eastern portion, but this will go on simultaneously with the removal of the cofferdam. The subsidiary works are making good progress, and already a very large traffic is being carried on the new dock. Waverley Station.—The whole of the permanent lines of rails and platforms are now in use. The suburban platform was opened for traffic on April 18th, the south cab road on May 1st, and the new north and west booking-office on May 22nd. These have added very materially to the smooth and rapid working of the traffic. The new main offices have made good progress during the past six months. The roofing of the station is proceeding slowly, but we are doing what we can to expedite this part of the work. The contractors for the Leith Central Station and connecting line from Abbeyhill have got a large portion of the old property removed and have made a fair start with the permanent works. Dalreoch Tunnel.—The new tunnel at Dalreoch was opened for traffic on May 20th. Milngavie Branch Widening.—The contract for these works was let in the month of April, and the contractors have commenced operations at several points along the line."

Mr. James Bell, the company's engineer, in his report dated August 24th, says:—"Waverley Station.—I beg to report that during the last six months the works in connection with the new Waverley Station, so far as under my charge, have made satisfactory progress. The whole of the lines of rails in connection with the passenger station have now been laid down in their permanent position, and are in use with the exception of small portions at the back ends of Docks Nos. 9, 10, and 11 at the west end, and these cannot be proceeded with further till the temporary buildings on their sites have been removed. The whole of the brick walls of the platforms have been built ready for the granolithic cope, with the exception of the small portions corresponding to the unfinished portions of rails for Docks Nos. 9, 10, and 11. Up to the date of this report 2,173 lineal yards of cope have been laid on the platform walls. With the exception of the small dwarf locking frames to work the cross-over roads at the ends of the dock lines the whole of the signalling is practically completed and the red cap pilotmen withdrawn, the moves being made now from the respective signal cabins. The principal part of the work now remaining to be done is the laying of the concrete pavement on the platforms. Helensburgh New Station.—The works in connection with this station are making good progress. About 75 per cent. of the excavations have been removed. The north and south platform walls have been built as far as can be done at present till the existing lines of rails have been lifted. The front and back boundary walls and the new station buildings are being proceeded with, and the contract for the roof has been let. The new footbridge over the line at Grant-street is completed and in use, and the old bridge has been removed. Cowliars Stores.—The new stores at Cowliars and the offices in connection therewith have been completed and are now in use. Craigendoran Pier.—The west pier at Craigendoran has been extended to meet the requirements of the steamboat traffic. Anstruther and St. Andrews Railway.—The station accommodation at Crail and Stravithie has been altered and improved, and new passing loops have been provided in connection with the introduction of train tablet working on the Anstruther and St. Andrews section. Swing-bridge, Grahamston.—The reconstruction of the swing-bridge over the Forth and Clyde Canal at Grahamston for a double line of rails is in hand and the work is proceeding in a satisfactory manner. The whole of the bearing and sheeting piles for the foundation of the centre pivot have been driven and the concrete foundations are being put in. The accumulator house and signal cabins are being built. The steel work of the bridge and the hydraulic machinery, which have been let to Sir W. G. Armstrong, Whitworth, and Company, Elswick Works, Newcastle-on-Tyne, are in hand."

## MERSEY RAILWAY.

The total receipts from all sources for the half-year have been 37,336*l.* as compared with 37,342*l.* for the corresponding period of 1897. The working expenses have been 29,744*l.*, or at the rate of 79·66 per cent., as against 29,823*l.*, equal to 79·86 per cent. for the corresponding six months of 1897. The exceptional charges for pumping, ventilation, and hydraulic lifts, for the past six months amounted to 5,844*l.*, equal to 15·65 per cent., as compared with 6,044*l.*, or at the rate of 16·18 per cent. for the corresponding period of 1897. The working expenses, exclusive of the exceptional charges above referred to, have been 23,899*l.*, equal to 64·01 per cent., as against 23,778*l.*, equal to 63·68 for the corresponding six months. The directors regret that the result of the working of the line for the half-year shows no improvement. The report further states:—

"With the view of securing as far as possible joint action by the receivers and managers and the board, it was arranged in April last, with the approval of the Court of Chancery, that the chairman should attend the meetings of the receivers and managers, and since that date he has attended all their meetings in Liverpool and London. The chairman has agreed to discharge this duty in the meantime without any remuneration in addition to the fees which have hitherto been credited to him half-yearly as a director, but in view of the claims made on him by the business of the company, the board propose to arrange, so soon as they are in a position to do so, for the payment of these half-yearly in the future."

"In order to protect the interests of the company in a question with the Wirral Railway Company, a petition was lodged in Parliament against the Bill promoted by the latter for an alteration of their Seacombe line.

Your directors are glad to report that, after negotiations between the companies, an agreement was entered into as from July 1st last, fixing the train services, and the amount and division of the fares for all traffic exchanged between the two companies. The terms of this agreement received careful consideration at a series of meetings between the receivers and managers and the chairman, on the one hand, and the representatives of the Wirral Company on the other, and while it affords additional facilities to the public, it is hoped that it may also prove advantageous to both companies. The questions with the North Wales and Liverpool Railway Committee still remain unsettled."

"The Bill promoted by the company for a renewal of the borrowing powers authorised by the Acts 1888 and 1892 was opposed by some of the debenture stockholders, but it was ultimately passed with certain modifications. The directors are thereby authorised to issue debenture stock to the extent of 275,000*l.* at a rate of interest not exceeding 4½ per cent. for a period of not more than ten years, and to apply the capital so raised for the purposes set forth in the Act."

## Meetings.

## GLASGOW AND SOUTH WESTERN RAILWAY.

The half-yearly general meeting was held in Glasgow on Tuesday; Sir W. R. WATSON presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said:—"The capital expenditure for the half-year amounts to 126,402*l.*, being 69,743*l.* less than the estimate. The largest items are for the purchase of properties for the extension of St. Enoch Station, the urgent need for which has already been fully explained to you; the widening of the line between Clyde Junction and Port-Eglington Junction; the extensions from Potterhill to Glenfield, and from Gatehead to Hurlford; the price of land in connection with the acquisition of the Gilmilnsroft Branch Railway; additional rolling stock; and the erection of workmen's houses. In connection with the last named I may say that your directors are of opinion that where workmen's houses can conveniently be erected by the company it is very desirable that they should do so. The class of houses built is generally superior to ordinary workmen's houses, and the men and their families are therefore better and more comfortably housed. For the current half-year the estimated capital expenditure is 306,048*l.* 1*s.* 8*d.* The chief items of this proposed expenditure of capital are on the following:—New lines—Potterhill to Glenfield, Potterhill to Barrhead, Dalry to North Johnstone, branch to Cart Harbour, widening of line between Clyde Junction and Port-Eglington Junction, and extension of St. Enoch Station, widening of line at Dalry, new station buildings, erection of workmen's houses, fifteen additional locomotives, and 1,000 additional wagons. The demand for the last named has become imperative on account of the increase in mineral and other traffic. In the revenue account the receipts from passengers are:—First-class, 22,100*l.*, an increase of 468*l.*, to earn which we conveyed 11,126 more passengers; third-class, 241,404*l.*, an increase of 9,299*l.*, for 697,519 more passengers; season-tickets, 27,979*l.*, an increase of 409*l.*, although there were eighty-five fewer tickets issued. From parcels, &c., and mails the receipts are 57,397*l.*, an increase of 1,827*l.*. The total receipts from coaching traffic amount to 343,881*l.*, which is an increase of 12,003*l.* over the corresponding half-year. The merchandise traffic receipts are up 11,366*l.*, the increase in tonnage being 47,813 tons; mineral receipts are up 15,958*l.*, with 295,326 tons more; live stock receipts are down 427*l.*. The total goods traffic receipts amount to 420,420*l.*, an increase of 26,897*l.* over the corresponding period. The total traffic receipts amount to 769,301*l.*, an increase of 38,900*l.*. Adding to this the miscellaneous receipts, amounting to 18,493*l.*, we have a total revenue for the half-year of 787,794*l.*, the increase being 37,723*l.*. The expenditure side of this account shows a total increase of 29,689*l.*. Maintenance of way, works, and station expenses show an increase of 6,920*l.*. About one-half of this increase was incurred in connection with the reconstruction of bridges, the remainder being accounted for by extra relaying, renewals of junctions, and various works at stations. Locomotive expenses are up 9,398*l.*, due to the extra mileage run on account of the increased traffic, and to the advance in the price of coal, which cost on an average of 4*d.* per ton more than in the corresponding period. Traffic expenses have increased 6,356*l.*. The wages bill accounts for about half of this increase, the advance in that item having been brought about by the opening of new stations and signal-boxes, increases in wages, and the appointment of extra men to reduce the hours of labour. The remainder of the increase in traffic expenses is due to the expenses connected with the new stations already referred to, and also an increase in the quantity and price of wagon covers, &c. Rates and taxes are up 4,113*l.*. At our last half-yearly meeting I explained that owing to the principle of rating we were taxed on our revenue; hence the increase. It will be observed from the report that we have added a new steamer to our fleet during the half-year, and I am pleased to say that this new boat, which has been named the *Juno*, is, we have every reason to think, a success. The net receipts amount to 353,697*l.*. Adding to that amount the balance brought forward from last half-year, we have a net revenue of 361,062*l.*. Of this amount, interest on debenture stock, rents of leased lines, &c., absorb 111,365*l.*, and dividends on guaranteed and preference stocks 112,331*l.*, leaving 137,366*l.* available for dividend on ordinary stock. Out of this sum your directors recommend the shareholders to declare a dividend at the rate of 5½ per cent. per annum on the ordinary stock of the company, being at

the rate of 2½ per cent. per annum to the holders of preferred ordinary stock, and 2½ per cent. per annum to the holders of deferred ordinary stock, and at the rate of ½ per cent. on the deferred stock, carrying forward a balance of 5,696½ to next half-year's account.

Mr. P. T. CAVILL seconded the motion, which was carried unanimously.

## General News.

### THE AMALGAMATED SOCIETY OF RAILWAY SERVANTS.

The executive committee of the Amalgamated Society of Railway Servants met on Tuesday at the offices of the society in Gray's-inn-road, King's-cross, for the purpose of further dealing with the matters to be laid before the forthcoming Leeds Congress. Mr. W. Hudson, president of the union, was in the chair, and all the other members of the executive were present with the exception of Mr. J. Thornhill, representing the Swansea district, who was reported to be unable to obtain leave of absence to attend the meeting. Mr. Bell, the general secretary, and Mr. Garrity, the assistant-secretary of the society, were also in attendance.

Mr. BELL reported that he had wired to Lord Stalbridge, the chairman of the London and North Western Railway Company, asking that Mr. Thornhill be granted leave of absence so as to permit his attendance at the meetings of the executive during the week, this being done in accordance with the instructions of the executive, on behalf of whom the request was made. No reply had, however, been received. A discussion followed, in which severe comment was made upon the action of the company, reference being made to the fact that this was not the first time in which Mr. Thornhill had been prevented from attending the meeting of the executive for the same reason. It was resolved, pending further action, that the head engineer of the London and North Western Company be telegraphed to, asking that Mr. Thornhill be relieved from duty for a term, to enable him to be present at the meeting of the executive.

The principal subjects which engaged the attention of the committee were the question of federation in general with other unions, and the amalgamation of the General Railway Workers' Union with the Amalgamated Society of Railway Servants. The former raised a long discussion, and in the course of it Mr. BELL gave his report on the meeting held in Manchester some weeks ago to consider Mr. P. J. King's scheme of federation. With reference to this question there are several motions on the agenda for the annual general meeting (to be held early next month in Leeds). Mr. Bell reported that the representatives of the unions present at Manchester agreed to adopt the scheme, and that he had been appointed treasurer of the provisional committee. The committee considered that the union ought to join in what it believed promised to be a workable plan of federation, and resolved that the scheme of working be approved of, and recommended that the annual general meeting adopt it in its entirety. As the proposal will in due course come before the annual general meeting, the committee considered that the further consideration of the matter should be postponed until its next meeting, when the decision of the society as a whole will be known. It will then be able to enter into details, provided its recommendations be agreed to. The financial part of the scheme, which is estimated to involve an initial expenditure of 100,000£ on the part of the society, was not entered into, but the annual general meeting was left to decide on the point itself. Federation, or rather amalgamation, with the General Railway Workers' Union, a body comprising about 7,000 members, mostly in the Manchester district, was then discussed. A sub-committee of the two unions has been in consultation for some time past, and has arranged terms on which the amalgamation might take place. The Amalgamated Society has always been ready to federate with the General Railway Workers, and at the Liverpool Congress some years ago the latter only rejected the proposal to federate by the casting vote of the chairman. At the Glasgow Conference it was resolved that the Railway Workers seek to amalgamate with the Amalgamated Society, with the result that terms were arranged at a joint conference. The committee expressed general satisfaction with the result, and unanimously adopted the proposal of the sub-committee, and the annual general meeting at Leeds will be asked to adopt the scheme decided upon.

One of the subjects with which the congress will have to deal will have reference to affairs on the Midland. Mr. Bell reported under this head that the Sheffield men have nearly all found employment, and that no complaints or report had been received from Sheffield on the matter. The Leeds men, as a whole, have not been so fortunate; while many have succeeded in obtaining employment elsewhere, and in a few instances better employment

than previously, yet the majority had been less fortunate, and had only succeeded in obtaining casual employment, or some employment less remunerative.

The replies of the railway companies to charges of victimising their servants were considered. Some time ago Mr. Bell forwarded to the Board of Trade a list of specific cases where it was alleged men employed by the companies had been dismissed or reduced because they had taken part in the movement for better conditions of employment inaugurated last year. The Board of Trade had communicated with the companies concerned, and about a dozen of them had replied to the communication. One and all denied that they had been guilty of the conduct attributed to them. A heated discussion ensued on the presentation of these replies, which had been communicated to the society with a request for their comments. Finally it was agreed unanimously "that as the replies as to victimising received by the Board of Trade imply that the railway companies are unaware of the circumstances under which their servants are dismissed, and the gross injustice inflicted upon men whose contributions to pensions and other benefit funds paid for many years are lost by dismissing them without adequate cause, and seeing that the Board of Trade has expressed the opinion that railway men have deserved well of the State, we appeal to Mr. Ritchie to cause a full inquiry to be made by a special commission into the specific cases of dismissal. We will furnish the evidence we are in possession of that they are the direct result of men being active members of the Amalgamated Society of Railway Servants, as we are desirous in the public interest that the truth shall be revealed, and the only independent tribunal we can appeal to is the Board of Trade."

The conditions of employment of the servants on this system will form a subject for discussion at the Leeds Congress. Mr. Bell reported that the platelayers had applied for the recent concessions to be extended to the branch lines, but without good result. The Lancashire and Yorkshire ballast-train men had applied for sanction to a movement for better conditions of service, and this was granted, subject to the approval of the executive. He also reported that the Lancashire and Yorkshire delegates (goods staff) were accorded an interview with the general manager, and the proposals for better conditions of service were discussed, the general manager promising to consider them and adjust some minor grievances.

### THE WELLINGBOROUGH RAILWAY ACCIDENT.

The inquest on the bodies of five of the victims of the Midland Railway accident at Wellingborough was concluded at Wellingborough on Tuesday before Mr. J. T. Parker, district coroner. Mr. J. L. Young (Messrs. Beale and Co., Birmingham) appeared on behalf of the Midland Railway Company; Mr. Edwin Winter, London, for the Postmaster-General; Mr. Hincks, Leicester, for the Amalgamated Society of Railway Servants, and for the relatives of Mr. Percy Richardson, Leicester, one of the killed; Mr. Monckton, M.P., for the Rev. H. S. Gedge, one of the injured, and several local solicitors for others of the killed and injured. Mr. G. H. Turner, general manager of the Midland Railway, and other officials of the company, and Mr. Dobson, organising secretary of the Railway Servants' Society, were also present. At the opening of the proceedings Mr. Young said that he was instructed by the directors of the Midland Railway Company to state that the company accepted responsibility for the deplorable calamity. They made that announcement because they feared there might be some anxiety in the minds of some of the sufferers, and they hoped that, by making that statement, they would relieve that anxiety. Mr. Monckton and several of the solicitors and the coroner expressed their pleasure at the statement. Mr. Monckton said that the action of the company in the unfortunate affair had been all along consistent with their sympathetic and kindly actions under such circumstances. Plans of the railway station were laid before the jury by Mr. J. A. Macdonald, chief engineer to the company. The down platform flanks the station-yard. From the station there are only two exits on this platform—one is through the booking-office, and the other, made chiefly for luggage, through an arcade closed with iron gates at the outside end. It was exactly opposite this arcade that the trolley fell on the line. Mr. MACDONALD deposed that the gradient of the platform at the spot where the trolley ran off was one in 33. The fall from the gates for a distance of 14ft. was one in 82, then for a distance of 2ft. 9in. it was one in 14, and from there to the edge of the platform it was one in 24. The width of the platform was 16ft. 5in. He did not know when the luggage exit was made, but it was within the last three or four years. A truck left by itself would not run away on some parts of the platform, but it would on others. He did not think a truck on an incline of one in 82 would start by itself. Mr. Young informed the coroner as to the regulations regarding the placing of barrows on the platform, and

these were that trucks not in use should be kept close up to the buildings; these were issued to every servant of the company by the foreman. He did not think the vibration of a passing train would be sufficient to start the truck running across the platform. Mr. GEORGE HENRY TURNER, general manager to the Midland Railway Company, replying to the coroner, said that in the year 1880 a deputation asked the directors to remove the station to the main road, and their attention was called to the want of better accommodation. This deputation was from the local board, and there was a petition from that board and the townspeople. In 1882 the accommodation was improved by extending the down-platform and covering in the up-platform, at an expense of 1,410*l*. In December, 1897, the urban district council approached the company by sending a letter in which reference was made to the utter inadequacy of the accommodation and asking for a new station. Some 4,000*l*. or 5,000*l*. had been spent on the up-platform, but the old buildings on the down-platform were left as before, the new exit being made. Following the letter from the urban council was a reply from the company stating that they did not feel justified in building a new station. To reconstruct the station there would be a great expense—from 40,000*l*. to 50,000*l*. The urban council again wrote to the company reiterating what had been said about the insufficient accommodation. The CORONER added that he wished it to be made clear that the local authorities had done all they could to point out to the company the inadequacy of the accommodation. Mr. TURNER said the company felt that the accommodation was sufficient for the traffic, and complied with the Board of Trade requirements. They knew that the buildings were not handsome, but they were to some extent guardians of the public purse, and could not throw money away needlessly. The directors, however, had not lost sight of this matter, and would, as they had promised, visit and inspect this station. There was a large line, and other sections had wanted attention; but the Wellingborough district was now upon the agenda for a visit. Continuing his evidence, Mr. Turner said that if a barrow had previously run off the platform he would not have heard of it unless it was broken or the occurrence was caused by irregularity. By Mr. WINTER—The duty of the company in regard to the mails was defined by the Post-office Acts. The position of the company with regard to this matter was shown by their accepting responsibility. Mr. Winter—Then that clears the postman. Replying to Mr. YOUNG, the GENERAL MANAGER said all the extra accommodation asked for by the authorities had been provided, except the new buildings on the down platform. By a JUROR—The new exit was only opened occasionally. By the CORONER—The question of improving the buildings and platform was under the serious consideration of the company at the present time. He did not think if that had been carried out before it would have prevented the accident. THOMAS GEORGE SMITH, postman, Wellingborough, repeated his evidence given at the inquiry before the Board of Trade inspector as to the incidents connected with the barrow. In reply to the Coroner, he said that he saw experiments conducted before the inspector. When the barrow was left by itself in the recess it ran backwards to the platform without any one touching it.—Mr. MACDONALD, recalled, admitted that at one point the platform was less than 10*ft*. wide. A number of witnesses were then called, including the two boys on the platform, all of whom detailed the circumstances under which the barrow left temporarily by postman Smith in the recess started, apparently on its own accord, to run across the platform and on to the line. This completed the evidence.—The CORONER, in summing up, pointed out to the jury that all they had to consider was how the deceased came by their deaths, and whether their deaths were due to any negligence, and, if so, whether that negligence was culpable. He thought the evidence would justify the jury in dismissing the theory that the truck came upon the metals through any action of the boys, and pointed out that there was nothing to show that the postman Smith acted recklessly or without prudence. There was a question whether he used proper precautions by leaving the truck in the way he did. There was the additional fact that the postman was much handicapped by the place in which he was working. The evidence showed that the platform and the gateway were considerably on the slope. It seemed to him that it was hardly the kind of place one would expect at an important station like Wellingborough. The JURY, after deliberating in private for about twenty minutes, found that the cause of the deaths was injuries accidentally sustained by reason of the express being thrown off the line and wrecked through running over a luggage trolley which had fallen from the platform. They added to their verdict the following rider:—"The jury desire to say that they consider the accident was accelerated by the gradient in the archway of the luggage exit, a portion of which is said to be 1 in 14. They express a hope that the Midland Company will at an early date rectify this, and also provide more adequate

accommodation for the travelling public at their Wellingborough Station."

### IMPENDING RAILWAY LOANS FOR RUSSIA.

It is announced that the banking firm of Mendelssohn and Co., of Berlin, will shortly introduce on the Berlin Bourse 44,570,000 reichsmarks in priority bonds of the South-Eastern Russian Railways, and 33,100,000 reichsmarks in Vladikavka priority bonds. Referring to the large impending issue of Russian railway bonds, the St. Petersburg correspondent of the *Times*, telegraphing on the 11th inst., says:—"A whole series of railway loans, guaranteed by the Russian Government at 4 per cent. interest, and free of income-tax, has for some time past been in process of emission by a German syndicate of all the principal Berlin bankers in conjunction with the larger banking houses of St. Petersburg, and it is another one of these loans which will shortly be issued in the German capital. The series began by the issue in May last of 86,050,000 German marks for the Riazan-Uralsk Railway Company. In the following July a loan of 70,605,000 marks was made for the Moscow-Windau-Rybinsk Company, and in a few days, on September 14th, a third loan will be issued in Berlin on behalf of the Russian South-Eastern Railway Company for 44,570,000 marks. Somewhat later the fourth loan of the series will be made, though without any public issue, on account of the Vladikavkas Railway Company, whose chief director is also vice-president of the Eastern Chinese Railway in Manchuria, for the sum of 33,100,000 marks. The total amount of these guaranteed Russian railway loans is 234,325,000 marks. This money is to be used in building new branches and feeding lines, of which an enormous number are projected. One of the most important is a new line to connect the important grain-exporting harbour of Novo Rossiisk, on the Black Sea, direct with the great Siberian trunk line at Cheliabinsk, running by way of Tzaritzyn, on the Volga, through Orenburg. The most competent persons in financial matters are of opinion that it would be useless for the Russian Government at the present moment to seek for more money either in Berlin, Paris, or London. The last loan of the above series was only realised with the greatest difficulty, and Berlin will have enough to do for some time to come in providing for the rest."

### CALEDONIAN RAILWAY.

#### RUNNING POWERS TO BO'NESS HARBOUR.

The Caledonian Railway Company has given notice to the North British Railway Company that it intends to exercise its running power to Bo'ness Harbour granted by Parliament last year. The Caledonian, however, will not enforce its right until February 1st, 1899, when the Grangemouth rate of 2*s*. per ton will commence. At a special meeting of Bo'ness Town Council on Friday, the official communication from Sir James Thompson, general manager of the Caledonian Railway Company, intimating that his company had resolved to exercise the running powers to Bo'ness on and after February 1st next, was read. The letter stated:—"I think it right to say that the terms under which we shall have to exercise the powers are more onerous than we at any time anticipated, but in coming to the decision to exercise the running powers my company have been largely influenced by the hearty support they have received from the town council and traders of Bo'ness, and I trust that we shall continue to receive such support from the public as will justify us in exercising the running powers." Provost STEWART moved that the town council desire to put on record their appreciation of the important announcement contained in Sir James Thompson's letter in the face of the adverse decision of the Railway Commissioners on the question of running power tolls, and they express the hope that the connection now about to be formed between the burgh and the Caledonian Railway Company may be a prosperous one for the company, the inhabitants, and the traders, and that it may long continue. Proceeding, the Provost said that while it seemed a long time to look forward to before the running powers were exercised, they must remember that there were a great many things to arrange between the companies to provide station and other accommodation, and the North British Railway Company would not find the time any too long for making the necessary arrangements for conducting the traffic. He expressed the opinion that though the terms on which the Caledonian Company would exercise running powers were not as good as they would like, yet he believed the connection would be a prosperous one for the company as well as the traders. He hoped many of them would see the time when the connection between the burgh and the Caledonian Company would not only be one with running powers, but a connection with a station on a through-going line to Edinburgh. (Applause.) Ex-Provost BALLANTINE seconded the motion, which was unanimously approved of.

## LOCOMOTIVE EMPLOYÉS' ANNUAL DINNER.

The employés of the Caledonian Railway Locomotive Workshops Department held their third annual excursion on Saturday. The party numbered fully 10,000, being made up of the men engaged in the workshops at St. Rollox with their families, and ten trains were provided to carry them to their destination in Dundee. Sir James Thompson presided at the annual dinner of the committee, which was held in the Queen's Hotel, Dundee, and among others who attended were:—Lord Provost M'Grady, Dundee; Sir John Leng, M.P.; Edmund Robertson, Q.C., M.P.; Sir Thomas Thornton, town clerk, Dundee; Colonel James Neilson, Glasgow, and Mr. Edward Cox, of Cardean, directors of the Caledonian Railway Company; Chief-Constable Dewar, Dundee; Mr. W. Shaw Adamson, of Careston Castle; ex-Provost Brownlee, Dundee; Treasurer Ritchie, Dundee; Mr. John Shiel, factor to Lord Dalhousie; Mr. J. F. M'Intosh, locomotive superintendent; Mr. George Graham, engineer-in-chief, Caledonian Railway Company; Mr. R. J. Patrick, excursion secretary; Mr. F. M'Lennan, excursion treasurer; and the officials and chief foremen of the locomotive department. Apologies for absence were intimated from the Marquis of Bredalbane, Mr. J. Badenoch Nicholson, Sir Thomas Lipton, and Mr. William Patrick, assistant general manager. The loyal toasts were given from the chair and cordially pledged, and Sir James Thompson, in next proposing "The City and Trade of Dundee," took occasion to express the pleasure it gave him to be present, and to have been asked to preside. Dundee, he proceeded to say, was a pioneer city in the matter of railways, and he recalled the fact that the Dundee and Newtyle line, opened on December 16th, 1831, was the first line north of the Forth opened for locomotives. It was first worked by horses, and about the end of 1833 the first engine was supplied by Messrs. Carmichael, of Dundee. He gave interesting information regarding the early railways in the district, and referring afterwards to the occasion and the character of the excursion that day, expressed the high appreciation which the visitors entertained of the cordial welcome extended to them by Lord Provost M'Grady and the municipality. The Caledonian Railway Company were one of the largest ratepayers in Dundee, and were deeply interested in the prosperity of the city. Lord Provost M'Grady acknowledged the toast. Sir Thomas Thornton, in proposing "The Caledonian Railway Company," described their system as a veritable Colossus. Referring to various schemes in which the Corporation of Dundee and the Caledonian Company were interested, he touched with some humour upon the courteous and conciliatory attitude invariably shown to the representatives of the city by the officials and directors of the company, while the actual concessions received amounted usually to little or nothing. They did not like, he remarked, to find the Caledonian Company opposing any of their schemes in Parliament, aided and abetted by a powerful genius such as Sir James Thompson, and he hoped to see revived the good relations that formerly existed between the town and the three local railways, of which the Caledonian Company were now the representatives. Mr. Edward Cox replied, and, in the course of his remarks, alluded with satisfaction to the fact that the Caledonian Company had been asked to build for the Belgian State railways six engines of the "Dunalastair" type. Mr. M'Intosh had made still further progress in this direction, and had designed an engine which he was confident would outlive all others. Lord Provost M'Grady proposed "The General Manager of the Caledonian Railway Company." Sir James Thompson, in responding, remarked that in dealing with municipal matters the Caledonian Company had always got on very well with the corporation of Dundee, and they intended to do so in the future as in the past. He attributed the great success of the company to the loyal assistance given by the staff. He had now an experience of over fifty years, and he said without hesitation that no company had a better, more loyal, or abler staff than the Caledonian. Treasurer Ritchie proposed "The Locomotive Department," to which Mr. J. F. M'Intosh replied. Colonel James Neilson proposed "The House of Commons," and the toast was acknowledged by Sir John Leng, M.P. The Chairman afterwards stated that it was fifty-one years that day since the Caledonian Railway was opened, and the only one of the officials who was present on the occasion and was still alive was Mr. George Graham, whose health he now asked them to drink. Mr. Graham, who was cordially received, gave some interesting details regarding the early days of the railway. The proceedings then terminated.

## EASTERN RAILWAY OF URUGUAY.

It will be remembered (says the *Monte Video Times*) that by the casting vote of the then President of the municipality of Monte Video, Dr. J. M. Vilaza, in a tribunal composed of seven Judges of Appeal—although this indivi-

dual was challenged by the company—the Government of Sr. Idiarte Borda was enabled to obtain a confirmation by the highest court in the Republic of its resolution cutting down the guarantee of the Eastern Railway Company from 7 to 3½ per cent., and from this judgment there could be no appeal. In order, however, thoroughly to exhaust the legal means of obtaining justice, the company applied for a new trial on the grounds that, according to Art. 138 of the Code of Civil Procedure, the tribunal or Judge when delivering a judgment is compelled to refute the legal arguments addressed in the pleadings. In this particular case one of the principal contentions of the company was "that at the time the Ellauri Convention was arranged the State had already by medium of the Chambers solemnly declared its own bankruptcy and inability to meet its obligations with respect to the unified debt and railway guarantees, which declaration was the cause of suspension of the works, and that after this first breach of contract on the part of the State the latter could not claim that because the company accepted a simple prorogation of the original concession time this would serve as a pretext for enforcing the company to become a party to a convention in which it had never in the slightest degree been even consulted." This apparently overpowering argument was carefully ignored in the confirmatory decision of the plenary tribunal. The move for a new trial was thrown out on the plea that the plenary tribunal, without prejudice to the individual opinions of its members, had acted as the highest court of justice in the country, and from the decision of which there could be no possible appeal, a result not to be surprised at considering the move had to be made before the very tribunal which had pronounced the previous judgment. It was reasonably anticipated that after the initiation of the proceedings for a new trial the Government would make an effort to arrive at an amicable solution of the means of prolonging the railway, taking into account the utter impossibility of raising capital in Europe for the construction of a railway in Uruguay, through, perhaps, the most difficult part of the country, with a State guarantee of 3½ per cent. on 5,000l. per kilometre, and with the national external debt fluctuating between 40 per cent. and 45 per cent., the more especially as only recently the Chambers had sanctioned a contract for the construction of some 300 kilometres of railway through an entirely different and easier region of the Republic for railway-building purposes, giving, as a bonus, 400,000l. of consolidated debt, and about 150,000l. worth of railway material, and this after having bought out the original concessionaires for a further 400,000l. of consolidated debt, although these concessionaires had not completed a single kilometre of line, and whose concession, in fact, had been declared cancelled by an Executive decree. A monster petition from the inhabitants of the department traversed by the Eastern Railway was voluntarily raised and signed by almost every person who could write, praying the Government to use its good offices to bring about the prolongation of the railway by entering into an arrangement with the company; but, as our readers are already aware, the expression of public opinion invariably acted upon the sensibilities of the late President much after the manner of a red rag to a bull, and the petition had no effect. With the extraordinary changes in the political world of Uruguay, we understand the company is by no means disposed quietly to accept the decision of "the highest tribunal in the country" as final, convinced, as it is, that, with a Government composed of men more sensitive to the interests of the country than to their own personal gains, it would be an insult to their intelligence to point out what a terrible blow to future railway enterprise has been dealt by the arbitrary and unjust proceedings adopted in the case of the Eastern Railway. By the excess of injustice inflicted in the confirmatory decision of the Plenary Tribunal, a curious judicial phenomenon occurs. The court declares in one of its summaries:—"There is no doubt that at the time the company obtained the prorogation of its concession time (1891) (the original concession was granted for five years dating from 1889), the said concession had become cancelled; but that the Tribunal did not declare the caducity because this was not a point submitted to it for decision." Under this menace the company is bound to elucidate the point. If the concession had become cancelled at the date of the granting of the prorogation—then as a consequence the company has no right to even the 3½ per cent. so magnanimously granted by the executive and confirmed by the Plenary Tribunal. If, on the other hand, it had not become cancelled, matters must be restored to their original condition, that is to say with a guarantee of 7 per cent., because it is in virtue of the argument that by accepting the prorogation the company came under the conditions of the Ellauri convention the four-sevenths majority of the learned Judges were enabled to arrive at their exceedingly clumsy and ridiculous decision. It may be worthy to note that the four majority legal luminaries are debarred from pronouncing judgment upon this new question, they having already prejudged the point in their former decision.

## CENTRAL ARGENTINE AND BUENOS AYRES AND ROSARIO RIVALRY.

The *Review of the River Plate* says:—In treating of this subject we cannot refrain from expressing our regret that two of the most powerful English railway companies here should have such difficulty in avoiding a quarrel that they are compelled from time to time to call in the judicial or the executive power to settle their differences. Ever since the amalgamation proposals fell through, the Central Argentine and the Rosario companies have keenly opposed each other, and have acted as if a defeat for the one must necessarily be a victory for the other. If a level crossing had to be made by the one line, it was promptly opposed by the other. In this contest for a long time the Central Argentine Railway had the advantage: not that it gained in the long run, but that, being in most cases the one in possession, it was enabled to harass and delay the other. In San Fernando the conflict ran so high that we were likely to have an actual collision between the municipal authorities and the national Government. The municipality, like most municipalities, was careless of its own interests, but it was stirred up by the rival railway to make it warm for the newcomer. Then an abortive attempt was made to show the helpless isolation of the Rosario Railway in Retiro by cutting off the points leading into its goods sheds. These are but incidents in a contest that has been going on for years. It is not wonderful, therefore, that when a serious attack was made upon the legally acquired rights of one of the companies, the other company, instead of backing it up, backed out, and left its rival to settle as best it could with the National Government. The Rosario Railway may have exacted its fair revenge in this way; but it was scarcely good policy for railway rights in general. We venture to think that the same criticism would apply to the document which we publish on another page. We have nothing whatever to say in defence of the attitude assumed by the National Railway Board, which is peculiarly disingenuous in its appropriation of the plans and arguments of the Rosario Railway Company, and which has been peculiarly unintelligent or unfair in the modifications which it has introduced for the sake of saving its own originality. We have nothing to say for the board's proposal, and we consider that the Rosario Company has rightly protested against the unacknowledged appropriation of its plans and arguments, in the interest of the Central Argentine Company. Nor does it seem to us that the Board of Public Works has taken the trouble to understand the proposals, possibly for want of information regarding the negotiations which led to their being made. But we do think that from a wider point of view, that of the general interests of railways and foreign companies in this country, the Rosario Railway's representative was ill advised when he assumed the attitude of a Government official, and criticised in the most destructive fashion rights which had been acquired in good faith by the Northern and afterwards by the Central Argentine companies, and which did not directly conflict with the rights of his own company, but had only been brought into conflict with these rights by the wrongheaded argument of the National Railway Board. It may or may not be the case that the Central Argentine Railway is entitled to compensation for eviction. It was not in the province of the National Railway Board to affirm that it was; and it would have been quite a sufficient reply to the board to say that the matter of these rights was at present *sub judice*. Every encroachment of the Government on railway rights is a danger to all the companies, and is calculated seriously to affect the value of their properties by the precedent which it establishes. The National Railway Board at the present moment is practically a partisan of the Central Argentine Company. But it is so accidentally, and it cannot be expected to look at matters from the point of view of the companies, or any one of them. The company that attempts to make a tool of the National Railway Board is playing a dangerous game; and the opponent who attacks the fundamental rights of a company because they are for the moment upheld in a partisan fashion by the board is equally suicidal in its policy. The Sermon on the Mount is generally believed to have been written before the days of railways, and railway men are not generally supposed to include it in their regulations; but there is a clause in it which bears directly upon the uncertainties of law, and which is not without its application to the disputes of railway companies. "Agree with thine adversary quickly, whiles thou art in the way with him: lest at any time the adversary deliver thee to the judge, and the judge deliver thee to the officer, and thou be cast into prison." Which may be paraphrased as follows: "Agree with the rival company while your concessions are both in force: lest the rival company pick holes in your concession, for the benefit of the Government, and the concession be declared null and void." It may be said that the interests of the companies are too directly opposed to one another to be reconciled in any way. This is hardly con-

ceivable, in the light of the partial agreements which have from time to time been arrived at. But if it should be found true, it will be for shareholders to consider whether companies whose rights are of so conflicting a character as to be ultimately at the mercy of a foreign Government are suitable investments for their money.

## BARRY RAILWAY NEW ORDINARY STOCK.

Messrs. E. T. Lyddon and Co.'s *South Wales Investment Circular* for the current month, in referring to the new issue of Barry Railway ordinary stock, says:—"The time of issue is unfortunate, owing to the disastrous colliers' strike, resulting in the non-payment of dividends by the Barry and other local railways, and the consequent depreciation in the value of their securities. It will have been observed, however, by those who have studied the balance-sheets, that the money was really needed, the overdraft at the company's bankers having grown from 19,608*l.* in June, 1897, to 289,280*l.* in June, 1898. The money has been spent, and interest thereon and on a further half-a-million of money, debited to revenue, while the works on which the capital has been expended, hitherto unproductive, will shortly be finished, and will to a large extent increase the earning capacity of the company. These facts must be remembered in estimating the intrinsic value of the new stock, as an impression has prevailed that the present comparatively large increase of ordinary capital might be the means of permanently reducing the dividend. The dividend for the current six months, if any be earned, must necessarily be small, as if the strike be ended to-day, practically the traffic of three out of the six months will have been lost. Another eighteen months may elapse before the lines being, and to be, constructed eastward, and on which a large traffic will run to Barry Dock, can be completed, and meanwhile it will be a pleasant surprise if the full 10 per cent. dividend be maintained, but whatever the reduction may be, if any, we quite believe it will be but temporary. As we write, the allotments are being negotiated on this market, and Cardiff is naturally the centre of dealings in Barry stock, at about 44—46 per cent. additional premium, equal, when fully paid, to Barry old stock at 244—246, and in buying these allotments there is no stamp duty, a saving to purchasers of 1½ per cent. Barry preferred and deferred stocks are being dealt in at 122½ and 140 respectively, and together are worth 262½, and this, or say 62½ additional premium, is the corresponding value of the new stock, less any slight loss in dividend which may arise through the new stock not being fully paid until April 1st of next year. There is here a difference of 17½ points, which may be secured by a purchaser or by the allottee who determines to hold, assuming, of course, the present market value of the old stock be maintained, and we suggest the probability of its being higher six months hence than now." [Since the above was written there has been a considerable fall in the ordinary, preferred, and deferred stocks of the Barry Company.]

**Royal Portuguese Railway.**—In the course of a letter published in his own paper, Senhor Pereira Carrilho, president of the Royal Imperial Portuguese Railway Company, states that a further 6,000 first mortgage bonds of the company will be placed on the Paris Bourse on the 19th inst. If it were not for the depreciation of the gold standard, the improved working results of the railway would not only allow of the payment of the interest on the first mortgage bonds and suffice for their redemption, but would also leave a considerable surplus. Moreover, if the gold agio completely disappeared, the president states that the working results would enable the company to pay, if not all, at least the greater part of the interest on the second mortgage bonds, and that it might not be surprising if the shares began to receive dividends in from three to four years' time. The directors, the president observes in conclusion, are convinced that the traffic on the railway will continue to increase, and that in a few years hence the company's shares will rank among the best of securities.

## STRONGEST LIFE OFFICE IN THE WORLD.

## THE EQUITABLE LIFE ASSURANCE SOCIETY of the UNITED STATES.

ASSETS .....	£49,349,231 Sterling.
SURPLUS .....	10,508,995 Sterling.

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months	£0 7 0
Six Months	0 13 0
Twelve Months	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

 Sep. 30—Hull and Barnsley Railway (Special), Winchester-house, at 12.  
 Oct. 7—Recife and Sao Francisco Railway (Half-yearly), Winchester-house, at 12.  
 Oct. 13—Grand Trunk Railway of Canada (Half-yearly), City Terminus Hotel, at 2.

The London Stock Exchange, before granting an official quotation to the first mortgage debentures of the Mashonaland Railway Company, require that the bonds shall each be endorsed with a statement showing the amount of the first issue—namely, 1,150,000l. The holders of the bonds are, therefore, requested to at once present them at the company's share office, 13, George-street, Mansion-house, E.C., with a view of having this noted upon their bonds. Until this is done the official quotation on the London Stock Exchange cannot be obtained.

## The Railway Times.

Established 1837.

SEPTEMBER 17, 1898.

## THE SECOND-CLASS PROBLEM.

"Methinks the chairmen do protest too much." This adaptation of the familiar quotation would, we fancy, express the suspicions of many who look below the surface of the present stage of the second-class problem, and who believe that they detect an anxiety on the part of the railway chairmen to convince themselves that all is for the best in the best of all possible railway systems. The opinion of THE RAILWAY TIMES is no matter of yesterday, and all the brave utterances of the recent half-yearly meetings, supported, as these were, by imposing array of figures, have served but to intensify that opinion. The whole point, in short, lies in the fact that the statistics of the subject presented to the shareholders dealt with gross receipts only, while the sole concern to the proprietary is obviously the net result on their revenue, of which no indication was given. Business men, in their moments of quiet reflection, have before now, and not so long ago either, failed to appreciate the difference between the two. It is not very surprising then that in the bustle of a general meeting the totals referred to should have produced a sense of mental indigestion, with the usual results of that complaint. It would, indeed, have been more appropriate had a discharge of fog signals taken the place of the figurative fanfare of trumpets and tom-toms which accompanied the ex-cathedra pronouncements. The subject is, however, too important for levity other than the small modicum necessary to adorn the tale. For the pointing of the moral an earnest consideration of the remarks which follow is all that is asked. For many years the chorus of lament, in a crescendo scale, at the falling off in the receipts of the second-class for long distance traffic, has formed an important feature of the railway meetings. Ten years ago an analysis of the accounts of the London and North Western was made by Mr. Price Williams, C.E., and gave the following remarkable information:—

First-class working expenses amount to	97.0	per cent. of receipts.
Second-class " " "	104.44	" "
Third-class " " "	41.0	" "

In fact, in 1888 the second-class was being maintained at a dead loss. These figures were adopted by the then general manager, Sir George Findlay, in an able paper read by him in 1890 before the Royal Society of Arts, and they may thus be considered as having received the official imprimatur. Since then, moreover, second-class receipts have fallen still further on the North Western and other companies' systems, while it would be absurd to suppose that the expense of working the second-class traffic has escaped the influences which have operated towards the increase of working expenditure generally. Two years ago the various companies which still hold to Sir George Findlay's view that "travelling society naturally divides itself into three classes" came to the conclusion that something must be done. Suburban traffic not being in question, and the Midland, the Great Central, together with the east coast and Scotch companies (except the Highland) having already abandoned the second-class in whole or for long-distance traffic, the companies principally concerned at this juncture were the North Western, South Western, Great Western, and Lancashire and Yorkshire. Whatever be the reason, innate conservatism or tenacity of opinion bordering upon obstinacy, these companies could not or would not make up their minds to take the plunge. It is but

right to suppose that the technical advisers of the respective boards have sufficient backbone to admit that advice once given cannot be expected to hold good for all times and under all circumstances. Yet it is difficult to believe that some mistaken sense of personal dignity was not involved in the decision to bolster up the second-class by material reduction of fares rather than to take the bold step of admitting the correctness of the action of rival companies. What was done, at any rate, was to reduce the second-class long-distance fares to a level which should show the smallest surplus over the corresponding third-class fare compatible with an estimate of the difference in the cost of maintaining the two classes. The basis of that estimate and the quantum of the difference have not, of course, been revealed. An examination of fare tables shows that the North Western and Lancashire and Yorkshire have apparently adopted a rate of approximately one penny and one-tenth per mile, in place of  $1\frac{1}{4}$ d.; while the two southern companies mentioned above have effected reduction of  $\frac{1}{4}$ d. on the old rates of  $1\frac{1}{4}$ d. It is not in the least surprising to find the second-class receipts rising rapidly under such encouragement. Yet this fact, and practically without qualification, it was that formed the subject of the ode to victory sung in unison by the railway chairmen and joined in chorus by a large part of the financial press. Let us see what these figures really mean to the companies. The results of the first half-year, shown in the following table, are abstracted from the directors' reports:—

Company.	2nd-class passengers.		2nd-class receipts.	
	Increase over 1897.	Increase per cent.	Increase over 1897.	Increase per cent.
L. and N. W. Railway ...	491,831	32.04	£56,842	44.58
L. and Y. Railway .....	691,535	91.56	29,953	111.76
Great Western Railway...	275,793	13.91	28,238	11.92
L. and S. W. Railway ...	112,335	5.41	10,665	8.34

The difference between the rates of increase of the two pairs of companies, northern and southern, is doubtless attributable to the greater extent of the reduction in the case of the two companies first mentioned. No small credit was taken for these increases by the various chairmen, though more than one had cause to refer to an actual falling off in the receipts per third-class passenger, due, as Lord Cawdor remarked at the Great Western meeting, to the passing of long-distance travellers from the third into the second class. Now, this would appear to be a matter for congratulation only if the cost of working the second-class traffic bears a reasonable proportion to the cost of working the inferior accommodation for which such slightly smaller charge is made. This is the point on which no information is vouchsafed, and which is extremely difficult to estimate. We may, however, approach the subject in another way. It must be admitted that not one additional customer is secured to the railway by the reduction in fares. All who now travel second-class would go first or third if no second-class existed. Let us assume for the sake of argument that all would travel third; and our assumption will not err in severity against the second-class supporters. What the companies rely upon for the cost of maintaining the intermediate class is, then, the difference between the second and third class fares, less the passenger duty payable on the former as being above the Parliamentary rate of one penny per mile. Taking the North Western as an example, the following results appear to be approximately correct:—

Total second-class receipts .....	£180,104
Passenger duty payable .....	9,005

Net .....	£171,090
Receipts on 1d. per mile scale (third-class).....	£154,401
Balance available for profit and maintenance of second-class	£16,698

It should be added that the hypothetical receipts on the third-class basis are derived from the assumption that the average second-class fare is  $1\frac{1}{4}$ d. per mile. There is thus

a balance of about 33,000*l.* per annum out of which to defray the whole cost of maintaining an intermediate class, involving, as this does, expense in station working, the shunting and marshalling of vehicles, and complication at every turn. Certainly the figure appears none too large, and the net result to the company can hardly be more favourable now, and may even be less so, with the large number of passengers to provide for, than when that number was smaller and each passenger paid one-tenth of a penny per mile more, which difference, indeed, was pure gain. Of course, it may be said that the present system economises space badly required in the lower class carriages, and fills those in the higher class which previously ran empty. Such an argument would, however, be a complete confession that the second-class is being merely bolstered up, and we should expect to find that no more rolling stock of that class was to be built. Such a policy, while a large quantity of second-class accommodation is still in running order, would be at least intelligible, even if there are those who, with ourselves, believe that by painting "third" over "second" a real simplification and economy would be effected. It is generally agreed that what the second-class passenger is ready to pay a small sum for is not so much increased comfort in the construction and upholstery of his compartment as the advantage of more congenial companionship, and an improved allowance of elbow room. Whether those who desire such advantages intermediate between the normal scales of first and third are to be considered a separate division of society for railway purposes is pure sophistry. By the ordinary arrangements for engaging compartments under specified and by no means prohibitory conditions, such a demand on the part of the public is generally admitted to be well grounded, and is conceded without extra payment. On one company's line, the Furness Railway, which runs no second-class carriages as such, all the advantages pertaining to that class can be secured by the payment of a small fee added to the third-class fare. For this is conceded the privilege of a seat in one of the third-class compartments specially reserved for those who pay the fee, and who are thus secured from the discomforts of crowding and the presence of undesirable individuals. We would not advocate an indiscriminate or any widening of the regulations under which third-class accommodation will be reserved without extra payment. Already the service afforded by the companies is out of all proportion to that obtaining some years ago, when fares were, if anything, higher than they are to-day. Nor is the Furness system perfected as to detail, and its continuance on the present basis will no doubt depend upon the outcome of the suggestion that all third-class fares so increased become liable to passenger duty. The reduced fare experiments of the various companies have, however, shown that there is a large section of the public ready and anxious to pay something above the ordinary third-class fare in order to obtain specific advantages; and, further, that the majority of these travellers cannot afford to pay sufficient to maintain a separate class for themselves. To meet the demand, and, as we think, to profit by it, the companies will have, sooner or later, to reconsider their position, and this remark applies equally to those who have abandoned the second-class as to those who are fighting against fate to maintain it.

### THE NORTH BRITISH REPORT.

The explanation of the very poor dividend of the North British Company, to which we referred in our last issue, is very largely to be found in extra capital charges. Further, the company published an increase in gross receipts of 83,000*l.*, but, according to the report, the actual growth in traffic receipts was only 69,000*l.*, whilst, including miscel-

laneous receipts, the increase was only 71,000*l*. About 22 miles were added to the system, so that some addition to gross receipts was to be looked for. Practically all items of revenue showed expansion, but the principal addition was 34,000*l*. in mineral receipts. All the Scotch companies, like many of the mineral lines in England, have shown exceptional growth in mineral traffic of late—a feature which is, no doubt, attributable to the stoppage of coal supplies from South Wales for five months past. Curiously enough, the North British was able to earn its 71,000*l*. of additional revenue last half-year, with an addition to its train mileage of only 21,000 miles. Expenses increased, notwithstanding, by 45,500*l*., leaving the addition to the net revenue at about 25,700*l*. Interest yielded more, but the amounts paid over to the Forth Bridge and West Highland companies, debited to net revenue account, increased by 4,300*l*. and 8,100*l*. respectively. Together the amount of net revenue paid over by the North British to those two subsidiary lines in the past half-year was 102,932*l*. Whether that payment involved a loss to the parent company or not does not appear, as the requisite details are not supplied, but we think that this is extremely probable. The net amount available for dividend is finally 27,200*l*. higher. As, however, the company had to find dividend on the 1897 issue of convertible preference stock and on an increased amount of lien stock, and as these charges together represented 39,000*l*., the sum available for the ordinary stocks is, of course, reduced, and by the reduction of  $\frac{1}{4}$  per cent. in the dividend on the deferred 11,500*l*. is saved, whilst the balance forward is also slightly lower. During the past six months 487,938*l*. was expended on capital account, and the estimated outlay for the current half-year is 475,294*l*. The expenditure at Waverley Station still proceeds apace, and last half-year a further 179,315*l*. was thus disposed of, and yet the project is not nearly completed. As the company has plenty of funds in hand, and other resources available, it will not have to issue any share capital for some long time to come. But the 1897 issue of preference capital added no less than 93,000*l*. a year to the pre-ordinary charges of the company, and the full force of these has not yet been felt by the company. From the current half-year onwards, however, the full charge on this stock has to be provided, and unless there is a marked advance in gross receipts, the dividend on the deferred stock must further suffer in consequence.

### DISTURBED STOCK MARKETS.

Until a few days ago the stock markets generally were very cheerful on the satisfactory turn taken by international politics. The Czar's peace manifesto, the brilliant victory of the Anglo-Egyptian Army in the Soudan, the Anglo-German agreement, the reported arrangement with Russia as to affairs in China, and the dismissal of Li-Hung-Chang, who was credited with active plottings against British interests in the Celestial Empire—these were the leading features of an improved political horizon which almost lulled one into the belief that the millennium had arrived. It was hardly surprising that prices of practically all classes of securities, which during the present year have been on many occasions adversely affected by gloomy political forebodings, should respond to the more cheering aspect of the barometer. But the spell did not last long. This week the disturbing items of intelligence have been just as numerous as were the preceding cheering events, and it became more evident than ever that the millennium is not, after all, in sight. The dastardly assassination of the Empress of Austria naturally renders less secure than before the none too secure succession of the House of Hapsburg, and adds to the already numerous disturbing elements

at work in the Austro-Hungarian Empire. The report of the presence of the French at Fashoda has again revived the talk of a war with France which the West African difficulty gave rise to earlier in the year. Then the defiant attitude of the Sultan of Turkey in regard to Cretan matters does not allay the general discomfiture. These are matters which have affected securities generally; but, in addition, Chilean and Argentine issues have had a scare all to themselves in connection with the eternal boundary dispute. The reported action of Chili in calling out troops clearly does not make the way any smoother for the contemplated arbitration on the disputed points, though it is believed in many quarters that Argentina, at any rate, will do everything possible to avoid a struggle. Any way, Chilean and Argentine Government stocks and Argentine railway securities, in sympathy with the latter, suffered a sharp reaction in the first part of this week, though later the tendency is somewhat better. As for Americans, they are getting distinctly "wobbly," the rise in these securities having been very large compared with the level touched whilst the war with Spain was proceeding, and in the ordinary course we should soon see a set-back. Nevertheless, our reading of this market is that the general trend of prices will be upward for another year or so, after which the big houses will begin to unload their enormous holdings preparatory to the next cycle of reconstructions and assessments. The markets generally have shown a better tendency during the last two days, and the probability is that the recent decline in values would have been less pronounced had not the advent of adverse political news synchronised with the over-bought condition of the markets.

### STATE OWNERSHIP IN GERMANY.

We published a fortnight ago, on the authority of the *Allgemeine Zeitung*, the significant announcement, which is believed in Berlin not to lack official countenance, that the German Minister for Railways is anxious to encourage the construction of private railways in competition with the lines owned by the State. It is a curious coincidence that a step so retrograde in ultra-democratic eyes, or to be regarded as a return to reason in the view of the opponents of State ownership, should be announced simultaneously with the first move towards the consummation of the Swiss nationalisation scheme, to which we referred in our last issue. Can it be that the reason advanced by our German contemporary is officially admitted? That the State railways are avowedly unable to cope with the requirements of a growing traffic? We can well believe this to be the case, for a very limited experience of the ways of red-tape and cast-iron restrictions, dear to the quasi-military functionaries with whom the ordinary traveller is brought into contact does not inspire confidence in the common-sense decision on a business footing of the far more delicate and important questions which come before the higher executive. There is little doubt that the socialistic element has deeply resented the purity of administration which has so far maintained the personnel of the German railway service free from the corruption which so often accompanies heavy labour patronage. The principal industries of the country have found that a ministerial bureau is unable to give that sympathetic attention by which alone special trades can be fostered and real competition increased to the benefit of the country at large by the elimination, in part at least, of geographical disadvantages. The traders, it is probable, would welcome the initiation of privately owned railways which by strict attention to business would raise the standard of service, and in all probability reduce its cost. The fact is, the State ownership of the German railways is desired neither by the traders nor by the labour

party, and its existence in these days of great commercial activity is an anomaly which is understandable only in the light of the bureaucratic proclivities of the nation. Unless we are much mistaken the present step is one of the most important yet taken in the commercial history of the country. Englishmen, please note.

### PASSING NOTES.

The traffic receipts for the week ending September 11th, on thirty-three of the principal lines of the United Kingdom, amounted to 1,844,340*l.*, which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,791,787*l.*, with 19,034½ miles open. There was thus an increase of 52,553*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for eleven weeks to date amounted on the same thirty-three lines to 20,637,692*l.*, in comparison with 20,227,296*l.* for the corresponding period last year; increase, 410,396*l.*

An extraordinary general meeting of the Metropolitan District Railway Company will be held on the 29th inst., for the following purposes—viz.:—(1) To authorise the exercise of the powers conferred by section 3 of the Whitechapel and Bow Railway Act, 1898. (2) To sanction the creation and issue of the capital authorised by section 6 of the Whitechapel and Bow Railway Act, 1898. (3) To sanction and approve an agreement, dated September 12th, 1898, made between the Whitechapel and Bow Railway Company, the Metropolitan District Railway Company, and the London Tilbury and Southend Railway Company, for the maintenance, working, and user of the Whitechapel and Bow Railway, and the division of receipts from traffic thereon. (4) To authorise the exercise of the powers conferred by section 68 of the Metropolitan District Railway Act, 1897.

At the conclusion of the monthly meeting of the Swansea Harbour Trust on Monday the CHAIRMAN (Mr. Griffith Thomas) observed that the trustees had had under consideration several important matters which would probably be referred to at the next meeting. It now transpires that deep-water entrances to the south and east docks are under contemplation, the cost of both schemes being roughly placed at about 300,000*l.* In connection with these proposed improvements, Mr. W. Law (harbour superintendent) has submitted a scheme with plans providing for an entirely new entrance to the Prince of Wales Dock, the present entrance having always been considered wrongly constructed, as it does not allow ships to enter the dock longitudinally. A new dock is said to be the alternative scheme to these contemplated improvements in the Swansea Harbour.

The half-yearly report of the Caledonian Railway Servants' Friendly Society shows that there are now 4,418 members on the roll, being an increase of 246 from last year. During the past half-year 1,792*l.* has been paid to members off sick, and 322*l.* has been paid as funeral allowance. The income was 2,242*l.* The question of alteration of rules will be discussed at the forthcoming meeting. It is proposed that members who have received fifty-two weeks' aliment, and are still incapacitated for work, and who at the commencement of their sickness were ten years in the society, shall, so long as their sickness continues, be entitled to receive, according to class, not exceeding the following sums per week:—A, 3*s.*; B, 4*s.*; and C, 6*s.*

Commencing on October 1st, and every Saturday until May 27th, 1899, cheap return tickets will be issued, by any train, from London to all Great Eastern stations below Shelford and Mark's Tey (except Peterborough, and stations on the Stoke Ferry Railway), at single fares for the double journey. These tickets will also be issued to Southwold, stations on the Colne Valley Railway, Paston and Knapton and Mundesley-on-Sea. The tickets will be available for return by any train on the Sunday (if train service permits) or Monday following the date of issue.

The Press Association states that, owing to the extraordinary drought, traffic on the Grand Junction Canal between London

and Birmingham is seriously impeded. The supply of water is so low that only half-loads can pass along in boats, and traffic on the Aylesbury and Wendover branches of the canal is entirely stopped. Such shortness of water in the canal has not been known for the last half-century. On the London and North Western Railway, at Bletchley, the supply of water is exhausted, and engines are being taken 6 miles to Leighton Buzzard for water.

An extraordinary general meeting of the Hull and Barnsley Railway Company will be held on the 30th inst., "to cancel the creation of the unissued additional capital sanctioned by the proprietors on February 24th, 1883, and to authorise the creation and issue of new preference stock in pursuance of the powers conferred by this company's Acts of 1882, 1887, and 1898, and by the Hull and South Yorkshire Extension Railway Act, 1897 respectively, at such times, on such terms, and in such manner as the directors may determine."

Dividend Announcements.—Nottingham Suburban Railway, at the usual rate of 3½ per cent. per annum; Killin Railway, at the rate of 1 per cent. per annum; Glasgow District Subway, full dividend on the 4 per cent. preference shares; Callander and Oban Railway, at the rate of 2½ per cent. per annum; American Investment Trust at the rate of 5 per cent. per annum (interim) on the deferred stock; Foreign American and General Investment Trust, at the rate of 2 per cent. per annum on the deferred stock (interim).

The recent accident in Wellingborough has caused a thorough inquiry to be made at the Great Northern stations, where the company supplies chains for the purpose of fastening the barrows and trucks to the wall or posts. In some of the London suburban stations these chains were found to be deficient, and better ones have been substituted. If these chains were used no accident from runaway trucks would be possible. As it is, a railway official alleges that hundreds of them every year are cut up by trains.

An extraordinary general meeting of the Whitechapel and Bow Railway Company will be held on the 29th inst., "To sanction and approve an agreement, dated September 12th, 1898, and made between the Whitechapel and Bow Railway Company the Metropolitan District Railway Company, and the London Tilbury and Southend Railway Company for the maintenance, working, and user of the Whitechapel and Bow Railway, and the division of receipts from traffic thereon."

At the half-yearly meeting of the Glasgow District Subway Company, on Wednesday, the chairman said that 5,779,110 passengers had been carried during the half-year, against 4,178,215 last year, and the receipts had increased from 21,369*l.* to 27,882*l.*, being an increase of 38 per cent. in numbers and fully 30 per cent. in fares. The directors thought that the proposal to adopt the London system of charging higher rates in the morning and evening would not be popular.

Mr. Alfred Willis, who has been appointed general manager to the South Eastern and London Chatham and Dover Railways Joint Committee, is the fifth son of Mr. William Willis, of Luton, Bedfordshire. He was born at Luton in 1850, and received his education at the Hertford and Huddersfield Colleges. He joined the solicitor's department of the South Eastern Railway in 1869, acted as solicitor to the company from 1892 to 1896, and as traffic manager from 1896 to 1898.

It is understood that a scheme is afoot with the Cheshire Lines Committee for doubling the width of their line from the southern outlet of the Old Trafford tunnel away to Chorlton Junction, where the Midland and Great Central lines diverge. Sufficient land on the east side, along the distance named, already belongs to the committee, and is used almost solely for agricultural purposes, so that the widening of the track is a matter of comparatively small cost.

The half-yearly report of the Callander and Oban Railway Company states that contracts have been entered into for the construction of the new line from Connel Ferry to Ballachulish. The directors regret that, on account of his health, Mr. Bolton

desired to be relieved from the chairman's duties, but he has agreed to remain on the board. Mr. Buntin was unanimously elected as his successor.

The Great Central Company, whose London terminus in Marylebone-road approaches completion, find that additional space is needed for the purposes of their goods traffic now in partial operation. Hence in the next session of Parliament they purpose seeking power to acquire, in order to extend their accommodation, property including 417 houses of a total rateable value of 8,728*l*.

At the Dover Town Council meeting on Tuesday afternoon it was officially reported that the first year's working of the Corporation Electric Tramways, after allowing for the payment of interest and instalment of the loans, had resulted in a profit of 1,300*l*., equivalent to a 2*d*. rate. 1,794,903 persons had been carried at a fare of 1*d*. each.

The Caledonian Railway Company have purchased the whole of the Grangemouth Iron Company's works, the ground on which the works are situated—covering ten acres—being acquired in connection with the new dock works, which are shortly to be proceeded with, and on which a quarter of a million is to be spent.

An extraordinary meeting of the Caledonian Railway Company will be held on the 20th inst., for the purpose of authorising the exercise of the powers of subscription conferred upon the company by the "Callander and Oban Railway Act, 1896," and the "Lanarkshire and Dumbartonshire Railway (Capital) Act, 1898."

The North British Railway Company have made a claim against the Corporation of Glasgow for about 12,000*l*. for way-leaves, land interference, and sectional damage connected with their line by Partick, Whiteinch, Yoker, and Clydebank, in connection with sewers.

The North British Railway Company have agreed that single-journey tickets from stations north and west of Edinburgh to stations south and east of Edinburgh, and *vice versa*, are now available for two days, instead of on the day of issue, as hitherto.

Mr. Morriss, who has been for the past fifteen years district auditor for the Nottinghamshire and Derbyshire lines of the Great Northern Railway, has been appointed by the directors to the position of chief auditor in the Yorkshire district.

The Midland Railway Company have issued orders prohibiting the use of the company's or private barrows by unauthorised persons. Instructions have also been given for barrows to be chained up when not in use.

Mr. Francis Hopwood, C.B., the secretary to the railway department of the Board of Trade, has left for Canada and the United States on official business connected with the Department.

Messrs. John Best and Son, of Leith, who secured the contract for the construction of the new railway between Connel Ferry and Ballachulish (with the exception of the viaduct over Loch Etive) began operations yesterday at the Connel Ferry end.

A reward of 50*l*. has been offered by the London and North Western Company for information leading to conviction of the persons who attempted on two occasions to wreck trains on their lines.

Mr. Moffatt, general manager of the Great North of Scotland Railway, with the directors and principal officers of the company, has been in the Isle of Man, inspecting light railways, &c., there.

The half-yearly report of the Killin Railway Company states that the working agreement with the Caledonian Railway Company has been renewed for another period of five years.

Next session a Bill is to be introduced to obtain powers for constructing an electric underground railway from Cricklewood, through Kilburn and under Hyde Park, to Victoria.

The new Aviemore branch of the Highland Railway, which will shorten the journey to Inverness by over 20 miles, will be opened on October 1st.

## Money and Stock Markets.

The monthly settlement in Consols takes place on the 3rd prox.; the fortnightly settlement in other Securities commences on the 27th inst.

CITY, FRIDAY EVENING.

There is not much change to record in the monetary situation, and, at 1 13-16 for discounts and  $\frac{1}{4}$  to  $\frac{1}{2}$  per cent. for loans, rates are very little higher than they were a week ago. Opinions differ very widely as to whether we are on the eve of a period of dearer money or not. The Bank Return, issued yesterday, shows that the exports of gold were more than counterbalanced by the return of notes from circulation, with the result that the reserve is 231,000*l*. higher at 24,022,000*l*.; its proportion to the current liabilities has risen  $\frac{3}{8}$  to 49 $\frac{3}{8}$  per cent. Government disbursements have caused a decrease of 242,000*l*. in the public deposits, and the private deposits are 437,000*l*. higher on balance, the "other" securities having declined by 62,000*l*. The Bank to-day sold 29,000*l*. United States gold coin, and 15,000*l*. was withdrawn for Santos and 10,000*l*. for New York. These are the only bullion operations since the issue of the weekly Return.

Silver bars are now quoted at 28 1-16*d*. per oz., being  $\frac{1}{4}$ *d*. higher on the week. A year ago the price was 26 $\frac{1}{4}$ *d*.

Eastern exchanges are telegraphed as follows:—Bombay, 1*s*. 4*d*.; Calcutta, 1*s*. 4*d*.; Hong Kong, 1*s*. 11 $\frac{1}{4}$ *d*.; Shanghai, 2*s*. 8*d*.; Singapore, 1*s*. 11 $\frac{1}{4}$ *d*.

The premium on gold at Buenos Ayres has risen during the week from 163.40 to 173.20 per cent., making the paper dollar (nominally worth 4*s*. 2*d*.) now actually worth 1*s*. 5.43*d*. A year ago the premium was 191 per cent., and the value of the paper dollar 1*s*. 4.36*d*.

The Valparaiso 90-day exchange comes over to-day at 12 11-16*d*., a fall of 13-16*d*. on the week. A year ago it was 17 $\frac{1}{4}$ *d*.

The Rio de Janeiro exchange on London is 7 $\frac{1}{4}$ *d*., being  $\frac{1}{4}$ *d*. higher on the week. A year ago it was 7 $\frac{3}{4}$ *d*.

The Bankers' Clearing-house return for the week ending September 14th, 1898, shows a total of 121,223,000*l*., as compared with 139,128,000*l*. for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£34,650,808	£35,311,749
Total Reserve .....	£24,021,628	£24,754,644
Proportion of Reserve to Liabilities...	49 $\frac{3}{8}$ per cent.	51 $\frac{1}{2}$ per cent.
Notes in Circulation .....	£27,429,180	£27,357,105
Bank Rate of Discount .....	2 $\frac{1}{2}$ per cent.	2 per cent.
Open Market ditto .....	1 $\frac{1}{2}$ per cent.	2 per cent.
Consols (account) .....	109 $\frac{1}{2}$	111 $\frac{1}{2}$
French Rentes (account) .....	102 <i>f</i> . 40 <i>c</i> .	103 <i>f</i> . 50 <i>c</i> .
Paris Cheque Exchange .....	25 <i>f</i> . 27 $\frac{1}{2}$ <i>c</i> .	25 <i>f</i> . 21 <i>c</i> .
New York 60 days ditto .....	\$4.82	\$4.82 $\frac{1}{2}$

The principal movements on the week, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>					
Consols, 2 $\frac{1}{2}$ per cent. ....	—	$\frac{1}{4}$	Great Western .....	—	1
Do. 2 $\frac{1}{2}$ per cent. ....	—	—	Hull and Barnsley .....	—	$\frac{1}{4}$
India 3 $\frac{1}{2}$ per cent. Stock...	—	—	Lancashire and Yorkshire .....	—	$\frac{1}{4}$
<i>British Railway Ordinary Stocks.</i>

The STOCK MARKETS, which during the early part of the week, were adversely influenced by various political considerations, have shown a better tendency during the last forty-eight hours, the presence of the French force at Fashoda not being regarded very seriously. The British Funds are a trifle easier, but this is partly due to the fear of gold withdrawals and dearer money. British railway stocks are not very gay, and dealings in them are on a very small scale. As regards Yankee rails prices of Union and Northern Pacific issues are being boosted on a lot of wild dividend talk, but it is doubtful if the common stocks will get anything for the next six or twelve months, when dividends will be wanted to assist the big reorganisation houses in unloading the immense blocks of stock which they have grabbed as part of their profit on recent financial operations. Omitting the Pacific stocks nearly everything in this market shows a decline on the week, notwithstanding the recovery of the last two days. Canadian Rails are comparatively steady, and their course is difficult to forecast. As regards *Foreign Rails*, one of the features has been the weakness of Argentines, partly due to the disappointing dividend of the Buenos Ayres and Rosario Company, and partly to the conflicting statements as to the relations between Argentina and Chili. Mexican Rails, after being dull, show signs of returning activity. With improving trade conditions in that country and the prospect of a further rise in the price of silver, almost any Mexican railway issues should be safe to lock up at present prices. Mexican Southern ordinary at 20 may be given as a particular instance. Costa Rica shares and debentures are rather weak on the poor traffic. Nitrate Rails show no change on the week, but may do so soon, as a good deal of lost ground will probably be made up by the traffic returns between now and the end of the year. The shares are, of course, little better than a gamble, but the biggest profits are sometimes made out of the greatest rubbish, and a purchase of the 10l. deferred shares at 10s. or a shade over could not result in much loss, even if they were completely wiped out. The new board appears to be afraid to commence putting the company's affairs in order, though there is much they might do, to restore confidence in the concern, and they might safely rely upon the support of the "opposition" in any bona-fide efforts in this direction.

Applications have been made to the Stock Exchange Committee (1) to appoint a special settling day in and to grant a quotation to:—Espirito Santo and Caravellas Railway Company, Limited—14,317 shares of 10l. each fully paid, Nos. 1 to 14,317, in lieu of the bonds and committee's certificates for bonds of the Espirito Santo and Caravellas Navigation and Railway Company, now quoted; and (2) to allow the following securities to be

quoted in the Official List:—Baltimore and Ohio Railroad Company—Mercantile Trust Company's engraved certificates of deposit for 5 per cent. bonds of 1885; 100-year 5 per cent. consolidated mortgage bonds of 1888, due 1988; 4½ per cent. terminal mortgage bonds of 1894; sterling 6 per cent. bonds of 1872, due 1902; sterling 6 per cent. bonds of 1874, due 1910; sterling 4½ per cent. bonds of 1883; sterling 5 per cent. bonds of 1877, due 1927; and common stock, in lieu of the certificates of deposit issued by Messrs. J. P. Morgan and Co., Messrs. Brown Shipley and Co., and Messrs. Speyer and Co. Pittsburgh and Connellsville Railroad Company—Mercantile Trust Company's engraved certificates of deposit for consolidated mortgage 6 per cent. bonds, in lieu of the certificates of deposit issued by Messrs. J. P. Morgan and Co., now quoted.

Messrs. Thackeray and Co., of Cardiff, under date September 15th, report as follows:—Barry undivided, 259 (a fall of ½); ditto preferred, 123 (unchanged); ditto deferred, 136 (unchanged); Cardiff preferred, 114 (a rise of 1); Port Talbot 9 (unchanged); Rhondda and Swansea Bay, 4 (unchanged); Rhymney undivided, 267½ (a rise of 1½); ditto preferred, 121 (unchanged); ditto deferred, 148 (unchanged); Taff Vale, 79 (a rise of ½); Vale of Glamorgan, 128½ (unchanged). The market for South Wales rails has been somewhat restricted during the week, but prices show a disposition to harden. Taffs, Barry preferred, Port Talbots, and Rhondas are in request, while Barry allotments have again been an active market, closing price about 46 additional premium.

#### ARGENTINE RAILWAY ITEMS.

Mr. F. W. Barrow, general manager of the Buenos Ayres Great Southern Railway, left Buenos Ayres for England on the 25th ult.

Mr. J. Craik and Mr. Theobald, director and secretary, respectively, of the Central Argentine Railway Company, are now on their way back to England, having sailed by the Royal Mail Steamship *Thames* on the 2nd inst. Mr. Breese, assistant-accountant on the Central Argentine Railway, is also on his way to England on a short holiday.

The board of the Buenos Ayres and Rosario Railway Company, Limited, have declared interim dividends on the preference and Sunchales shares at the rate of 7 per cent. per annum, and at the rate of 2½ per cent. per annum on the ordinary stock of the company. Warrants for the above-mentioned dividends will be posted on the 10th proximo.

The Central Argentine Railway Company, Limited, has decided to form a local board of directors in Buenos Ayres, to consist of two directors and the general manager. Mr. Samuel Hale Pearson, of the firm of Samuel B. Hale and Co., has been appointed one of the directors; the other has not yet been nominated. It is probable that Mr. F. W. Brooker will be appointed as secretary to the local board.

The National Railway Board has discovered that the provincial railway system of Sante Fé has from 15 to 20 kilometres of line in the Chaco, which is national property, and it has applied to the Minister of the Interior to have the line put under National jurisdiction. From what we know of the working of the line by the French company, it should prove a most valuable feeder to the National Treasury in the shape of fines.—*Buenos Ayres Review.*

The Ottoman (Smyrna-Aidin) Railway exhibits another serious decrease this week, the gross take showing 4,287l., compared with 10,691l. for the corresponding week last year. Traffics then were exceptionally good, owing to an abundant harvest. So far this year the crops have been bad, especially in the valleys. It is hoped that when the upland crops are moved the weekly decreases will be less marked, but any prospect of a dividend on the ordinary shares next April seems remote. At the same time, this event is already discounted in the market price of the shares; as in 1894, when the dividend was also passed, the shares never fell below 11½, and rose at one time during that year to 14 13-16. The present price is 12. It is a poor consolation to compare the English railway in Asia Minor with the French and German undertakings, which entirely depend upon the Ottoman Government for their existence, but the Smyrna-Cassaba (French) line, with double the mileage this year, is actually taking less receipts than last year; while the section of the Anatolian (German) Railway, which lies within 70 miles of the district served by the Smyrna-Aidin, is earning less than 4l. per mile, compared with 14l. per mile earned by the latter. The excellent dividend of 22s. per share paid last April will have to content the shareholders for two years.—*Daily Mail.*

## American & Canadian Railways.

### NEW YORK, ONTARIO AND WESTERN.

Subjoined is a brief summary of operations as given in the annual report for the year ending June 30th. Full copies of the report may be obtained upon application at the offices of the English Association of American Bond and Share Holders, Limited, 5, Great Winchester-street, London, E.C. 4.

	1896-7.	1897-8.
Passenger earnings .....	\$638,659	\$641,679
Freight earnings .....	3,075,505	3,000,280
Mail, express, rents, &c. ....	121,659	122,774
Miscellaneous .....	58,690	59,902
<b>Total gross earnings .....</b>	<b>\$3,894,403</b>	<b>\$3,914,635</b>
Operating expenses and taxes ..	2,780,497	2,601,642
<b>Net earnings .....</b>	<b>\$1,113,906</b>	<b>\$1,112,993</b>
Other income .....	82,800	86,746
<b>Total net income .....</b>	<b>\$1,196,706</b>	<b>\$1,199,739</b>
Interest on bonds .....	\$609,055	\$615,000
Interest and discount and rentals ..	187,741	182,278
<b>Total disbursements .....</b>	<b>\$796,796</b>	<b>\$797,278</b>
<b>Surplus .....</b>	<b>\$399,910</b>	<b>\$402,461</b>

The accumulated balance at credit of profit and loss account is now \$2,611,173. The balance-sheet shows the capital to be as follows:—Common stock, \$58,113,983; preferred stock, \$5,000; consolidated first mortgage 5 per cent. bonds, \$5,600,000; refunding 4 per cent. bonds, \$8,375,000.

The length of line operated was 480 miles (same as in the previous year); the number of passengers carried 872,632 (against 808,811); the average rate per passenger per mile, 2·005 cents (against 2·072 cents); the quantity of freight moved, 2,479,292 tons (against 2,492,056 tons); the average rate per ton per mile, 0·873 cent (against 0·871 cent.); the ratio of operating expenses to receipts, 71·56 (against 71·40) per cent.

Mr. Thomas P. Fowler, the president, in his report, dated September 1st, 1898, says:—

"Within the last year the final payments on account of car trust indebtedness have been made, with the exception of three notes held by the Guaranty Trust Company and maturing August 15th, 1898 (since paid), November 15th and February 15th, 1899, amounting in the aggregate to \$17,500, when the last car trust obligation of the company will have been discharged.

"On or after June 1st, 1899, the company has the right to pay off or refund by issue of its 4 per cent. bonds \$5,600,000 of consolidated first mortgage 5 per cent. bonds. This matter is now having the careful consideration of the board, and will be carried through when such a price for the fours can be had as, in the judgment of the directors, they should and are likely in the near future to command. No bonds have been issued or disposed of during the last fiscal year.

"The contract with the Adams Express Company having expired, a new agreement, taking effect July 1st, was entered into for a period of five years, and thereafter to continue until one year's notice shall be given, by either party to the agreement, of its termination. The sleeping and drawing-room car contract with the Pullman Company terminated March 31st, 1898. A new contract was thereupon made with the Wagner Company for running sleeping-cars only, for a period of ten years, the railway company reserving the right to operate its own drawing-room cars, the earnings from which will hereafter be included in the earnings of the railway.

"In addition to the amount invested by the company in the stock and bonds of the Ontario Carbondale and Scranton Railway Company, further sums were necessary to complete that line, amounting at the close of the fiscal year to \$628,894. While these advances have been carried as, and do constitute, an asset, enforceable by judgment against the subordinate company, should any necessity arise for such action, to protect the interests of the company or its security-holders, it is evident that the item is not a quick asset available for the purpose of discharging direct liabilities. Surplus earnings having been used in the completion of the line, the board decided to charge the item against the profit and loss account and to credit the same account with the balances carried in the construction accounts of the Wharton Valley and Hancock and Pennsylvania roads (the latter being the portion of the Ontario Carbondale and Scranton line in New York State), both which accounts are now closed.

"Various other minor accounts have also been closed, uncollectible claims charged off and settlements of old claims effected, making a further charge to profit and loss, the net result of all being a reduction of the profit and loss surplus from \$2,681,087 at June 30th, 1897, to \$2,611,173 at June 30th, 1898.

"In view of recent legislation obliging railway companies in

the State of New York charging a rate of fare exceeding 2 cents a mile to place on sale mileage books of 500 or 1,000 coupons, at 2 cents per mile, good in the hands of any person presenting them on trains, the officers of the company, after mature reflection, concluded to make a uniform rate of 2 cents a mile for all distances travelled over the company's lines, at the same time withdrawing all other forms of tickets, including the mileage books previously issued. The use of such books led to abuses which the officers of the company were unable to control or rectify. At several connecting points it was necessary to meet the two-cent rate established long since by the New York Central Company, and being confronted by these conditions, the plan of charging a uniform rate of two cents per mile was finally adopted. It is believed that for a time this concession may result in reduced passenger receipts, but the board and officials of the company have reason to expect that the reduction from 3 cents to 2 cents per mile will, in the end, stimulate passenger travel, and develop the country adjacent to the main line and its branches, thus eventually augmenting the company's revenues, both as to local freight and passenger earnings.

"After a prolonged period of dulness and depression, there were indications of an improvement in business conditions during the first months of the calendar year. The Maine disaster was, however, immediately followed by a period of uncertainty and serious mercantile depression, which has continued with more or less force since war was declared in April last. There are now, however, indications of a material improvement in business throughout the country, in which your company will be prepared to participate when peace shall have been declared and normal conditions happily resumed.

"As stated in the last annual report, the rates on milk were readjusted in accordance with a decision of the Interstate Commerce Commission, then recently rendered. While such rates were established, on the basis of the old uniform rate of 32 cents per can, as the maximum rate to be charged for the longest distance, a considerable reduction on the shorter hauls was made, which it was intended should benefit the shippers located in near-by districts. These reductions in the freight rate have not enhanced the price of the commodity, so far as the farming community is concerned. For example, while the rate on milk shipped by rail from Orange County stations was reduced from 32 to 26 cents per can, the price per quart received by the farmer has shown no material increase. It is too often assumed that a panacea for the ills of the shipper may be found in the reduction of the rate he pays the railway for transporting his product. Experience shows that the reduction is in most cases absorbed by the middleman or consumer, and that the producer fails to derive any great benefit from such concessions, while the loss falls entirely upon the carrier. Upon the prosperity of the agriculturist depends, in great measure, the financial success of the railway, and all proper concessions which the railway company can extend to the farming community along its lines are, as a rule, cheerfully made, because their interests are identical, and it is an elementary business proposition that facilities and rates which promote the prosperity of the shipper also benefit the carrier to an appreciable extent. These conditions apply to other branches of traffic as well as to milk. Uniform and just rates, giving no advantages whatever to favoured shippers, are of paramount importance, but the continual reduction of freight rates is of no material advantage to the shipper, simply because the agents, factors, middlemen, or consumers at the other end of the line are individually or collectively astute enough to absorb the amount of such reduction, or as much of it as possible. This has been the case heretofore and is likely to continue to be so in the future. The constantly increasing demand for milk shipped in bottles instead of cans, and the higher freight paid on bottled milk, are conditions which promise to reimburse the carrying companies to some extent for the reduction made in the can rate. The superior quality of the milk produced in the country tributary to the main line and branches of your company, and the untiring attention given to the development of this traffic by the freight department and operating officials, promise a continuation of the satisfactory growth of this branch of traffic.

"Again this year it is necessary to report extreme depression in the anthracite coal trade, and consequently coal traffic earnings do not show that improvement which your officers had hoped to be able to place before you. For the first time in more than a decade the consumption of anthracite coal is not likely to show a material increase. It is believed by many well-informed persons, who are familiar with the trade, that these conditions are temporary, and that there will be a revival of the demand and an improvement in prices with a return of prosperity in other fields; that economy in the domestic uses of anthracite is to be looked for when in other branches of business unusual depression

has led to similar conditions. On the other hand, there are also experienced and intelligent people who hold the view that the increasing use of bituminous coals, gas oil, and electricity for domestic and business purposes has introduced a new factor of a most serious character, which the anthracite trade must promptly take steps to combat, or the future is dark indeed for this great industry. The usual panacea has already been suggested—viz., a reduction of the freight rate. It is claimed that it is manifestly unfair to charge higher rates for transporting anthracite coal to the markets than are charged for hauling bituminous coal. The earnings and details of the anthracite coal traffic have been very clearly presented by the general manager, in this, as well as in former reports. The gross earnings from this branch of the company's traffic may be said to have averaged under seven mills per ton per mile, from the time the Scranton division was opened until the present time. It must be borne in mind that all coal traffic is one-way business, that is, the coal trains earn nothing whatever when returning from the markets to the mines. It may be stated as a further proposition that were the rates paid for hauling bituminous coal applied to anthracite, this company would be one of those which would be obliged to retire from this branch of business, as it could not profitably haul coal to tide-water or other points at a rate of three mills per ton per mile or even less. The railways which regulate the prices of bituminous coal at tide-water and other markets haul large trains over low-grade lines to comparatively inexpensive terminal points, such as Norfolk, Va., for instance. The rates are abnormally low, and the roads doing the business are not conspicuously prosperous. Bituminous coals are mined in various localities throughout the United States, easily accessible from the seaports and great manufacturing centres. Competition is keen, and the condition of the trade for a number of years has been unprofitable, and at times almost lamentable. Neither the owner of the fee, the operator, or the miner have been at any time within the last ten or twelve years upon a basis even approaching prosperity. The old remedy of low rates has been applied with caustic severity, but without avail. To apply these conditions to the anthracite trade could in no way benefit the mine-owner or operator. It is manifestly unreasonable to assume that the rail rate can be lowered, and the high royalty and comparatively high price received for coal at the breaker at the same time be retained. The very low price received for bituminous coal at the mine, sometimes as low as 60 or 70 cents per ton, would not be possible in the case of the individual or company operating an anthracite breaker, and yet it is clear that in order to compete with bituminous coal on equal terms, in the New England and other manufacturing markets, not only the rail rate but the cost at the mines must be reduced to the prices ruling on the bituminous product. The objective point, the end to be arrived at, should be an increase in the freight rates on bituminous coal to a reasonably profitable point, and not the reduction of the anthracite rate to the ruinous bituminous basis. Aside from these considerations, there is no reason why the rate for hauling anthracite coal should be as low as the rate on bituminous coal, or lower than the present anthracite rates. The train loads are necessarily much lighter than those of the bituminous carrying railways, as all anthracite producing mines in this section of the country are located in the deep valleys of the state of Pennsylvania, and various summits and heavy gradients are encountered in moving the product of the mines to the markets. The actual transportation cost is, therefore, heavier than it is on many of the low-grade, bituminous roads, over some of which fifty-car trains may be hauled. In the anthracite trade there are known nearly a dozen varieties or sizes, while there is no sizing or grading of bituminous. Soft coal is carried long distances, usually at regular intervals under contracts for large quantities, entered into at the beginning of each year. As it is generally run of mine coal which is dealt in, unassorted and unclassified, trains do not need to be broken up or divided in order to get a particular size, nor need there be any storing or side-tracking. There is consequently much less switching and shunting, and cars are unloaded and returned much more promptly. Each of these sizes of anthracite must be taken from chutes when the breaker is running and loaded into, and carried in separate cars, and side-tracked or stored until wanted. At different seasons of the year certain sizes are in demand while other sizes may have no market whatever. Those sizes not required are dumped into storage places, and thus remain until it is possible to dispose of them; or such sizes are carried in cars which are side-tracked sometimes for months at a time. As a car in which twenty-two tons on the average can be carried costs in the neighbourhood of five hundred dollars, and as these cars are held on tracks, the average cost of which cannot be far from fifteen thousand dollars a mile, it will be seen that the accumulation of interest and cost increases at a somewhat alarming ratio. When carried at storage places, the rehandling, interest on the cost of an expensive plant, and maintenance, constitute a very serious

item of expense, all of which is borne by the railway company. All of these facilities are provided, and services are included in the freight rate paid. It is also manifestly unfair to compare the freight rates paid for hauling and handling anthracite and bituminous coals without giving prominence to the fact that in the anthracite trade the custom is to deal with long or gross tons of 2,240lb., whilst generally in the bituminous trade only short tons are known. This difference will average 4,800lb. weight on every 20 tons carried in a coal car. It will thus be seen that the somewhat peculiar and complicated relations existing between the transportation company and the shipper in this particular branch of traffic result in putting the railway company in the position of having to render services not only as common carrier, but also as warehouseman, factor, and sometimes as financial agent. The amount of capital required by an anthracite coal-carrying railroad company to enable it to compete successfully with other railway companies in the same territory is therefore much in excess of the funds necessary merely to construct and equip a line of railway. It is also a difficult task to introduce and find markets for the anthracite coals of a newly opened line. If an anthracite trade is to be conducted successfully and profitably, it is necessary to be able to reach the Northern and Western markets, as well as the tide-water and Eastern consumer, and costly and extensive terminals are required on the great lakes, as well as at tide-water points, and barges and vessels must be built or controlled, in the proper conduct of the business. The market value of the article transported bears some proper relation to the rate charged for carrying and caring for it. One must consider whether the rate charged is reasonable for the services performed, and cannot justly complain because it may cost more to ship a bale of silk a certain distance than it does a box of boots. That the rate on anthracite coal is a reasonable rate there can be no doubt. In fact that question has once already been passed upon by the Interstate Commerce Commission and the courts. The shipper, undoubtedly, would be entirely content to pay even a higher than the prevailing rate, as he has done in the past, provided he could realise more for his product at the mine. The price at the breaker and the freight rate are inseparable factors, dependent one upon the other, and properly so. It is well known that in no other portion of the globe are freight and passenger rates so low as they are in this country, and there are no people anywhere who get the best of fuel at a cost so low. It may be authoritatively stated that last year the rates obtained by the London and North Western Railway of England for all coal handled over its lines averaged 1½ cents per ton per mile. The average distance was, no doubt, quite equal to the rail haul of anthracite coal to tide-water points and lake ports. It is undeniably true that competition reduces but never enhances the market price of a commodity or the rate for carrying it. It must likewise be admitted that there are to-day engaged in the anthracite carrying trade too many lines competing sharply with each other for the traffic offered. In other words, there has not only been over-production in the output of the mines but in transportation facilities as well. The only possible remedy would seem to lie in the direction of the proper control of the product and its curtailment to the requirements of the trade. Such co-operation, if earnest and honest, would probably lead to and secure to the producer reasonable prices and profits, and to the transportation companies fair and stable rates. The officers of this company have at all times and in all seasons, expressed their willingness, even anxiety, to co-operate for these praiseworthy and desirable ends. As an indication that the anthracite coal traffic is unduly profitable, the operations of the New York Ontario and Western Railway in this particular field are frequently referred to. It may be proper to state in view of these assertions that the construction of the Scranton division involved the building of only 54 miles of line. It connected with the upper coalfield of Pennsylvania, 325 miles of main line, which had for many years been in active operation and which are admirably located for reaching the anthracite markets, *via* the lakes and tide-water, as well as at other interior rail and water points. As an entirely new operation from the coalfields to the markets it could have offered no inducement to either the capitalist or experienced railway promoter, and in fact could not as such have been built. It is not denied, on the contrary, it has repeatedly been asserted in these reports and elsewhere, that the construction of the Scranton branch has been a profitable operation for your company and seems likely to continue so, but only in connection with its then existing line and the natural advantages it possesses for reaching markets for other commodities than anthracite in all directions."

#### KANSAS CITY PITTSBURG AND GULF.

President A. E. Stillwell has made the following statement regarding the property:—"The prospects for the Kansas

City Pittsburg and Gulf Railroad were never brighter than they are to-day. The attacks made upon our property do not worry us, for such attacks were expected when we began to build the road. Wall-street is naturally hearish on the property, because it was built without the aid of Wall-street and because it will cut into the business of roads controlled in Wall-street. I hear all sorts of rumours of receiverships, big floating debt, &c., but the facts in the case are that the Kansas City Pittsburg and Gulf is to-day earning its full interest and has the larger part of the money in the bank to meet its October coupons. It has no floating debt. Our August earnings will undoubtedly be the largest in the history of the road. The best previous month was November, 1897, with gross earnings of \$303,000. Our earnings are now \$11,000 to \$12,000 a day. Our earnings should be largely increased, for the cotton movement is just starting. Five mammoth lumber mills, which have been in process of construction for nine months, will soon be completed, and they should give us \$5,000 a day in freight. One of the mills is now giving us \$1,000 a day. The last week of July was the best week in the history of the road for the movement of lumber. We handled 564 cars from the 110 sawmill's located on the road. Our road is now furnishing four big railroad systems with coal, all new business within the last four months. Our first steamer to Europe will arrive on September 7th for loading, and they will thereafter run regularly every two weeks. A new line to Amsterdam will run from Port Arthur in October. Our steamers to Mexico are running crowded with freight both ways, and we expect to put on fast mail boats soon, making the time to Tampico thirty-six hours from Port Arthur and forty-two hours to Vera Cruz. As it is only twelve hours from Vera Cruz to the City of Mexico, this will annihilate the distance from Chicago to the City of Mexico over a day. The new elevator at Port Arthur will be finished in six weeks, and it will be the most rapid loading elevator in the world. The American Fisheries Company, which has a capital of \$10,000,000, and controls the menhaden industry, is building one of its largest plants at Port Arthur, where 200 people will be employed. The plant will be completed December 1st, and four steamers will be operated in connection with it. Our ship canal will be completed in December to a depth of 18ft. and at a depth of 24ft. two or three months later. Our Kansas City and Northern connecting road is being operated very successfully, and is already earning the interest on its first mortgage bonds. Our grain business is good, but farmers are holding off shipments somewhat, awaiting higher prices. Cotton is beginning to move. Last year we handled over 300,000 bales of cotton, and of this amount we took 44,000 bales out of Shreveport for export, and we brought into Shreveport more than 10,000 bales more than any other road. The cotton acreage along our road is this year 40 per cent. greater than last, and the crop is estimated 15 per cent. heavier along our road."

#### MEXICAN CENTRAL.

The Mexican Central Railway Company, Limited, issues the following official statement for the first half of 1898, compared with the same period of 1897:—

	1898.	1897.	Inc. or Dec.
Gross earnings.....	\$6,739,293	\$6,567,753	Inc. \$171,540
Operating expenses .....	4,578,053	4,376,237	Inc. 201,816
Net earnings .....	\$2,161,240	\$2,191,516	Dec. \$30,276
Average rate received for Mexican dollars.....	46.04c.	49.90c.	Dec. 3.86c.
Net earn. equivalent in U.S. currency .....	\$995,051	\$1,093,614	Dec. \$98,563
Add net credit of miscellaneous items.....	3	27,335	Dec. 27,332
Total .....	\$995,054	\$1,120,949	Dec. \$125,895
Fixed charges.....	1,250,757	1,206,115	Inc. 44,612
Deficit.....	\$255,708	\$85,166	Inc. \$170,537
The deficit from the operation of the railway, as above, was.....			\$255,703
But the net income of the subsidy trust fund for the first six months of 1898 was .....			84,979
Making the net deficit.....			\$170,724
The balance of the subsidy trust fund on July 1st, 1898, was .....			\$2,446,379
And the investment in the \$5,397,000 of priority bonds was.....			6,122,646
Making a total security July 1st, 1898, for payment of interest on the mortgage bonds of...			\$8,569,025

#### RIO GRANDE WESTERN.

The Rio Grande Western Railway Company has issued the following circular to its stockholders:—"The auditor's com-

pleted figures of net earnings for the last fiscal year show a surplus of \$220,000 beyond the full 5 per cent. paid upon the preferred stock. While the expenditures upon the property during the past years have been liberal, both for current maintenance and for improvements and betterments, it is deemed for the true interests of the stockholders to continue to make further outlays for improvements. The directors have, therefore, decided to make no cash division to the common stockholders, but to make a dividend of 2 per cent. payable in preferred stock at par, and so provide \$200,000 of cash towards such betterment outlays. A further sum of \$50,000 is directed to be charged to profit and loss from the balance to credit, making a total amount for betterment of \$250,000. Of this \$87,000 had been expended up to June 30th, and a portion of the remainder has been authorised to be expended during the current fiscal year."

#### MEXICAN SOUTHERN RAILWAY.

A correspondent writes:—"In these times of stagnation it may be of interest to draw attention to a security which shows increasing vitality. The directors' reports of the above railway give the following results for the past few years:—1893-94, loss 9,655l.; 1894-95, profit 3,441l.; 1895-96, profit 7,886l.; 1896-97, profit 16,633l. For the year 1897-98, ended on March 31st, 1898, the published returns show gross receipts amounting to \$673,570, as compared with \$592,645 during the preceding year. Owing to the reduced value of the Mexican dollar in 1897-98, the sterling equivalent will be practically the same as for 1896-97—namely, 62,500l. To this has to be added the interest on the subsidy bonds, which produced 50,465l. in 1896-97, and will also be subject to the depreciation of the dollar, reducing the amount to about 45,000l., making the total receipts from working and subsidy 107,500l. During the past three years the expenditure has been practically unchanged, in spite of the great increase in gross receipts, and after making allowance for the special permanent way charges incurred in 1896-97, may be taken at 43,000l. for 1897-98. The account should, therefore, stand somewhat as follows:—Gross receipts, 62,500l.; interest on subsidy bonds, 45,000l.; total, 107,500l.; less expenditure, 43,000l.; and debenture interest, 48,000l.; total, 91,000l.; profit, 16,500l.; brought forward from 1896-97, 7,900l.; available for distribution, 24,400l. This seems to point to the possibility of a 2 per cent. dividend on the ordinary stock of 1,000,000l., with a substantial sum carried forward. The dividend for 1896-97 was 1 per cent., and the stock at present stands at about 21."

#### LATEST EARNINGS.

First week of September.—Kansas City Pittsburg and Gulf, \$70,000—increase, \$18,000; Milwaukee and St. Paul, \$813,000—increase \$66,000; Baltimore and Ohio South Western, \$190,000—increase, \$49,000 (the increase being due to a rush of passenger business owing to the grand army encampment); Chesapeake and Ohio, \$225,000—increase, \$8,000; Chicago Great Western, 116,000, same as last year; Denver and Rio Grande, \$170,000—increase, \$9,000; Louisville and Nashville, \$427,000—increase, \$12,000; Mexican Central, \$231,000—increase, \$18,000; Missouri Kansas and Texas, \$234,000—decrease, \$23,000; Missouri Pacific, \$502,000—decrease, \$13,000; New York Ontario and Western, \$78,000—increase, \$2,000; St. Louis and San Francisco, \$128,000—decrease, \$1,000; St. Louis South Western, \$95,000—increase, \$2,000; Texas and Pacific, \$126,000—decrease, \$7,000; Wabash, \$286,000—increase, \$9,000; Oregon Railroad and Navigation, \$165,000—increase, \$2,000; Southern Railway, \$492,000—increase, \$65,000; Cleveland Cincinnati Chicago and St. Louis, \$369,000—increase, \$83,000; Norfolk and Western, \$246,000—same as last year.

Month of August.—Illinois Central Railroad, gross, \$2,345,894—increase, \$170,213. New York Central and Hudson River, \$3,978,000—decrease, \$268,000.

Month of July.—Philadelphia and Erie, gross, \$370,000—decrease, \$21,000; net, \$126,000—increase, \$22,000. Illinois Central, gross, \$2,052,074—increase, \$67,999; net, \$465,607—decrease, \$10,513. Northern Pacific, gross, \$1,840,000—increase, \$76,000; net, \$887,000—increase, \$83,000; net operating income, \$749,000—increase, \$79,000. Southern Pacific Company, gross, \$4,216,000—decrease, \$66,000; net, \$1,524,000—decrease, \$248,000.

Month of June.—Baltimore and Ohio South Western, gross, \$540,000; net, \$96,000—decrease, \$58,000.

#### RAILROAD NOTES.

Mr. Bond, vice-president of the Chicago Milwaukee and St. Paul, speaking on the subject of the recently declared dividend says:—"The directors simply reflected the wishes of the large body of stockholders. No doubt there is a great deal of dis-

appointment among speculators with small margins, who have bought St. Paul for a quick turn; but those are not the people we have to consider in forming our policy. It would have been ridiculous to have jumped from a 4 per cent. to a 6 per cent. basis in a single year. We do not believe in eating up the surplus when stockholders are getting returns. All the directors were unanimous in favour of a 5 per cent. I have yet to find a *bond fide* stockholder who is not supporting the action of the directors. Arbitrage houses representing large foreign interests were especially desirous that any dividend in excess of 5 per cent. should be withheld."

The report of the Atchison Topeka and Santa Fé for the year ended June 30th shows:—Gross earnings, \$39,214,000—increase, \$8,593,000; net earnings, \$10,708,000—increase, \$2,954,000; total net income, \$8,883,000; net surplus over fixed charges, \$3,890,000; total surplus shown in the income account, \$3,943,000. At the end of the year the company held in its treasury \$2,588,000 of cash and securities valued at \$2,423,000. Since that time \$3,500,000 of general 4 per cent. bonds have been sold in reimbursement for improvements, and the treasury holds now cash \$5,563,000 and securities \$2,701,000. No notes or bills payable are issued.

It is announced that Messrs. Brown, Shipley, and Co., having deposited the bonds of the Baltimore and Ohio Railroad Company 4½ per cent. sterling (Philadelphia Division), 1883-1933, and of the Baltimore and Ohio Railroad Company 4½ per cent. first mortgage terminal gold bonds, 1894-1934, represented by their deposit certificates under the plan of reorganisation of the Baltimore and Ohio Railroad Company, dated June 22nd, 1898, are prepared to exchange the Mercantile Trust Company's certificates of deposit received therefor against the above-mentioned deposit certificates.

It is announced that Messrs. Brown, Shipley, and Co. having deposited the bonds of the Baltimore and Ohio Railroad Company 4½ per cent. sterling (Philadelphia Division) 1883-1933, and of the Baltimore and Ohio Railroad Company 4½ per cent. first mortgage terminal gold bonds 1894-1934, represented by their deposit certificates under the plan of reorganisation of the Baltimore and Ohio Railroad Company, dated June 22nd, 1898, are prepared to exchange the Mercantile Trust Company's certificates of deposit received therefor against the above-mentioned deposit certificates.

The last obstacle in the way of the full restoration of passenger rates in Western territory has been removed by the announcement of the Canadian Pacific Railway that it will advance its basing rate between Chicago and St. Paul to \$11.50. The company had previously stated it would use the reduced \$8 rate as the basing rate. All transcontinental tariffs will be restored by 25th instant. As to freight rates, nothing further has been done since the meeting at Denver, when it was agreed to refer the freight situation to arbitrators, who have not yet been appointed.

The report of the Erie Railroad Company for the year ended June 30th, 1898, shows that the volume of tonnage handled increased 20 per cent. The average rate per ton per mile decreased 7 per cent. President Thompson, in his report, says the unsatisfactory feature of the year's work is the rate received for service from year to year. "The unit of revenue grows less, while the character of the service forced by competition and the modern requirements of trade grows more expansive."

President Callaway, of the New York Central, explains that the recent decrease in the freight traffic was owing mainly to the unusual conditions affecting wheat transportation. He says that the abnormal movement of flour and wheat was caused by the Leiter deal, but since that there has been practically no movement. It will probably be the late fall before the eastward movement of wheat begins, as the farmers are imbued with the idea that they must get \$1 a bushel.

The Baltimore and Ohio is expected soon to make formal propositions to the bondholders of the Baltimore and Ohio South Western road, which will in effect amount to a reorganisation of the latter property. The new Baltimore and Ohio issues have been dealt in to-day at the board deliverable when issued. There is excellent authority for stating that President Hill, of the Great Northern, has made a large personal investment in the new Baltimore and Ohio stocks.

The annual report of the Norfolk and Western makes very severe references to the rate-cutting by the Trunk lines. It also

says that business in the territory of the company's system is not as good as in the rest of the country. Expenditures amounting to \$1,334,596 have been charged to the capital account, and the physical condition of the road is now much improved. The balance-sheet shows a good surplus of current assets over current liabilities.

The Pennsylvania Railroad Company, which has had such success in preventing dust on its line between Philadelphia and Atlantic City by the use of oil, is now experimenting on its New York Philadelphia and Norfolk division. A section of 11 miles has been sprayed with oil at an expense of \$75. It is claimed that re-oiling will not be needed for three years. About 2,000 gallons of oil were used for the purpose.

The report of the New York Central and Hudson River Railroad for the year ended June 30th shows:—Gross earnings, \$45,774,000—increase, \$1,494,000; net earnings, \$16,263,000—increase, \$1,631,000; net income, including dividends on the Lake Shore and Michigan Southern stock owned, \$18,515,000; surplus after payment of charges and dividends carried to surplus revenue account, \$654,000.

The report for the year ended June 30th of the Cleveland Cincinnati Chicago and St. Louis Railway shows:—Gross earnings, \$14,108,000—increase, \$1,185,000; net, \$3,049,000—increase, \$81,000; net income, \$3,386,000—increase, \$134,000; surplus over all charges, \$107,000, against a deficit of \$47,000.

There are rumours abroad that the reserve fund for equalising the dividend on the preferred stock of the Northern Pacific Railroad Company is illegal. It is a fact, however, that Mr. Stetson, Messrs. J. P. Morgan and Co.'s counsel, approves of the scheme.

An interim report will shortly be issued by the directors of the Union Pacific which will, it is said, be of a very favourable character. It will show amongst other things an earning capacity for the present year equal to 4 per cent. on the common stock.

It is officially denied that the Louisville and Nashville will build a new road from the coalfields of Alabama to the Gulf. A survey for 30 miles has been made, but it is now believed that the road would not pay.

The annual report of the Wabash Railroad says that the surplus of \$401,495 has been carried to the profit and loss account to be used to retire the floating debt before paying anything on the debenture bonds.

Last week's eastbound all-rail freight tonnage from Chicago amounted to 52,000 tons, the Panhandle system leading with 7,000. In the corresponding week last year 68,000 tons went forward.

Messrs. Kuhn, Loeb, and Co. have bought from the New York Ontario and Western \$6,000,000 of 4 per cent. bonds to refund the 5 per cent. bonds which are redeemable at 105 next year.

The Cleveland Cincinnati Chicago and St. Louis has declared the usual quarterly dividend of 1½ per cent. on its preferred stock.

The meeting of directors of the Union Pacific, to consider the dividend, will be held on September 22nd.

The sale has been ordered of the property of the Hudson River Tunnel Company.

## General News.

### GREAT NORTH OF SCOTLAND RAILWAY.

The Great North of Scotland Railway Company announces that at Aberdeen, on the 21st inst., separate meetings will be held (1) of the proprietors of the deferred ordinary stock No. 1, (2) of the proprietors of the deferred converted ordinary stock, for the purpose of considering and (if thought fit) approving the scheme prepared by the directors for merging the deferred ordinary stock No. 1 of the company into and with the deferred converted ordinary stock of the company. On the same day an extraordinary general meeting of the proprietors of the company will be held for the purpose of approving the said scheme.

The following is a copy of the scheme for merging the deferred ordinary stock, No. 1, into and with the deferred converted ordinary stock:—"Whereas the Great North of Scotland Rail-

way Company, in pursuance of section 2 of the Great North of Scotland Railway Act, 1897, and of a resolution of the company passed at an extraordinary general meeting held on February 16th, 1898, have created ordinary stock of two classes, namely, 'Great North of Scotland Railway preferred converted ordinary stock,' amounting to 920,132l. 10s. 11d., and 'Great North of Scotland Railway deferred converted ordinary stock,' amounting to 920,132l. 10s. 11d., having the rights and subject to the conditions respectively expressed in the said section and resolution with respect to the said stocks. And whereas it is provided by section 3 of the said Act, that if the company carry into effect such conversion, the directors may at any time within five years after the passing of that Act prepare a scheme or schemes for merging the deferred ordinary stock No. 1 of the company into and with the deferred converted ordinary stock created under the said recited section 2 of the said Act of 1897 and the said recited resolution, now, therefore, the directors of the company do hereby make the following scheme—namely:—The deferred ordinary stock No. 1 of the company shall be merged into and with the deferred converted ordinary stock created as aforesaid; the said deferred ordinary stock No. 1 shall become and be Great North of Scotland Railway deferred converted ordinary stock, and for that purpose the said Great North of Scotland Railway deferred converted ordinary stock shall be increased by 102,822l., the amount of the existing deferred ordinary stock No. 1; the Great North of Scotland Railway deferred converted ordinary stock shall be increased by the said amount of 102,822l., making 1,022,954l. 10s. 11d. in all. Every proprietor of the existing deferred ordinary stock No. 1 shall be entitled to Great North of Scotland Railway deferred converted ordinary stock of equal nominal amount."

#### LIGHT RAILWAY PROJECTS.

Plans for a new light railway to run from Dover, along the eastward cliffs, to Martin Mill, near St. Margaret's Bay, were on Tuesday submitted to the Dover District Council. The railway is to cross three public roads on the level, one of which affects the Kent County Council, and the matter had, therefore, to be deferred for submittal to their surveyor.

At a conference held in Dundee last week the promoters of the Dundee and Broughty Ferry Light Railway agreed to abandon their scheme as regarded the lines within the burgh on the understanding that the city authorities resolved to construct these. The council indicated that they would support the railway from the burgh boundary to Barnhill in the event of a suitable running arrangement being made.

At a meeting of the Jedburgh Police Commissioners on Monday a letter was read from Mr. Purves, civil engineer, Edinburgh, stating that he, along with a London traction company, had projected a scheme for a light railway between Jedburgh and Hawick, *via* Denholm. It is their intention to form a limited liability company to construct and carry on the undertaking, and the traction company are prepared to put up from one-third to one-half the required capital provided that the remainder of the capital will be subscribed by some local authority or town or county council, or otherwise raised. Provost SWORD said that the railway would likely be taken from Jedfoot to Hassendean, a distance of 7 miles, and the probable cost was 50,000l. Bailie HILLSON thought that if the landlords in the district looked after their own interest they would support the scheme. It would be a great advantage to the district, where there had been a wave of depression in the tweed trade. A committee of seven commissioners was appointed to confer with Mr. Purves, and to bring up a detailed report.

#### CHINESE RAILWAY QUESTIONS.

An Imperial edict orders Hu, director of the Northern Railway, to commence a branch line to the Western Hills. A short time ago the Russians attempted to obtain the contract for this line.

The *Cologne Gazette* says:—"News has just reached us from Peking that the construction of the railway from Shanghai to Nanking, the contract for which German banks have for the last six months been actively endeavouring to secure, has been definitely intrusted to an English company. The construction of the Han-kau-Peking Railway was intrusted just prior to this to a Franco-Belgian syndicate. We have here not only to deplore a severe blow dealt to German industry by the loss of both these railway lines, but also—and this is of more importance—we have to lament that German prestige has thereby considerably sunk in the eyes of the Chinese."

The Paris correspondent of the *Financial Times* says:—"The Société Générale is the principal shareholder in the Société d'Etude de Chemins de fer en Chine, which has been conducting the negotiations relative to the Chinese railway loan to

be contracted in Paris for the construction of the line (or, rather, the completion of the line) between Peking and Hankow. The arrangement has been concluded between the Chinese Government, the Chinese Railways Company and the above-mentioned Société d'Etude, acting for and in agreement with the Société Générale. The amount necessary for the completion of the line is to be covered by a 5 per cent. Chinese Government loan of the nominal amount of 112½ million francs, which is to be known as the 5 per cent. 1898 Chinese loan, divided into 225,000 bonds of 500f., redeemable in twenty years from 1909 by quarterly drawings to take place at the Société Générale's Brussels offices. The loan is inconvertible, and the interest is to be paid quarterly, in gold, in Paris and Brussels. The guarantee is a first mortgage on the material and rolling stock and on the line itself from Peking to Hankow. The Société Générale is to pay over the amount of the loan to the Chinese Railways Company as and when required, and the material and supplies for the railway are to be ordered from the Société d'Etude."

The *Times* correspondent at Peking telegraphs:—"The Tsung-li-Yamen has formally agreed to concede to a British syndicate the right to construct a short railway from British Kau-lung to Canton. This partly balances the valuable concession given to France of the railway from Pakhoi to Nanning-fu, which, however, France appears to have no intention of building. The Tsung-li-Yamen has also formally admitted the right of the Peking Syndicate to extend its proposed mining railway beyond the border of Ho-nan province to Sipgyang (?), on the Han river, where the water is navigable. Despite Lord Salisbury's declaration that England would tolerate no interference by any other Power in the matter of this signed British contract for the Nin-chwang railway extension loan, England has given way, and has agreed to all the conditions imposed by Russia—namely, that the proposed railway north of the Great Wall shall not be mortgaged or given as security for a British loan, nor pass under foreign control even in case of default. England has thus admitted the Russian right of intervention. The withdrawal is inexplicable. Yesterday, as the result, Hu Yu Fen, Director of Railways, formally broke off the negotiations with the Hong Kong and Shanghai Bank on the ground that the financial terms were unsatisfactory, and resumed relations with the Russo-Chinese Bank. The Hong Kong and Shanghai Bank, despite the reduced security, has fulfilled the conditions of the preliminary agreement and offers, according to the agreement, the best terms possible in the London market. The Government is now bound to interpose to prevent China from evading the terms of the signed contract, but, even if the loan be concluded, the British withdrawal before Russian opposition is bound to be misinterpreted."

The final contract with the Chinese Government granting the concession for a railway from Canton to Hankow to an American syndicate was signed on Thursday by the Chinese Minister in Washington.

#### LIGHT RAILWAYS FOR CAPE COLONY.

Mr. C. Bodtker, C.E., Maclear, Griqualand East, South Africa, late district engineer of the Cape Government Railways (at present staying at the Holborn Viaduct Hotel, London), sends us a copy of a pamphlet which he has written, entitled *Little Railways for the Cape Colony*. In a preface to his work, Mr. Bodtker remarks:—"During the last two or three years there has been a very marked increase in the expression of opinion that further transport facilities are required in this colony, and many districts are at the present moment clamouring for such. Members of Parliament all seem to agree that better ways of communication are what is wanted to make the country self-supporting so far as meat, dairy produce, and cereals are concerned, but there is a great diversity of opinion as to what is the best means of furthering that object. Some wish to go on constructing railways on the present standard gauge, but a good many seem to favour a breaking of the gauge in order to reduce the cost of construction. With a view to enable those who take an interest in this battle of gauges to judge for themselves what ought to be done in the matter, I have compiled this pamphlet on little railways from the latest information and statistics obtainable, and from a personal knowledge of them in other countries."

The first year's working of the light railway between the city of Chichester and the town of Selsey has resulted in a dividend of 3 per cent. to the ordinary shareholders. Proposals are now under consideration in the same locality for the construction of light railways between Chichester and Bognor and between Cosham and Horndean.

At a joint meeting of the Burgh Commissioners and Town Council of Girvan, held on Thursday, it was unanimously resolved to petition the Light Railway Commissioners in favour

of the Dunure and Maidens light railway scheme, in view of the benefit that such a railway would confer on the important district through which it is intended to pass.

### THE STOCK EXCHANGE SETTLEMENT.

The making-up prices for the principal railway stocks, and the extreme rates of continuation current at the Stock Exchange settlement on Tuesday, are shown hereunder:—

Making-up Price.	Aug. 10.	Aug. 29.	Sep. 18.	Stock.	Continuation rate.
153	153½	152½	152½	Caledonian .....	—
55½	55½	54½	54½	" deferred .....	9d. to 1/6 con.
20½	21	21	21	Great Central deferred ..	even to 6d. con.
120½	120½	120½	120½	Great Eastern .....	1/3 bk. to 2/6 con.
55	57	57	57	Great Northern defd. ord.	even to 2/6 con.
165	167½	167½	167½	Great Western .....	2/6 bk. to even.
140½	147½	148	148	Lancashire & Yorkshire ..	2/6 to 3/9 con.

### NEW COMPANIES AND NEW ISSUES.

[Applications for shares in limited liability companies may be withdrawn by letter—or by telegram, if confirmed by letter—provided the notice of withdrawal reaches the secretary before the shares are allotted.]

#### GLASGOW DISTRICT SUBWAY RAILWAY.

The Glasgow District Subway Railway announces an issue of 20,000 4 per cent. redeemable preference shares of 10l. each. The money is required to meet temporary loans, interest on which has hitherto been paid out of revenue, and the shares will rank *pari passu* with the 300,000 shares issued in January, 1895.

#### JURA-SIMPLON RAILWAY BONDS.

The application for the issue of 20,000,000l. of the 60,000,000l. in 3½ per cent. bonds guaranteed by the Swiss Federal Government, for the construction of the Jura-Simplon Railway Tunnel, resulted in a total subscription of 21,880,000l., of which about 20,000,000l. were taken up in Switzerland, and the remainder in Germany and

elsewhere. In this connection the *Frankfurter Zeitung* characterises the issue as a failure, seeing that a not inconsiderable part of the loan was previously underwritten by the Swiss banks in order to be able to record a full subscription, and notwithstanding the appeals made recently in the Swiss papers to the patriotism of capitalists in that country to provide all the money required for the carrying out of the undertaking. German investors, the Frankfurt paper states, formerly exercised a preference towards Swiss enterprises, but the action of the Federal Council in its treatment of shareholders in connection with the nationalisation of the railways has induced them to stand aloof largely from the present Jura-Simplon Railway issue. Switzerland cannot dispense with the assistance of foreign capital for great financial undertakings, and it will only be by removing to some extent the ill humour caused by the treatment of shareholders in Swiss railways that foreign investors will again begin to interest themselves in financial enterprises in Switzerland.

### RAILWAY PATENTS.

[This list is specially compiled for THE RAILWAY TIMES by Messrs. Rayner and Co., registered patent agents, 37, Chancery-lane, London, W.C., from whom all information relating to patents may be had gratuitously.]

18,485. John Smith Raworth—Improvements in the distribution of electrical energy for railways and tramways.

18,531. R. A. Baldwin and H. Rowland, 70, Market-street, Manchester—Improvements in electric railway switches.

18,552. George Joseph Capewell—Improvements relating to railway trucks and to means for driving the same.

18,554. George Joseph Capewell—Improvements in air-resistance devices for railway and other vehicles.

18,556. George Joseph Capewell—Improvements in railways.

18,564. William Melvin Russell and Thomas Asencio—Improvements in locomotives.

18,705. John Fairley, 2, Hamlet-cottages, Hamlet-court-road, Southend—An improved automatic fog and danger signalling apparatus for use on railways.

18,707. Thomas Foster and Robert G. Ashville, Ashton New-road, Clayton, Manchester—Improved lever brake for railway wagons and like vehicles.

18,754. John Charles Love—Improvements in electric tramways and railways.

18,018. Elijah Salthouse, 8, Lombard-chambers, Bixteth-street, Liverpool—Improvements in and appertaining to automatic signalling on railways or like places.

18,020. Maurice Davies, 36, Rathbone-street, Earlestown, Lancashire—A double brake lever for railway wagons.

18,137. C. F. P. Stendebach—Improvements in contact apparatus for electric railways with underground currents, feed and partial conductors.

18,160. John Brady—Improvements in elevated or overhead railways and railway cars.

18,167. Edgar Lister Powell—Improvements in compensators for railway signals.

18,383. H. C. Barnes and A. E. Hoaldsworth, 12, Standish-street, Burnley—Improvements in apparatus for simultaneously locking or unlocking railway carriage doors.

18,384. John Robert Allen, 1, Church-court, Old Jewry, London—Improvements in means for arresting sparks emitted from locomotive funnels, smoke-stacks, and the like.

18,439. Washington Hume—Improvements in railway signals.

### SPECIFICATIONS PUBLISHED.

20,274. Oman—Door fastener for railway trains, warehouses, and the like. 1897.

24,520. Dawson—Overhead lines of electric railways or tramways. 1897.

25,158. Marsland—Railway chairs and joints. 1897.

29,852. Hillischer—Underground duct for electric railway leads and a contract slide to work therein. 1897.

14,721. Smith—Compound locomotive engines. 1898.

23,923. Clegg and Brook—Brake mechanism for the wheels of railway and similar vehicles. 1897.

24,522. Dawson—Overhead lines of electric tramways or railways. 1897.

### NITRATE ITEMS.

Mr. J. Mayne Nicholls, locomotive superintendent of the Nitrate Railways, is in England on a short holiday. During Mr. Griffin's recent visit to England Mr. Nicholls took over the general management of the line.

The *South American Journal* says:—"All the nitrate 'oficinas,' with decent grounds, are now said to be doing fairly well, and, presuming the total output to be kept within reasonable bounds, are likely to be comparatively prosperous. A low rate of exchange is in their favour, as it reduces the cost of pro-

duction. The shipments to Europe for August were only 61,000 tons, against 66,000 tons in 1897, and the visible supply is 260,000 tons as compared with 358,000 tons last year. At the present rate of production, however, stocks on the coast, at the end of this year, will amount to 340,000 tons, even assuming the shipments for 1898 to reach a maximum of 26,000,000 quintals."

A meeting was held on August 25th at Iquique of the owners of nitrate properties with a view to concert measures for limiting the production, it being proposed to form a syndicate for five years for that purpose. Forty-seven proprietors were present, only one of whom (the Alianza Company) opposed the proposal; fourteen proprietors were absent. It may truthfully be said, regarding the proposed new combination, that the conditions are, on the whole, much more sensible than those laid down in the one that was broken up a year ago. The question of the amount of nitrate that can be made by each oficina will depend not only on the magnitude of the maquina, but, to a great extent, upon the grounds and the possibility of the amount they might yield for five years if worked with due care. Two committees were appointed; one, to fix the quotas, is composed of thoroughly practical men, who will visit the various factories; the smaller committee will sit as a court of appeal for those who are discontented with the quotas assigned them. By the beginning of 1899 nitrate should be selling on the coast for 5s. 10d. instead of 4s. 10d. as at present.

Dr. Newton, who figured so prominently in the president's address to the British Association, returned to England from Chile a couple of years ago. He had resided on the nitrate pampas for three years as consulting chemist to several large oficinas, where his high scientific abilities were greatly appreciated. It is expected that his knowledge will bear fruit in elaborating a method for dealing practically with the refuse of the material from which the nitrate is extracted, and which often contains 10 to 15 per cent. of the latter that is at present thrown away as waste, there being no economical and paying process for its extraction.

Mr. Andrew Simpson, manager of the Santa Rita Nitrate Company, Limited, is at present in England, taking a very well-earned holiday. Mr. Simpson took over the management of the company's property in Chile at a time when it was somewhat under a cloud, and by strict attention to the smallest economies, and at the same time by minutely examining the grounds, which have turned out more valuable than was previously supposed, he has materially assisted to restore confidence in the concern. The directors are to be congratulated upon the choice they made in the appointment of their manager, and upon the support they have since accorded him.

The late Colonel North and his colleagues appointed an inspecting manager to control the affairs of both the Lagunas Syndicate, Limited, and the Lagunas Nitrate Company, Limited. When these two companies fell out and started upon litigation, the same inspecting manager, having a three years' contract, continued to watch over both concerns, and the old saying that he who sits between two stools comes to the ground is once more verified, for the Lagunas Company, as well as the Lagunas Syndicate, have intimated to the gentleman referred to that they will not be able to renew his contract.

Mr. Albert Torres, the very able ex-manager of the Bank of Chile in Iquique, and at present part owner of the rich "Santiago" Oficina, is now in London. We believe that Mr. Torres is very dissatisfied with the late financial measures that have been promulgated in Chile. It is a pity Mr. Torres cannot be induced to identify himself with the Bank of Tarapaca, as there is sad need of some cleansing of that Augean stable, and of new blood on the board.

According to the present quotation of Lagunas Syndicate shares on the London Stock Exchange, the property is valued at 302,500*l.*—plus the debenture debt of 127,500*l.* The syndicate has certainly more than 10,000,000 quintals of nitrate in its grounds; probably the quantity is 20,000,000. At an average profit of 1s. per quintal this would give a valuation of 500,000*l.* to 1,000,000*l.* The Stock Exchange valuation of the Lagunas Nitrate Company pans out at 180,000*l.* for the entire property, which is wholly free from debt, debenture or otherwise. This is barely the value of the works, to say nothing of the grounds containing probably 8 or 10 million quintals of nitrate, or of Mr. Justice Romer's judgment—in itself worth anything from 50,000*l.* to 150,000*l.*, and may be a good deal more as a result of the appeal to the higher court. The speculative investor need have no misgiving in helping himself to a few nitrate shares so long as he can pick them up at anything like current prices.

### INDIAN RAILWAY ITEMS.

The Indian Railway Conference commenced its sittings on the 15th ult. at Simla. The Viceroy presided. The members are Sir James Westland, Sir A. Trevor, Mr. Upcott, Mr. Becher, Sir Edwin Collin (for the Military Department), and Captain McElhinney, secretary. As no famine lines are likely to be required, the Revenue Department is not represented.

Sir A. Havelock told the people of Trichinopoly that out of twenty different railway schemes submitted by the Madras Government to the Government of India twelve have a good prospect of being favourably considered, four others are less promising, but not hopeless, and the remainder belong to—well, the very distant future. "Schemes which will altogether include 4,428 miles," he said, "are pretty well secure, and further schemes, covering 300 more miles, are progressing satisfactorily."

From a letter from the Bengal Chamber of Commerce to the Government of Bengal, it would appear that the Chamber is diffident as to the possibility of the scheme for a central station for Calcutta, and, before offering any suggestions or opinions upon the subject, advocates its reference to a committee to be appointed by Government of a sufficiently representative nature to embody all interests concerned.

The contract with the Delhi-Umballa-Kalka Railway Company, for the construction and working of the extension from Kalka to Simla, was executed by the Secretary of State for India in Council on June 29th, 1898. The line will be on the 2ft. gauge (single track), and on a route independent of the existing cart-road, which may, however, be crossed on the level at such places as, with the sanction of Government, are considered necessary. The contract date of completion of the railway is June 30th, 1902.

### FOREIGN AND COLONIAL ITEMS.

A regular service of trains on the Siberian Railway between Tomsk and Irkutsk has been opened.

Telegrams from Yokohama state that an agreement has been signed at Seoul for the construction by the Japanese of the Seoul-Fusan Railway.

We are informed that Major W. J. Langford, late of the Royal Marines, has been appointed Director of the Argentine Great Western Railway Company, Limited.

The Uruguayan Budget for 1898-99 estimates the railway guarantees at the maximum of \$884,770. This item is variable in the annual budgets, being dependent on various circumstances.

The Bilbao River and Cantabrian Railway Company announces an interim dividend at the rate of 10 per cent. per annum on the preference and ordinary shares for the half-year ended June 30th last.

A conference of railway commissioners representing New South Wales, Victoria, South Australia, and Queensland has been held in Sydney. The railways represented extend to over 10,000 miles of line, with a capital value of 107,000,000*l.*

The report of the Bolivar Railway Company, Limited, for the year ending June 30th, 1898, shows a deficiency of net revenue, to meet interest and all other prior charges, of 2,313*l.* Against this, however, may be set the surplus of 4,095*l.* brought forward from the previous account.

Indian labourers for the construction of the Uganda Railway have been arriving at Mombasa in large numbers during the past few months, and the line is progressing rapidly. Kibwegi was reached at the end of last month, and on the 8th inst. the rails were laid past the 200 mile peg, being a third of the entire length.

Meetings of the creditors and contributories of the Syria-Ottoman Railway Company, Limited, and Asia, Limited, will be held at 33, Carey-street, Lincoln's-inn, London, on Friday next, at twelve o'clock. The object of the meetings is to consider proposed further modifications of the agreements with the Syria-Ottoman Railway (Turkish) Company.

The Agent-General for Victoria has received a dispatch from the Government of the colony enclosing a comparative return of the railway traffic for the three years ending June 30th, as follows:—1896, 2,401,392*l.*; 1897, 2,615,934*l.*; 1898, 2,608,896*l.*

In view of the severe drought which the colony has passed through, the return is considered very satisfactory.

The Havana correspondent of the *Times*, writing on July 26th, says:—"Dynamite explosions on the Western Railway are now of almost daily occurrence. It is noticeable that all the outrages are committed on the property of the company whose local staff is English, and whose shares are chiefly held in England, whereas the other railways in the island, whose shares are held by Americans and Cubans, are respected by the insurgent dynamitards."

The authorities of the Central of Brazil (State) Railway are calling for tenders for the supply of 120,000 tons of steam coal, Cardiff or other similar quality, to be delivered during the year 1899. Tenders must be presented at the Central Railway offices in Rio de Janeiro by October 31st prox., and be accompanied by a deposit of \$5 in currency or in Brazilian bonds as a guarantee of good faith. The administration of the railway desires to give the widest publicity to this announcement.

Under the auspices of the Government of Schleswig-Holstein and the Central Society for Inland Navigation, an influential committee has been formed in Kiel for the promotion of a scheme for the construction of a ship canal to connect the Elbe with the port of Kiel. It is not considered that the ship canal would in any way interfere with the Kaiser Wilhelm Canal, but rather that each would be of assistance to the other. The length of the projected canal would be 75 kilometres, the cost 10,500,000 marks, and the annual cost of maintenance is put at 136,000 marks.

The protracted negotiations between the Vienna Town Council and the Tramway Company, based upon the proposals submitted by Messrs. Siemens and Halske, of Berlin, have now been brought to a successful issue. Under the agreement entered into the local authority will acquire the tramways and lease them to a new company until the year 1925, the whole of the lines to be converted to the electric system. The new company to be constituted will pay 40 per cent. of the net receipts to the local authority by way of rental, and at the expiration of the concession the whole of the plant and equipment will pass into the possession of the town without payment.

A little time ago the Portuguese Government appointed a commission to investigate the affairs of the Trans-African Railway Company, the former having already devoted the sum of 11,000,000*l.* to the purposes of the railway by way of guarantee. Though the members of the commission have met to consider the position of affairs, it is not yet known what proposals will be made in regard to the railway. On the one hand, the Lisbon papers advise the Government to take over the undertaking, whilst on the other it is reported to be the intention to dispose of the railway to an English syndicate. In any case, the situation of the line is such that energetic measures are said to be indispensable in order to improve the position of the enterprise.

**The Appleford Collision.**—The report of the inquiry made by Colonel Sir F. A. Marindin into the circumstances attending a collision which took place on the 14th ult., near Appleford level crossing, between Didcot and Culham, on the Great Western Railway, has been issued by the Board of Trade. A coal train was approaching the crossing on the up line from Oxford, when the axle of a wagon broke, causing it to leave the rails, and throwing some other wagons off. At that moment a down passenger train from Paddington ran into one of the wagons, with the result that the engine and several carriages were derailed. No passenger was injured, but the driver and firemen were hurt by a falling signal-post, and the

guard was thrown down and shaken. The inspector states that he does not consider any of the servants of the company with the trains were in any way to blame for the accident, which was due to the fracture of the axle, which was very badly flawed. It could not have been detected unless the wheel had been removed, but the axle was one that should not have been under a 10-ton wagon.

**Chatham and South Eastern Agreement**—It was officially announced yesterday that the South Eastern and London Chatham and Dover Railways Joint Committee, which has been constituted for the management of the competitive traffic of the two companies, have appointed Mr. John Morgan and Mr. Charles Sheath as joint secretaries, to whom all communications on secretarial business of the company should be addressed. The joint committee have also appointed Mr. Alfred Willis the general manager for such competitive traffic, to whom all communications as to general management are to be addressed, and Mr. William Forbes has been appointed assistant-manager. Mr. Percy C. Tempest has been appointed engineer under the joint committee, and Mr. R. Barker assistant-engineer. Captain George F. Dixon has been appointed marine superintendent.

The London School of Economics and Political Science announces that its arrangements for the session 1898-9 include six lectures by Professor Hewins on "The Policy of different States in Relation to Means of Transport;" four lectures by Mr. Mackinder on "The Geography of certain Great Railways;" a course of lectures on "Railway Law;" a course of lectures on "Railway Finance;" six lectures by Mr. Acworth on "Railway Economics;" ten lectures by Mr. Montague Brown on "Modern Company Law and its Connection with the Development of English Commerce."

## BLAENAVON COLD BLAST PIG IRON

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

**No. 1 Foundry.**—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.

**No. 2 Foundry.**—A more Open Quality, used for similar purposes, and largely by nail makers.

**No. 3 Foundry.**—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.

**No. 4 Grey Forge.**—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.

**No. 5 Common Forge.**—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plate, and B.B. Merchant Bars.

**No. 6 Strong Forge.**—A still harder and closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

**MOTTLED.**—Used for Chilled Rolls in tempering; and for other similar purpose.  
\* These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4971, Session 1858.

	Specific Gravity.	Tensile Strength.	Transverse Strength.	Crushing.
Average of 57 sample including Blaenavon	850 Specimens 7.140	350 Specimens 23,257	540 Specimens 7,102	273 Specimens 91,061
Average of 5 samples of Blaenavon only...	63 Specimens 7.175	63 Specimens 25,588	46 Specimens 7,488	21 Specimens 108,281

Prices and any further information as to quality suitable for special purposes may be obtained from

## AMERICAN RAILWAY SHARES AND BONDS.

**THE ENGLISH ASSOCIATION of AMERICAN BOND and SHARE HOLDERS, Limited, Register Shares, Collect Dividends, and Cash Coupons.** Shares may be registered either in owners' names or in that of the Association. In the former case dividends are collected by Powers of Attorney (forms supplied at the office), and on shares in Association's name on presentation of the shares certificates. The Association also issues its own certificates good to bearer or registerable, countersigned by the London and Westminster Bank against the deposit of the original shares. These certificates save great trouble to Executors as they can be distributed, avoiding the expense of sending the original shares and certified copies of Wills to America.

Particulars and Forms may be obtained at the Association's Offices, 51, Great Winchester-street, London, E.C.

## TO the HOLDERS of:—

Baltimore and Ohio Railroad Company 4½ per Cent. Sterling (Philadelphia Division) Bonds 1883-1933. Brown, Shipley, and Co.'s Deposit Certificates,

and Baltimore and Ohio Railroad Company 4½ per Cent. First Mortgage Terminal Gold Bonds 1894-1934. Brown, Shipley, and Co.'s Deposit Certificates.

NOTICE is hereby given, that the undersigned, having deposited the Bonds represented by the above-mentioned Deposit Certificates, under the Plan of Reorganisation of the Baltimore and Ohio Railroad Company, dated June 22nd, 1898, are prepared to EXCHANGE the Mercantile Trust Company's Certificates of Deposit, received therefor against the above-mentioned Deposit Certificates, which should be left at the Offices of the undersigned for examination.

**THE TORBAY and DART PAINT COMPANY, Ltd.****Meetings.****NORTH BRITISH RAILWAY.**

The half-yearly general meeting was held in Edinburgh on Thursday; the Marquis of TWEEDDALE presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), stated that there were 26,000 shareholders in the company. With regard to the working during the half-year ended July 31st, the capital expenditure was 52,862*l.* less than the estimated amount. The greater part was due to the company not being called upon to meet obligations in connection with the construction of the new dock at Burntisland, while the balance of 18,000*l.* related to the Waverley Station and other works. On the working stock the estimate was exceeded by 5,000*l.*, they having found that more engines were required for the increasing traffic. Capital expenditure for the current half-year was estimated to amount to 475,294*l.*, the Waverley Station and the new branch to Leith being responsible for 151,300*l.*, and the working stock for 168,234*l.*; 120,000*l.* of that sum was provided for additional wagons, as the directors deemed it advisable to be prepared for the much larger output of coal on the system, of which there were indications. For the same reason they were building more goods engines, and they hoped to have twenty-four working by this time next year. The Waverley Station buildings were making satisfactory progress. The new tunnel at Dalreoch was opened in April, and had been of great service in the working of the traffic to and from the west coast. A good start had been made with the doubling of the Milngavie Branch, while the East Fife Central Railway was now completed and opened for traffic. Mortgages at 2½ and 3 per cent. were paid off at Whitentide to the amount of 178,890*l.*, and renewed to the extent of 5,150*l.* at 2½ per cent. The arrears of calls under the convertible preference stock, 1897, were under 2,300*l.* Owing to the occurrence of twenty-six Sundays in the last half-year, instead of twenty-five, there was a difference in the revenue of about 14,000*l.*; but the difference lost by the inequality in the last half-year would be gained during the present half-year. The parcel traffic continued to advance, and the live stock receipts had been affected by shortness of keep for store cattle. Exclusive of season-ticket holders, the number of passenger carried exceeded the figures of last year by 565,000, and the receipts by 19,700*l.*, much the greater proportion of both increases being from third-class traffic. Season-ticket holders had also considerably increased. The gross receipts showed an increase of 71,099*l.*, to earn which they had spent 45,409*l.* Apart from the increased cost of coal the various increases were of moderate amount under all heads except for wages in the locomotive and traffic departments. These had cost 13,318*l.* more, which was largely the result of the general movement in recent years for the reduction of the hours of labour. The arrangement in force was a very expensive one, but it was the only method of carrying into force the regulations. During the last twenty years they had been engaged at intervals rebuilding the bridges on the Waverley line, to adapt them for the heavier rolling stock now in use. Only one more remained to be rebuilt. Coal for locomotives had cost 8,000*l.* more, the greater part of which was due to the higher price paid for coal in consequence of the Welsh strike. General charges were higher by 2,523*l.*, the principal causes of which were renewals of telegraphs on the Forth-bridge and Bothwell and Hamilton lines, extended advertising, and additional clearing-house expenses. The increase of 9,400*l.* in rates and taxes was mainly due to the higher valuation of the company's property. There was a decrease of 13,482*l.* in Parliamentary expenses, which were exceptionally heavy last year. The total profit for the six months was 984,430*l.* In the net revenue account interest showed a credit of 20,024*l.*, and the feu duties payable by the company an increase of 826*l.* The proportion of traffic due to the Forth-bridge Company showed an increase of 4,325*l.*, and the amount payable to the West Highland Railway an increase of 8,069*l.* The traffic on the West Highland line was not coming up to expectations, but its development would take time. Rapid progress was being made with the Mallaig line. The final result was that the balance available for deferred stock was insufficient to pay more than at the rate of ¼ per cent., instead of 1 per cent. paid last year. That deficiency was almost entirely accounted for by the profit on the 14,000*l.* of gross receipts which fell into the half-year in consequence of the extra Sunday. Practically, therefore, they had maintained their position. The directors were happy to find that the Workmen's Compensation Act had not been instrumental in severing the company's connection with the insurance society established for the benefit of their employes.

Sir CHARLES TENNANT seconded the motion.

Mr. T. O. OCKLESTON (Liverpool) said there was a matter which he wished to bring forward, and which he knew was of considerable interest to many in that room and to the givers of the proxies for over half-a-million stock which he held in his name. It would also, he felt sure, be of considerable interest to the directors, and he hoped and trusted it would meet with their support. The immense and ever-increasing business of the company required the constant, not to say the daily, attention of the directors if it was to be carried on in a proper and businesslike manner. Now, was it receiving this attention? He had written to the secretary asking him for particulars of the system of directors' meetings, and this was the secretary's reply:—"The directors, as a rule, meet once in four weeks as a body, but some of them are in the office daily, and others occasionally." He (Mr. Ockleston) had since taken considerable trouble to ascertain the exact position of affairs, and his information was this—that the board met only one day in every four

of the experiments which were being made in this direction on the Metropolitan and the District railways.

The motion, on being put to the meeting, was carried.

### WIRRAL RAILWAY.

The half-yearly general meeting was held at New Brighton, Cheshire; Mr. T. H. JACKSON presiding.

The report stated that the balance brought from the previous half-year was 2,593*l.*, the half-year's earnings had been 9,101*l.*, and there had been a return of Government duty of 771*l.*, making a total of 12,465*l.* From this had to be deducted amount due to the Mersey Railway Company on adjustment of accounts 2,000*l.*, interest on debenture loans 1,448*l.*, interest on debenture stock 1,984*l.*, general interest 365*l.*, total 5,797*l.*, leaving to be dealt with that day 6,669*l.* The dividend on the 1885, 1886, 1893, and 1896 preference shares absorbed 4,532*l.* of this sum, and the directors recommended that the balance, 2,137*l.*, be carried forward to next account.

The CHAIRMAN, in moving the adoption of the report and accounts, said the result of the Railway Commissioners' decision on the case of the Mersey Company's claim against them was that they had to pay a sum which reduced the rate on a large volume of passenger traffic to under 1*d.* a mile, and on that they claimed a rebate of Government duty, which the Government paid. This decision, however, only referred to a portion of the claim, a large sum being left in dispute respecting matters not dealt with by the Commissioners. They had amicably conferred with the Mersey Company, and finally settled all differences by agreeing to pay them 2,000*l.*, 1,000*l.* of which had been paid off, and the balance would be handed over in the current half-year. The receipts per train mile for the last half-year were 3*s.* 7*d.*, compared with 3*s.* 2*d.*, whilst the expenses were 2*s.* 1*d.*, compared with 2*s.* 0*d.*. The expenses were 59 per cent. of the receipts for the last half-year, compared with 62 per cent. in 1897. After alluding to their friendly relations with the Mersey Company, the chairman, looking at the steady progress the line was making, ventured to predict that they might be able to make a distribution on the ordinary stock at the end of the present half-year. For the past seven weeks there receipts had increased by 1,414*l.*, and although the expenditure must also increase, still their prospects were good. They would, he admitted, have to meet the interest on the expenditure on the Seacombe Station; still, they must hope that with the improved accommodation they would be able to give, the line would become further popularised. As negotiations for a mutual service of trains with the joint lines and for a joint station had ended in nothing, and as there was no chance of the question ever being reopened, which the chairman much regretted, as it would have been a great public convenience they had decided, he said, to run the line straight into West Kirby. The position of the station would be opposite the opening of the Crescent.

The motion was agreed to.

### GREAT NORTH OF SCOTLAND RAILWAY.

The half-yearly general meeting was held in Aberdeen on Wednesday; Mr. W. FERGUSON presiding.

The report was adopted and the dividends recommended therein were declared.

It would be a waste of space to give any lengthy report of the proceedings, as the only fact brought out in the chairman's oration, beyond what was contained in the directors' report, was that the average receipts per train mile had been 43*l.* 27*d.*, as compared with 45*l.* 0*d.*, and the average expenses per train mile 23*l.* 47*d.*, as compared with 23*l.* 68*d.*

At a special meeting held later in the day, the scheme for dealing with the deferred ordinary stock No. 1 (published in our last issue) was adopted.

## General News.

### IRISH RAILWAYS—SOME INTERESTING COMPARISONS.

*L.S.D.*, the *Irish Financial Review*, of the 15th inst. contains an interesting and instructive comparison of the working of the principal Irish railways during the first half of 1898. Instead of offering commonplace comments upon recent speeches of the chairmen of the various railway companies, our contemporary presents its readers with the more important features of the railway accounts. These have been analysed in such a way as to present a comparison between the working of the principal Irish companies which is certain to be interesting, and probably useful, to those most keenly interested in the subject. Perhaps, says *L.S.D.*, there is no branch of railway economics receiving so much attention from the directorates in recent years as that which may be comprehensively classed under the familiar heading "working expenditure." The cost of carrying on the business has been steadily increasing, despite of a tightening of the purse, but it would be unwise to draw positive deductions from such comparisons owing to various elements which affect the working of a railway company. Some of the principal disturbing influences will be illustrated in the course of the following analysis dealing with the accounts of the principal Irish railway companies for the half-year ended with June 30th last.

### TRAFFIC EXPENSES

absorb larger amounts on the debit side of revenue accounts than any other branches of expenditure in connection with the Cork and Macroom, Cork Bandon and South Coast, Great Northern, Great Southern and Western, and Waterford Limerick and Western railways, but when the proportion of outlay per pound of gross traffic receipts is arrived at we find that the Great Northern, for instance, secures a larger margin of revenue than the Belfast and Northern Counties, whose traffic expenses entail less outlay than is incurred for locomotive power. The subjoined analysis of traffic expenses shows that in this department the Belfast and County Down and Midland Great Western railways have achieved the best results, inasmuch as only 3*s.* 1*d.* has been expended for traffic expenses out of every 20*s.* derived from the carriage of goods, passengers, &c. The Dublin Wicklow and Wexford comes next in merit, then the Great Northern, followed by the Belfast and Northern Counties and Cork Bandon and South Coast Railways. The Great Southern and Western is comparatively high, at 3*s.* 6*d.* on every pound received, but is a long way better than the Cork and Macroom or Waterford Limerick and Western. With regard to the latter company, the expenses at Waterford wharf appear to be a pretty stiff tax on the company's revenue. As the figures stand they show a difference of as much as 10*d.* in the pound between the two extremes of outlay under this head.

Traffic expenses per £ of traffic receipts.

### LOCOMOTIVE POWER

has been costlier than usual during the first half of 1898, and showed up as the heaviest class of expenditure on the Belfast and County Down, Belfast and Northern Counties, Dublin Wicklow and Wexford, and Midland Great Western railways. The statement below, showing the average expenditure per locomotive, is interesting as illustrating the heavy outlay incurred in the up-keep of engines. The lowest average is 304*l.* for the Cork Bandon and South Coast, whilst the highest is 388*l.* on the Great Northern. The Dublin Wicklow and Wexford Company appears to advantage in this comparison, as in the previous one, as their trains have been run at the lowest charge per mile of any of the lines whose accounts have been analysed. The Great Southern and Western have had to pay top price, or nearly 1*l.* 1*d.* per train mile more than the Wexford Company.

### COST OF MAINTENANCE

of the permanent way and works is the third most important source of outlay in connection with working railways. For convenience of comparison the mileage maintained by each company has been reduced to single miles. The mistaken policy of the founders of the Dublin Wicklow and Wexford Railway in constructing their line along the coast, because they got the land for nothing in some cases and very cheaply in others, is forcibly shown up in the following table. If the amounts drawn from reserve funds in aid of renewals and coast defences be added to the ordinary outlay from revenue, the cost of maintenance per mile of line on this system totals up to 128*l.* 7*s.* 8*d.*, a startling figure when contrasted with that appearing opposite each of the other companies set forth below. The mistake which placed the Wexford Company in this awkward position has always been a serious drain upon its resources, and is likely to continue to remain so until the heroic remedy be adopted. Even then the prejudicial effect of the first false step must be ever present to the end:—

Cost of Maintenance per Mile of Line.

pensation, benefit, or insurance," as it is called in the Act, with its servants, which, if approved by the Registrar of Friendly Societies, could be substituted for the provisions of the Act; but, after careful consideration, we have come to the conclusion that, in the meantime, the most expedient course to pursue is to meet the liability imposed by the Act as it arises each half-year, and without insuring against it either with an outside company or by forming an insurance fund of our own. Thus we shall learn by experience the average cost to the company of the compensation paid under the Act, and so be in a better position than we now are to come to a final decision as to the best mode of providing for it in the future.

Sir JAMES KING seconded the motion.

Mr. BARBOUR said he wished to put a question as to the payment of the dividends. He had no desire that the date should be altered on the present occasion, but he wished to know whether the dividend could be paid at some earlier date in future years. He knew that the Scotch railways closed their half-year a month later than the English railways. By all means let them continue that practice. The English railways closed their accounts on June 30th. He would state the dates at which some of the English railways paid their dividend. The London Brighton and South Coast paid their dividend on August 5th, the Lancashire and Yorkshire on August 11th, the Midland on August 13th, the North Eastern on August 13th, and the London Chatham and Dover on August 17th. These dividends were paid on an average six weeks after the closing.

The CHAIRMAN said the directors were very much obliged to the questioner for drawing their attention to the time which it took to make up the accounts and pay the dividends. It had been the practice for the last 25 years to pay them half-yearly on October 1st and April 1st, and this was the first occasion on which he had ever heard any murmur or question as to their being too long. As the shareholders were aware, they had to wait for the returns from the Clearing-house, and in the summer time especially, when the holidays were in vogue, it was not so easy to get them out. He promised, however, that the directors would take the matter into consideration.

The report and accounts were unanimously adopted, and the dividends were then declared.

An extraordinary general meeting was afterwards held.

The CHAIRMAN said—I have now to ask the shareholders to give their formal sanction to the exercise of the powers of subscription conferred upon the company by two Acts of Parliament, the Callander and Oban Railway Act, 1896, and the Lanarkshire and Dumbartonshire Railway (Capital) Act, 1898. By the first of these Acts the Callander and Oban Company, whose line, as you are aware, we work and maintain, took power to make a railway, about 25 miles long, from Connel Ferry to Ballachulish, and for this purpose were authorised to raise 210,000*l.* capital, with relative borrowing powers, and the Caledonian Company were authorised, with the consent of their shareholders, to subscribe 150,000*l.* of this sum, the subscription being in the same proportion as the Caledonian Company's present holding of Callander and Oban capital. The Lanarkshire and Dumbartonshire Act permits that company to raise fresh capital to the amount of 225,000*l.*, with relative borrowing powers, and of this capital the Caledonian Company is authorised to subscribe, with the sanction of its shareholders, 140,700*l.* The Caledonian Company works and maintains the Lanarkshire and Dumbartonshire line, and already owns about half its existing capital. He moved the following resolution:—

"That the company be and they are hereby authorised to exercise the powers of subscription to the undertaking of the Callander and Oban Railway Company, conferred on the company by the 'Callander and Oban Railway Act, 1896,' and the powers of subscription to the undertaking of the Lanarkshire and Dumbartonshire Railway Company, conferred on the company by the 'Lanarkshire and Dumbartonshire Railway (Capital) Act, 1898,' on such terms and conditions, in such amounts, and at such times as the directors from time to time may think proper."

Sir JAMES KING seconded the resolution, which was adopted.

### MERSEY RAILWAY.

The half-yearly general meeting was held at Worcester-house, Walbrook, E.C., on the 16th inst.: Mr. JAMES FALCONER presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an abstract of which has already appeared in THE RAILWAY TIMES), stated that the figures of the working for the six months to June 30th last were substantially the same as those for the corresponding period of 1897. During the half-year the receivers and managers worked the line practically under the same conditions as in the first half of 1897. He regretted to state that the result was not a satisfactory one for the company, and he thought that the lesson to be learnt from it was that under existing conditions—the conditions which ruled in the past half-year—it was hopeless to expect a substantial improvement either as regarded the receipts or the working expenses. He had no wish to enter upon controversial questions, because, as he had said on previous occasions, his firm belief was that the first condition of prosperity was that every one who was interested in the railway should apply himself to the future, and do his best to improve the conditions under which the system was worked. He had all along advocated united action on the part of the different interests in the company, and the experience of the last half-year confirmed and strengthened his view that such action was of real importance to the company. During the half-year the board had been able to give effect to the arrangement which was practically concluded at the commencement of the year for securing

joint action between the receivers and the managers and the board. This had met with the approval of the Court of Chancery, and as chairman of the company he had attended all the meetings of the managers and receivers held in Liverpool and London. He had also attended the meetings which had been held with the representatives of the Wirral Company, and he wished to acknowledge the courtesy which had been extended to him. He had been allowed to take part in all discussions and negotiations. At the last meeting of shareholders their relations with the Wirral Company were somewhat strained owing to the action of the Wirral Company, to which the directors had taken exception in the interests of the Mersey Company. Subsequently they met the chairman and other officials of the Wirral Company, and it was suggested that they might see whether they could not arrive at an amicable solution which would be satisfactory to the public, which might lead to an increase of traffic and obviate the friction (and consequent expenses) between the two companies. The proposal was to form an important communication between the Wirral Peninsula and Liverpool. He did not propose to enter into details, but no pains were spared to arrive at what would really be the best solution. As a result they had framed a time-table which provided for an improved train service. The agreement was for twelve months, and was terminable at six months' notice after that. It was the hope of the two companies that the agreement would have a long life, subject, of course, to alterations in times of trains or fares which the needs of the public might require. They had added very considerably to the train service, and had very materially reduced the fares all round. This did not come into operation until two months ago, and it was too early to say what the result of it might be upon the receipts of the company. The receipts had shown a slight increase. The directors had not been able to arrive at a settlement of the very important questions in dispute between the company and the North Wales and Liverpool Railway Committee. Having had such good results with regard to the Wirral Company, they felt that it would be desirable, if possible, to endeavour to bring about a meeting with the North Wales and Liverpool Committee. A meeting had not yet been held, but they had arranged for one at an early date. It would now be their duty to see whether an agreement conducive to the interest of the Mersey Railway could not be arrived at. It all depended upon whether they could see eye to eye with the members of the committee. Last session the directors promoted a Bill for the purpose of enabling them to deal with the first debenture stock of the company. Certain of the debenture-holders took exception to the Bill, and appeared in Parliament to oppose it. The Bill, with certain modifications, was passed, and the directors were now empowered to issue debenture stock to the extent of 275,000*l.*, at a rate of interest not exceeding 4½ per cent. for a period of not more than ten years. The Bill only received the Royal Assent on August 12th, and the period which had elapsed since then was not a period in which one could deal with financial questions, because of so many people being away on their holidays. The question of exercising the power of raising the money was one which required very careful consideration. The company was at the present time unable to meet any claims on behalf of the debenture-holders, but their hope was that the position of the company might financially improve, and then they would be able to borrow money at a lower rate of interest than at the present time. There were many elements into which it was not necessary to go, but which could make the future of the Mersey Company full of possibilities. It was, however, very undesirable to make at the present moment any rash bargain for the renewal of the debenture stock at a high rate of interest. He was not now speaking with the authority of the board, because the directors had not really had an opportunity of seriously considering what should be done in this question. He wished now to mention a personal matter. With a view of securing as far as possible joint action by the receivers and managers and the board it was arranged that he should attend all the meetings of the receivers in London and Liverpool. He had done this without any remuneration in addition to the fees as director (which were credited to him), but in view of the claims made upon his time he asked the shareholders to consider whether 500*l.* was too much. They did not get their fees as directors, and he thought they would agree with him that that was more than a Scotchman could stand. (Laughter.) He would leave the matter in the hands of the shareholders.

Mr. S. G. SHEPPARD seconded the motion.

Mr. BAINES complained that, instead of progressing, the company were slowly going backward.

Mr. BIRCHALL criticised the present management, and asserted that several of the measures which had been taken by the present directors with the view of improving the company's position would have been carried out long ago by the late board but for the opposition of the present directors. He urged the advisability of introducing electricity on the company's system, which he considered would be managed with much better results by local directors.

The CHAIRMAN, in reply, stated that the questions respecting goods traffic, the spur line, the dock connection, and the physical connection with the Cheshire lines all fell to be considered together. The view of the board was that their first duty was to secure the co-operation of the receivers and managers, while their second duty was to establish satisfactory relations with the companies already connected with their railway. Before dealing with those questions they must have the debenture-holders working with them. The solution of all these questions involved the raising of capital, which, in turn, involved the rights of the existing debenture-holders. The question of electrical working was one of very great importance, but the directors felt that they should await the result

of the experiments which were being made in this direction on the Metropolitan and the District railways.

The motion, on being put to the meeting, was carried.

### WIRRAL RAILWAY.

The half-yearly general meeting was held at New Brighton, Cheshire; Mr. T. H. JACKSON presiding.

The report stated that the balance brought from the previous half-year was 2,593*l.*, the half-year's earnings had been 9,101*l.*, and there had been a return of Government duty of 771*l.*, making a total of 12,465*l.* From this had to be deducted amount due to the Mersey Railway Company on adjustment of accounts 2,000*l.*, interest on debenture loans 1,448*l.*, interest on debenture stock 1,984*l.*, general interest 365*l.*, total 5,797*l.*, leaving to be dealt with that day 6,668*l.* The dividend on the 1885, 1886, 1893, and 1896 preference shares absorbed 4,532*l.* of this sum, and the directors recommended that the balance, 2,137*l.*, be carried forward to next account.

The CHAIRMAN, in moving the adoption of the report and accounts, said the result of the Railway Commissioners' decision on the case of the Mersey Company's claim against them was that they had to pay a sum which reduced the rate on a large volume of passenger traffic to under 1*d.* a mile, and on that they claimed a rebate of Government duty, which the Government paid. This decision, however, only referred to a portion of the claim, a large sum being left in dispute respecting matters not dealt with by the Commissioners. They had amicably conferred with the Mersey Company, and finally settled all differences by agreeing to pay them 2,000*l.*, 1,000*l.* of which had been paid off, and the balance would be handed over in the current half-year. The receipts per train mile for the last half-year were 3*s.* 7*d.*, compared with 3*s.* 2*d.*, whilst the expenses were 2*s.* 1*d.*, compared with 2*s.* 0*d.* The expenses were 59 per cent. of the receipts for the last half-year, compared with 62 per cent. in 1897. After alluding to their friendly relations with the Mersey Company, the chairman, looking at the steady progress the line was making, ventured to predict that they might be able to make a distribution on the ordinary stock at the end of the present half-year. For the past seven weeks there receipts had increased by 1,414*l.*, and although the expenditure must also increase, still their prospects were good. They would, he admitted, have to meet the interest on the expenditure on the Seacombe Station; still, they must hope that with the improved accommodation they would be able to give, the line would become further popularised. As negotiations for a mutual service of trains with the joint lines and for a joint station had ended in nothing, and as there was no chance of the question ever being reopened, which the chairman much regretted, as it would have been a great public convenience they had decided, he said, to run the line straight into West Kirby. The position of the station would be opposite the opening of the Crescent.

The motion was agreed to.

### GREAT NORTH OF SCOTLAND RAILWAY.

The half-yearly general meeting was held in Aberdeen on Wednesday; Mr. W. FERGUSON presiding.

The report was adopted and the dividends recommended therein were declared.

It would be a waste of space to give any lengthy report of the proceedings, as the only fact brought out in the chairman's oration, beyond what was contained in the directors' report, was that the average receipts per train mile had been 43*27d.*, as compared with 45*00d.*, and the average expenses per train mile 23*47d.*, as compared with 23*68d.*

At a special meeting held later in the day, the scheme for dealing with the deferred ordinary stock No. 1 (published in our last issue) was adopted.

## General News.

### IRISH RAILWAYS—SOME INTERESTING COMPARISONS.

*L.S.D.*, the *Irish Financial Review*, of the 15th inst. contains an interesting and instructive comparison of the working of the principal Irish railways during the first half of 1898. Instead of offering commonplace comments upon recent speeches of the chairmen of the various railway companies, our contemporary presents its readers with the more important features of the railway accounts. These have been analysed in such a way as to present a comparison between the working of the principal Irish companies which is certain to be interesting, and probably useful, to those most keenly interested in the subject. Perhaps, says *L.S.D.*, there is no branch of railway economics receiving so much attention from the directorates in recent years as that which may be comprehensively classed under the familiar heading "working expenditure." The cost of carrying on the business has been steadily increasing, despite of a tightening of the purse, but it would be unwise to draw positive deductions from such comparisons owing to various elements which affect the working of a railway company. Some of the principal disturbing influences will be illustrated in the course of the following analysis dealing with the accounts of the principal Irish railway companies for the half-year ended with June 30th last.

### TRAFFIC EXPENSES

absorb larger amounts on the debit side of revenue accounts than any other branches of expenditure in connection with the Cork and Macroom, Cork Bandon and South Coast, Great Northern, Great Southern and Western, and Waterford Limerick and Western railways, but when the proportion of outlay per pound of gross traffic receipts is arrived at we find that the Great Northern, for instance, secures a larger margin of revenue than the Belfast and Northern Counties, whose traffic expenses entail less outlay than is incurred for locomotive power. The subjoined analysis of traffic expenses shows that in this department the Belfast and County Down and Midland Great Western railways have achieved the best results, inasmuch as only 3*s.* 1*d.* has been expended for traffic expenses out of every 20*s.* derived from the carriage of goods, passengers, &c. The Dublin Wicklow and Wexford comes next in merit, then the Great Northern, followed by the Belfast and Northern Counties and Cork Bandon and South Coast Railways. The Great Southern and Western is comparatively high, at 3*s.* 6*d.* on every pound received, but is a long way better than the Cork and Macroom or Waterford Limerick and Western. With regard to the latter company, the expenses at Waterford wharf appear to be a pretty stiff tax on the company's revenue. As the figures stand they show a difference of as much as 10*d.* in the pound between the two extremes of outlay under this head.

### LOCOMOTIVE POWER

has been costlier than usual during the first half of 1898, and showed up as the heaviest class of expenditure on the Belfast and County Down, Belfast and Northern Counties, Dublin Wicklow and Wexford, and Midland Great Western railways. The statement below, showing the average expenditure per locomotive, is interesting as illustrating the heavy outlay incurred in the up-keep of engines. The lowest average is 304*l.* for the Cork Bandon and South Coast, whilst the highest is 388*l.* on the Great Northern. The Dublin Wicklow and Wexford Company appears to advantage in this comparison, as in the previous one, as their trains have been run at the lowest charge per mile of any of the lines whose accounts have been analysed. The Great Southern and Western have had to pay top price, or nearly 1*½d.* per train mile more than the Wexford Company.

Midland Great Western .....	332 14 8	845
Waterford Limerick and Western.....	313 14 8	772

### COST OF MAINTENANCE

of the permanent way and works is the third most important source of outlay in connection with working railways. For convenience of comparison the mileage maintained by each company has been reduced to single miles. The mistaken policy of the founders of the Dublin Wicklow and Wexford Railway in constructing their line along the coast, because they got the land for nothing in some cases and very cheaply in others, is forcibly shown up in the following table. If the amounts drawn from reserve funds in aid of renewals and coast defences be added to the ordinary outlay from revenue, the cost of maintenance per mile of line on this system totals up to 128*l.* 7*s.* 8*d.*, a startling figure when contrasted with that appearing opposite each of the other companies set forth below. The mistake which placed the Wexford Company in this awkward position has always been a serious drain upon its resources, and is likely to continue to remain so until the heroic remedy be adopted. Even then the prejudicial effect of the first false step must be ever present to the end:—

Cost of Maintenance per Mile of Line.

	£	s.	d.
Belfast and County Down.....	261	6	6
Belfast and Northern Counties.....	75	6	10
Cork and Macroom .....	42	3	2
Cork Bandon and South Coast .....	52	14	7
Dublin Wicklow and Wexford .....	112	13	4
Great Northern (Ireland) .....	73	10	3
Great Southern and Western .....	68	17	10
Midland Great Western .....	46	8	11
Waterford Limerick and Western .....	49	15	9

REPAIRS AND RENEWALS

of rolling stock, other than engines and tenders, are the next leading calls on revenue. The averages are pretty low all round considering the efficiency of the passenger accommodation on the main lines of the country, and happily do not present any striking contrasts, except that the County Down line appears to have been catering more liberally than usual for the comfort of its patrons. The charges per goods train vehicle may be said to be fairly uniform in view of the large numbers of wagons, &c., maintained by the companies:—

Cost of Repairs and Renewals.

	Per Passenger Train Carriage.	Per Goods, &c., Wagon.
Belfast and County Down .....	£18 4 3	£22 6 10
Belfast and Northern Counties .....	11 1 9	1 19 6
Cork and Macroom .....	6 17 2	2 1 1
Cork Bandon and South Coast .....	15 2 6	1 16 6
Dublin Wicklow and Wexford .....	11 10 11	2 6 1
Great Northern (Ireland) .....	13 17 3	2 0 10
Great Southern and Western .....	12 16 11	2 3 6
Midland Great Western .....	11 17 0	2 1 9
Waterford Limerick and Western .....	15 2 0	2 2 7

GENERAL CHARGES

are as unavoidable a claim upon revenue as locomotive power. In the case of many poorly circumstanced railways they afford even less room for retrenchment than the locomotive, carriage, permanent-way, or traffic departments. The Dublin Wicklow and Wexford Company figures very prominently in the following table owing to the heavy loss of revenue sustained by the Electric Tramway opposition. The Waterford Limerick and Western yields the next most interesting average, and is followed by the Cork and Macroom. The table tends to show the advantages of amalgamation in reducing the relative impost of general charges on railway working. It is obviously cheaper under this head to administer large businesses, like the Great Northern and Great Southern and Western, than small ones.

General charges per £ available for dividend.

	s.	d.
Belfast and County Down .....	2	9½
Belfast and Northern Counties .....	2	9½
Cork and Macroom .....	3	9½
Cork Bandon and South Coast .....	1	10½
Dublin Wicklow and Wexford .....	8	10½
Great Northern (Ireland) .....	1	3½
Great Southern and Western .....	1	4
Midland Great Western .....	1	11½
Waterford Limerick and Western .....	4	5½

COMPENSATION

is fortunately a comparatively unimportant item in Irish railway accounts. That for injury to passengers is very trifling in view of the numbers carried and the revenue derived therefrom:—

Compensation for Personal Injury per £ Passenger Receipts.

Belfast and County Down .....	53d.
Belfast and Northern Counties .....	Nil
Cork and Macroom .....	Nil
Cork Bandon and South Coast .....	56
Dublin Wicklow and Wexford .....	62
Great Northern (Ireland) .....	87
Great Southern and Western .....	18
Midland Great Western .....	35
Waterford Limerick and Western .....	57

With regard to goods, it is only to be observed that the Waterford Limerick and Western Company appear to have settled claims more readily than most Irish companies—a very desirable policy if a railway is to keep on good terms with its customers.

Compensation for Goods, &c., Damaged or Lost per £ Received from Parcels, Horse, Carriage, Dog, Goods, and Live Stock Traffic.

Belfast and County Down .....	46d.
Belfast and Northern Counties .....	47
Cork and Macroom .....	Nil
Cork Bandon and South Coast .....	Nil
Dublin Wicklow and Wexford .....	50
Great Northern (Ireland) .....	100
Great Southern and Western .....	131
Midland Great Western .....	50
Waterford Limerick and Western .....	245

RATES AND TAXES

are an ever-growing burthen upon the railway property in these islands. From the following table it will be seen that the Dublin Wicklow and Wexford and Great Northern companies are most severely mulcted in this respect, whilst the Cork Bandon and South Coast is the most fortunate in getting a fair rating.

Rates and taxes in the £ gross receipts.

Belfast and County Down .....	498d.
Belfast and Northern Counties .....	733
Cork and Macroom .....	603
Cork Bandon and South Coast .....	306
Dublin Wicklow and Wexford .....	1036
Great Northern (Ireland) .....	1031
Great Southern and Western .....	798
Midland Great Western .....	534
Waterford Limerick and Western .....	634

Our concluding table will not be without interest to many of our readers. The chairman of the Cork and Bandon Railway explained and justified the carry over in their accounts to the

satisfaction of the shareholders. Before the end of the current half-year the Great Northern shareholders will probably be satisfied that the board acted wisely in aiming at uniform rather than record dividends. Probably the time is not far distant when we shall have to encounter the inevitable periodic depression of trade, which appears to be somewhat deferred in its reappearance during the present decade. Nevertheless it is certain to come, and if there be yet a few good half-years in store for the Irish railway shareholder it would be desirable to take advantage of them to strengthen reserve funds and provide for the evil time as fully as possible.

Balance carried into current half-year.

CHINESE RAILWAY QUESTIONS.

Telegrams received from Peking and Shanghai during the past week state that in consequence of representations made by the British Government, the Tsung-li-Yamen has instructed Hu Yu Fen to reopen negotiations and proceed to the conclusion of the Niu-chwang Railway extension loan with the Hong-kong and Shanghai Bank. The Tsung-li-Yamen has formally agreed to concede to a British syndicate the right to construct a short railway from British Kau-lung to Canton. This partly balances the valuable concession given to France of the railway from Pakhoi to Nan-ning-fu, which, however, France appears to have no intention of building. The Russians are about to establish a line of steamers on the Yang-tse-Kiang, on which hitherto two large British steamers and one belonging to the China Merchants Company have enjoyed a monopoly. The Tsung-li-Yamen has also formally admitted the right of the Peking syndicate to extend its proposed mining railway beyond the border of Ho-nan province to Sipgyang (?) on the Han river, where the water is navigable. Mr. J. C. Macdonald, M.P., has obtained a concession for a railway connecting Mangchow, Soochow, and Shanghai. The Belgian syndicate is endeavouring to obtain the concession for another important railway to connect Saug-chow, Ning-po, and Ven-chow.

The St. Petersburg correspondent of the Times, telegraphing on Monday last, says:—"The discovery of your Peking correspondent that the Russians are making a railway to Niuchwang and his subsequent news that England has given way and agreed to all the conditions imposed by Russia in connection with this matter render it advisable to explain the Russian view of the question, which, as might be supposed, represents it in a somewhat different light. It is asserted—and, presumably, if the British Government have acquiesced it means that the assertion is believed to be correct—that a secret agreement existed between Russia and China prior to any negotiations begun by the Hong-kong and Shanghai Bank, by which the Chinese Government pledged itself not to allow the proposed extension of the Shan-hai-kwan Railway to Niuchwang to fall into the hands of foreigners or to come under their control. In fact, any new railway north of Peking in the direction referred to would be regarded as entering the sphere of influence to be traversed—which means, of course, that the English were not to be permitted to obtain control over any such railway. In virtue of this secret arrangement M. Pavloff was within his right in protesting to the Chinese Government that they were infringing it. There was, it seems, no objection to English money being given for building the line, but the mortgage of the latter to the Hong-kong and Shanghai Bank violated this previously made stipulation. If this is a true statement of facts—and it is entertained as such by well-known persons here who cannot be suspected of having any interest in misrepresenting the case—it becomes quite inexplicable why the Chinese should have made such a contract with the Hong-kong and Shanghai Bank. Unfortunately, all the chief men of the Eastern Chinese Railway Company and of the Russian Chinese Bank are at present absent from St. Petersburg, and the above explanation, which must be taken for what it is worth, is the only one obtainable."

Although the West Australian Government will not ask the House of Assembly to sanction during the present session the construction of any of the railways mentioned in the Governor's speech, preliminary surveys will be made of the lines from Coolgardie to Norseman, and from Menzies to Mount Leonora.

**HULL AND BARNSELY RAILWAY.**

The following circular was issued on Wednesday by the chairman of the Hull Barnsley and West Riding Junction Railway and Dock Company:—

As I intimated to the proprietors at the last half-yearly meeting, it is proposed to take early advantage of the powers for the construction of the Hull and South Yorkshire Extension line which were transferred to this company by our Act of last session. This line, as you will remember, will give the company direct access to the important collieries at Hickleton, Wath, and Manvers Main, and thus bring considerable additional traffic over the company's system. The extension of the Alexandra Dock and the construction of the additional coal shipping appliances will be completed before the new line is finished, and the company will, therefore, have no difficulty in dealing with this additional traffic.

To construct the line it will be necessary to raise 200,000*l.* further capital, but, as the Act gives the company power to pay interest at the rate of 3 per cent. out of capital during construction, the proposed issue will only slightly affect the income available for dividend on the ordinary capital until the line is opened, after which it is confidently anticipated that its earnings will not only cover the dividend on the new capital, but result in a substantially increased revenue to the ordinary proprietors.

You will remember that early in 1897 the company issued 300,000*l.* 4 per cent. preference stock for the purpose of extending the dock, increasing the coal shipping appliances at Hull, and providing additional engines, rolling stock, sidings, and other works. On that occasion I informed you that I anticipated that the outlay of capital would result in an increased revenue, sufficient to provide for the dividend on the new capital, and to leave a considerable surplus of profit to the company. The works connected with the dock extension, and the increase of the coal shipping appliances are still in progress, and therefore not yet remunerative, but I have no doubt that my anticipations will be fully realised when they are completed. In the meantime the outlay on rolling stock and sidings has been productive of additional revenue, and has enabled the company to deal with the greatly increased traffic of the present year.

Since the issue of the above capital, the financial position of the company has much improved, and I am confident that as a result of the capital expenditure now in progress and in contemplation, the improvement will continue. Under these circumstances, I am advised that the new capital should be offered as a 3½ per cent. redeemable preference stock, and that as it is undesirable to have two preference stocks, the existing 4 per cent. preference stock should be redeemed (in accordance with the terms of issue), and replaced by its equivalent in the new 3½ per cent. stock, sufficient at the price of redemption to yield the same income.

This operation will absorb 345,000*l.* of the new stock, but at the lower rate of dividend will practically leave the preference dividend payable in respect of it out of the company's income at the same amount as at present.

For the above purposes, and in order to provide the necessary funds as they may be required for the future equipment of the company's undertaking, it has been decided to recommend the proprietors to authorise the creation and issue of 450,000*l.* additional capital, making, with the above-mentioned 300,000*l.* already authorised, 750,000*l.* to be issued at par as a 3½ per cent. redeemable preference stock, ranking for dividend next after the debenture stocks of the company.

Of this issue only 600,000*l.* is required for the present purposes of the company—viz., for the new line, 200,000*l.*; for the conversion of the existing preference stock, 345,000*l.*; and for additional engines, rolling stock, appliances, &c., 55,000*l.* The balance of the stock is to be reserved for the future wants of the company as they may arise. As you will understand from the above explanation, this issue will not, until the new line is completed, increase the amount required for the preference dividend by more than from 2,000*l.* to 3,000*l.* per annum.

It is intended to offer new stock to the existing preference stockholders in exchange for their holdings, and to give the ordinary proprietors of the company the opportunity of subscribing for the remainder before it is offered to the public.

Your attendance is requested at the extraordinary general meeting of the company, to be held at Winchester-house, Old Broad-street, London, E.C., at 12 o'clock noon, on Friday, the 30th inst., for the purpose of authorising the creation and issue of the above capital. In the event of your being unable to attend, I shall be obliged if you will sign and return the accompanying proxy to the secretary of the company, so that it may reach him before noon on Wednesday, the 28th inst.

The general manager of the Uruguay Great Eastern Railway, Mr. Tring, is now in England.

**THE BAKER-STREET AND WATERLOO RAILWAY SCHEME.**

At the annual general meeting of the London and Globe Finance Corporation, Limited, held on Tuesday at Winchester-house, E.C., the CHAIRMAN (the Marquis of Dufferin and Ava) said:—We are engaged in the building of an underground electric railway from Baker-street to Waterloo. This line will be in length 3 miles and 1 furlong. Commencing under the Waterloo Station of the London and South Western Railway (where it will have communication with the platforms of that company and with the Waterloo and City Railway), it will cross under the river near Charing-cross-bridge, where there will be a station to exchange traffic with the District line. The route followed will then be up Northumberland-avenue, along the south side of Trafalgar-square, where there will be a station. Then it goes up the Haymarket to Piccadilly-circus (where the next station will be), thence up Regent-street to Oxford-circus, where there will be a station which will connect it with the Central London Railway, thence up Great Portland-street into Regent's-park, turning in a westerly direction to Baker-street, where there will be a station connecting with the Metropolitan Railway, and the northern terminus of our line will adjoin the station of the Great Central Railway Company. From the point of view of convenience to the general public this line will be the most important of any of the electric railways. Running, as it does, north and south and competing with no other railway or tramway, it will pass through the most important shopping centres in London, and be within easy reach of many theatres and other places of amusement. Moreover, the facilities which it will afford for intercommunication with other lines are probably without precedent, connecting as it will at important points with the systems of the London and South Western, the Waterloo and City, the South Eastern, the District, the Brompton and Piccadilly Circus, the Central London, the Metropolitan, and the Great Central railways, and it will form a connecting link between the districts north of the river and the tramway system south of the Thames, which now discharge their thousands of passengers in the immediate vicinity of the Waterloo Station. The entire distance between Waterloo and the Great Central terminus will be accomplished in about fifteen minutes. There will be a very frequent service of trains, probably every three minutes, and the carrying capacity of the line will be over 50,000,000 passengers per annum. The traffic will be continuous throughout the day and night, for there will be early morning business traffic, later the shopping and pleasure traffic, again in the evening there will be the return business traffic, and up to a late hour of the night the traffic from the theatres and other places of amusement, in addition to the traffic from one railway system to another. The line is now in course of construction, the contractors being Messrs. Perry and Co., who have carried out large and important works for the London and South Western Railway Company as well as large works in other directions. The engineers are Sir Benjamin Baker and Messrs. Galbraith and Church. The construction of the line is being pushed forward with a view to its being completed and open for traffic at the earliest possible date. At present the London and Globe is furnishing all the money for construction, and we may decide to complete the entire work ourselves, devoting several hundred thousand a year for that purpose for three years, by which time we hope the road will be finished, when the London and Globe would possess for all time a very valuable asset indeed; or we may, on the other hand, float it as a separate undertaking.

Baring Brothers and Co., Limited, notify that coupon No. 3 of the consolidated scrip of the Western of Santa Fé Railway Company and six months' interest to July 1st, 1896, on bonds stamped under the arrangement of March, 1894, will be paid at the rate of 3 per cent. per annum on or after the 19th inst., on presentation of the coupons at their office.

## Notices to Readers.

The Offices of THE RAILWAY TIMES are at 2, Exeter-street, Strand, W.C.

Telegraphic Address:—RAILWAY TIMES, LONDON. Telephone No.:—1967 GERRARD.

All communications bearing upon literary matters should be addressed to the Editor.

Letters relating to Subscriptions, Advertisements, and other business matters should be addressed to the Publisher.

## TERMS OF SUBSCRIPTION.

Post-free to any address in the United Kingdom.

Three Months .....	£0 7 0
Six Months .....	0 13 0
Twelve Months .....	1 5 0

A special discount of 6d. on quarterly, 1s. on half-yearly, and 2s. on annual subscriptions will be allowed for payment in advance.

THE RAILWAY TIMES may be had at all bookstalls, and of any newsagent throughout the kingdom, at 6d. per copy.

Back numbers will be charged for as follows:—If dating back more than a year, 1s. per copy; if more than two years 2s. per copy.

## REMITTANCES.

Money Orders, Cheques, &c., should be drawn in favour of Lionel Bridgland, and should invariably be crossed "London and County Bank." Stamps will be taken in payment of small sums, say under 10s.

## EDITORIAL.

All communications must be authenticated with the name and address of the writer, which will be received in strict confidence.

## Forthcoming Meetings.

- Sep. 27—Bolivar Railway (Annual), Winchester-house, at 2.30.  
 Sep. 27—Ottoman Railway from Smyrna to Aidin (Half-yearly), Winchester House, at 12.  
 Sep. 28—King's Lynn Docks and Railway (Half-yearly), Lynn, at 1.  
 Sep. 29—Metropolitan District Railway (Special), Westminster Palace Hotel, at 2.  
 Sep. 29—Whitechapel and Bow Railway (Special), Westminster Palace Hotel, at 3.  
 Sep. 30—Hull and Barnsley Railway (Special), Winchester-house, at 12.  
 Oct. 7—Recife and Sao Francisco Railway (Half-yearly), Winchester-house, at 12.  
 Oct. 13—Grand Trunk Railway of Canada (Half-yearly), City Terminus Hotel, at 2.

**Preventable Railway Accidents.**—The general secretary of the Amalgamated Society of Railway Servants has addressed a letter to the President of the Board of Trade enclosing the following resolution of the Executive Committee of the Amalgamated Society:—"In discussing its accident list the Executive Committee of the Amalgamated Society of Railway Servants is painfully reminded of the suffering inflicted on railwaymen by accidents arising in the course of their work in consequence of what, in its opinion, are avoidable causes. It suggests a better plan for the inspection of dangerous places on railways, an improved form of coupling for wagons, with suitable means of keeping the same lubricated, the provision of brake levers on both sides of trucks, and the providing of brakes to all vehicles. It instructs the secretary to call the attention of the Board of Trade to these urgent reforms, and appeals to it to put them into effect."

## The Railway Times.

SEPTEMBER 24, 1898.

## THE CONVEYANCE OF PASSENGERS' LUGGAGE.

There is, as we have often observed, a growing tendency on the part of the worker to seek recreation at the seaside or in the quiet country away from the scene of his labours. It was this fact that was at the root of most of the difficulties which were so troublesome during the summer of 1896, and more particularly of last year, when the enormous amount of tourist and week-end holiday traffic to be carried proved in many parts of the country far greater than could be successfully coped with under then existing conditions. It will be only too readily remembered how serious was the disorganisation caused, especially at large junctions en route to various popular holiday resorts. The platforms often resembled large lumber wharfs, bestrewn as they frequently were with chaotic piles of luggage, around which seething masses of exasperated and importunate passengers sought, and even fought, for their own. It was, therefore, with no ordinary interest that we perused in the spring the announcements made by several of the large railway companies that this year passengers' luggage to and from seaside and tourist resorts would be conveyed under arrangements which, if not entirely novel, had certainly never been very extensively adopted in this country. For some years, it is true, arrangements have been in force by which certain railway companies have undertaken to forward luggage brought by passengers to starting stations and to deliver it at hotels or residences in certain large towns for a fee of 1s. per package, but this system has been hitherto too hedged about with limitations to prove popular. Now, however, what the railways say simply amounts to this:—"It suits us to convey your luggage in advance, and if, prior to the date of your journey, you will let us know where you live and where you are going for your holiday, we will send a cart for your luggage, collect it, despatch it, and deliver it to your address at destination, charging you nothing more for the whole transaction than the nominal sum of 6d. per package." The public have lost no time in showing that they understand this announcement, and appreciate its advantages; but before reviewing the success already achieved by the new system, or considering its future possibilities, it may be well to briefly refer to a few of its details for the information of those readers who have not so far had an opportunity of familiarising themselves with them. The luggage dealt with under the arrangement is collected by parcels' cart, and is despatched as ordinary "parcels" traffic in the sorting vans on the night services, and is so kept out of the busy passenger and tourist trains. On the collection of the luggage a consignment note has to be filled up by the sender, specifying what there is to be conveyed, and stating also how many passengers' tickets are held or are going to be taken, but there is no limitation as to the amount of luggage that may be sent by each passenger, the only restriction being that no package shall weigh more than 112lbs. The fee charged for each package is 6d., irrespective of distance. The arrangement applies to all sorts of personal baggage, but not to cycles or household chattels of any sort. For the convenience of those who live in those metropolitan suburbs outside the recognised area for the free delivery of parcels in London, the co-operation of Messrs. Carter Paterson and Co., Messrs. Pickford and Co., and other firms has been

secured. The road carriers make in such cases the following additional charges per package for their services:—If collected above 7 miles but not exceeding 10 miles from the General Post-office, 6d.; if collected from a place more than 10 miles from the General Post-office, 10d. As is so often the case in developing new ideas, the managers of the several railways, whilst in complete agreement as to the fundamental lines on which their experiment is to be conducted have not thought it necessary in the initial stages thereof to be bound down to uniformity of detail in minor points. Thus the Great Western Company intimated from the very first that they would make the system apply to all their stations, whilst the London and North Western decided to commence by trying it with luggage to or from sea-side and other holiday resorts only, but such variations of practice are so superficial that there is no need to do more than to recognise their existence, especially as it may safely be predicted that before long the different companies will compare notes, and agree upon a common permanent arrangement. The success of the new venture is even now assured, for the public have already made extensive use of the opportunity afforded to them of travelling unhampered by luggage. Its success on traffic working has, moreover, been happily apparent, for instances of delay, owing to lack of luggage accommodation, so frequent last summer, have this season been comparative few and far between. This is all the more satisfactory when we consider that the percentage of corridor vehicles running on the principal lines is much greater than formerly, and that in consequence the number of luggage cupboards on trains is of necessity less. As the system develops there can be no doubt but that economies can be effected in the staff of porters at large stations, for more than 50 per cent. of the transfer at junctions hitherto necessary will be saved, as by concentrating the conveyance of luggage a far greater number of through loads can be made up than is at present possible. The immediate object that the railway companies should strive to attain is to inspire the public with complete faith in the reliability of the new system. We regret to hear that cases have occurred where luggage has reached its destination after, instead of in advance of the passengers to whom it belonged. Nothing could be more unfortunate; and while we warmly welcome the adoption of a new method of working at once advantageous to railway interests and the public, we would urge the necessity of most strenuous efforts being made to avoid anything like laxity or negligence being allowed to mar its complete success.

### WATERFORD AND LIMERICK PURCHASE.

Readers of THE RAILWAY TIMES have been kept well posted in the various interesting events which have been taking place for some time past in connection with railway developments in the south of Ireland. These schemes have their ultimate origin in the settled policy of the Great Western of England to develop by every possible means its traffic with the south of Ireland. To this end that company is preparing to set up an entirely new steamship service via Fishguard and Rosslare—a considerably shorter sea passage than at present exists via Waterford and New Milford. Another phase of the same movement was the agreement arrived at with the Fishguard and Rosslare Railway undertaking, with its extensive powers obtained last session for the absorption of the Waterford Dungarvan and Lismore and the Fermoy and Lismore lines. To this scheme the shareholders of both the Great Western and the Great Southern and Western have agreed to subscribe 250,000*l*. This money will be needed for the provision of steam-

boats, and also for the construction of a new line now authorised from Rosslare to Waterford. Yet another development is the acquisition of the Waterford Limerick and Western and the Waterford and Central Ireland undertakings by the Great Southern and Western. As regards the former, we dealt with the proposal fully on July 23rd last. As we then pointed out, some slight opposition to the proposal was revealed among the members of the board. That has since been overcome however, and the amalgamation schemes have been duly approved by the shareholders of all three companies concerned. But there yet remains the necessity for obtaining Parliamentary sanction to these amalgamations, which will be duly sought next session. As we indicated in our article of July 23rd, public opposition is certain to be encountered; indeed, it has already developed to such an extent that we doubt the wisdom of revealing the absorption plans entertained by the Great Southern and Western Company, at any rate so long before the time when it would become absolutely necessary to give public notice—that is, at the time for publishing notice of intention to bring in the necessary Bill in November next. This, however, is only in accordance with the past methods of the Great Southern, which somehow has had a most singular and unhappy knack of muddling its Parliamentary programme in recent years. One specially interesting development is the proposal which we printed in our issue of the 10th inst. that the Waterford and Limerick Company should be purchased “by the counties through which it runs on the same terms as those offered by the Great Southern Company.” This is certainly a novel suggestion and apparently has its origin among the trading interests who are opposed to the amalgamation with the Great Southern. Their misgivings are perhaps not unnatural, for the Great Southern management is sadly behind the times, and leaves much to be desired both by traders and shareholders. As it is pointed out, the purchase on the same terms as are actually agreed to be paid by the Great Southern and Western would only involve a risk of about 15,000*l*. a year. This sum it is proposed by the somewhat fantastic scheme referred to should be borne by the eight counties through which the railway runs in proportion to their ratable value! It is truly considerate of the designers of this scheme that they should offer to pay the same liberal terms as the Great Southern Company have agreed to pay, but we imagine that Waterford and Limerick stockholders would rather enjoy a direct guarantee of that substantial railway company than be obliged to look to eight or more county authorities for their guarantee, especially as the circumstances would probably lead to considerable discussion among the latter as to what their respective payments would have to be. In short, the scheme is practically a proposal to provide cheapened railway facilities and lower rates for the trading interests at the risk and expense of the general body of the ratepayers, and we imagine the latter would very soon scout the idea. The very boldness and novelty of the proposal compels a certain attention being given to it, but when closely examined the case in favour of such a project being carried through must be realised to be a very weak one. First of all it would mean the maintenance of the railway as a separate corporation, for the scheme says that “taxation should carry with it representation on the board of directors.” The Great Southern scheme would effect an economy by doing away with the separate organisation, and would further reduce the disjointed administration by a number of independent authorities, which produces many of the worst evils of the railway system of Ireland at the present day. In fact, so great are evils so arising recognised to be that some authorities who do not go so far

as to support out-and-out Government purchase, strongly advocate the absorption of the smaller companies by a few of the stronger lines as a measure of public utility. The proposal that one of these weaker corporations, such as the Waterford and Limerick unfortunately is, should be jointly administered by eight county authorities is too absurd, and even the trading interest would come to recognise in time that there are serious objections to such a proposal. Better by far have State control in its undiluted form than experiments in railway management by local authorities conducted at the cost of the ratepayers. Better still to let the Great Southern and Western carry out its scheme for the development of the system as it proposes. Perhaps, after all, the proposal for local purchase is put forward less on its own merits than as a means of gaining adherents to the opposition party, which will, no doubt, do all in its power to prevent the grant of amalgamation powers to the Great Southern Company.

### AMERICAN RAILROAD RESULTS.

Three American railroad reports of considerable interest to British investors have appeared within the last few days. These contain the results to June 30th last of the Chicago Milwaukee and St. Paul, the Norfolk and Western, and the Wabash. All three documents are of special interest just now, the Milwaukee on account of the light it may throw upon the late disappointing dividend, the Norfolk and Western because it covers the first full year's results of the reorganised road, and the Wabash on account of the recent advance in its securities, and the respectable surplus over charges which this struggling road has at last been able to show. The "bulls" of Milwaukees looked for a dividend of  $3\frac{1}{2}$  per cent. on the common stock recently, which would have made 6 per cent. for the year 1897-8. Only  $2\frac{1}{2}$  per cent. was forthcoming, however, making 5 per cent. for the year, the same as for 1896-7. The report indicates nevertheless that the higher rate could have been paid, and we do not wonder that the common stockholders who have felt the full brunt of the preceding bad times should now be inclined to grumble because they are not realising the full advantage of the improved business of 1897-8. Gross earnings rose by \$3,702,896, expenses by \$2,624,028, and net earnings by \$1,078,868. As the capital stock only amounts to \$46,026,600, it is clear, if these figures are worth anything at all, that at least 2 per cent. more could have been paid than in the preceding year. In fact, after paying the 5 per cent. dividend for the year, there remains a "surplus" of \$1,426,387, raising the total of undivided profits to over 11 millions of dollars. Of course we know something of these Yankee railroad "surpluses," and it is not improbable that the imposing balance at credit of Milwaukee's income account is as mythical as the rest of them. The rate per ton per mile on the Milwaukee system was fairly well maintained, having been 0.972 cent, against 1.008 cent for the year 1896-7. In the rate per passenger per mile there was an increase from 2.277 cents to 2.357 cents. During the past year the sum appropriated from revenue to "renewal account" was \$1,125,000, against only \$200,000 in the preceding twelve months. In other respects the position of the property seems to have been strengthened, and regarding the future President Roswell Miller says:—"The prospects for business the coming year are good. The crop of small grains on your lines is the best there has been for several years, and general business promises well." One of the most satisfactory features of the report is that the growth of general freight traffic was on a larger scale than that of purely agricultural traffic, so that its recent spell of prosperity was by no means entirely due to the good crops and high prices for cereals. The Wabash

has to rub along with a much lower rate than the Milwaukee road. Last year its average rate per ton per mile was only .624 of a cent, and it fell from .661 of a cent—the rate in 1896-7. President Ashley, in his report, repeats the well-known wail about "unregulated competition," though he is forced to admit that the "rate problem is as far from a satisfactory solution as ever." After referring to the disappointment regarding Congressional relief to the railways, he points out that some compensation for falling profits from operation has been found in the reduction of interest on bonds, though the Wabash, we may add, has not been in a position to benefit much by this means. However, economy in expenditure has continued in evidence, and in spite of declining rates a gross increase of \$1,681,075 turns out an addition to the net earnings applicable for interest of \$373,163. This enables the company to meet all its charges, with \$401,496 to spare, against a "surplus" of only \$28,336 in 1896-7. This surplus has to be applied, however, in part reduction of a floating debt of \$800,000 incurred in 1894 and 1895, when the current net earnings did not suffice to pay charges in full. Compared with 1894-5 the Wabash showed an improvement last year of \$944,000, but the fact that it was left at the close of a good year with a further \$400,000 of floating debt to wipe away shows how hopeless in ordinary circumstances the position of this road is. The Norfolk and Western had to be content with an even lower rate than the Wabash, for its average receipt per ton per mile was .4044 of a cent for 1897-8, and .4460 of a cent in 1896-7. President Fink is certainly entitled under these circumstances to the further growl which he indulges in. "The evil of rate-cutting" seems to have passed from the acute to the chronic stage, and "ordinary remedies are no longer effective," he says. British investors had come to that conclusion years ago. Like the Wabash, the Norfolk has overcome the rate difficulty by means of a large growth in traffic and economy in working. After meeting all fixed charges, there was a sum available of \$1,138,000. This left a surplus of about \$230,000 out of the profits of the year to June 30th last, after meeting the full dividend of 4 per cent. on the adjustment preferred shares, which is, of course, contingent on the profits. The company in its reorganised form goes forward as at June 30th last with a "surplus" of \$690,000. We may recall that on February 12th last we foreshadowed the payment of the full 4 per cent. on the preferred. The fact that \$1,334,596 was charged to capital account in the past year is apparently not liked in some quarters; but as a prominent English firm of auditors certifies to the correctness of the accounts, this may be regarded as evidence that these charges were justified, though, all the same, more prosperous roads might have met these outlays out of revenue.

### THE OTTOMAN RAILWAY.

The report of the Ottoman Railway for the period to June 30th last is indeed a sorry document, and must come as a serious damper to those people who bought the shares at 18 about a year ago, when they were being actively "tipped" by a section of the press. Just a year ago—on September 25th, 1897—we said "we would warn possible buyers at the present level that the price has already risen from 11 this year, and the dividend record of recent years is by no means so good as to warrant a much higher level." Well, the price now has fallen again to 11, for the 20l. share, and it is dear enough at that, judging by the report before us and certain other points about the company's outlook which that document discreetly ignores. The receipts for last half-year fell off by 23,617l., whilst a saving in expenses was effected of only 4,932l., so that net profit

declined by 18,685*l.* As the interest, &c., charges of the company for the six months come to 75,371*l.*, whilst the net earnings plus the balance brought from last year only amounted to 58,819*l.*, a debit balance of 16,552*l.* has to be carried forward to the current half-year. For the first half of 1897 there was a surplus over obligatory charges of 3,448*l.*, so that in the net result the company was worse off at June 30th last by exactly 20,000*l.* And to make matters worse there is already a published decrease in traffic for the current period of 28,759*l.* for only eleven weeks. As the margin over fixed charges last year was only 59,960*l.*, it looks very probable that this will be wiped away, and with a few more traffics like those recently published the dividend outlook for the shares will be dismal indeed. For 1897 a dividend of 22*s.* per share was paid, requiring about 49,000*l.*, and this may almost be regarded as swallowed up already. In our article of September 25th, 1897, we drew especial attention to the dangerous character of the company's capitalisation, and remarked that the "Council of Administration would do well to take advantage of the comparatively good times in which the company now finds itself to rearrange its obligations on some more prudent basis, though perhaps it is too much to expect this of such a notoriously sleepy body." We are afraid the board will have occasion ere long to deplore their dilatoriness in this matter, for unfortunately the position of the company and its prospects are such as to render default one of the most likely occurrences of the next year or two. If traffics continue at the same level as the recent returns, the company will find itself at the end of the year with a deficit in its fixed charges of a considerable amount to be provided—from whence it is difficult to discover, for the company has no available resources, and on June 30th had as much as 78,415*l.* of capital receipts in use for current purposes. The explanation of the decline in traffic given in the report is that, whereas in 1897 "the seasons were favourable and the harvests were abundant, the weather of the last winter and spring was exceptionally severe, and the crops since grown have been consequently poor." We are afraid this is not even half the truth. The statement contained in the general manager's report that "the Cassaba Railway with its extension to Kara Hissar was worked throughout the half-year on full mileage" has a more immediate bearing on the decline in traffic, if we mistake not. In February last, in dealing with railway developments in Asia Minor, we pointed out that the extension of the Smyrna-Cassaba line from Alashehr to Kara Hissar would parallel the Ottoman Railway, and that it "might divert from the older system the most profitable of its traffic—that arising in the district beyond Diner, to which it now seeks to extend." By its extension the Cassaba line has a junction with the Anatolian Railways, and thus cuts away from the Ottoman Railway its most valuable traffic. The negotiations which have been proceeding between the Ottoman Railway and the Turkish authorities for the desired concession which would place the English company in a position to compete on all fours with the Cassaba line have apparently not had the desired effect, for an ominous silence on this matter is preserved in the report. For many years the Ottoman Railway has sought for this concession (without a guarantee) from Diner to Tchai, which would give it a junction with the Anatolian Railways at a point south of its existing junction with the Cassaba line. As we pointed out in our issue of February 26th last, "the position of the shareholders of the Ottoman Railway is not an enviable one, for even were the proposed extension granted it would still have to face the competition of the Smyrna-Cassaba line." Without the prolongation of the Diner line, however, the Ottoman

Railway is practically cut off from its principal source of traffic, and the position not only of its shareholders but of its debenture-holders as well is precarious indeed.

### PASSING NOTES.

The traffic receipts for the week ending September 18th, on thirty-three of the principal lines of the United Kingdom, amounted to 1,841,999*l.*, which was earned on 19,253½ miles. For the corresponding week in 1897 the receipts of the same lines amounted to 1,814,883*l.*, with 19,034½ miles open. There was thus an increase of 27,116*l.* in the receipts, and an increase of 219 in the mileage. The aggregate receipts for twelve weeks to date amounted on the same thirty-three lines to 22,479,691*l.*, in comparison with 22,042,179*l.* for the corresponding period last year; increase, 437,512*l.*

The half-yearly report of the Lanarkshire and Ayrshire Railway Company states that a contract has been entered into for the construction of railways Nos. 1, 2, 5, and 6, authorised by Parliament last year, and the works are in active progress. At a special general meeting of the company, held on Tuesday, it was resolved:—"That for the purpose of raising additional capital the company be, and they are hereby, authorised to raise and create under the powers of the Lanarkshire and Ayrshire Railway Act, 1897, the sum of 150,000*l.* by the creation and issue of new ordinary shares or stock on such terms and conditions, and at such times as the directors of the company from time to time may think proper."

Fraser's Railway Door Controller Syndicate, Limited, is the title of a company which has just been formed, with a capital of 5,000*l.* in 1*l.* shares, to acquire certain patents relating to an invention known as the new and improved mechanism for opening and closing doors of railway carriages, and for indicating the stations stopped at, to develop, deal with, and turn to account the same, and to adopt a certain agreement. The directors are F. W. Baker, S. A. Bird, C. M. Rae, and R. A. Fraser. Qualification, 50*l.* Remuneration, 100*l.* per annum and a per-centage of the profits, divisible. Registered by F. C. Annesley, 35, Lincoln's-inn-fields, W.C.

At the half-yearly meeting of the Leeds and Liverpool Canal Company, the chairman said that was practically the first period the canal had benefited from the improvements begun in 1892 and completed last year in the section from Liverpool to Wigan and the branch from Wigan to Leigh. The deepening of the canal and the improvement of the banks in that section covered a distance of 36 miles of the main canal and 7½ miles of the Leigh branch, and there were besides costly improvements in Liverpool and Bootle.

The Scotch railway traffic returns for the past week are exceedingly satisfactory. In every case they compared with heavy takes and large increases in the corresponding week, and now they have been exceeded. In the same week in 1897 the Caledonian had an increase over the like week in 1896 of 4,225*l.*, the North British 2,948*l.*, and the Glasgow and South Western 1,134*l.* The gains now announced on these—2,867*l.*, 4,657*l.*, and 1,468*l.* respectively—show healthy expansion all round.

The half-yearly report of the King's Lynn Docks and Railway Company records the death of Mr. J. S. Valentine, the chairman of the company. Mr. John Crossley has been appointed chairman in his stead, and Mr. Frederick Valentine has been elected to fill the vacancy at the board. The directors recommend the payment of the full dividends on the 1869 preference stock and the consolidated preference stock, which will absorb 2,985*l.* and leave 1,372*l.* to be carried forward.

The light railway between Flamborough and Bridlington is likely soon to be constructed. On Saturday an inquiry was held at Bridlington by the Light Railway Commissioners into a petition by the promoters to increase the company from 45,000*l.* to 60,000*l.*, and borrowing powers from 15,000*l.* to 20,000*l.* An extension of time for the completion of the work was asked for—from 1900 to 1901. No opposition was offered

At Ayr, on Wednesday, the Light Railway Commissioners held a public inquiry into the application by the Glasgow and South Western Railway Company for an order authorising the construction of the Maidens and Dunure Light Railway. After hearing evidence, the chairman stated that the Commissioners would recommend the Board of Trade to issue an order.

A belated report on railway accidents which occurred in the year 1897 has just been issued as a Parliamentary Blue-book. Why it should be necessary to trot out again in August statistics which had already been issued to the world in May last is one of those things which nobody outside a Government department can comprehend.

The Midland Railway Company have offered a reward of 100*l.* for information leading to the apprehension and conviction of the person or persons concerned in placing obstructions on their main line near Wellingborough on the 9th inst. and near Bedford on the following night.

Work was started last week in connection with the Paisley and Barrhead District Railway. The line will be 12 miles long, and will branch off the Caledonian near Paisley. Mr. John Watt, Glasgow, is the contractor, and the cost is put at 243,855*l.*

The Sunderland Corporation on Thursday decided to obtain powers to work the tramways in the town, which are at present worked by a company. They also decided to establish the electric overhead trolley wire system in lieu of horse power.

The Light Railway Commissioners have refused the application of the British Electric Traction Company for powers to make a light electric railway between Glasgow and Paisley and district.

The Earl of Moray has been appointed a director of the Highland Railway Company, and Mr. W. Roberts, C.E., engineer-in-chief.

The ceremony of cutting the first sod of the Goole and Marshland Light Railway took place on Thursday at Boltgate, Eastoft, Goole.

## Money and Stock Markets.

*The monthly settlement in Consols takes place on the 3rd prox.; the fortnightly settlement in other Securities commences on the 27th inst.*

### CITY, FRIDAY EVENING.

The feature of the week in the MONEY MARKET has been the somewhat unexpected action of the Bank of England directors in raising the official rate of discount from  $2\frac{1}{2}$  per cent. to 3 per cent. The effect of this step has been to unsettle the discount market, which, however, the Bank is now getting well under control. To-day three months' bills were quoted  $2\frac{3}{4}$  to  $2\frac{7}{8}$  per cent. Call money was not obtainable under  $1\frac{1}{2}$  per cent., nor short loans under  $1\frac{3}{4}$  per cent. The private banks have raised their deposit rates by  $\frac{1}{2}$  per cent., but the discount houses have raised theirs by 1 per cent. The Bank Return issued yesterday shows that the exports of gold have been partly counterbalanced by the return of notes and coin from circulation, so that the net decrease in the reserve amounts to little more than half a million, whilst the proportion of reserve to liabilities has risen from  $49\frac{1}{4}$  to  $50\frac{3}{4}$  per cent. Revenue payments have added nearly a million to the Government deposits, and the total decrease in the securities, most of which is doubtless due to the measures taken by the Bank to obtain control of the market, amounts to more than 2 millions. The private deposits are thus  $3\frac{1}{2}$  millions lower. The Bank

yesterday sold 169,000*l.* United States gold coin, and 105,000*l.* in bar gold. These are the only bullion operations since the issue of the weekly Return.

Silver bars are now quoted at 28*½d.* per oz., being 3-16*d.* higher on the week. A year ago the price was 26*½d.*

Eastern exchanges are telegraphed as follows:—Bombay, 1*s.* 3 15-16*d.*; Calcutta, 1*s.* 3 15-16*d.*; Hong Kong, 1*s.* 11*½d.*; Shanghai, 2*s.* 8*½d.*; Singapore, 1*s.* 11 15-16*d.*

The premium on gold at Buenos Ayres has fallen during the week from 173·20 to 165·00 per cent., making the paper dollar (nominally worth 4*s.* 2*d.*) now actually worth 1*s.* 5·96*d.* A year ago the premium was 188 per cent., and the value of the paper dollar 1*s.* 4·50*d.*

The Valparaiso 90-day exchange comes over to-day at 12 11-16*d.*, being unaltered on the week. A year ago it was 17*½d.*

The Rio de Janeiro exchange on London is 7 13-16*d.*, being 1-16*d.* higher on the week. A year ago it was 7 13-32*d.*

The Bankers' Clearing-house return for the week ending September 21st, 1898, shows a total of 159,106,000*l.*, as compared with 126,131,000*l.* for the corresponding period last year.

Subjoined is a comparison of the present position of the Bank of England, the Money Market, the prices of Consols, French Rentes, &c., with the position at the corresponding period of last year:—

	At Present.	Same Week last Year.
Coin and Bullion .....	£33,804,883	£34,637,078
Total Reserve .....	£23,495,218	£24,349,603
Proportion of Reserve to Liabilities...	50 <i>½</i> per cent.	50 <i>½</i> per cent.
Notes in Circulation .....	£27,109,665	£27,087,475
Bank Rate of Discount .....	3 per cent.	2 <i>½</i> per cent.
Open Market ditto .....	2 <i>½</i> per cent.	2 <i>½</i> per cent.
Consols (account) .....	109 <i>½</i>	111 <i>½</i>
French Rentes (account) .....	102 <i>f.</i> 27 <i>c.</i>	103 <i>f.</i> 30 <i>c.</i>
Paris Cheque Exchange .....	25 <i>f.</i> 29 <i>c.</i>	25 <i>f.</i> 20 <i>c.</i>
New York 60 days ditto .....	\$4·81 <i>½</i>	\$4·82 <i>½</i>

The STOCK MARKETS continue to be disturbed by the political news from Paris, Pekin, and St. Petersburg, and prices naturally show a declining tendency. In addition to this there is the unsettled state of the money market, which is affecting the Government stocks and the other gilt-edged securities. British railway stocks are further adversely influenced by the indifferent traffic returns issued this week. There has been a good deal of profit-taking lately by bulls of Yankee rails, which has caused a set-back in this department. In Canadian Rails there is very little doing, but the tone is weak in sympathy with Americans. In Foreign Rails the feature has been a mild boom in Nitrate shares, to which we called attention in our last issue. Even at the enhanced price they are quite safe to hold for a further rise by and bye, but we are not likely to witness any sensational developments just yet. The debentures, which are up 4 on the week, are good for a further 5 or 10 point rise. Mexican Rails have not yet "caught on," but they will have their innings soon. Manila debentures have put another point, and there is no need to add what we have recently written concerning them. Argentine rails are kept back by the news respecting the boundary row with Chili. The traffics of these lines have mostly been very good lately, and are likely to continue so. Western of Havana and United of Havana bonds and shares are dull and a set-back here is not unlikely, and the state of affairs in Cuba is deplorable—bordering almost on anarchy. Ottoman Railway shares have shed a further 10*s.*, and certainly the position and immediate prospects are not very cheering.

The principal movements *on the week*, so far as they relate to securities in which the readers of this journal are likely to be most interested, are set forth in the following table:—

Name of Stock.	Rise.	Fall.	Name of Stock.	Rise.	Fall.
<i>British Funds, &amp;c.</i>

Applications have been made to the Stock Exchange Committee to allow the following securities to be quoted in the Official List:—Bechuanaland Railway Company, Limited—2,000,000*l.* 5 per cent. first mortgage debentures, Nos. 1 to 2,400 of 10*l.* each, 2,401 to 3,000 of 50*l.* each, and 3,001 to 22,460 of 100*l.* each. Great Western Railway—further issue of 2,450,000*l.* consolidated ordinary stock. Tottenham and Forest-gate Railway Company—150,000*l.* 3 per cent. guaranteed preference stock.

The Stock Exchange Committee has ordered the undermentioned securities to be quoted in the Official List:—Baltimore and Ohio Railroad Company—Mercantile Trust Company's engraved certificates of deposit for 5 per cent. bonds of 1885; 100-year 5 per cent. consolidated mortgage bonds of 1888, due 1988; 4½ per cent. terminal mortgage bonds of 1894; sterling 6 per cent. bonds of 1872, due 1902; sterling 6 per cent. bonds of 1874, due 1910; sterling 4½ per cent. bonds of 1883; sterling 5 per cent. bonds of 1877, due 1927; and common stock, in lieu of the certificates of deposit, issued by Messrs. J. P. Morgan and Co., Messrs. Brown, Shipley, and Co., and Messrs. Speyer and Co.; Pittsburgh and Connellsville Railroad Company—Mercantile Trust Company's engraved certificates of deposit for consolidated mortgage 6 per cent. bonds, in lieu of the certificates of deposit issued by Messrs. J. P. Morgan and Co., now quoted.

Messrs. Thackeray and Co., of Cardiff, under date September 22nd, report as follows:—Barry undivided, 257½ (a fall of 1½); ditto preferred, 123 (unchanged); ditto deferred, 134 (a fall of 2); Cardiff preferred, 114 (unchanged); Port Talbot 9½ (a rise of ½); Rhondda and Swansea Bay, 4½ (a rise of ½); Rhymney undivided, 267½ (unchanged); ditto preferred, 121 (unchanged); ditto deferred, 148 (unchanged); Taff Vale, 78½ (a fall of ½); Vale of Glamorgan, 128½ (unchanged). The market for South Wales rails has been of a somewhat restricted character during the past week. Barry allotments have again been the chief attraction, the price at the close 4½ 45 being a little weaker. Port Talbots and Rhondda ordinary are in request at enhanced prices, whilst Taff Vales are a little easier.

**Royal Trans-African Railway.**—The report has been issued of the Commission appointed by the Portuguese Government to investigate the affairs of the Compagnie Royale des Chemins de Fer Transafricains. Though the details of the report are being withheld, it is understood that the Commission recommend the Government to grant a further sum in aid of the company, in order to render possible the completion of the line to the left of the Lucalla river, and in order to maintain the extraordinary expenses mainly caused by the high gold premium. It is believed that a capital of 1,200 contos would be required for this purpose, and the Portuguese Government would extend its subsidy of 300 milreis per kilometre of line from ten to twelve years, with a view to assisting the company to obtain the loan on this basis.

## Directors' Reports.

### BOLIVAR RAILWAY.

#### CAPITAL.

The authorised capital is 500,000*l.* in ordinary shares, and 200,000*l.* in 6 per cent. debenture stock. Of the share capital 488,000*l.* has been issued, and of the debenture stock 133,500*l.* The remaining 66,500*l.* debenture stock is not to be issued without the consent of a meeting of the holders of the debenture stock. The cost of the railway and property has been 590,086*l.*

#### REVENUE, &c.

The accounts for the year ending June 30th, 1898, show gross receipts as follows:—Bolívar Railway, 28,784*l.* (against 35,631*l.* in 1896-7); Barquisimeto Railway, 25,844*l.* (against 32,175*l.*), less rental of line 14,214*l.*—11,630*l.*; total, 40,414*l.* The expenditure was as follows:—Bolívar Railway, 14,075*l.*; shipping charges, 5,246*l.*; Barquisimeto Railway, 12,672*l.*; general charges (London), 2,292*l.*; total, 34,286*l.* The net profit was thus 6,128*l.*, and adding balance from previous account, 4,095*l.*, interest received 160*l.*, and transfer fees, &c., 31*l.*, the total net revenue was 10,386*l.*, which is disposed of as follows:—Debenture interest, 8,010*l.*; loss in exchange and commission on drafts, 245*l.*; interest and discount, 13*l.*; depreciation of rolling stock, 240*l.*; income-tax, 96*l.*; balance carried forward, 1,782*l.* The report states:—

"The very serious decrease in the traffic earnings is to be accounted for to a large extent by a revolution which broke out in the month of February, and paralysed all business activity, and to an epidemic of small-pox, which has also interfered severely with traffic and the current course of trade. Some portion, however, of the decrease is due to the lower freight rate upon coffee, which had to be adopted to meet the heavy fall in the market price of that article. The board is happy to report that the revolution was quelled in the month of June, and since that time the traffic has shown signs of improving owing to the lower rates offered to merchants. And it is to be hoped that before long the traffic returns may show more satisfactory results. The epidemic of small-pox has not yet disappeared, although it interferes less with this company's railroad than with others, the main obstacle being the difficulty encountered at the port of Puerto Cabello, to which the traffic of this company's line is consigned. The increase of passenger traffic shown in the revenue account is attributable to the carriage of troops by the Government. There is due from the Government to the company for the transport of troops and other services in connection with the revolutionary movement a sum of 6,598*l.*, payment of which is promised by the Minister; but, unfortunately, the Government is at present very short of funds. The expenditure for the past year, as appearing in the revenue accounts, was 34,286*l.*, and, compared with twelve-thirteenth of the expenditure reported in the previous account, which covered a period of thirteen months, shows a decrease in working expenses of 4,215*l.* The working expenditure now reported includes the following special outlays on the Bolívar Line, viz:—Bridge renewal, 672*l.*; ballasting, 279*l.*; sleeper renewal, 1,273*l.*—2,224*l.* The board has the satisfaction of reporting that the company's line is now completely ballasted with slag. The company has collected from the receivers of the Quebrada Company the sum of 16,998*l.* in final settlement of the receivership. The directors in their last report estimated the amount to come from this source at 17,000*l.* Mr. John McMillan, who has been general manager of the railway since August, 1894, having resigned in consequence of his determination to retire from active business life, the board has appointed Mr. Arthur Drew Thomas as his successor, and that gentleman sailed for Venezuela on August 24th last. The Aroa Mines, Limited, has continued the sinking of its shaft; but the work is not yet sufficiently advanced to warrant any expression of opinion as to the result. Should the mine be reopened it may be expected to furnish the railway with considerable traffic. It will be seen from the revenue account that the operation of the Barquisimeto Railway has entailed a loss to the Bolívar Railway of 1,042*l.*, and, as it is evident that some fresh arrangements must be made to protect this company, the board has given notice to the Barquisimeto Company to terminate the existing working agreement on May 31st, 1899, and proposes in the meantime to negotiate for a renewal of the agreement upon more equitable terms."

### OTTOMAN RAILWAY.

#### CAPITAL.

The total expenditure on capital account to June 30th, 1898, amounted to 3,648,065*l.*; whilst the receipts were 3,726,480*l.*—namely, shares, 20*l.* each, 891,940*l.*; debentures, 6 per cent. (repayable 1907), 709,600*l.*; debentures, 5 per cent. (due 1910), 891,000*l.*; debentures, 5 per cent. (due 1935), 1,199,940*l.*; debentures redeemed out of revenue, 34,000*l.*

#### REVENUE.

The accounts for the half-year ending June 30th, 1898, show a gross revenue of 112,625*l.* (in comparison with 136,242*l.* for the corresponding half of 1897), a total expenditure of 65,008*l.* (in comparison with 69,940*l.*), and a net profit, including 299*l.* sundry credits, and 10,903*l.* brought forward, of 58,819*l.* Debenture interest absorbed 73,565*l.*; discounts, &c., 208*l.*; and sinking fund, 5 per cent. debentures, 1,597*l.*, leaving a deficit of 16,552*l.* Length of line open, 322½ miles.

#### TRAFFIC, &c.

The report states:—

"The receipts for the current six months show a considerable decrease

as compared with those for the corresponding period of 1897. This decrease is due to the fact that whereas in that year the seasons were favourable and the harvests were abundant, the weather of the last winter and spring were exceptionally severe, and the crops since grown have been consequently poor."

The general manager reports under date September 1st, 1898:—"The goods traffic of the half-year was much curtailed owing to the duration of winter and frost, the weather not being favourable to either the winter or spring-sown crops in either the upper or lower districts. This caused the retention of the stocks of grain that usually come forward after March. This forecast was unfortunately verified by the very short harvests of the present year in wheat and barley through all our district, and, from what can be learnt, the whole of Anatolia. The scarcity of produce also extends to dry fruits, particularly figs. Only valonea and olive oil are spoken of as an average. There is also a great want of winter fodder for cattle. The gross traffic of the year to June 30th, 1898, stands fourth of all corresponding. The Casaba Railway, with its extension to Kara Hissar, was worked throughout the half-year on full mileage."

### BUENOS AYRES AND ROSARIO RAILWAY.

#### REVENUE.

The results of the working for the half-year ending June 30th, 1898, as compared with the corresponding period in 1897, are shown in the following summary:—

	1897.	1898.
Passenger traffic .....	£117,508	£125,303
Goods traffic .....	117,440	264,940
Parcels .....	8,791	10,431
Miscellaneous .....	7,520	11,408
Carriage of company's material, &c. ....	3,776	5,418
Gross receipts .....	£315,035	£417,500
Working expenses .....	188,549	216,349
Net receipts .....	£126,486	£201,151

From the net revenue of 201,151l. must be deducted—interest on debenture stock, 69,038l.; interim dividend on preference, and Sunchales shares, 52,314l.; leaving a balance of 79,800l. The board have declared an interim dividend on the ordinary stock at the rate of 2½ per cent. per annum, free of income-tax, for the six months ended June 30th last. The gold premium averaged 165 during the first six months of this year, against 198½ for the corresponding period of last year, and the sterling value of the paper dollar 1s. 6d., against 1s. 4d.

#### TRAFFIC, &c.

The number of passengers carried in the half-year was 1,333,844 (against 1,362,222); the quantity of freight carried, 493,850 tons (against 421,798 tons); the train mileage 972,964 (against 955,990); the receipts per train mile, 8s. 7d. (against 6s. 7d.); the expenses per train mile, 4s. 6½d. (against 3s. 11½d.); the length of line worked, 914 miles (against 915 miles); the ratio of expenses to receipts, 51·83 per cent. (against 59·85 per cent.). The report states:—

"Nothing has yet been decided with regard to the proposed New Central Station in Buenos Ayres, but the subject is still under the consideration of the National Government.

"The Independent Entrance line to Buenos Ayres under construction by this Company through the Palermo Park, has made considerable progress during the past half-year. The whole of the material for the viaduct has been shipped from this side, and the works will be rapidly pushed forward to completion. The river wall for the extension of this line to the Madero Docks is now practically finished, and every effort will be made to complete and open the entire line for through traffic to the Docks with as little delay as possible."

Mr. Bigby, the general manager, in his report dated August 17th, 1898, says:—"The effects of the conversion of the currency receipts into sterling has been to cause an improvement of about 37,000l. The passenger traffic has not been very satisfactory, as it shows a decrease in numbers of 28,378. There has been a considerable decrease in first-class bookings throughout the line, especially on long-distance travel, the cause of which is, no doubt, the impoverished state of the country, owing to the bad cereal crops of previous years which the recent good harvest has not quite restored, and to the great shrinkage in business in Tucuman and the North arising from the precarious state of the sugar industry. Season-tickets, however, show an increase of nearly 2,000l., and the local service is satisfactory. The goods traffic has on the whole been satisfactory, representing an improvement in receipts of 87,500l. The greater portion of this is due to the cereal crop, which, though greatly injured by locusts and drought south of Galvez, and practically destroyed on the Santa Fé branch, gave excellent results on other parts of the system, especially on the Morteros branch. The increased tonnage of wheat, linseed and maize was 115,922, and of flour 6,900, which together yielded an increase in freight of 74,481l. General goods, the movement in which is a good index of the prosperity of a district, show the satisfactory increase of 9,324 tons in weight and 20,870l. in money. There were also considerable increases in wine, yerba, timber and firewood, tallow, paper, &c. Against these improvements must be set the somewhat heavy decrease in alcohol and sugar of 8,786l. and 6,762l. respectively, due to the 1897 crop being much smaller than that of 1896, and also partly to the lower rates in force. The potato crop also was a failure this year owing to severe frosts—the loss from this source was 8,297l. Of the increase of 27,800l. in the expenses, the sum of 14,336l.

is due to the appreciation of the paper currency, 8,000l. to the additional appropriation to maintenance, renewal, and casualty fund, leaving the actual increase of expenditure for the half-year at 5,264l., which is much more than accounted for by the cost of working two new stations, five new signal cabins, providing ten additional road guards at level crossings, and the extra cost of hauling the additional tonnage. As already mentioned, the cereal crop in our district was on the whole satisfactory, and the prices received, especially for wheat, were very good, so that the colonists have been able to clear off to a great extent the liabilities they had been obliged to incur through the failure of the previous crops, but the result has not been sufficient to leave much margin for anything beyond actual expenses, so that general business throughout the country is much slacker than was anticipated. Though the quantity of grain moved was not so great as in some previous years the gross receipts for the half-year were the highest we have yet attained. The present condition of the grain district is very good, and the area under cultivation large. The locusts are not so numerous as at this time last year, and as the organisation for destroying them is more perfect, it is hoped that even less damage than was done last year will be caused, should they come down in force later on, as is most probable. The other principal source of our traffic—that is, the sugar industry—is, I am sorry to say, in a very unsatisfactory state, and we must anticipate a much smaller crop than last year, and as the country is still overstocked with sugar, notwithstanding the bounties offered by the Government to promote export, prices are still ruling low, so that we have been obliged to continue the low rates adopted last year. Fortunately, owing to the intervention of the Railway Board, we have been able to make an agreement with the other competing lines to the north, which I trust will put a stop to the methods which had been adopted to divert traffic to the other and more circuitous routes, thus depriving us of the advantages we should naturally enjoy from the position we occupy of being much the shortest and only direct route by which goods can be transported without transshipment between the capital and the north. When the district has recovered from its present depressed state I have no doubt we may anticipate greatly improved traffic."

## American & Canadian Railways.

### NORFOLK AND WESTERN.

From the report of this company for the year ending June 30th, 1898 (the first complete year since the reorganisation), we take the following. For purposes of comparison figures for the corresponding twelve months are given:—

	1896-7. Nine mos.	1897-8. Year.
Passenger earnings .....	\$902,194	\$1,467,532
Freight earnings .....	6,518,925	9,306,899
Mail, express, &c. ....	311,019	461,692
Total gross earnings .....	\$7,732,139	\$11,236,123
Total operating expenses and taxes ...	5,628,035	7,886,099
Net earnings .....	\$2,104,124	\$3,350,024
Other receipts .....	16,182	32,963
Total net income .....	\$2,120,306	\$3,382,987
Interest on funded debt and Car-Trust obligations .....	\$1,645,146	\$2,239,433
Dividends .....	—	454,198
Miscellaneous .....	15,311	4,605
Total disbursements .....	\$1,660,457	\$2,698,236
Balance—surplus .....	\$459,849	\$684,751

Since reorganisation the dividends paid have been three (November 15th, 1897, and February 15th, 1898, 1 per cent. each, and August, 1898, 2 per cent.) on adjustment preferred shares, 4 per cent. in all, amounting to \$908,934, leaving balance to profit and loss after deducting August, 1898, dividend \$689,862.

The length of line operated was 1,561 miles (against 1,569 miles in the previous year); the number of passengers carried 1,684,851 (against 1,716,444); the average rate per passenger per mile, 2·197 cents (against 2·318 cents); the quantity of freight moved, 8,276,948 tons (against 6,967,672 tons); the average rate per ton per mile, 0·404 cent (against 0·446 cent); the ratio of operating expenses to receipts 70·18 (against 75·00) per cent.

President Fink in his report states:—

"The earnings, both gross and net, exceed those of any previous year in the history of the road. As compared with the results of operation for the year 1896-97 (including three months' operation by the receivers, and nine months of operation by the company), the gross earnings show an increase of \$698,400, or 6·63 per cent. The operating expenses show a decrease of \$17,351, or 0·22 per cent., and the net earnings show an increase of \$715,751, or 27·17 per cent.

"While there has been a general improvement in business throughout the country, the section from which the company draws its traffic has not been highly prosperous during the year. Anticipation of war, and actual war, have checked the revival of business. Nor has the company derived any considerable

advantage from the war in the movement of troops. Under these circumstances the results of operation for last year are highly gratifying. These results illustrate the recuperative power of the property, and confirm the opinion we expressed in our last report, that the company has been organised on a safe and stable basis.

"The company has already derived great benefits from the expenditures made in putting the property in good condition, and in providing additional facilities for the economical handling of its traffic. As a large per-centage of the company's freight business is of the lower classes, and can only be secured at rates that leave a small margin of profit, it is necessary to secure a large volume of freight, and to reduce the cost of transportation to a minimum. It is therefore the part of wisdom to continue such expenditures as will result in a reduction of the operating expenses, and especially the cost of the movement of freight. The work of reducing grades, wherever practicable, should be prosecuted as rapidly as may be found consistent with economy.

"The rates in the southern territory have been fairly well maintained during the year, but rates of freight in the territory of the Joint Traffic Association have been and are in a demoralised condition without precedent in the history of unrestrained competition. The evil of rate-cutting seems to have passed from the acute to the chronic stage, and ordinary remedies are no longer effective. Efforts made from time to time by the co-operative fast freight lines, of which this company is a member, to improve the rate situation by agreements with their competitors, have invariably resulted in a diversion of competitive traffic from those lines and a loss of revenue to this company.

"Congress has adjourned without giving the railroads the hoped-for relief by amending the Act to regulate commerce so as to permit a division of competitive traffic, improperly termed pooling.

"On the other hand, Congress did not enact into a law the Cullom Bill, which was introduced in the Senate at the last session of Congress. That Bill, if enacted into a law, would have conferred upon the Interstate Commerce Commission additional and extraordinary powers, including the power to establish rates on all interstate traffic.

"The per-centage of operating expenses was 67.17 per cent. of the gross earnings (taxes excluded). In view of the low average rate per ton per mile (0.404 cents), and in view of the liberal expenditures that have been made in the maintenance of the road and equipment, this per-centage must be considered quite low."

#### WABASH.

This company has issued its report for the year ending June 30th, from which we abstract the following:—

	1896-7.	1897-8.
Passenger earnings .....	\$2,837,974	\$3,528,746
Freight earnings .....	7,604,770	8,524,733
Mail, express, &c. ....	1,084,044	1,154,383
Gross earnings .....	\$11,526,788	\$13,207,862
Operating expenses .....	7,979,157	9,304,779
Net earnings .....	\$3,547,631	\$3,903,083
Other income .....	195,347	292,065
Total net income .....	\$3,742,978	\$4,195,148
Rents, taxes, and other prior charges ..	\$1,020,097	\$1,099,107
Interest on bonds and rentals of leased lines .....	2,694,545	2,694,545
Total fixed charges .....	\$3,714,642	\$3,793,652
Balance .....	Cr. \$28,336	Cr. \$401,496

The average mileage operated was 2,061 (against 1,936 in the previous year); the number of passengers carried 3,517,682 (against 3,149,170); the average rate per passenger per mile, 1.957 cents (against 2.087 cents); the quantity of freight moved, 6,382,831 tons (against 5,954,760 tons); the average rate per ton per mile, 0.624 cent (against 0.661 cent); the ratio of operating expenses to receipts, 70.45 (against 69.22) per cent.

The balance-sheet shows a funded debt of \$81,534,000; preferred stock, \$24,000,000; and common stock, \$28,000,000. The total balance at debit of profit and loss account is now \$517,190.

President Ashley in his report states:—

"As compared with the traffic operations of the previous fiscal year, the changes are as follows:—In gross earnings, an increase of \$1,681,075; in operating expenses, an increase of \$1,325,620; in taxes, a decrease of \$30,484; in miscellaneous receipts, an increase of \$67,381; in balance of joint track rentals, an increase of \$80,126; in net earnings applicable to interest, an increase of \$373,163. The increase in miscellaneous receipts is mainly due to larger dividends on stocks represented in the investment account. The increase in the balance of joint track rentals is mainly the result of the contract with the Grand Trunk

Railway Company, reference to which will be made in another part of this report.

"The surplus net earnings of the year amounting to \$401,496, has been carried to the credit of profit and loss account, in accordance with the vote of the directors, which decided that the floating debt of the company should be paid before dividends could be claimed by the holders of debenture mortgage bonds. This floating debt, which, at the close of the fiscal year ending June 30th, 1897, amounted to \$800,000, consisting of notes given for borrowed money, was the result of the payment of interest on the first and second mortgages during the fiscal years 1894 and 1895, in excess of net earnings applicable thereto. Under the stipulations of the debenture mortgage, which cover the question of dividends to this mortgage, it is provided that the amount applicable to the payment of such interest "shall be ascertained by deducting from the gross earnings of said company all current expenses for operating said railroad and such sums as in the judgment of said board of directors may be necessary to maintain and renew said road and its equipment and appurtenances, and to keep the same in good condition, and to increase its equipment to such an extent as may be commensurate with its business requirements, and to pay taxes, rentals, interest and sinking fund instalments accrued or to accrue on any and all mortgages existing on the property hereby conveyed, and to satisfy all liens and charges thereon that are or may be prior in equity to this mortgage." Under this clause it is clear that the floating debt, which represents interest payment to the senior mortgages, should be fully discharged before net earnings can be applied to dividends on the debenture bonds. But irrespective of the legal obligations of the company as thus interpreted, it is not only sound policy on the part of the company to clear off its floating debt, but it is beyond question for the ultimate advantage of the holders of debenture bonds. The possible danger of a floating debt should not be allowed to interfere with the otherwise promising and healthy financial condition of the company. This explanation of the conservative policy of the board of directors is made to answer inquiries of the holders of debenture bonds, and to justify a postponement of dividends, which strengthens the company and adds to the permanent safety and value of all its securities. This application of the surplus earnings of the year has enabled the company to pay off \$400,000 of the floating debt, which has been reduced to \$400,000 at the end of the fiscal year. Within the ensuing six months a large part of this, if not the whole amount, can be liquidated, and at the end of the present fiscal year, counting upon a continuance of fair traffic, it is not unreasonable to expect a complete elimination of these borrowed-money notes.

"The statement of floating debt does not include equipment notes amounting to \$430,692, which extend over a period of two years in monthly payments, amounting to an average of about \$18,000 per month during that period. These notes are charged to operating expenses as they mature, and will be easily provided for in monthly earnings.

The Act of Congress, which requires all freight cars to be provided with automatic couplers and air-brakes, compels railway companies to expend about \$80 per car for these improvements. This expenditure has taxed the resources of all lines severally, and has been especially oppressive to companies of moderate financial resources, and it soon became evident that quite a number of them would be unable to comply with the law. The time was consequently extended to January 1st, 1900, and this will probably render compliance with the Act less difficult. The Wabash Company will complete its changes in this respect during the next calendar year, and will then be able to economise in such expenditures. One of the embarrassments of the change required has been found in the addition of such an expense to old box cars of comparatively small capacity, ranging from twelve to fifteen tons, which are being displaced by those of so-called standard capacity of thirty tons. Many of these old cars have seen so much service that it would be a waste of money to add the automatic couplers and air-brakes required by the law. The company has therefore been compelled to provide new cars in their stead more rapidly than would have been necessary under former conditions. Recognising, however, the humane features of the law, railway companies have been anxious to meet its requirements with as little delay as possible, and the subject is only referred to here in order to account for larger expenditures for rolling stock during the last fiscal year. The opening of the Buffalo Division has also obliged the company to add considerably to its motive power and passenger equipment. Reference to the report of Vice-President and General Manager Ramsey, herewith submitted, will give more complete information on this subject, and such details as may be considered essential to a correct understanding of the policy which has governed the management in meeting the requirements of the case.

"Whoever studies carefully the railway situation in this country will be led to the conclusion that under the fierce competition of lines multiplied at a rate far beyond the rate of increase in the volume of traffic, those which are in the best physical condition, and provided with rolling stock of approved design and enlarged power and capacity, will stand the best chance of securing traffic. Box cars of modern standard are much preferred by shippers, and are more conveniently and economically handled. The scanty profits now available to transportation companies at the prevailing rates render it necessary to study economy in every direction, not only in the movement of trains and in the motive power, but in the improvement of tracks. It is not difficult to understand that in the rectification of lines and in the removal of heavy grades, as well as in providing a smooth and solid track, we add to the capacity of the motive power, secure greater speed, greater safety, and greater economy. In short, it is a self-evident proposition that the railway companies which are able to adopt the most approved methods of operation, with machinery of the best make and modern design, and tracks of substantial construction, will meet the peculiar conditions of railway traffic in this country with the best promise of success.

"In our last annual report, reference was made to a temporary arrangement made with the Grand Trunk Railway Company of Canada, under which two passenger trains were run daily, each way, between Buffalo and Detroit. This experiment was satisfactory enough to encourage the management to further negotiations with the Grand Trunk Company, and the result was an agreement covering a period of twenty-one years, which gives the Wabash the joint use of the tracks between Windsor, Buffalo, and Niagara Falls for both passenger and freight trains, and also the use of the ferry between Windsor and Detroit. Arrangements have been completed, also, with the Erie Railroad Company for the use of its line from Suspension-bridge to Buffalo, and its passenger station in that city. In connection with these terminal facilities at Buffalo an agreement has been made with the Lehigh Valley Railway Company for the use of yards for the convenient handling of freight. These arrangements appear to be sufficient to handle the traffic of the line.

"The trains began running under the new agreement March 1st, 1898, and the result, thus far, has been quite satisfactory. The additional traffic contributed to the lines of the system between Detroit, Chicago, St. Louis, and Kansas City would alone be of great advantage to the Wabash Company, but there is good reason to anticipate, besides, a fair profit above the rental on the traffic between Buffalo and Detroit.

"The stockholders will be asked at the annual meeting to approve and authorise the construction of two short lines between Hannibal, Mo., and Quincy, Ill., about 16 miles, and between Moulton and Albia in the State of Iowa, a distance of about 27 miles. The construction of these two links will save about 24 miles of distance between St. Louis and Des Moines, Ia., and give the Wabash, by way of the Hannibal-bridge, the shortest line between Quincy and Kansas City, and the amount saved in rentals of other roads now used jointly to reach the same points will offset the interest on bonds issued for the construction of the new lines. The transfer of the property now held by the Purchasing Committee will, at the same time, add to the Wabash system, the Des Moines and St. Louis road, of about 67 miles, extending from Albia to Des Moines. Although opposed, as a general proposition, to the construction of any new lines of road, these short links have seemed imperatively necessary to the proper development of the present system, especially in view of the retention of the Des Moines and St. Louis line now to be turned over to the company by the Purchasing Committee.

"Railway companies in the United States are still struggling with the difficulties of unregulated competition, and while there has been manifest improvement in the volume of traffic, and, consequently, a fair increase in net profits, it is still quite evident that the rate problem is as far from a satisfactory solution as ever. It is not so much a question of what the rates should be as how they can be maintained when agreed upon, and against this obstacle the companies involved are constantly stumbling, much to the embarrassment of associated lines, and to the discontent of shippers.

"Congressional relief, which can be furnished by legislative amendment to the Interstate Commerce Law, has hitherto been sought in vain, and the railway interests of the country have thus been jeopardised by a neglect which it is difficult to comprehend or excuse. The complicated machinery of inland transportation is allowed to work under laborious and unsatisfactory conditions, to the exclusion or indefinite postponement of improvements in harmony with the progressive spirit of the times, and yet public clamour is at once aroused if there is the least failure in service or in the accommodation of travellers.

The severe trial to which railway property has been subjected has had one good effect; it has developed economical methods of operation in many directions and thus enabled the lines to move an enormous volume of freight at a rate which, but a few years since, would not have paid running expenses, but which now yields a small although inadequate profit. Another favourable feature has been influential in partially relieving these corporations from the consequences of intense competition and meagre profits. This is to be found in the condition of the money market, which has made possible the readjustment of interest obligations as old mortgages have matured, or as bankrupt companies have been reorganised. The substitution of  $3\frac{1}{2}$ ,  $4\frac{1}{2}$  and 5 per cent. annual interest for 6 and 7 per cent. obligations has saved enough in fixed charges to neutralise a fair share of the reduction in rates of transportation, while the superabundance of capital has rendered its employment difficult except at the lower range of interest rates, and thus a great change has been brought about in the finances of railway companies, which, to that extent, compensates for the diminished revenue of the operating departments.

"Looking to the future growth and prosperity of the country, and the close connection of the transportation interest with that expansion, it is to be hoped that Congress will see the necessity of removing useless restrictions in the Interstate Law, in view of a senseless and uncontrollable competition, which, while encouraging unjust discrimination, cripples railway enterprise, limits railway extension, and renders it impossible to continue improvements which the public good demands.

"Perhaps it is not an over-sanguine anticipation to expect in the near future a more intelligent comprehension of this subject on the part of the people whose interests are so closely identified with transportation. When this time arrives the voters of the country will be anxious to remove obstacles which stand in the way of progressive development. It will then be recognised that the country itself is the chief sufferer from laws which discourage legitimate and healthy enterprise and contract the area of employment."

#### GRAND TRUNK OF CANADA.

The steamship line with which the Grand Trunk Railway Company has closed contracts for its tri-weekly service between Portland and Liverpool during the coming winter season is, according to statements made at Montreal, the Leyland Line. A representative of the company is now in New York to make arrangements for five of the company's vessels, now plying between Liverpool and New York, to be transferred to the Portland route. These vessels will take the place of the boats of the Dominion Line, which, along with those of the Allan Line, last year gave the service between Liverpool and Portland. This year the Allan and the Leyland Lines will work together on that service. It is understood that the Leyland Line will not only put five of their vessels on the Portland route this winter, but next summer those vessels will make an effort to retain the Canadian business secured during the winter months by running into Montreal instead of New York. This means that Montreal will have a new steamship line with a summer service of five vessels.

#### CLEVELAND CINCINNATI CHICAGO AND ST. LOUIS.

The report of this company for the year ending June 30th has now been issued, and enables the following comparison to be made with the previous year's working:—

	1896-7.	1897-8.
Passenger earnings .....	\$3,665,193	\$3,850,126
Freight .....	8,254,873	9,237,507
Mail, express, &c. ....	912,449	930,857
Net earnings .....	\$12,832,515	\$14,018,290
Expenses and taxes .....	9,864,665	10,968,367
Net earnings .....	\$2,967,850	\$3,049,923
Other income .....	284,596	336,992
Total net income .....	\$3,252,446	\$3,386,915
Interest .....	\$2,687,049	\$2,708,691
Rentals .....	196,877	196,333
Dividend on preference stock $3\frac{1}{2}$ p.c. ....	375,000	375,000
Miscellaneous .....	40,214	—
Total disbursements .....	\$3,299,140	\$3,280,024
Balance .....	Dr. \$46,694	Cr. \$106,891

The share capital of the company is \$37,987,835, of which \$27,987,835 is common and \$10,000,000 preferred. The funded debt amounts to \$54,216,730. The length of line operated was 1,838 miles (against 1,838 miles); the number of passengers carried 5,093,978 (against 4,937,250); the average rate per passenger per mile 1.915 cent (against 1.964 cent); the freight carried 9,630,159 tons (against 8,223,347 tons); the average rate

per ton per mile 0.545 cent (against 0.614 cent). President M. E. Ingalls, in his report, dated Cincinnati, August 16th, says:—"The year ending June 30th, 1897, closed with a deficit after paying three dividends upon the preferred stock, the company passing the dividend for the quarter ending June 30th, 1897. During the year just closed the company has been enabled to resume dividends upon the preferred stock, and has paid three, and the indications now are that the regular quarterly dividends can hereafter be paid. There has been considerable money expended and charged to expenses to put the property in proper condition and repair some of the wastes of previous years, when the earnings were light, especially in reference to the equipment. Some of the principal items which have been spent during the year and charged to repairs (the company having made no charges to construction account for any repairs or improvements during the year) are as follows: 28.8 miles of new side-track for the accommodation of business and the passing of trains, including new yards at Greensburg, Ind., at a total cost of \$96,621. To comply with the ordinance of the city of Columbus, new stores were built upon the viaduct abutting the company's property, at a cost of \$36,589; this was charged directly to expenses, but in time there should be an income from the rent of these stores. \$326,000 was charged to expenses for new freight-cars to replace those worn out in the present and previous years; in addition to this the ordinary repairs were fully maintained, and \$56,577 expended on account of additional air-brakes and couplers to comply with the law of Congress in reference to the same. The expenditure of this money fills the numbers of the freight equipment and brings all of the same up to the company's standard, and hereafter it can be maintained with only the expense of ordinary wear and tear and replacements. Fifteen new engines were purchased and charged to expenses, to replace old and light engines worn out, at a cost of \$145,420. Seven new passenger cars of various descriptions were purchased, at a cost of \$43,000, and charged to expenses on account of renewals and replacements. Altogether, in addition to these items, the expenditures for stations, rails, ties, and ballast have been fully up to the requirements necessary to maintain the property in its present high standard of physical condition. It is anticipated that for the coming years a large sum can be saved in the expenditures for equipment and track from those of the last year. \$598,118 has been charged to expenses for taxes—an increase of about 4 per cent. over the previous year. This burden is still as serious as ever, and not much relief can be anticipated for the future. The company's extension into Louisville has proved a source of profit during the past year, instead of a loss, in addition to bringing new business to and from the other lines of the company. It will be seen by looking at the balance-sheet that the greater part of the cost of new cars and engines purchased during the year and charged to expenses is payable in monthly instalments during the next three years, with interest at the rate of 5 per cent. This liability amounts to \$417,893, and is carried under the name of 'New Equipment Account.' The outlook for business for the coming year, at the writing of this report, seems to be quite encouraging. Large crops of wheat have been harvested, and other crops look promising. The only cloud resting upon your property is the excessive competition and the low rates attending the same. This, it is hoped, can be reduced somewhat during the coming year."

#### CHICAGO MILWAUKEE AND ST. PAUL.

We are now in receipt of the full pamphlet report, and abstract therefrom the following summary of operations for the year ending June 30th:—

	1896-7.	1897-8.
Passenger earnings .....	\$5,717,496	\$5,986,840
Freight earnings .....	22,104,803	25,468,852
Miscellaneous .....	2,664,469	2,733,972
<b>Total earnings .....</b>	<b>\$30,486,768</b>	<b>\$34,189,664</b>
<b>Total expenses .....</b>	<b>18,577,539</b>	<b>21,201,567</b>
<b>Net earnings .....</b>	<b>\$11,909,229</b>	<b>\$12,988,097</b>
Sundry credits .....	162,822	131,018
<b>Total net income .....</b>	<b>\$12,072,051</b>	<b>\$13,119,115</b>
Interest on debts .....	\$7,488,747	\$7,190,413
Dividend on preference stock .....	1,896,363	2,104,245
"    on common stock .....	1,841,090	2,531,463
<b>Total disbursements .....</b>	<b>\$11,226,200</b>	<b>\$11,826,121</b>
Balance .....	Cr. 845,851	Cr. 1,292,994

The balance-sheet shows a funded debt of \$136,588,500, a preferred share capital of \$31,818,400, and a common share capital of \$46,026,600. The total balance at credit of income account is now \$9,802,695.

The length of road in operation was 6,154 miles (against 6,154 miles in the previous year); the number of passengers carried,

7,427,614 (against 7,154,689 in the previous year); the average rate per passenger per mile, 2.257 cents (against 2.277 cents); the quantity of freight moved, 12,210,055 tons (against 11,554,153 tons); the average rate per ton per mile, 1.003 cent (against 1.008 cent); the ratio of operating expenses to receipts, 60.21 (against 60.94) per cent.

Mr. Roswell Miller, the president, in his report says:—

"During the year two dividends aggregating 7 per cent. were paid on the preferred stock, and two dividends aggregating 5½ per cent. were paid on the common stock—of which the dividends paid October 21st, 1897—3½ per cent. on preferred and 3 per cent. on common stock—were from net earnings of the previous fiscal year ending June 30th, 1897.

"The prospects for business the coming year are good. The crop of small grains on your lines is the best there has been for several years, and general business promises well."

#### NEW YORK CENTRAL.

The full pamphlet report of this company for the year ending June 30th is now at hand, and shows fiscal results as follows:—

	1896-7.	1897-8.
Passenger earnings .....	\$25,250,731	\$27,496,130
Freight earnings .....	13,094,619	13,250,801
Mails, express, &c. ....	2,793,893	2,938,558
Rents and miscellaneous .....	1,875,160	2,088,751
<b>Total gross receipts .....</b>	<b>\$43,614,414</b>	<b>\$45,774,240</b>
<b>Operating expenses .....</b>	<b>27,599,911</b>	<b>29,511,014</b>
<b>Net receipts .....</b>	<b>\$16,014,493</b>	<b>\$16,263,226</b>
Dividend on Lake Shore and Michigan Southern stock owned .....	—	1,311,605
Dividend on Michigan Central stock owned .....	—	248,368
Dividends and interest on other securities .....	512,186	539,003
Interest on loans, notes, and sundry bills .....	90,027	44,700
Profits from sundry accounts .....	63,522	107,795
<b>Gross income .....</b>	<b>\$16,680,228</b>	<b>\$18,514,698</b>
Interest on funded debt .....	\$4,019,760	\$5,421,200
Rentals of leased lines .....	5,924,736	5,972,422
Taxes on real estate .....	2,048,235	1,883,240
Tax on capital stock .....	141,000	136,788
Tax on gross earnings .....	87,900	87,671
Interest on loans, notes, and bills payable .....	106,730	58,905
<b>Net income .....</b>	<b>\$12,328,361</b>	<b>\$13,560,227</b>
From this net income for the year 1897-98, \$4,954,471, there should be further deducted:—		
Reserve for redemption of 4 per cent. gold debentures of 1890 .....		\$300,000
<b>Balance available for dividend .....</b>	<b>\$4,654,471</b>	<b>\$4,654,471</b>
Cash dividends, four of 1 per cent. each .....		4,000,000
<b>Surplus for the year (transferred to profit and loss) .....</b>	<b>\$654,471</b>	<b>\$654,471</b>
Amount to the credit of profit and loss June 30th, 1897 .....		11,465,000
<b>Total .....</b>	<b>\$12,119,471</b>	<b>\$12,119,471</b>
From which deduct:—		
Payments incidental to refunding the bonded debt .....	\$2,344,998	
Payments incidental to issuing Lake Shore and Michigan Central collateral bonds .....		57,050
Certain uncollectible and depreciated accounts written off .....	293,250	
<b>Balance to the credit of profit and loss June 30th, 1898 .....</b>	<b>\$9,474,173</b>	<b>\$9,474,173</b>

The number of passengers carried was 24,074,254 (against 23,166,483); freight, 23,403,439 tons (against 20,649,810 tons); the average earning per passenger per mile were 1.86 cent (against 1.90 cent); the average earnings per ton of freight per mile were 0.61 cent (against 0.68 cent); length of line operated, 2,395 miles (against 2,395 miles).

#### ILLINOIS CENTRAL.

The report of the Illinois Central Railroad for the year ended June 30th shows:—Gross earnings, \$27,318,000—increase, \$5,207,000; net earnings, \$8,662,000—increase, \$2,287,000; net income, including the surplus dividend fund, \$11,823,000; net surplus after charges, \$5,313,000, of which are appropriated for dividends \$2,625,000, for the insurance fund and betterments \$1,726,000, and for the surplus dividend fund \$962,000. From the year's earnings \$501,000 have been taken for the insurance

fund, \$829,000 have been used for betterments commonly charged to capital account, \$396,000 have been set apart to cover the entire cost of completing the equipment of the rolling stock with automatic couplers and air brakes. The net charges to capital account for the year amount to \$1,583,000. The earnings of the St. Louis division exceeded the net charges by \$46,000, and those of the Louisville division exceeded the net charge by \$186,440. The company's stock held in Great Britain is represented by 229,252 shares.

### RAILROAD NOTES.

The Union Pacific Railroad Company has declared a dividend of  $1\frac{1}{2}$  per cent. on the preferred stock. An official statement of operations from January 1st to June 30th shows:—Gross earnings, \$7,670,579; net earnings, \$3,136,161; other income, \$606,442; fixed charges, \$1,800,000; adjustment of taxes, \$145,918; surplus, exclusive of branch lines, \$1,796,685. The net receipts from branch lines were approximately \$446,659. Of the available cash resources of the new company \$3,065,024 have been expended for new equipment.

Chicago despatches announce that at a conference held on the 16th inst. between the representatives of Messrs. Speyer and Co., of New York, and Messrs. P. D. Armour, N. B. Ream, Marshall Field, and J. J. Hill (president of the Great Northern Railway) the gentlemen above named secured the control of the Baltimore and Ohio Railway. The arrangement makes Mr. Hill a dominant factor in the reorganisation of the system, and it is said that his aim is to secure a transcontinental route, probably using the Chicago Great Western road from the Great Northern Railway's terminus in Chicago.

The report of the Missouri Kansas and Texas for the year ended June 30th shows a surplus of \$475,000, as against a deficit of \$149,000 in 1896-7, a surplus of \$16,000 in 1895-6, a surplus of \$224,000 in 1894-5, and a deficit of \$9,000 in 1893-4. The company is free from floating debt. An official of the company says that there is no probability of the preferred stock getting any dividend at present in view of the recent falling off in earnings.

The report of the St. Louis and San Francisco for the year ended last June shows a gross increase of \$893,131, and a net increase of \$346,651. The surplus, after payment of dividend and other charges, increased by \$95,379. The total surplus to profit and loss account is \$569,000. The equipment and improvement fund has been expended during the year and a small charge made to capital account.

Messrs. Blake, Boissevain, and Co. announce that a dividend of 3 per cent. (\$30 per \$1,000 Bond) has been declared on the Oregon Short Line Railroad Company Income Bond Series "B," payable in New York on and after the 1st October against surrender of Coupon No. 2. Messrs. Blake, Boissevain and Co. will be prepared to buy these coupons from to-day at the current rate of exchange.

The board of the Chicago Junction Railways and Union Stock Yards Company has declared a quarterly dividend of  $1\frac{1}{2}$  per cent. on the preferred stock, payable in New York on 1st prox. and in London a few days later.

A Montreal City despatch says advices received by officials of the Grand Trunk show that Klondyke transportation rates have taken a slump, and that they are now about half of what they were formerly.

Last week's east-bound all rail freight tonnage from Chicago amounted to 57,000 tons, the Lake Shore Line leading with 9,000 tons. In the corresponding week of last year 63,000 tons went forward.

The Chicago Rock Island and Pacific Railroad Company has declared a quarterly dividend of  $1\frac{1}{4}$  per cent.

### LATEST EARNINGS.

Second week of September.—Baltimore and Ohio South Western, \$156,000—increase, \$25,000; Chesapeake and Ohio, \$242,000—increase, \$25,000; Chicago Great Western, \$111,000—decrease, \$17,000; Denver and Rio Grande, \$181,000—increase, \$12,000; Louisville and Nashville, \$439,000—increase, \$3,000; Mexican Central, \$209,000—increase, \$9,000; Missouri Kansas and Texas, \$277,000—decrease, \$20,000; Missouri Pacific, \$525,000—decrease, \$34,000; New York Ontario and Western, \$83,000—increase, \$1,000; St. Louis and San Francisco, \$128,000—decrease, \$11,000; St. Louis South Western, \$103,000—decrease, \$2,000; Texas and Pacific, \$142,000—decrease, \$24,000; Wabash,

\$294,000—increase, \$20,000; Chicago Milwaukee and St. Paul, \$819,000—increase, \$104,000; Kansas City Pittsburg and Gulf, \$72,000—increase, \$12,000; Cleveland Cincinnati Chicago and St. Louis, \$301,000—increase, \$15,000; Oregon Railroad and Navigation, \$158,000—decrease, \$18,000; Southern Railway, \$492,000—increase, \$39,000; Norfolk and Western, \$263,000—decrease \$9,000; Northern Pacific, \$592,000—increase, \$56,000.

First week of September.—Northern Pacific, \$596,000—increase, \$100,000. The gross earnings of 67 roads in the first week of September show an increase of 6.15 per cent.

The gross earnings of 90 roads in the fourth week of August show an increase of 9.80 per cent.

Month of August.—Pittsburg Cincinnati Chicago and St. Louis, gross, \$1,390,000—increase, \$67,000; net, \$476,000—decrease, \$30,000; surplus after charges, \$222,000—decrease, \$61,000. Union Pacific Denver and Gulf, gross, \$289,000—increase, \$24,000. Chicago Great Western, gross, \$526,000—increase, \$38,000; net, \$209,000—increase, \$29,000. The latter statement includes in its operating expenses \$28,000 of items previously in suspense. Chicago and North Western, gross, \$3,414,000—increase, \$288,000. The gross earnings of 127 roads in the month of August amounted to \$48,880,006, being an increase of \$2,297,452, or 4.93 per cent.

Month of July.—Missouri Kansas and Texas, gross, \$753,000—decrease, \$55,000; net, \$121,000—decrease, \$73,000; deficit after charges, \$164,000—increase, \$164,000. Chesapeake and Ohio, gross, \$962,000—increase, \$4,000; net, \$338,000—increase, \$2,000. Philadelphia and Reading, gross, \$1,688,000—decrease, \$229,000; net, \$655,000—decrease, \$194,000. Coal Company—gross, \$1,356,000—decrease, \$720,000; net, \$99,000—decrease, \$61,000.

## General News.

### JARRAH TIMBER AND WOOD PAVING CORPORATION, LIMITED.

THE PREMIER STARTS THE NEW MILL ON THE CENTRAL ESTATE.

A Ministerial and Parliamentary party, numbering about 120 in all, left Perth, W.A., by special train early on August 5th, among those on board being the Premier (Sir John Forrest, K.C.M.G.), the Commissioner for Railways (Mr. F. H. Piesse, M.L.A.), the President of the Legislative Council (Sir George Shenton), the Speaker of the Legislative Assembly (Sir James Lee Steere), Messrs. Alex. Matheson, D. K. Congdon, F. Whitcombe, F. T. Crowder, H. Briggs, E. McLarty, and C. A. Piesse, M.L.C.'s, A. E. Morgans, B. C. Wood, George Leake, H. L. Hall, E. Solomon, F. Wallace, F. Wilson, A. Forrest, E. C. B. Locke, W. Kingsmill, N. K. Ewing, J. J. Higham, J. J. Holmes, J. R. A. Conolly, A. Y. Hassell, and H. W. Venn, M.L.A.'s; the Clerk of the Legislative Council (Mr. C. Lee Steere), the Clerk of the Legislative Assembly (Mr. W. A. Gale), the Sergeant-at-Arms (Mr. C. B. Kidson), the Engineer-in-Chief (Mr. C. Y. O'Connor), the General Manager for Railways (Mr. John Davies), the General Traffic Manager (Mr. J. T. Short), the Locomotive Engineer (Mr. R. B. Campbell), the Engineer for Existing Lines (Mr. W. W. Dartnall), the Under-Secretary for Mines (Mr. Francis Gill), the Under-Treasurer (Mr. L. S. Eliot), the Auditor-General (Mr. F. Spencer), the Under-Secretary for Railways (Mr. Alpin Thomson), the Postmaster-General (Mr. R. A. Sholl), the Inspector of Engineering Surveys (Mr. J. Muir), the Hon. Government Geologist (Mr. H. P. Woodward), and a large number of leading citizens and visitors from Fremantle and the goldfields. At Brunswick Junction Mr. J. Moore, the mayor of Bunbury, with most of the councillors and several of the leading residents of that town, joined the train, which thereupon branched off on to the Collie line recently taken over by the Government from the contractors (Messrs. Atkins and Law). This line opens some of the most picturesque scenery in the colony, and the first stopping-place was the Lunenburg mills, where the visitors were received by Mr. H. Bateman, one of the London directors of the recently floated Jarrah Timber and Wood Paving Corporation, Limited; Mr. J. C. Port, the vendor of the property, and now the general manager of the company; and Mr. W. H. Dolly, the mill manager. The party proceeded to the new mill close to the railway line, where Sir John Forrest, amid loud applause, started the machinery. An adjournment was then made to a temporary structure, in which a cold collation had been prepared. Owing to the late hour of the arrival of the train it was announced that only a short time could be spent at Lunenburg, so the proceedings were necessarily somewhat hurried. Mr. BATEMAN, in proposing the health of the Premier, thanked Sir John Forrest, on behalf of the directors of the company, for attending on that auspicious occasion, and for the honour he had done them in setting in motion their machinery, which he was

sure would be a source of revenue to the magnificent country which he saw there. (Applause.) The few days that he had been in the colony did not enable him to form that opinion which longer experience would give him, but it must be patent to all who passed through the country that one of its greatest resources, if not the greatest, was the marvellous timber that they saw around them. ("Hear, hear.") He wished to tell them that the people in the old country were beginning to appreciate the difference in the quality of the timber exported from Western Australia. If they wished to maintain the reputation of that timber, which was the best, he advised them to send only the best. He left them to form their own conclusions as to which timber it was to which he referred. (Laughter.) The PREMIER, in responding, said that, speaking for all the visitors, he could say that they were delighted to be present to witness the starting of the machinery owned by the company represented by Mr. Bateman. ("Hear, hear.") It was, indeed, an auspicious occasion. They proposed to visit the Collie coalfields, and on their road they found that a great industry had arisen and was being stimulated by the introduction of a large amount of capital from England. Nothing but good could result to the colony from the development of this industry. As Mr. Bateman had said, it was one of the greatest in the colony. He was glad that they had amongst them that day several representatives from the goldfields. They would be able to see for themselves the magnificent jarrah timber which they so much required. (Loud applause.) A little further on they would be shown that the coal, which they also required, was to be obtained, and he believed could be exported to the goldfields at a rate which would pay them to introduce it. The time at their disposal was short, owing to the delays which had taken place; but he was sure they were all pleased at that short interval, which enabled them to witness the development of the great timber industry. They wished every success to those who had invested capital in it. He proposed, "Success to the Jarrah Timber and Wood Paving Corporation," coupled with the name of Mr. Bateman. (Cheers.) Mr. BATEMAN, in responding to the toast, referred to the trouble that had been experienced by the visitors that day in getting to the Collie. To him such a thing seemed terrible. It could not have happened in the old country, and he hoped that the railway system of the colony would soon reach such a state of perfection that it would be impossible for such accidents to occur there. Mr. J. C. PORT, general manager, who was also called upon to speak, said that he hoped that the trip would be instrumental in convincing such of them as had been sceptical before that the timber was there, and that all they had required was the railway to take it to the magnificent harbour of Bunbury. (Applause.) He hoped that the Government, in framing the land regulations, would not do anything to prejudice the timber industry, in which 2,000,000*l.* of money must have been invested.

### THE GREAT WESTERN AND SWANSEA.

MR. THOMAS YORATH, chairman of the Swansea Drapers' Association, last week introduced the question of getting the Great Western Railway Company to run their main line through Swansea. The loop line from Landore caused deplorable loss to the town. As they might have read in the papers, there was a possibility of a big lawsuit between the Great Western Railway Company and Mr. Philip Richards, owing to the latter's collieries running under the Cockett Tunnel, and if they were worked they would probably injure the tunnel. It had been suggested that it would, therefore, be just the time to move in the matter of getting the main line moved. If the town had agitated and agitated, and made up its mind to try and get Swansea on the main line, he believed the change would have been accomplished years ago. If, as suggested, the tunnel were abandoned, and another made near Penllergaer, Swansea could then be placed on the main line. It would be a good scheme to run all the trains through Landore to Swansea, form a V, and run back to near Cwmfelin. The other scheme was more difficult and harder to accomplish—viz., to get the Great Western Railway to run down as they did till they got on the low level, join with the London and North Western at the Victoria Station, and run to Gower-road, and so encircle the whole town. That would, of course, lengthen the distance; but it was the aim of the Great Western Railway Company to lessen the distance between London and Milford. Another scheme mentioned was to run from Gower-ton alongside the London and North Western Railway, cross the river, and go on to Briton Ferry to join their own line. But the objection to that would be the tidal bridge at the docks. Mr. PHILIP JENKINS said that, in his opinion, the best solution of the difficulty would be to provide a central station for all the railways. Mr. LEWIS LEWIS said the tunnel cost the Great Western Railway Company at present 2,500*l.* a year, and another 1,000*l.* for wear and tear of extra engines. It was decided to ask the Mayor to convene a town's meeting on the question.

### SYRIA OTTOMAN RAILWAY.

Under the liquidation of the Syria Ottoman Railway Company (Limited) and Asia (Limited) meetings of creditors and shareholders were held at the London Bankruptcy Court yesterday to consider a proposal for the further modification of an agreement between the Official Receiver, as liquidator of the companies, and the Syria Ottoman Railway (Turkish) Company, which the chairman said he would shortly describe as the Ottoman Company. On June 7th, 1894, an agreement was come to between the two companies, and the Ottoman Company in connection with a concession obtained from the Sultan to construct the Akka Haifa and Damascus Railway. The agreement, however, was not carried out, and it was subsequently modified; but what was now proposed was that in lieu of 60,000 and 20,000 fully paid deferred shares in the Ottoman Company held by the liquidator of the Syria Ottoman Railway Company (Limited) and Asia (Limited) respectively, he should accept 50,280 and 16,720 ordinary shares. Mr. PARKER, in supporting the proposed modification, said they always thought that the business was largely over capitalised, but they had now a contract which reduced the capitalisation from 800,000*l.* to 400,000*l.*, or the rate of about 8,000*l.* a mile. As to the reduction from 80,000*l.* to 60,000*l.*, it had to be borne in mind that the former were really warrants entitling the holders to demand shares after the railway was completed, and the 60,000*l.* of ordinary shares, although smaller in amount, were infinitely more valuable. The matter was urgent, as the concession would lapse on the 12th of next month, and could not then be renewed, even by the Sultan—only a fresh concession could be granted. If the concession lapsed, competition in the enterprise of Germans, French, and Belgians might be expected. The CHAIRMAN (Mr. Winearls, Assistant-Receiver), in expounding the scheme, said it did not appear to him that the shareholders were likely to derive any benefit under it, as the shares would go to the creditors, and not to the shareholders. Mr. PARKER submitted that if the proposal was agreed to there was every prospect that a large amount of expenditure on the railway would be agreed to. Mr. GRANT represented other interests. The modifications as proposed were unanimously agreed to.

### CALAIS HARBOUR IMPROVEMENTS.

At the invitation of the Calais Chamber of Commerce a large party of shipowners, underwriters, and other gentlemen interested in shipping visited Calais on Saturday to inspect the improved facilities of the port. The guests included leading members of the Baltic and the Shipping Exchange, Mr. J. W. Maclure, M.P., Mr. W. O'Malley, M.P., Mr. John Morgan, Mr. Alfred Willis, Mr. William Forbes, Mr. C. Sheath, Mr. B. Martell, Mr. R. Cattarns, Mr. J. C. Fleming, Mr. H. A. Galbraith, Mr. W. D. Barnett, Captain Blomfield, Captain G. F. Dixon, Mr. Robert Steele, Mr. W. M. Rhodes, Mr. T. E. Barlow, Mr. T. G. Robinson, Mr. J. R. Dowdall, Mr. S. J. Becher, Mr. J. A. Findlay, Mr. F. Bryant, Captain Bagshaw, Mr. Robert Pim, Mr. H. Jamieson, Mr. G. R. Jellicoe, Mr. Theo. Uzielli, and Mr. T. Ronaldson. The visitors, travelling in special train and steamer provided by the London Chatham and Dover Railway Company, were received at the Calais Chamber of Commerce by M. Darquer, the chairman, and the members of that body, by whom they were entertained at luncheon. Having given a cordial welcome to the party, the chairman indicated the scope of the improvements effected in the port, and said that the chamber desired that their guests should personally examine its present facilities, in order that they might be convinced as to the capacity of the port to receive and give rapid dispatch to large ocean-going vessels of deep draught. The party were afterwards conducted over the port.

### ELECTRICITY ON THE UNDERGROUND RAILWAYS.

A correspondent writes respecting the experiments in the use of electricity on the London underground railways:—"It is understood that the plan for the Earl's-court and High-street, Kensington, stations, is to be put down at once in order that more exact data may be obtained than are at present possessed, and also for the purpose of familiarising some of the railroad officials and staff with the ins and outs of the use of electric locomotives or other heavy electric railroad plant. I know that the generating plant is intended to be of such a size as to make it capable of being employed as a unit in the permanent power plant which it is hoped will be eventually installed for the entire Metropolitan and Metropolitan District systems, as the outcome of the present experiments. One point in particular that will arise will be the effect upon the system of steam locomotives owned by other companies running over the Metropolitan lines when they have been converted for the purpose of electrical working. Further than this it is at the

moment impossible to go, as, if anything has been actually decided by the board or the technical advisers on the questions of contractors for the electrical equipment, or details of the plant, or track work, or locomotive particulars, no one will be allowed to get at the facts so long as it is possible to keep them quiet."

#### NITRATE NOTES.

An interesting and timely article on the nitrate situation appeared in yesterday's *Financial Times*. It was high time a check was put upon the reckless and indiscriminate buying of nitrate shares that has recently taken place, and this our contemporary's article is calculated to do. Yesterday also the *Financial News* delivered itself of an obviously inspired article on the Nitrate Railways Company, the sum and substance of which is that no reconstruction of the capital account will be attempted until the debentures of the company stand at par. We cannot quite share the *Financial News'* anticipation that the reserve fund will be divided amongst the shareholders—i.e., if the auditors do their duty. There are lots of little items which should be written off the books from revenue—for example, the 10,000*l.* or so given by the company for Patillos Railway shares, which are absolutely valueless.

Liverpool Nitrate Company's shares are not in our opinion under-valued at their present market price of 5½. This company's oficina has now been working its grounds (and not the worst part of them) for many years, it has also lost a large slice for the solid reason that it was not its own property. A few good estacas which border on its grounds and belong to "Santiago" oficina might have been acquired at a profitable price a short time ago, but in face of the looked-for revival of the industry a much higher price will have to be paid now, even if they can be acquired at all. We shall hope to learn at the next general meeting whether 30,000*l.* had to be paid a little while ago under an arbitration award for making a mistake in working over a neighbour's landmark, and whether an action is not now pending with the Government for another similar error on the part of the company.

On the 15th inst. the Nitrate Railways Company closed the following stations:—Santa Catalina, Dolores ("where the water used to come from"), Primitiva, San Donato, and Cuesta Arenal (Pizagua). All this is in the cause of economy, which doubtless also prompted the recent discharge of stationmasters, guards, and telegraph clerks.

In view of the sudden rise in the price of the various nitrate companies' shares, it may be interesting to speculate upon the effect which a "combination" is likely to have upon the finances of these undertakings. Under a low price such as has been ruling lately, no substantial dividend could be *bona fide* earned by any oficina, for none of them could make and put nitrate on board at less than 4*s.* 3*d.*, with the exchange ruling at 18*d.* The cost, now that exchange has fallen to 12½*d.*, might in some cases be reduced to 4*s.* or 4*s.* 1*d.*, but few of the cheaper making oficinas could even now put it on board at less than 4*s.* 4*d.*, and this would be without allowing anything for the value of the caliche which is being used up. Supposing this is reckoned at 4*d.* per quintal of nitrate made, it would mean that nitrate selling at 4*s.* 10*d.* would cost 4*s.* 8*d.*, or a hazardous profit of 2*d.* Hazardous because it requires, from the time caliche is dug out of the Pampa to the time the nitrate is put on board, about five or six weeks for manufacture, &c., and as the price is always fluctuating, nitrate which is commenced to be made to-day with every prospect of obtaining a profit of 2*d.* may by the time it is shipped be sold at an actual loss. Thus, it is impossible to speak of a small margin of 2*d.* or 3*d.* as an actual profit; and, further, the expenses of the headquarters of the company in England have also to be kept in view, so it pays no one to sell at the present market rate. But under a combination with a selling price of 5*s.* 8*d.* a clear profit of 10*d.* or 1*s.* would be gained by the good establishments, and a little more by those with particularly rich grounds. In other words, an oficina, reckoning the value of its caliche at 4*d.* per quintal for the nitrate produced, and putting on board its nitrate at 5*s.* 8*d.*, would for every 100,000 quintals made, net perhaps 5,000*l.* profit, whilst to make twice the quantity under present conditions would only clear 1,750*l.* Thus the advantage of a combination is obvious. It must not be forgotten that if the price is put at too high a figure there might be a falling off in the consumption, though a mistake in this direction is not likely to occur. Nitrate has its competitors, and those who have a controlling voice in its disposal know full well that an exorbitant price would drive consumers to try other manures that are cheaper, and a trade easily driven away is not always so quickly recovered. The rich oficinas, as well as the poor, are heartily tired of exhausting their grounds

for the infinitesimal return they have of late received, and thus a combination is sought by both alike. There seems to us to be a fair prospect of this desirable object being attained; at the same time nitrate shareholders would do well not to be over sanguine.

#### RAILWAY PATENTS.

[This list is specially compiled for THE RAILWAY TIMES by Messrs. Rayner and Co., registered patent agents, 37, Chancery-lane, London, W.C., from whom all information relating to patents may be had gratuitously.]

18,894. Alexander Shiels, 100, Wellington-street, Glasgow—Improvements connected with electrical signalling or communication on railway trains.

18,908. Henry Norfolk, 511, Green-lanes, Harringay, London—Improvements in and relating to railway couplings.

18,916. Vivian Larchin Butler—An improved method for the carriage of bicycles in railway trains.

18,924. Frank Murray, 11, Cunningham-place, St. John's-wood, London—A new and improved method of signalling for use on railways.

18,972. William Rose Smith and Reginald Page Wilson—Improvements in overhead railways and cars for same.

18,984. Harry Crowther Slingsby, 2, Market-street, Bradford—Improvements in hand trucks for conveying railway luggage and the like.

19,040. H. A. Costerton, 3, Silwood-terrace, Brighton—"Buffer vans" for railway trains.

19,043. F. S. Willoughby, 12, Mosley-street, Manchester—Improvement in railway platform and other trucks.

19,249. W. Fairclough, 6, Lord-street, Liverpool—Improvements in automatic signalling apparatus for railways.

19,278. A. A. Govan—15, Renfield-street, Glasgow—Communicating apparatus for railway trains.

#### SPECIFICATIONS PUBLISHED.

18,214. Paterson—Means for communicating between railway passengers, guards, and engine-drivers. 1897.

20,732. Gascoyne. Electric signalling apparatus for railways. 1897.

23,514. McKenny and Porte—Electric tramways and railways. 1897.

26,458. Laffas.—Safety apparatus for railway lines. 1897.

#### FOREIGN AND COLONIAL ITEMS.

The earthworks of the Beira Railway are now within 35 miles of Salisbury.

The length of the railways of the Republic of Mexico now aggregates 12,403 kilometres.

A series of articles on the national railways of Switzerland is now appearing in *The New Age*.

St. Petersburg advices state that Russia has secured extraordinarily important and exclusive concessions for railways in Persia.

The annual report of the North Eastern of Uruguay Railway Company, Limited, announces the retirement from the board of the chairman, Sir Edward Thornton.

The receipts of the Netherlands South African Railway Company amounted in August last to 2,602,800*fl.*, being a decrease of 151,200*fl.*, and for the first eight months of 1898 to 21,192,000*fl.*, a decrease of 4,079,600*fl.*

Judgment has been given in favour of the Buenos Ayres Western Railway Company in an action brought against it by A. Fusaro, contesting the company's right to forbid the sale of newspapers within its precincts.

Holders of the Western Railway Company of San Paulo 7 per cent. debenture bonds of 100*l.* each, issue of 1879, are informed that all the debenture bonds outstanding mature and become payable on October 1st next.

The railway system of the Province of Santa Fé (Argentina) is about to be declared a national railway by the Ministry of the Interior, as the line now connects the Province of Santa Fé with a portion of the Chaco national territory.

The management of the Province of Santa Fé Railways has been authorised by the Railway Board to ignore all applications for wagons of the Santa Fé Land Company, unless prepaid, as it had paid none of its accounts since February.

A telegram from Brussels states that a company has just been formed to build a new railway in the Congo State. The new line will open up the mining districts at Mayumbe. Part of the capital will be subscribed by the Belgian Government.

As a result of the Jamaica Government's failure to take over the railway, an *ex parte* application of the trustees for the bondholders to recover possession was heard in Kingstown on Thursday and dismissed with costs, the other side having applied to be heard.

A correspondent writes:—"For the first half-year of 1897 the Mexican Railway paid at the rate of  $2\frac{1}{2}$  per cent. on the first preference stock. The price remains the same as at this time last year, but the figures (\$215,000 increase) and the advance in the price of Mexican dollars show from 4 per cent. to 6 per cent. earned for the first half of 1898. The improved prospects continue. The dividend announcement should come next month."

The first section of the Jungfrau Railway was opened on Monday. The ceremony was attended by a company of 450 persons specially invited by President Guyer-Zeller, who had a pleasant journey by the new line from the Scheidegg to the Eiger glacier. The railway is worked by electricity. President Guyer-Zeller stated that the summit of the Jungfrau would be reached in 1904. The next section will carry the line as far as the Monch. When the line is completed, it is intended to build an observatory at the summit of the mountain.

At the forthcoming half-yearly meeting of the San Paulo (Brazilian) Railway Company, Limited, the directors will recommend the payment of the following dividends for the half-year ended June 30th last:—On the preference shares, at the rate of 5 per cent. per annum, less income-tax; on the ordinary shares, at the rate of 12 per cent. per annum, free of income-tax; on the new ordinary shares, at the rate of 12 per cent. per annum, on the amounts from time to time paid up, free of income-tax. The amount carried forward, after providing for income-tax, will be the sum of 32,200*l.*, subject to audit.

Messrs. Emilio Daireaux and Co. have applied to the Argentine Congress for a concession to make a railway from Cordoba to Mendoza. Messrs. P. J. Bengolea and Co. have applied to the Senate for a concession for a railway line from Villa Maria, province of Cordoba, to San Nicolas, province of Buenos Ayres. Messrs. Luis E. Zuberbühler and Co. have applied to Congress for a concession for a line starting from some point on the River Paraná to Santiago del Estero, and they ask for a land grant. The Buenos Ayres *Review* says:—"Seeing that we have already three means of reaching Santiago del Estero, we fail to see what need there is for another line, which probably would never be constructed, even if the concession were granted."

**Mr. Pond and the District Railway.**—Mr. R. W. Perks, M.P., writes:—"I see that Mr. Pond has issued another circular about the District Railway, in which he suggests that I and other shareholders should join the board. Allow me to say that I have perfect confidence in the directors and their policy, and have no desire to join the board as a nominee of Mr. Pond. Being a considerable shareholder, holding upwards of 100,000*l.* of the ordinary stock, I attended the last half-yearly meeting and listened most attentively to what Mr. Pond had to say, with every desire to support any reasonable suggestions he might make; but I came very decidedly to the conclusion, after his speech, that the policy he then recommended, which he explained in greater detail in his circulars, would most seriously injure the railway, and postpone for very many years the prospect of any dividend upon the ordinary stock. I do not speak as an entire stranger to the Metropolitan Underground Railway, for I was the law adviser of the Metropolitan Railway for nearly fifteen years, during which period the Metropolitan Railway laid down and steadily pursued the policy which has brought that company to its present satisfactory position."

**Workmen's Compensation Act.**—At the Liverpool County-court on Monday, Theresa Brown brought an action under the new Workmen's Compensation Act against the North Western Railway Company for damages for loss of her husband, a brakesman, who was fatally injured in Wapping tunnel. The Judge expressed surprise that no lawyers appeared in the case. The plaintiff had arranged to accept 200*l.* on behalf of herself and five children. The Judge explained that under the Act the plaintiff would have to take out letters of administration, and adjourned the case for the purpose. A representative of the company said they desired as far as pos-

sible to save the woman trouble and expense. The claim was for the total amount of deceased's earnings for three years preceding the death, and 15*l.* for each of the children, to be invested in the Post-office Savings-bank, the balance to be handed to the widow. The claim had been fully met by the company, who had also allowed the widow 10*l.* living expenses immediately after the accident. Had the man been killed before June 30th, when the new Act came into force, he would have been entitled to only 100*l.* from the insurance fund connected with the railway company.

**Brighton Railway—Improved Train Service.**—The Brighton Railway Company announces the following alterations (amongst others) in its train service for October:—A limited Pullman will run from Victoria every Sunday at 11 a.m., returning from Brighton at 9 p.m., running between London and Brighton in one hour. The number of seats in this train will be strictly limited, and a first-class train will follow it, doing the distance in one hour fifteen minutes. The 11.50 p.m. theatre train from Victoria, which has hitherto run only on Thursdays and Saturdays, will run every week-night, and call at Burgess-hill on Mondays, Hassocks on Tuesdays, Hayward's-heath on Wednesdays and Saturdays, Horley on Thursdays, and Three Bridges on Fridays, so as to afford the residents in those towns an opportunity of visiting the London theatres, and reaching home the same night. Several of the trains have been accelerated, and the 10.5 a.m. down Pullman and 5.45 p.m. up will have first, second, and third class carriages attached to them. A new train will be run from Victoria at 10 a.m. to Eastbourne every Sunday, returning at 8.50 p.m.

**Proposed Railway in South Bedfordshire.**—Of late a scheme has been under consideration by the leading inhabitants of South Bedfordshire for the construction of a new railway in the southern portion of that country, for the purpose of the opening up for increased trade of the principal market towns. The London and North Western Railway, Midland Railway, and Great Northern Railway companies have been approached on the matter, but owing to certain constructive difficulties the scheme has been allowed to remain in abeyance. Recently it has been revived; the principal obstacles have been removed, and there now appears to be every probability of something definite being done in the matter. As the matter stands at present, it is proposed to start a line from a station in the centre of Leighton Buzzard, run it to Hockliffe, and thence to Paddington and Harlington, where a junction with the Midland main line will be formed. From there the line will be carried through Barton, Pilton, and Shillington to Hitchin, where it will terminate at the Great Northern station. The line, when completed, would be about 19 miles in length, and already steps have been taken to promote a Bill in Parliament for sanction to construct the railway.

**Bilbao River and Cantabrian Railway.**—An official circular to the shareholders, dated September 21st, states that the directors, at a meeting held on the 15th inst., resolved to pay an interim dividend at the rate of 10 per cent. per annum, free of income-tax, on the preference and ordinary shares out of the profits of and for the half-year to June 30th last. For the half-year ended June 30th the gross receipts were 54,426*l.*, and the tonnage 438,923, as against 51,526*l.* and a tonnage of 426,100 in the same period of 1897, and for eight months to August 31st the gross receipts amount to 73,598*l.*, and the tonnage 594,621, against 68,954*l.* and tonnage of 569,742 in the corresponding period. Immediately upon the outbreak of war between Spain and the United States in April last there was a further very serious addition to the depreciation of Spanish currency, and the gold premium, which averaged 30 per cent. in 1897, advanced very rapidly, and in less than a month increased to over 100 per cent. It is now about 64 per cent., which may be roughly estimated to represent a present loss to the company of about half the gross profit. The loss on exchange for the half-year was 15,000*l.*, and the net profit amounted to 17,000*l.*

**Piræus Athens and Peloponnesus Railway.**—In the report issued for the first half of this year it is mentioned that the 5,000,000 drachmas of preference shares have been replaced by the issue of 3 per cent. gold bonds to the extent of 3,000,000 drachmas, and 2,600,000 drachmas in 5 per cent. paper bonds. The latter yielded 2,236,000 drachmas, which are to be used for the completion of the Myli-Calamata Railway, which is expected to favourably influence the company's receipts. During the six months ended June 30th last the receipts amounted to 2,100,000 drachmas, or 362,084 drachmas in excess of the corresponding period of the previous year; and after deducting working expenses and interest there remains 85,026 drachmas to be carried forward, as against 30,914 in the same period of the previous year.

**Bulawayo-Tanganyika Railway.**—At Mr. Rhodes's suggestion, the Chamber of Commerce met Sir Charles Metcalfe recently with respect to the route of the Bulawayo-Tanganyika Railway. The Chamber supports the Gwelo route, on the understanding that Gwelo is not made the terminus for any considerable time, that the contractors shall not carry any merchandise without accepting liability for loss and for robbery, and that proper guarantees shall be obtained from the contractors that construction material shall not be sold. Sir Charles stated that the survey must be completed before the Imperial Government could be asked to fulfil the promise of guarantee, and therefore the surveys were being pressed forward. He was leaving for the north to complete the survey to the Zambesi, and to select a crossing on that river, while another survey was being pressed forward from Tanganyika southwards. He did not expect the construction to start until after the rains next year, and Gwelo would not be reached within a year. The line to the falls would be too great an angle to take, but by the Gwelo route they would tap the coalfields, and so feed the mines along the route. Probably the Imperial Government would give the guarantee for each section.

**Severn Navigation.**—Before the Mechanical Science Section of the British Association last week, Mr. E. D. Marten, chief engineer to the Severn Commissioners, read an important paper on the scheme for the improvement of the waterway between the Bristol Channel and the Birmingham district—a project which practically amounts to a ship canal to Birmingham. The existing canals, Mr Marten pointed out, were suitable only for the navigation of small barges.

Mr. G. W. Keeling had prepared a scheme by which the Worcester and Birmingham Canal would be improved so as to take vessels of from 200 to 300 tons, and in which groups of locks would be replaced by inclines. His estimate for this was 600,000*l.* The canal would be increased in width to 66ft., and in depth to 9ft. The locks would be large enough to pass two steamers at once, each 100ft. long by 18ft. beam, up to Worcester. The Severn has a minimum depth of 10ft.; and Mr. Marten gave in outline a scheme for improving the Staffordshire and Worcestershire Canal, so as to give a width of 60ft. and a depth of 7ft. In this also inclines would be substituted for levels in some places, the estimated cost being 300,000*l.*

**Norwegian Railway Contracts.**—The Foreign Secretary has received a despatch from her Majesty's Consul-General at Christiania stating that tenders are invited by the Norwegian State Railways Administration for the delivery of 80,800 fish-plate screws. Tenders in sealed envelopes, marked "Laskeskruer," should be addressed to "Jernbanestyrelsens Expeditionskontor, Christiania," and should reach this address by 7 p.m. on October 5th. Tenders are also invited by the Norwegian State Railways Administration for the delivery of twenty closed trucks, letter G, for narrow gauge. Tenders in sealed envelopes, marked "Lakkede-Godsvogne," should be addressed to "Jernbanestyrelsens Expeditionskontor, Christiania," which address they should reach by 7 p.m. on September 28th. A copy of the conditions of any of the above contracts may be examined at the Commercial Department of the Foreign-office any day between the hours of 11 a.m. and 5 p.m.

ESTABLISHED 1774.

The Directors are prepared to receive TENDERS for the supply of the Company's ordinary requirements of the following ARTICLES during the twelve months ending 31st October, 1899:—

No.	No.
1 Brake Blocks.	20 Iron Castings (Hydraulic Pipes).
2 Candles.	21 Iron Castings (Water Pipes).
3 Canvas.	22 Iron Hinges.
4 Carpeting and Rugs.	23 Ironmongery.
5 Cement.	24 Small wares, Trimings, &c.
6 Cloth (Bunting).	25 Soap.
7 " (Cord, Moleskin, &c.)	26 Sponge Cloths.
8 Coach Fittings.	27 Steel and Files.
9 " Trimmings.	28 Sundry Tools.
10 Coke (Best Foundry).	29 Timber (English or Welsh).
11 " (Gas).	30 Transfers.
12 Copper.	31 Tubes, Copper, for Boilers.
13 Copper Tubing.	32 Wickings.
14 Croscote.	Way Materials.
15 Dressaltery.	33 Fence Rails (Larch).
16 Fire Bricks and Clay.	34 Spikes.
17 Fire Hose.	
18 Glass (Plate and Sheet).	
19 Indiarubber.	

Further particulars and Forms of Tender may be obtained on application at the Stores Department, Osborne-street, Manchester, where parties are requested to call and examine the samples before tendering. The Sample-room will be open for this purpose from the 26th September to the 8th October, inclusive, between 10.0 a.m. and 4.0 p.m. Saturday, 10.0 a.m. to 12.0 noon. Contractors cannot be allowed to tender to their own patterns, nor can the Company's patterns be sent away for inspection, all being sealed and exhibited at Osborne-street.

Tenders, properly endorsed and addressed to the Directors, must be lodged with the Secretary not later than Ten o'clock on the morning of Monday, the 10th day of October next; any received after that date will not be considered.

Separate Forms of Tender will be provided for each Contract: parties applying are therefore requested to state the particular Contract for which they propose to submit Tenders.

The Directors do not bind themselves to accept the lowest or any Tender.

C. W. BAYLEY, Secretary.  
Hunt's Bank, Manchester, 23rd September, 1898.

No. 38, New Broad-street, London, 9th September, 1898.

**UNIFORM CLOTHING.**  
**JAMES SMITH AND CO.,**  
**DREWRY-LANE WORKS**  
**DERBY.**

**BLAENAVON COLD BLAST PIG IRON**

(MADE WITH THE CELEBRATED BLAENAVON CHARCOAL COAL).

- No. 1 Foundry.**—A Dark, Grey, Soft Iron, used for Castings, where toughness and strength are required, such as Toothed Wheels for Agricultural, Cotton and other Machinery; also by various Governments, for Guns and other superior work.
- No. 2 Foundry.**—A more Open Quality, used for similar purposes, and largely by nail makers.
- No. 3 Foundry.**—An Open Grain, Harder Iron; used for both Foundry and Forge; it has a high transverse strength in Castings, but not so tough as the No. 1 and No. 2; gives a strong fibre in wrought iron.
- No. 4 Grey Forge.**—An Open, Soft Iron; possesses great strength; suitable for toughening and tempering harder qualities; it is a very superior Forge Iron.
- No. 5 Common Forge.**—A Harder, Finer Grain, very Strong Iron; suitable for Heavy Machinery, such as Shafts, Large Wheels, and also for Steam and Blowing Cylinders, Guides, Slides, &c., as well as for Forge purposes in Cable Bolts, Boiler Plate, and BB. Merchant Bars.
- No. 6 Strong Forge.**—A still harder and closer quality used for Mill Rolls and for bringing up the strength of weaker Forge Irons.

**MOTTLED.**—Used for Chilled Rolls in tempering; and for other similar purposes. These qualities have a high tensile strength in wrought iron, and are used for bringing up weaker iron to stand the Government tests.

Extract from Report made by the Officers of H.M. Government to the Royal Arsenal on the strength of various descriptions of Iron, showing the general average of a number of Specimens prepared and tested from fifty-seven samples and also from five samples of Blaenavon Iron.—Parliamentary Paper No. 4671, Session 1898.

	Specific Gravity.	Tensile Strength.	Transverse Strength.	Crushing.
Average of 57 sample including Blaenavon	850 Specimens 7.140	850 Specimens 23,257	546 Specimens 7,102	273 Specimens 91,061
Average of 5 samples of Blaenavon only	63 Specimens 7.175	63 Specimens 25,488	46 Specimens 7,488	21 Specimens 108,281

**Meetings.****BOLIVAR RAILWAY.**

The third ordinary general meeting of the Bolivar Railway Company, Limited, was held on Tuesday, at Winchester-house, E.C.; Mr. HENRY WILLIAM SMITHERS presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said—Gentlemen, you will notice that the accounts submitted are for twelve months, while those submitted to you at the last annual meeting were for a period of thirteen months—that is, the first thirteen months since the formation of the company. Your directors are extremely sorry not to be able to meet you to-day with a more favourable report; but the unfavourable nature of it is due entirely to circumstances over which we have no control whatever. The causes are, mainly, the revolution which broke out in February and lasted till June, during which time our trains were stopped. It was somewhat perilous for passengers to travel; the consignors held back their consignments to the coast, and business generally was at a standstill. The revolution was quelled in June, and General Hernandez, who was at the head of it, was taken prisoner. We hope now that, under General Andrade, and with the Finance Minister, Mr. Matos, we have a good Government in the country. You will see from the figures that the gross revenue was 54,629*l.*, and that the working expenses, including the amount we pay to the Barquisimeto Company; for the rental of its line and rolling stock, were 48,500*l.*, leaving a balance of net revenue of 6,128*l.* The charges against us amounted to 8,441*l.*, so that there was a deficiency of revenue for the year of 2,313*l.*; but, happily, we had brought forward a surplus from the previous year, so that our net balance to the good upon the two years is 1,782*l.* 4s. 9d. There was a decrease of the gross receipts as compared with the previous year of 13,177*l.*, of which decrease a little more than half belonged to our own Bolivar line, and little less than half was upon the Barquisimeto. The decrease was almost all in traffic carried to their interior—that is, up traffic; for out of the total decrease of 13,176*l.* over 12,000*l.* was decrease in the up traffic. We have taken out the main items constituting that decrease, and we find that in machinery, ironmongery, drapery, cloth goods, and agricultural implements we carried up 987 tons less, of provisions 400 tons less, and of flour 275 tons less. Our business has been also to some extent interfered with by an outbreak of smallpox, which began at the end of March and which still continues. That, however, really has not affected our business quite so much as it has that of some other lines, the main difficulty we have experienced being that of unloading at Puerto Cabello, to which port most of our goods are consigned. Of course this decrease in the up traffic signifies that the country had less purchasing power, and that was to be attributed to the stagnation and upset generally of the revolution, and also to some extent to the fact that merchants realised so much less money for their coffee than they did before. The price of coffee has within the last few years fallen very considerably. In August, 1897, it was 2*l.* per bag, whereas in 1898 it was 1*l.* 7s., and if we go back further still we find that in 1891 the price was as high as 3*l.* 8s. 2d. per bag; so that, naturally, people in the interior realised less money, and consequently had less spending power. There has been some increase in the passenger traffic, but that has arisen entirely from the carriage of troops for the Government, mainly in quelling the late revolution. We have made some reduction in our rates upon certain articles in the hope of stimulating trade in some of the goods, and we have found so far that it has had some effect in this direction. It is almost too early to speak of the prospects for the current year, but the returns for July and August are more hopeful, and lead us to expect that we shall do considerably better this year than we did last. There has been a decrease in the expenditure of 4,215*l.*, and the greater part of this is due to the fact that we have run less steamers and launches. The other decreases are distributed over various departments. The traffic charges on our own line have been about 700*l.* less than they were in the previous year. Consequent upon the carriage of troops we have a considerable claim upon the Government—about 6,598*l.*—of which sum 1,500*l.* will be due to the Barquisimeto Company when we collect it. The Government promises to pay in weekly instalments, but I am sorry to say its treasury is not full; it is very nearly empty, and we can only keep pressing for it. Our line, we are glad to say, is now completely ballasted with slag, and we have just recently completed the last bit of the road, which is now considered to be in a very good condition. Mr. John McMillan, who has been our general manager for some time, has resigned, wishing to retire from active business. The board had thrown upon it the duty of finding a competent successor, and after full consideration we chose Mr. A. D. Thomas, who sailed for Venezuela on August 24th last. We have given him full instructions, and hope his management will be successful and economical. We have given notice to the Barquisimeto Company to terminate the working agreement because we find, with the very small traffic of the past year, we actually made a loss under it. We do not propose to take any action unfriendly to the Barquisimeto Company, and we hope we shall succeed in renewing the arrangement upon some fair terms. As to the Aroa Mines, we are not in a position to say anything to-day, Mr. Keswick, the chairman of the company, who is present, thinking it too early to speak. We can only say we hope the shaft they are sinking will be successful, which will mean very considerable traffic to this company. The results, poor as they are in the account before you, amply justify the very conservative basis upon which this company was formed when we took the property over in satisfaction of the debenture debt of the old company. You will under-

stand, I hope, that your directors cannot control circumstances; all we can do is to continue to do our best, and hope that time will yield better results. We have good reason to believe that we have seen the worst.

Mr. W. KESWICK seconded the motion, which was carried unanimously.

### LYNTON AND BARNSTAPLE RAILWAY.

The half-yearly general meeting was held at Lynton, on Monday; Mr. E. B. JUNE presiding.

The accounts for the half-year ending June 30th, 1898, showed a gross revenue from May 16th to date of 992*l.*, an expenditure of 596*l.*, and a net revenue of 396*l.* Number of passengers carried, 9,540; length of line open, 19 miles. On capital account the expenditure had been 104,482*l.* (including 14,501*l.* during the half-year), and the receipts 109,768*l.*—viz., ordinary shares, 82,766*l.*; debentures, 27,000*l.* The report stated:—"The board are glad to be able to announce that the entire railway was opened for general traffic from Barnstaple to Lynton on May 16th last, and the accompanying account of the traffic receipts and expenditure represents the period between that date and June 30th. The Board of Trade have duly granted the necessary certificate of completion, though there are necessarily many details incident to a new railway still in course of completion. The board have every reason to be satisfied with the prospects of the company, but it is impossible at present to lay before the shareholders any adequate detail on which to form reliable calculations. From January 1st last the payment of interest out of capital has ceased, and the shareholders since that date have, of course, to rely in the future on the income arising from traffic receipts. The board regret to announce that they have felt it their duty to claim compensation from the contractor for the delay in completion of the railway, and to resist certain extravagant claims made by him against the company. These questions are, however, now the subject of arbitration under the terms of the contract. The board, with others, presented a petition, and appeared by counsel against the Minehead and Lynmouth Light Railway scheme, and the same has been rejected by the Light Railway Commissioners."

Mr. C. E. R. CHANTER, solicitor for the company, said they had every reason to be gratified with the present position. They had expended 104,482*l.* on the line. Colonel Yorke, on behalf of the Board of Trade, had now given them their full certificate, and had stated that the line was well and soundly constructed, in fact, was one of the best he had inspected. The accounts presented included the receipts from May 16th to June 30th, 1898, which, minus working expenses, left 396*l.* profit. That period was not sufficient to form a just estimate of the commercial value of the line. July, August, and September, the best months of the season, were, of course, not included. Only at the end of the financial year could a just estimate be formed, but, taking into account the receipts of the past three months, which quite justified their anticipations, he had every confidence in the future of the line. He was quite satisfied with the shares he himself held, and should, under certain conditions, be only too willing to greatly increase his holding. He moved that the accounts be adopted.

Mr. J. CROOK seconded the motion, which was agreed to.

In reply to questions it was stated that the speed had been curtailed to 16 miles per hour by Colonel Yorke for the first six months, and then to 20 miles per hour. Compensation would be claimed from the contractor as the line was not finished in the time specified by the contract. Any extras, such as bridges, &c., would be paid for according to the schedule of prices agreed on.

### PLYMOUTH DEVONPORT AND SOUTH WESTERN JUNCTION RAILWAY.

The half-yearly general meeting was held at Devonport; the Earl of MOUNT EDGUMBE presiding.

The CHAIRMAN, in moving the adoption of the report and accounts, said of course their dividends had not gone up by leaps and bounds, but the increase had been gradual and continuous, and that year they were able to declare the largest dividend paid in the first half of any year, and this was all the more satisfactory when they considered that it was the half-year in which the dividends in most other companies had been either stationary or reduced. He believed the sound agreement entered into with the South Western Company had much to do with this highly satisfactory result. The local traffic continued to make satisfactory progress, and it did not appear that the opening of the Tamerton station had in any way decreased the earnings of any other stations. While the passenger receipts for the first half-year for that station were satisfactory, there was a falling off in the goods traffic; but this was accounted for by the fact that in the corresponding half of last year a lot of material was carried over the line to complete the Bude Railway. That had ceased now, and, therefore, they had not that item of receipts in their accounts for this half-year. Then, again, the agricultural season had been better than usual, and a proportionately smaller amount of food stuffs had been carried from place to place. With regard to the proceedings instituted in the Railway Commissioners' Court in order to obtain through rates and fares between Waterloo and some of the principal stations in Cornwall, his lordship reminded them that that action had not been taken by the directors without earnest consideration and with the distinct hope that it might result for the benefit of the public and the company. He expressed regret that the directors had found it impossible to carry out the proposed Calstock branch. The coaching traffic had been entirely satisfactory and, taking the whole into consideration, he trusted that the shareholders would feel with him that the report was satisfactory.

Lord ST. LEVAN seconded the motion, which was adopted unanimously.

Dr. G. ROLSTON asked whether they had abandoned the idea of constructing the line from Bere Alston to Calstock because of the expense.

The CHAIRMAN replied that the directors could not undertake to do it, and the South Western Company would not. Something might be done at a future date under the Light Railways Act. The very steep gradients were the great difficulty they had to contend with. Of course, had the South Western Railway Company been willing to advance the money they (the Junction Railway Company) would have done the work.

Dr. ROLSTON thought instead of giving up the scheme altogether they might seek to cross the river at some lower level, and thus avoid the gradients to a certain extent.

The CHAIRMAN replied that before that could be done they would have to get a new Act of Parliament, the period of time granted them having expired.

The CHAIRMAN then moved that a dividend at the rate of 1½ per cent. per annum on the ordinary shares of the company respectively be declared.

Dr. ROLSTON seconded the motion, which was carried unanimously.

### OTTOMAN RAILWAY (SMYRNA TO AIDIN).

The half-yearly general meeting was held on Tuesday, at Winchester-house, E.C.; the Right Hon. Lord BATHMORE presiding.

The CHAIRMAN, in moving the adoption of the report and accounts (an analysis of which has already appeared in THE RAILWAY TIMES), said—If, in reviewing the history of the six months with which we have now to deal, we could consider the management and condition of our railway apart from the question of our earnings, there would be little in this report and statement of accounts to which I need call your especial attention. For the traffic was conducted during that period without any serious mishap of any kind. One passenger and two of the company's labourers unfortunately lost their lives, in each case in consequence of their jumping from the train, but no responsibility for these isolated accidents was due to the company or its servants. There was also the derailment of an engine and some wagons on the Chivril branch; not producing, however, serious damage to the rolling stock or to the road. The whole of our railway has been maintained, as usual, in perfect order, while the strengthening of the viaduct over the pass near Ephesus (an undertaking the necessity for which I fully explained to you at our last meeting) was finished, and the new permanent bridge over the Meander was carried almost to the point of completion. In fact, the permanent way, bridges, stations, locomotives, and rolling stock have all been kept up in as sound and workable a condition as could have been desired—in a condition which would, I believe, compare on favourable terms with that of any corresponding enterprise in England. Neither is there anything very exceptional in the statement of expenditure which we have laid before you. You may have observed in that statement (comparing our expenditure for the last half-year with that of the corresponding period of 1897), that though less mileage has been run, the cost of coal is 500*l.* higher. That was in consequence of the lamentable coal strike in South Wales, which compelled us to pay a greater price for fuel of an inferior quality to that which we ordinarily use. But, on the whole, the expenditure is 4,900*l.* less than it was last year, and the saving, as you will observe, is spread pretty well over all the headings. In fact, you may depend upon it that Mr. Purser has exercised all possible care and caution, and that every effort has been made to keep the outgoings down to the lowest limits which are consistent with maintaining the railway in proper order, and with efficiency and safety in working the business of the line. But when we come to consider the receipts for the six months with which we are now dealing, I know that this statement of accounts must have been studied by you, as I need not tell you it has been by us, with feelings of grave disappointment. For, gentlemen, we have all been made unpleasantly aware that it is one thing that we should have a railway with the construction and equipment of which no fault can reasonably be found, and that our railway should be managed with all the skill and economy which the great ability and experience of Mr. Purser and his excellent staff secures for us. It is, in fact, one thing to have a railway capable of carrying in the best way all the traffic that is brought or can be attracted to it. It is another thing that the desired traffic should be forthcoming. Gentlemen, you will remember that when we met here in the spring we were all congratulating ourselves on the result of the last year's working, and on the remarkable improvement which had for some years been manifest in our earnings, for we had seen that, whereas no dividend had been paid on the ordinary stock for the year 1894, 2 per cent. was paid for 1895, 4 per cent. for 1896, and last spring we were able to declare a dividend of 5½ per cent. for 1897. Those were certainly indications of steady progress. But even then I thought it my duty to remind you that, however encouraging our recent experiences might have been, still, taking one year with another, we must expect to meet with vicissitudes. I reminded you that there must be, as I said, "ups and downs" in the fortunes of a railway, which depends, as ours does, mainly on the carriage of agricultural produce, and therefore to a great extent upon the chances of wind and weather, and other influences which affect the industry of the husbandmen in the districts which our line is intended to serve. And so I warned you, having regard especially to the falling off in our traffics for the first few months of this year, that we must expect "sets back" in the growing prosperity which we had then, for some years, enjoyed. Gentlemen, I am sorry to say that my warning has been only too quickly and too completely justified, for it has now been found that the exceptionally severe weather of last winter, its snows and its frosts, had worked even

more injury than we feared they had when last we met. I am afraid it has caused much distress, which we must all regret, to the people in those parts who are our friends and, in good times, our ready customers. Not only did the bad weather in the early spring make access to our line difficult for those who wished to bring us merchandise, but it also made many unwilling to part with their produce, in anticipation that the fruits of the coming harvests in that part of the country would be so poor that they would for the most part be required for the consumption of the inhabitants; so the result was that during the first six months we earned only 112,624*l.*, as compared with 136,241*l.*, in gross, and that our net profit amounted only to 47,617*l.*, as against 66,301*l.* in the corresponding period of last year. Some part of that decrease was in passengers and animals, which was mainly, I believe, owing to the difference between the amounts which we earned for the carriage of troops and their horses to the late war between Turkey and Greece in the earlier period, and in the latter period for such of them as returned to our districts in Asia Minor. But the great bulk of the decrease was in our goods traffic, which consists, as you know, almost entirely of agricultural produce, and was due to the causes to which I have just now referred. And, gentlemen, turning from the past to the current half-year, I am sorry to say that our experiences have so far been most unsatisfactory. You have seen the large decreases in our traffic since the beginning of July, and, even after making allowances for the exceptional prosperity of the period of last year with which we have to compare them, we must all admit that the falling off of our receipts is depressing in the extreme. Mr. Purser sums up the present position so clearly in a letter which I received from him only last week that I cannot do better than read from it a few sentences. "There has been," he says, "a great and unexpected deficiency in nearly all the crops, and all through our own districts, not to speak of what our neighbours have and will have to sustain. It is general throughout Asia Minor, with the exception, perhaps, of the corner of the country in the plain of Adana. We do not reckon on more than 40 per cent. of the crop of last year in cereals. Of figs, a phenomenal crop of only 20,000 loads at most. The valonia and olive crops still remain in doubt, but perhaps they will arrive at a small average." He adds, "What mineral traffic we have is good, and improves in variety of the ores." Therefore, gentlemen, although we will, of course, cherish a hope as warmly as we can under such chilling circumstances, that the "drops" in our traffic returns may not continue for the last quarter with the same startling figures as we have lately witnessed, yet we must, I think, look the very disagreeable fact in the face, that we are passing through one of the worst twelve months for earnings that we have for a long time experienced. I do not believe that we need attribute these decreases which we have had to record, in any substantial measure, to the extensions of the Cassaba and Anatolian lines, and for this reason, that the merchandise which we have hitherto been carrying does not come, to any large extent, from those regions in which such competition could, under any circumstances, seriously affect us. Mr. Purser, writing on this point at the end of last month from Smyrna, says, "If there had been no Anatolian and no Cassaba extension, I do not believe that we should at this juncture be earning more by 5 per cent., so much does the loss lay in our own districts." No, gentlemen, the fallings off of the current six months are due to the same causes—accidental and, let us hope, transient causes—as those which produced the bad returns of the first half of the year. We may even take some further solace from the fact that our friends the enemy are also suffering from the same evil influences as ourselves—I mean the exceptional weather of last winter; and that owing to the superiority of our own districts, and the other advantages we possess, we are able to reap a much larger profit, even in this unfavourable season, from our mileage than they can from theirs. For, if you compare the last published accounts of the weekly traffics of the three companies, you will find that whereas we earned at the rate of 15*l.* 8*s.*, the Cassaba earned but 12*l.* 6*s.*, and the Anatolian, on its Konia section, only 3*l.* 14*s.* per mile. These misfortunes of our neighbours can afford to any of us but a small and somewhat cynical relief in our adversity, but it is a more solid consolation to bear in mind that in Asia Minor the sequence of two very bad seasons is almost unprecedented; that no part of our present disappointment is due in the construction or condition of our railway; that no responsibility for it rests on the management of our business; and so we may hope that the coming winter may be more kindly for agriculture than the last one, which so suddenly checked our progress, remembering that should fortune again favour us, we are ready to take immediate and full advantage of the returning prosperity of the country.

Mr. GEORGE HERRING seconded the resolution.

Mr. LA FONTAINE thought there could be no doubt that the depressed condition of the company's affairs was owing to the severe frost in the early part of the year and the drought in the early spring, which had caused a deficiency in nearly all the crops. This, however, was not the company's first experience of a bad year. They had had two previous unfortunate years. One was four years ago, and the other seven or eight years since. As they all knew, their line served an agricultural district, and they naturally expected bad seasons occasionally, at longer or shorter intervals. There was, therefore, no need to be despondent regarding the present unfortunate state of affairs. If the shareholders looked back for the last nine or ten years they would find that the line had returned to them something like 3½ per cent. in the shape of dividend, and this should give them hope and confidence in regard to the future. The company's prosperity was to a certain extent dependent on the seasons, but the results hitherto had been satisfactory, with the exception of one year, in which no dividend was paid. As the land under cultivation increased in area, the company's undertaking was bound to be favourably affected. Asia Minor in the past had been the granary of Europe, it

was a wonderfully fertile country, and there still remained large fertile tracts of territory to be cultivated. Therefore they had reason to hope that year by year the line would show increased profits. As a large shareholder, and as one having business relations with Smyrna, he had full confidence in the future of the railway.

The CHAIRMAN thanked Mr. La Fontaine for his cheering remarks, which, he pointed out, confirmed the views which he had ventured to place before the meeting.

The resolution was then put to the vote and carried unanimously.

### ROTHER VALLEY (LIGHT) RAILWAY.

The second ordinary general meeting was held on Wednesday, at Cannon-street Hotel, E.C.; Sir MYLES FENTON presiding.

The CHAIRMAN, in moving the adoption of the report and accounts, said—I have now to submit to you the statement of accounts for the half-year ended July 31st last. You will see that the first statement—namely, the statement of capital authorised and created—remains the same. Statement No. 2, giving the stock and share capital created, is also practically the same. As to the next statement—the receipts and expenditure on capital account—you will see the amount expended to January 31st is 27,517*l.* The sum expended since that time has been 7*l.*, leaving practically the same amount as was spent in the previous half-year. The expenditure arises in this way: we paid under the contract with the London and Scottish Contract Corporation a sum which covered the cost of the land, the cost of obtaining the Act, the cost of promotion, and the interest during construction, which, with other items, makes a total of 27,517*l.* Statement No. 5 gives the details of the capital expenditure for the half-year. The small amounts which have been paid have been general charges amounting to 36*l.*, the auditors' fees 21*l.*, and the interest on paid-up capital and on calls paid in advance (from date of receipt), 506*l.* You will see that that sum was to be paid by the contractors, and it is proposed that dividend warrants representing that amount shall be issued to the shareholders in the course of a few days. The further expenditure on capital account remains practically the same, as also does the expenditure on capital powers and other assets available. I was in hopes, when I had the pleasure of presiding at the last half-yearly meeting, that we should have made very great progress with regard to the purchase of the land, and that we should practically by this time have got possession of the whole of it; but I regret to say that we have met with so much opposition on the part of the landowners, who we expected rather to aid us than to frustrate our endeavours in making a railway through their property, thereby enhancing the value of their estates. We had such very large claims made for compensation that we had to refer them to an arbitrator, instead of being able to deal reasonably with these gentlemen. The consequence is that the purchase of the land has been considerably delayed. I may state that we are practically in possession of the land for one-half of the railway; but with regard to the other half we are still in treaty, and we hope, now that the arbitrators are fixed and the umpires appointed, that we shall be able to bring to an end these very unsatisfactory and exaggerated claims which have been made against us. Of course, the amount which is payable for the land is included in the 27,517*l.* paid to the London and Scottish Contract Corporation, and the corporation is naturally doing everything it can to conclude all these outstanding arrangements with the landowners for the purchase of their property. I will give you one or two instances of these exaggerated claims, without giving you the names of the persons referred to. The owners of some land, at present 6 miles from a station, and who will have a station constructed on their property which will enormously increase their estate, demanded a sum of 1,079*l.* for about 4 acres of land which was valued by our surveyor at about 200*l.* They were awarded 475*l.*, as against their claim of 1,079*l.* In another case a landowner whose estate was 9 miles from a railway station, and who will now have a station within ½ mile—and in this case the route of the line was actually fixed by the owner himself, so that everything possible was done to meet his wishes—claimed 1,070*l.*, and he was awarded 526*l.* In this case 6 acres were taken. I give these as examples of the serious claims which have been made against us. As I said before, one would have thought that those gentlemen would have hailed the construction of this railway with the greatest pleasure, because when it is completed all their properties will be greatly enhanced in value, and they will have facilities of communication by railway which they do not now possess. However we must look these facts in the face, and deal with them in the best way we can under the circumstances. I am happy to say that the earthworks are actually in progress, and that a great part of the railway has been fenced out. The rails and sleepers are ordered and are on the way, and the plan of the rolling stock designed and in preparation, and we hope very soon that we shall have them in course of construction. With regard to the opening of the railway I do not like to prophesy; but you may rely upon it that the directors and the Contract Corporation, who are most interested in getting the line opened early, will do everything that can be done to expedite its construction. The Contract Corporation is naturally very anxious to complete it as soon as possible, because it is liable to pay interest upon the capital until the railway is opened. I am happy to say that there are no works likely to create any engineering difficulties. The whole work is very simple and easy, and we have an excellent engineer in Mr. Stevens, who has constructed railways through countries of a similar character. The directors place great reliance upon him, and you may rest assured that we shall all do our best to complete the line and make it a success.

Sir ROGER GOLDWORTHY seconded the motion.

Mr. FOSTER said he had come from the neighbourhood where the railway was to run purposely to attend the meeting. It occurred to him and most of the principal residents in the neighbourhood that the line they were constructing was ending almost in a desert, where there were no inhabitants, and he urged the directors that it should be extended to Tenterden, or even to Ashford or Rye, or, at all events, some other place to connect the proposed railway with the South Eastern. The proposed line was of no use to commercial men; but there was no doubt that commercial men would use it if it were connected with a main line. In his opinion, they would not get any return for their money unless they went to a town. He therefore hoped the line would be extended to Ashford, or even to Rye. The whole of the country that the proposed line would traverse was fertile and productive, and he believed that a great deal of traffic in fruit and farm produce would be carried over the line if it were extended to a town.

The CHAIRMAN, in reply, said that he quite agreed with Mr. Foster that it would be very much better for the railway to run into the heart of Tenterden, but at present their capital powers would not admit of their doing so. There were many places of greater population than Tenterden that had no station within a mile and a half, and their station would be nearer to them. He granted that it would be much better to go to Tenterden, but that would considerably increase their capital expenditure, and they must take the present enterprise as it stood. The line, as authorised by Parliament, only enabled them to go some distance from Tenterden; but the directors felt that it would be extremely desirable if they could extend their operations to join the South Eastern at Robertsbridge in order to get access to Hastings. At the present moment they had enough on their hands, but as they progressed, and saw their way to the completion of the existing undertaking, the directors would consider the matter. He might say that the board had already been considering how they could properly extend the railway, and the proprietors might feel perfectly certain that when the proper time came the directors would lay before them a scheme which he hoped would be profitable, and which he was quite sure would greatly add to the value of their present undertaking.

The resolution was put to the meeting and carried unanimously.

### METROPOLITAN DISTRICT RAILWAY.

An extraordinary general meeting of the shareholders of this company was held on Thursday at the Westminster Palace Hotel for the purpose of authorising the exercise of the powers conferred by section 3 of the Whitechapel and Bow Railway Act, 1898, for the creation and issue of the capital authorised by the same Act, and to sanction and approve an agreement made between the Whitechapel and Bow Railway Company and the Metropolitan District Railway Company, and the London Tilbury and Southend Railway Company; Mr. J. S. FORBES presided.

The CHAIRMAN stated that their meeting that day was important, but still it was really merely to ratify by a formal act what they had already committed themselves to in connection with the Whitechapel and Bow Railway. The intention was to connect the District Railway with the Tilbury Railway. The proposed line was of a nature which admitted of its being constructed at a price relatively very low to that of other metropolitan railways. It was 2 miles 5 chains long, and it could be made for about 40 per cent. of the cost of their own City extensions to Whitechapel and Aldgate. If those extensions had been made at anything like the price at which the projected line could be constructed they would have been a great adjunct to the proprietors' dividends instead of being a drag on the company. In regard to the Whitechapel and Bow Railway, they were only liable for half the risk with the Tilbury Company, and they expected that the completion of the proposed line would greatly strengthen the District Company, both financially and politically in its relations with other companies. The theory of the matter was that the new line would belong to an independent company, whereas the fact was that the Tilbury and the District companies would take it over as part of their two systems in order to get rid of the complications and disadvantages of allowing other persons really to spend their money. The District Company might subscribe for half of the debentures or debenture stock of the company not exceeding in the whole 220,000*l.*, and they might guarantee or join with the Tilbury Company in guaranteeing to pay a rate of interest not exceeding 4 per cent. per annum on any part of that stock. The authorised capital was 666,000*l.*, and both the District and the Tilbury companies might provide half of that capital. What the shareholders would be asked to do that day would be to subscribe to half of the ordinary and half of the debenture capital. The position of the two companies was different. The Tilbury Company was relatively a rich company, and instead of there being a joint guarantee upon which the share capital was to be raised, the Tilbury Company thought it would be more in their interest to subscribe their half—330,000*l.*—in cash. The District Company were pursuing in this matter the policy which they adopted in connection with their western extensions from Ealing to Harrow and beyond, by postponing for a time the burden, which, if it came upon their backs immediately on the opening of the new railway, would probably be detrimental to the interests of the company. They found people in that case ready to take, with a guarantee, a very small proportion of interest for the first year, a larger proportion for the second year, and in the third and following years a permanent sum, and they stood the racket upon the ultimate profit on the value of the stock of covering any deficiency in interest in the first and second years. The fact was that the District Company wanted, so to speak, a couple of years to enable them to develop the traffic sufficiently to meet the interest. What, therefore, they pro-

posed to do was to raise—as their Act empowered them—their part of the subscription to the Whitechapel and Bow Company's capital by the issue of a separate guaranteed stock with a perpetual dividend attached thereto. The interest on this stock they proposed should not exceed 2 per cent. per annum for the first year, or 3 per cent. per annum for the second year, while for the third and succeeding years the interest would not exceed 4 per cent. This guaranteed stock they would offer to their proprietors first, as they believed that it would be a very good investment. That was the substantial part of the first resolution which would be submitted to them. It was merely putting into operation the clauses of an Act of Parliament, which they had already agreed to, in order that the projected undertaking might be proceeded with. To come to another part of the business, they were to take the railway over bodily and work it. This meant that the District Company and the Tilbury Company between them must man, stock, and work the new line, and this involved an agreement—first, between the two companies and the owning company that they would do so, and then as between the District Company and the Tilbury Company with regard to the conditions on which they would do so. The arrangement was a very simple one as a rule. The working company took the whole of the receipts, out of which they paid the working expenses, and they manned and used the line as part of their own system, each company having equal rights over it. The proposed railway was likely to be of great public convenience, and it would probably quickly develop a new traffic on both the Tilbury and District companies' systems. A separate resolution dealing with the proposed agreement would be submitted to them. It was dated the 12th inst., and was between the Whitechapel and Bow, the District, and the Tilbury companies. Another matter which he would have to bring before them was in a Bill of their own. It was a very important matter, and was daily assuming greater importance. He referred to the question of electric traction. During the last two months the weather had been extraordinarily fine and very hot, and the Welsh coal strike had prevented them from obtaining the best class of fuel. These circumstances together had combined to punish their traffic severely, as the tunnels had been abnormally disagreeable of late. The object of electric traction was to get rid of all these disadvantages; and what was important and patent before had only been emphasised by the experience of the past two months. In fact, it looked very much as if the salvation of the District Company and of the Metropolitan Company, so far as the latter's metropolitan lines were concerned, depended on their substituting electricity for steam on their lines under London. This they had the power to do, and the resolution which would be submitted to them on this subject was as follows:—"That the company work the traffic on their existing railways, or any part thereof, by means of electrical power for such period or periods, in such manner and generally, as the directors may from time to time think desirable." The directors had been subjected to some criticism in the press for having dealt with this question as a somewhat exceptional one. Of course, one knew now a great deal about electrical railways and electrical traction, and the matter was very simple where the railways were constructed primarily for electric traction. That, however, was not the case with their line or with the Metropolitan Railway, and problems had to be considered which required careful deliberation. The directors therefore came to the conclusion that before committing the two companies to the enormous expenditure which would be necessary they would consult two of the greatest authorities—Sir Wolfe Barry, the eminent engineer, and Mr. Preece, the electrician to the Post-office—as to how the problems which they would have to meet were to be dealt with. When they received a report from those gentlemen, and were satisfied that the expenditure could be entered upon with a reasonable probability of success, they thought it would be quite soon enough to come to the proprietors and ask them for the capital. They estimated that they themselves would have to expend 500,000*l.* in applying electric traction on their line from Earl's-court, while the Metropolitan Company would have to expend a great deal more, because they had a much longer line.

Lord GORT seconded the motions, which were agreed to unanimously.

The meeting was formally adjourned for a fortnight, to enable the Tilbury Company to have the agreement signed.

### HULL AND BARNLEY RAILWAY.

An extraordinary general meeting was held yesterday, at Winchester-house, for the purpose of authorising the creation and issue of 450,000*l.* additional capital. Mr. JOHN FISHER presided.

The CHAIRMAN, in submitting the resolution, said the dock extension continued in progress, and would be ready before the proposed extension line could be completed; and he was satisfied that, when finished, the traffic would not only fully pay the interest on the capital expended, but also contribute considerably to the earnings of the main line. The conversion of the existing 4 per cent. preference stock would not entail any additional annual cost of the undertaking, and would enable them to issue the 3½ per cent. stock as a first and new preference stock. The 4 per cent. stock was issued as a terminable stock, and, no doubt, the holders of it would avail themselves of the conversion and take up the amount they were entitled to, according to their holding, in the new stock. The new capital was required for additional works, new sidings, additional rolling stock, and other purposes, as it was proposed to provide accommodation for cattle similar to that available at Deptford and Birkenhead. The chairman passed on to refer at length to a circular which had been issued by the Deuby Main Colliery Company, and to defend Mr. J. S. Forbes (who had not yet arrived) against what he characterised as the "violent attack" which had been made upon that gentleman, who was not, he asserted, the "arrogant director" he was

stated to be. He urged that the agitation was not to the interest of the shareholders, and expressed his opinion that the secret and explanation of the action of colliery companies was the fear of competition. In favour of the adverse action of the Denaby Company proxies had been received representing 4,397 votes, representing 142,821*l.*; while in favour of the company the proxies represented 21,453 votes, and a money value of 405,165*l.* In addition, the Town Clerk of Hull held 1,056 votes, representing 100,000*l.* of stock.

Mr. W. TROTTER seconded the resolution.

Mr. H. HICKMAN moved an amendment to the effect that no further capital should be issued except it be applied for supplementing the dock and shipping facilities at Hull.

Mr. NICHOLAS seconded the amendment, and both speakers complained of the detention of ships at Hull, urging that it was in the way of providing dock accommodation, and not in the matter of additional railway facilities that any further expenditure was required.

In reply to a question,

The CHAIRMAN said that not one penny piece of the proposed new issue had been underwritten. It would be offered to the shareholders at par, though he could not say as yet in what proportion.

Mr. J. S. FORBES, having characterised certain statements that had been made concerning himself as "wild" and "absolutely untrue,"

The resolution for the proposed increase of capital was carried, the amendment receiving only four supporters.

## Directors' Reports.

### BAHIA AND SAN FRANCISCO RAILWAY.

The capital account to June 30th, 1898, shows a total expenditure of 1,799,532*l.*, whilst the receipts have been 1,800,000*l.* Credit balance 468*l.*

The accounts for the half-year ending June 30th, 1898, of the *Bahia and San Francisco Railway* show the revenue to have been as follows:—Brazilian Government, 47,250*l.*; traffic receipts, 79,174*l.* (against 62,716*l.*); transfer fees, 30*l.*; interest, 858*l.*; stores exchange, 5,330*l.*; total, 132,642*l.* The total expenses in Bahia and London amounted to 98,279*l.* (against 78,662*l.*), and the net revenue to 34,363*l.* The directors recommend the payment of a dividend at the rate of 4 per cent. per annum, or 8s. per share (less income-tax), which will necessitate taking 1,637*l.* from working capital account. Working capital account will then stand at 94,513*l.* Length of line, 77½ miles.

The accounts of the *Timbo Branch Undertaking* for the half-year ending June 30th, 1898, show a gross revenue (including 6,708*l.* received in respect of the Government guarantee) of 18,793*l.* (against 17,755*l.*), and an expenditure in Bahia and London of 14,743*l.* (against 13,705*l.*), leaving a balance of 4,050*l.* Out of this it is proposed to distribute a dividend for the half-year ending June 30th last at the rate of 3 per cent. per annum. The report states:—

"The receipts of the company in Brazil for the half-year amount to 79,174*l.*, and the expenditure, after making provision for rolling stock, to 96,704*l.*, but it must not be forgotten that in both cases the milreis is reckoned at its par value—viz., 27d. (as is invariably stated at the head of the balance-sheet)—whereas its actual value averaged about 6½d.

"The board have to announce that for the first time in the history of the company the Brazilian Government has found itself unable to pay in gold, and has decided to fund the guaranteed interest for three years, from July 1st, 1898, to June 30th, 1901. While fully recognising the troubles, both political and financial, that have befallen Brazil in recent times, the directors cannot but express their extreme regret that such a measure has become necessary.

"A copy of the funding scheme was posted to every shareholder on July 9th. As therein provided, the guaranteed interest for the half-year ending June 30th was paid to the company in funding bonds of the nominal value of 63,000*l.* instead of in gold as heretofore.

"The board, acting under the powers conferred on them by the statutes and articles of association of the company, and after obtaining legal advice, decided to sell the bonds, and distribute a dividend in cash. A similar method of paying dividends will probably be adopted throughout the period the funding scheme is to remain in force.

"The price realised by the sale of the whole of the bonds representing the guaranteed interest was 75 per cent., or 47,250*l.*, and this amount has been placed to the credit of revenue account.

"The funding scheme of the United States of Brazil applies also to the Timbo branch undertaking, and bonds of the nominal value of 8,944*l.*, representing the guaranteed interest, having been paid to the company, were disposed of at 75 per cent., realising 6,708*l.*, which sum has been placed to the credit of revenue account."

Mr. Richard Tiplady, the superintendent, in his report, dated August 30th, 1898, says:—

"The result of the half-year's working shows that there has been an increase in the receipts in comparison with corresponding period of last year of 16,457*l.* The expenditure, owing to the continued depreciation of the currency, has been increased, the excess being 21,061*l.* over the same period of last year. The increase in earnings is mainly due to the increase in the tariffs, still there is no doubt that the volume of traffic is increasing, and that with a more settled state of the country, coupled with fairly regular seasons, a more voluminous and stable traffic will be assured. The number of passengers carried is less by 10,532 than in the same period last year, parcels and horses are slightly lower, but all other items show an increase both in tonnage and receipts; the most marked being merchandise to and from the interior, sugar and tobacco. There is

a total increase over the corresponding half-year of 9,368 tons. The traffic over the prolongation line has improved slightly, a large quantity of salt is being carried up this half-year. The want of rain in the interior has been a great drawback to planting. The expenditure continues unavoidably heavy, in maintenance this is due to renewals in permanent way of new rails and fastenings, and extensive repairs to buildings and workshops. The mileage and tonnage of goods carried has been higher this half-year than ever before, and the cost of material and wages in all departments has increased, and will continue to do so, so long as exchange keeps low. The rainy season this year has been very light, and unless this is remedied by rains in the early part of the next half-year, it will adversely affect the crops and raise the price of food and cereals. The new sugar factories at K 18 and K 74 have been at work this half-year, and it is hoped will lead to an increase in sugar planting in these districts."

Referring to the Timbo Branch, Mr. Tiplady says:—"The receipts this half-year amounted to 11,602*l.*, against 7,850*l.* of the same period in last year, showing an increase of 3,752*l.* The expenditure also shows an increase of 1,038*l.* The receipts show an increase of nearly 48 per cent. over the corresponding half of last year; although this is due in a measure to the raising of the rates, there has been an increase in the tonnage carried in all items of traffic, except passengers and merchandise from the interior, but although passengers show a decrease of 960 for the whole half-year, the last four months of it show a gradual increase, which is still rising. Tobacco has more than doubled, and sugar shows an increase of 23½ per cent. The total tonnage carried this six months is 6,373, against 5,103 last year, an increase of 1,270 tons; this includes parcels. The increase in expenditure has been in all items except carriages and waggons, and is due to the constant rise in wages and materials. Great hopes were entertained of an abundant harvest next season, but the want of rain has greatly retarded the development of the crops, and should no rain fall early next half-year, the amount of produce expected will be much reduced."

### CENTRAL URUGUAY RAILWAY OF MONTEVIDEO.

#### CAPITAL.

The expenditure on capital account to June 30th, 1898, amounted to 2,797,897*l.*, while the receipts had been 287,600*l.*—viz., ordinary stock, 2,000,000*l.*; permanent 6 per cent. debenture stock, 826,600*l.* The expenditure in the past year amounted to 24,578*l.*, of which 16,831*l.* was provided by premiums on sale of stock.

#### REVENUE.

The accounts for the year ending June 30th show receipts to have been as follows:—

	1896-7.	1897-8.
Passenger traffic.....	£79,623	£86,762
Goods .....	160,879	179,899
Animals .....	16,440	23,287
Luggage and parcels .....	7,754	7,840
Telegraph, sundries, and wharfage.....	6,956	7,161

Total receipts ..... £271,652 ... £304,949

The expenditure on revenue account during the same period was as follows:—

	1896-7.	1897-8.
Maintenance of permanent way, works, &c.....	£31,225	£31,839
Locomotive expenses.....	48,913	49,578
Telegraphs and sundries.....	1,426	1,588
Carriage and truck repairs.....	11,091	12,101
Traffic expenses .....	45,351	45,300
General charges .....	18,550	18,438

Total expenditure ..... £156,556 ... £158,844

The net revenue account may be summarised as follows:—

	1896-7.	1897-8.
Net earnings .....	£115,096	£146,105
Balance from last year (less income-tax) .....	2,582	2,929
Interest on Government bonds, &c.....	6,140	8,221
Other credits .....	466	1,813

Total ..... £124,284 ... £159,068

	1896-7.	1897-8.
North Eastern Railway rent .....	£43,266	£44,008
Interest on debenture stock .....	44,960	48,477
Sundry debits .....	5,129	1,932
Dividend on ordinary shares .....	*30,000	†60,000
Balance to next year.....	2,929	4,656

Total ..... £124,284 ... £159,068

\* At the rate of 1½ per cent. † At the rate of 3 per cent., of which 1½ per cent. was paid in April last.

#### TRAFFIC, &c.

The number of passengers carried was 613,147 (against 589,656); the quantity of freight carried, 348,596 tons (against 325,621 tons); the number of animals carried, 267,045 (against 211,189); the train miles run, 494,997 (against 484,949); the length of line open, 271 miles (in each year); the receipts per train mile 12s. 4d. (against 11s. 2½d.); the expenses per train mile, 6s. 5d. (against 6s. 5½d.); the ratio of working expenses, 52.09 per cent. (against 57.63 per cent.).

The increase in gross receipts for the year was 33,297*l.*, equal to 12.26 per cent., and in the net profits 31,009*l.*, or 26.94 per cent. The receipts from passenger traffic show an increase of 8.96 per cent., from luggage and parcels an increase of 1.11 per cent., from goods traffic an increase of 11.82 per cent., and from animals an increase of 41.65 per cent. The directors' report states:—

"The results obtained from the working of the line during the past

year, although a considerable improvement on those of the year preceding; have hardly come up to the anticipations of the board as foreshadowed in the interim report of April last. The general manager has, however, fully detailed the causes of this in the foregoing extract from his report, and from this it is gratifying to note that the shortcomings of the past year represent traffic which has been merely kept back, owing to the exceptionally wet weather which has prevailed during the last few months, and as this is now coming forward current revenue will receive the full benefit of it.

"The expenditure on capital account has been kept within the smallest possible limits, and the board have only authorised such outlay as was absolutely necessary for the efficient working of the line. The principal outlay has been in connection with the new Central Station at Monte Video, the necessity for which was fully explained when reporting for the year ended June 30th, 1897, and the account for which is now closed. To provide the necessary funds for these new works, the board have availed themselves of the borrowing powers as laid down in the articles of association, and have sold during the year 50,000*l.* of the 6 per cent. permanent debenture stock of the company, which has realised the sum of 66,831*l.*

"The results obtained from the working of the extension companies compare favourably with the corresponding period, although in this case also, owing to the generally unsettled state of the country, coupled with the bad condition of the camp roads consequent upon the heavy rains, traffic has been kept back which it is, however, hoped will benefit the current year. The gross receipts of the Northern Extension show an increase of 654*l.*, or 2.06 per cent., while those of the Eastern Extension show an increase of 10,052*l.*, or 18.18 per cent. The proportion of the gross receipts retained under the respective working agreements amounts to 53,974*l.*, being 4,661*l.* less than the actual cost of working; against this, however, 57 per cent. of the total passenger traffic and 96 per cent. of the goods and animal traffic collected by these extensions have passed over the company's main line.

#### GENERAL.

"The board have pleasure in reporting the prompt payment of interest on the internal bonds held by the company, as also the claims for guarantee for the year ended June 30th, 1898. They have also received during the year \$179,978 in bonds of the Extraordinary Loan of 1897, in liquidation of 30,635*l.* of the freight accounts owing by the Government. These bonds were taken at 80 per cent. of their nominal value, and bear interest at the rate of 6 per cent., and the net revenue of the company has therefore benefited from this source to the extent of 2,082*l.* For the purpose of accurately setting out the assets in the balance-sheet as at June 30th last, these bonds have been valued at 62 per cent., resulting in a depreciation of 6,893*l.*, which, pending their realisation, has been temporarily written off against the general reserve fund of the company."

Mr. Henderson, the general manager, in his report dated August 4th, 1898, writes:—

"The foregoing statements afford, I think, a striking illustration of the vast recuperative powers of the country, for not only must it be borne in mind that for the first three months of the year the general traffic movement was paralysed by the revolutionary movement, and our receipts were during that period lower than they have been for years, but the exceptionally wet weather which has prevailed this winter has seriously interfered with all branches of traffic by effectually cutting off all communication between our stations and the camp towns for protracted periods. Large tracts of land were broken up for maize, and the harvest was exceptionally abundant, but no new grain whatever has as yet been carried, the continual rains preventing its being dried sufficiently for exportation, and, therefore, the entire crop will be dealt with in the current year. It has already been observed that the yield of wheat was very superior to that of the previous season, and the fine quality of the grain and the high prices obtained for same has encouraged the agriculturists to still further extend the areas to be placed under wheat this year, but I am sorry to say the weather has been very unfavourable for the preparation of the land, so much so that there is still a great deal of grain to be sown, and it is feared that much that has been sown will become sodden and will not germinate. With respect to the wool prospect, it is reported that mortality among the flocks has been somewhat abnormal this winter owing to the heavy and continual rain and the prevalence of scab, but I trust the clip will not be inferior to that of last year, as I observe from reliable statistics I have in my possession that from the year 1891 the shipment of wool from the port of Montevideo has increased by a gradual and steady development 50 per cent. An encouraging feature in the cattle traffic, as shown by the preceding statement, is the fact that whereas we have carried 40,612 animals more this year than last, the Montevidean 'saladeros' returns for the corresponding period show a decrease of 47,473 animals killed, which proves conclusively that a much greater proportion of the animals have been brought in by rail this year than last; the exact proportion of animals carried to the number slaughtered in the 'saladeros' being 55.53 per cent. in 1897-8, and 32.24 in 1896-7. The circumstances of traffic during the year have been very unfavourable to economical working by reason of its fluctuating character, for whereas in the month of August the gross receipts were lower than they have been for the past eight years, they rose in January to a higher figure than they have ever before reached. Under such variable conditions of traffic as these it has been exceedingly difficult to keep working expenses in line with receipts, and I may safely say that since my connection with the company I have never experienced such a trying time in this respect. Taking into consideration these facts, the results shown cannot, I think, be considered unsatisfactory."

#### BUENOS AYRES WESTERN RAILWAY.

##### CAPITAL.

The expenditure on capital account to June 30th, 1898, amounted to 11,052,233*l.*; whilst the receipts to same date had been 11,130,645*l.*—viz., ordinary 10*l.* shares, 3,500,000*l.*; deferred 10*l.* shares, 1,000,000*l.*; 5 per cent. preference 10*l.* shares, 300,000*l.*; Government bonds, 2,127,280*l.*; debenture stock, 4 per cent., 4,203,365*l.*

##### REVENUE.

The accounts for the year ending June 30th show the receipts to have been as follows:—

	1896-7.	1897-8.
Passenger traffic.....	£174,832 ...	£185,063
Goods traffic.....	446,776 ...	353,161
Animals.....	26,356 ...	27,270
Luggage and parcels.....	31,349 ...	34,378
Miscellaneous.....	7,058 ...	8,571
Total receipts.....	£686,371 ...	£708,443
Total expenditure.....	330,597 ...	327,588

Net earnings.....£255,774 .. £280,855

Adding annuities\* receivable 148,186*l.*, balance brought forward 7,219*l.*, and sundry credits 11,826*l.*, the total net revenue was 448,086*l.*, which is appropriated as follows:—Interest on Government bonds, 118,621*l.*; interest on 4 per cent. debenture stock, 166,905*l.*; dividend on preference shares, 15,000*l.*; sundries, 2,881*l.*; interim dividend of 3*s.* 6*d.* per share on ordinary shares, 61,250*l.*; balance, 83,430*l.* Out of this the board recommend the payment of a dividend of 4*s.* 6*d.* per share on the ordinary shares (making, with the interim dividend, 4 per cent. for the year), carrying forward a balance of 4,680*l.* For the previous year a dividend of 12*s.* per share, or 6 per cent., was paid on the ordinary shares, and a dividend of 3*s.* per share, or 1½ per cent., on the deferred shares.

##### TRAFFIC, &c.

The number of passengers carried during the year was 3,481,564 (against 3,348,389 in the previous year); the gross weight carried, 778,995 tons (against 1,165,004 tons); the train miles run, 1,410,694 (against 1,464,266); the receipts per train mile, 8*s.* 7½*d.* (against 9*s.* 4½*d.*); the expenses per train mile, 4*s.* 7½*d.* (against 4*s.* 6*d.*); the net profit per train mile, 3*s.* 11½*d.* (against 4*s.* 10½*d.*); average receipts per passenger, 1*s.* 0½*d.* (against 1*s.* 0½*d.*); average receipt per ton of goods, 9*s.* 0½*d.* (against 7*s.* 8½*d.*); length of line worked, 602 miles (against 495 miles); ratio of working expenses to receipts, 53.84 per cent. (against 48.16 per cent.).

The decrease in the gross receipts of the line for the year is 77,928*l.*, equal to 11.35 per cent., and in the net profit 74,919*l.*, or 21.06 per cent. The number of miles open for traffic is 602, being an increase of 107 miles. The receipts from passenger traffic show an increase of 10,231*l.*, or 5.85 per cent.; from luggage and parcels, 3,030*l.*, or 9.67 per cent.; from animals, of 914*l.*, equal to 3.47 per cent.; and from goods traffic a decrease of 93,615*l.*, or 20.95 per cent. The report states:—

"The past year has, in many respects, been for this company one of the most unsatisfactory since its formation, and a combination of adverse circumstances has caused the large reduction in gross receipts, and consequent increase in the per-centage of working expenses, which are shown on the preceding pages. The wheat harvest, which promised to be exceptionally heavy, was to a great extent ruined by unusually late frosts in November last. The locusts destroyed at least two-thirds of the 1897 maize crop, and owing to the wet weather, the movement of the 1898 crop began much later than usual, with the result that we have this year only carried 153,703 tons as against 449,549 tons in 1896-7, representing a loss in receipts of 84,923*l.* Since the 1st July, the new maize has begun to come forward, and although in the outside districts considerable damage was done by the locusts, it is estimated that there are between 300,000 and 350,000 tons to carry.

##### GENERAL.

"The provincial Government made an offer, which was accepted, to liquidate their indebtedness to the company for traffic accounts by the delivery of bonds bearing 4 per cent. interest, and an amortisation of 10 per cent. annually, and every effort is being made to obtain a settlement with the National Government for similar outstanding accounts.

"The board have to announce with deep regret the death in London on May 6th last, of Mr. J. F. Roberts, the able and much valued general manager of the railway. Mr. Roberts was appointed on the formation of the company in 1890, and his connection with the railway was marked by the most untiring energy and unsparring devotion to its interests. The board have now appointed Mr. David Simson as general manager in succession to the late Mr. Roberts. Mr. Simson has been for two years the resident engineer of the railway, and for nearly twelve months has been acting manager, and the board have the greatest confidence that in appointing him to the responsible position of general manager they are placing the company's interests in safe hands.

"Certain proprietors having expressed a wish that this company shall adopt the provisions of the Forged Transfers Acts, 1891 and 1892, a resolution will be submitted for consideration at the forthcoming general meeting."

Mr. David Simson, the general manager, reports under date August 16th, 1898, as follows:—

"The results for the past financial year are very bad; this is principally due to the destruction of some two-thirds of the maize crop of 1897 by the

\* From Central Argentine, 90,787*l.*; from Buenos Ayres Great Southern, 46,832*l.*; from Buenos Ayres and Ensenada Port, 10,917*l.*—total, 148,186*l.*

locusts, 296,000 tons less having been transported than during the previous year. The maize crop of 1898, though very good in our principal districts, was not in a condition to transport until after the end of June, owing to the almost continuous wet weather that prevailed in May and June. The wheat crop, from which great things were expected on account of the very large area sown down, also proved a partial failure, a great part of it being killed by the frosts in the early part of November last; but the farmers were compensated to some extent by the considerable rise in prices coincident with the outbreak of the Spanish-American war. As large an area as last year is reported to have been sown under wheat, and so far it gives all the indications of being a very good crop, though it is too early to predict with any certainty. The only traffic we have had which shows a considerable increase is wool, due principally to the opening of the Toay extension, and, though we are sure to lose some of this traffic owing to the Great Southern Company's extension to Bolivar, I trust that the natural increase on other parts of the line will compensate for the loss. The new Southern extensions to Navarro, 25 de Mayo and Bolivar are, as was to be expected, taking away part of our maize traffic from the Chivilcoy district, though it is too early yet to estimate the extent of the loss, and the tendency to sow more cereals on the western part of our system may make it good before long. The Toay extension has been open to public service since October 1st, 1897, and the results have been as good as could be expected for the first year, and there is no doubt that when the camps are more refined in the district which it serves, it will prove a valuable feeder to our main line. The Villegas extension has continued to show satisfactory results. The camps are in very good condition after so much rain, but sheep and lambs have suffered to some extent by the continued wet weather. The locusts, though apparently as numerous as in 1896-7, fortunately avoided our principal maize district and confined their ravages to the part of our system lying outside of a radius of about 160 miles round Buenos Ayres, but where they did appear they did great damage, and the yield from these districts is probably not more than 20 per cent. of what it would have been had it escaped the locusts. There are rumours of locusts having appeared in the Northern Provinces, and the Central Locust Commission are making every arrangement to combat them energetically should they appear in our districts. The plans are ready and contracts are being let for the new corn exchange at the Once, and it should be opened to the public in the course of the current financial year."

#### CENTRAL URUGUAY EASTERN EXTENSION RAILWAY.

The revenue account for the year ending June 30th, 1898, shows gross receipts amounting to 65,340*l.* (against 55,288*l.* for the previous year), expenses amounting to 34,519*l.* (against 30,864*l.*), and a net profit of 30,821*l.* (against 24,424*l.*). Adding the balance from previous account, 2,127*l.*, and Government guarantee, 20,246*l.*, the total net revenue was 53,194*l.*, which was appropriated as follows:—Interim dividend, 10,500*l.*; debenture interest, 12,250*l.*; balance dividend of 4*s.* per share (making 7*s.* 6*d.* per share, or 3½ per cent. for the year), 14,000*l.*; income-tax, &c., 919*l.*; balance carried to next account, 2,856*l.*. The report states:—

The capital expenditure up to June 30th, 1898, was 1,170,262*l.*, and the receipts on capital account amounted to 1,163,400*l.*—viz., shares, 700,000*l.*; 5 per cent. debenture stock, 463,400*l.*. The expenditure during the past year amounted to 3,825*l.*

"The board have satisfaction in stating that, although the first three months suffered heavily from the effects of the revolution, the results of working during the past financial year show an improvement in almost every branch of traffic as compared with those of the previous year, and they trust that the development of the various sources of traffic will continue to manifest itself during the current year."

#### CENTRAL URUGUAY NORTHERN EXTENSION RAILWAY.

The capital expenditure up to June 30th, 1898, was 1,637,804*l.*, and the receipts 1,627,150*l.*—viz., shares, 1,000,000*l.*; 5 per cent. debenture stock, 627,150*l.*. The expenditure during the past year amounted to 56*l.*

The gross revenue for the year ending June 30th, 1898, amounted to 32,425*l.* (against 31,772*l.* for the previous year), the expenses to 19,455*l.* (against 19,063*l.*), and the net receipts to 12,970*l.* (against 12,709*l.*). Adding the balance from previous year, 3,584*l.*, and Government guarantee, 51,332*l.*, the total net revenue was 67,886*l.*, which was disposed of as follows:—Interim dividend, 17,500*l.*; debenture stock interest, 31,358*l.*; final dividend of 3*s.* per share (making 6*s.* 6*d.* per share, or 3½ per cent. for the year), 15,000*l.*; income-tax, &c., 1,140*l.*; interest, 530*l.*; balance to be carried to next account, 2,358*l.*. The report states:—

"The board are glad to state that notwithstanding the serious interruption to traffic during the first three months of the past financial year, owing to the damage sustained by the line during the revolution, as mentioned by the general manager in his report, the results of working are slightly better than those of the previous year, although until the Custom-house at Santa Ana is an established fact, the full benefits which would accrue to the company from the interchange of traffic with Brazil will not be fully realised."

#### CITY OF BUENOS AYRES TRAMWAYS.

The report states that the gross receipts (in sterling) of the company for the half-year ending June 30th, 1898 have been 124,128*l.* (against 105,825*l.*); and the working expenses 88,633*l.* (against 73,945*l.*); leaving a profit of 35,495*l.* (against 31,880*l.*). To the balance of 35,495*l.*, must be

added the amount brought forward, 2,614*l.*, and interest 537*l.*, making 38,646*l.*, less debenture interest, 3,480*l.*; leaving 35,166*l.*. The directors recommend that a dividend, free of income-tax, of 3*s.* 9*d.* be paid upon the fully paid-up shares, and of 2*s.* 3*d.* upon the shares of the eighth issue, which will together absorb the sum of 23,287*l.*, and that the further sum of 7,500*l.* be placed to the reserve fund. This will leave the sum of 4,378*l.* to be carried forward.

The local committee, under date June 30th, 1898, report as follows:—"The working of the half-year may be considered satisfactory. There has been some commercial depression and stagnation, but in spite of this the gross volume of our traffic has again increased. The gold premium has been at a lower figure than we have had for some years past; and it is in a great measure due to this favourable circumstance that we are able to show a larger balance of profit in sterling. As mentioned in our report for 1897, we have thought it of the greatest importance to give as good and ample a car service as possible. We have endeavoured to give every facility for travel and have increased the car mileage in order to provide for the prospective increase in passengers. The premium on gold has averaged 164·66 per cent., against 191·38 per cent. for the year 1897."

#### AUSTRALIAN HARD WOODS.

*A propos* of the recent opening, by the Premier of Western Australia, of one of the new mills of the Jarrah Timber and Wood Paving Corporation, Limited, a Perth (Western Australia) correspondent writes:—"It is often asked by the public and the municipal authorities of our cities, 'How shall we pave our streets?' and reference is made to the drawbacks attending the use of various materials, amongst them wood. Quite recently a London daily newspaper wrote 'wood is quiet; but wood decays, and is the happy home of microbes,' and you close with the assurance that 'a big fortune awaits the lucky inventor of a good material for road-making.' It may interest your readers to know that if the wood which has for so long been used in paving the streets of London does decay and harbour noxious germs, Jarrah does neither. The absorbent character of the spruce pine from the Baltic seaboard, or, indeed, of the entire *conifer genera* is not cured by creosote, nor can its life as paving be much prolonged by pickling. But I wish to assure engineers that Jarrah does not quickly wear out, and that if microbes intruded themselves into a chink or cranny of a Jarrah block they would never emerge alive or trouble humanity further. We have extending from this city roads which have been laid with Jarrah blocks for from forty to fifty years, Albany and Wanneroo roads particularly. This work was done in a very crude fashion, trees being sawn into short lengths of about 10in. and the round blocks laid on the ground, interstices being filled with earth. No contractor was employed, the engineers being wardens and the workmen 'lifers' who were unwilling immigrants. Yet these blocks have borne heavy traffic in parts for four or five decades. I have repeatedly examined loose blocks and found the edges alone worn by being tilted from their rough bed. I have also examined a section of a small Jarrah tree that has been buried for over three hundred years, part of a bridge pile which had been in use for forty-three years, and the cleat of a coffin which had been buried (and in use) for twenty-eight years. Every specimen was quite sound and without trace of ravages by insects. On the question of microbes, it may not be generally known that the peculiar chemical property of Jarrah which resists the encroachments of all insect life is really an acrid poison, and that no germ can live where the termite dies. Baron Sir F. von Muller, late Government Botanist of Victoria, wrote:—"The Jarrah is neither attacked by the borings of the *chelura teredo* nor termite." Jarrah is, therefore, par excellence the proper material for paving streets, being noiseless, durable, sanitary, and, I may say, cheap; for Jarrah at 66*s.* per load, f.o.b. Bunbury, is much cheaper than soft wood, considering the immense difference in their longevity."

The agitation for the purchase of the Japanese trunk railways by the State continues.

#### STRONGEST LIFE OFFICE IN THE WORLD.

#### THE EQUITABLE LIFE ASSURANCE SOCIETY of the UNITED STATES.

ASSETS .....	£49,349,231 Sterling.
SURPLUS .....	10,508,985 Sterling.
